Ministry of Forests

APPENDIX A.2

REQUIREMENTS CONCERNING APPLICATION AND REPORTING OF PESTICIDES

To control pests, seedlings grown under the terms of this Agreement shall be treated only with Approved Pesticides. These Approved Pesticides are registered for use under the federal Pest Control Products Act and Regulations; and are approved for use in British Columbia under the provisions of the Integrated Pest Management Act (2004) and Regulation by the Integrated Pest Management Program of the Ministry of Environment.

For a summary of BC pesticide regulations, please see the Ministry of Environment web site at:
<http://www.env.gov.bc.ca/epd/ipmp/index.htm>.

Pesticide applications on seedlings must follow manufacturer's label recommendations. Provincial legislation regulates worker safety, drinking water safety, the sale, use and disposal of pesticides in BC. All pesticide activity needs to comply with provincial, municipal and federal legislation as described in the current issue of the annual Nursery and Landscape Pest Management and Production Guide for Commercial Contractors, published by the Ministry of Agriculture and Lands. This is also on the Ministry website at: http://www.al.gov.bc.ca/pesticides/i_4.htm and subject to safety provisions of the Workers' Compensation Act and provincial occupational health regulations.

When shipping seedlings treated with pesticides, the Contractor shall include a notification with the stock shipping invoice, one copy of which goes with the shipment to the Province. The notification will state the following or similar effective wording:

"All seedlings in this shipment have been treated with pesticides to reduce the possibilities of mould. While oral and dermal toxicities are very low, common-sense precautions should be taken. Gloves should be worn where possible, and hands should be washed after contact and before smoking or eating. There should be no problem if these basic steps are taken."

If seedlings have been treated with pesticides within one month prior to shipping, the Contractor shall mark the shipping cartons with an exterior notification indicating latest date of application, rate of application and name of pesticide used.

ANNEX "C" GREEN PROCUREMENT

Greening Government Operations

Canada is committed to greening its supply chain. In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to acquire products and services that have a lower impact on the environment than those traditionally acquired. Environmentally preferable goods and services are those that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose. Environmental performance considerations include, among other things: the reduction of greenhouse gas emissions and air contaminants; improved energy and water efficiency; reduced waste and support reuse and recycling; the use of renewable resources; reduced hazardous waste; and reduced toxic and hazardous substances.

Furthermore, in June 2008 the *Federal Sustainable Development Act* was passed to provide the legal framework for developing and implementing a Federal Sustainable Development Strategy that will make environmental decision making more transparent and accountable to Parliament. A Federal Sustainable Development Strategy is developed every three years that includes shrinking the environmental footprint of government operations. Green procurement is a key enabler of these objectives.

In accordance with the *Policy on Green Procurement* and Federal Sustainable Development Strategy, for this requirement:

General

- a) The Contractor is encouraged to offer or suggest green solutions whenever possible.
- b) The Contractor should consider the complete lifecycle of products and services provided to favor strategies, processes, and materials that assure sustainable development.
- c) The Contractor should use green meetings practices when conducting workshops and meetings. Guides to green meeting practices are available through [Environment Canada](#) and the [United Nations Environment Program](#).

Travel

- a) The Contractor is encouraged to work off-site to reduce commuting requirements where security requirements allow.
