4. CLARIFICATIONS TO QUESTIONS SUBMITTED

Q1: What is the existing video management system (VMS) being utilized? Brand and version?

A1: The camera system is the Avigilon version 5.0 hooked up to 7 coaxial cable with ip switches. We would like the replacement camera to be on Cat5e. There is a separate switch for the cameras.

Q2: During the walk thru, I did not see any spare capacity in the existing CCTV system, to add any cameras. Is connecting to the existing VMS, part of this scope? If so, are we to provide camera licenses? Does DFO (Department of Fisheries and Oceans) have the configuration users name and login information?

A2: We are not adding any new cameras this is a replacement. We have a security contractor who has the codes and license. The project authority would coordinate.

Q3: For the card system, can you confirm that it is KANTEC, what version they are running and how many doors they currently have connected to their system? Does DFO has the configuration users name and logon password, to be able to add doors to the existing system?

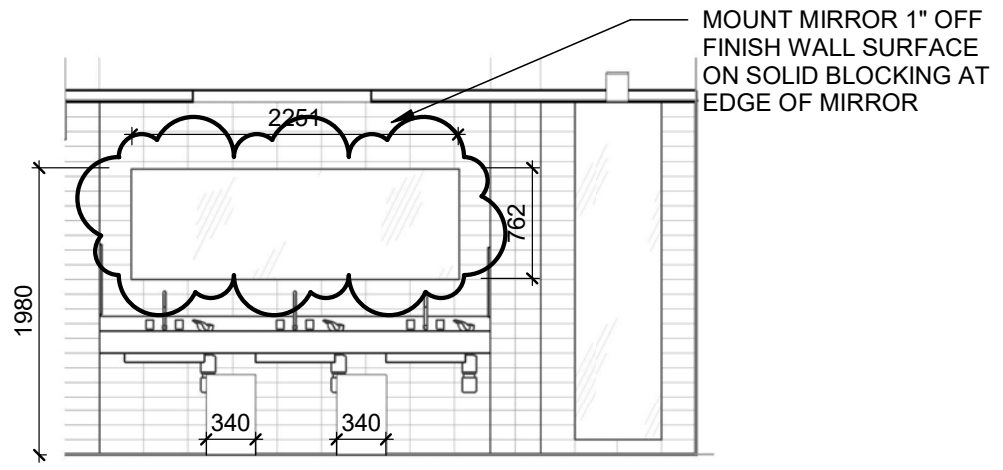

A3: KANTEC is the access control system and expanders can be used to monitor more zone. Our security contract has login and administrator log in rights will be their responsibility coordinated through the project authority.
