

QUESTIONS AND ANSWERS

- Q29. Specification 31 11 00 clause 3.4 provides procedures for temporary removal of trees. However the drawings do not indicate which trees are to be temporarily removed and which are to be replaced. Drawings S-04 through S-06 note to "Remove Trees (As Required)". Can the owner please provide clarification on which trees would be "temporarily removed" and which ones would be simply removed if required? If to be determined in the field by the Department Representative, can the Owner then please provide an estimate on size and number of trees that will require temporary removal for the purpose of bidding?
- A29 There are no trees to be temporarily removed. Refer to specification 31 11 00 Section 1.2.
- Q30. Drawing S-01 Note 8 refers to vibration monitoring of existing facilities as specified in the contract document. Can the Owner please provide direction on where in the specifications the vibration monitoring requirements can be found, as well as on which facilities will require monitoring?
- A30 There is no vibration monitoring required for this project.
- Q31. The specifications currently call for divers to be on site at all times directing the placement of materials for the Rock Berms. Would the owner accept as an alternative the use of GPS systems on the placing equipment and a dive inspection of each layer? If divers are required to be in water guiding placement it will significantly impact production and cost.
- A31. This question has been previously answered. Refer to ATT 17 Questions 11 and 12.
