Question 42:

Ref: Page 31, Part 11: Vehicle Requirements Clause 11.2 section 5.

How many locations have a height restriction? If not all locations have a height restriction, would it be acceptable to utilize an alternate vehicle (eg. a "mid roof" van) for locations that do not have a restriction? The listed restrictions of height and separation create safety issues which must be addressed during the upfit process. Are there currently any pre-approved vehicle model exceptions to meet these restrictions?

Answer 42:

It is impossible to know how many locations have height restrictions as not all locations are known and arrangements made with the different clients are changed due to constructions issues, renovations or simply operational needs. This is the reason why the type of vehicle chosen by CBSA are ones that have standard heights to limit the restraints.

Question 43:

Ref: Page 31, Part 11: Vehicle Requirements Clause 11.2 section 4b.

For the split vehicle compartment, is there an example (ie. photograph) that could be shared in order for us to understand the current setup? The "client" transfer units (which meet the specifications) are fabricated to be installed into van variants that will not meet the height requirements.
