**F5211-180405**  
**Civil / Marine Engineering Services / Services de génie civil / maritime**

**Question #1**

Regarding Fisheries and Oceans Canada's Request for Standing Offer for Civil/Marine Engineering Services, Solicitation No. F5211-180405, please confirm if DFO would like a separate proposals (Section I: Technical Bid, Section II: Financial Bid, and Section III: Certifications) for Western Area and Eastern Area regions or one submission that covers both regions. For example, does DFO want separate personnel teams for East and West (a total 8 CVs) or combined team for East and West (a total 4 CVs). Likewise, does DFO want separate projects for East and West (a total 16 projects) or combined project experience for East and West (a total 8 projects).

**Response #1**

They can submit separate proposals for the east and west if their project teams are different (presumably the projects would need to be different as well because they would need to be projects that were completed by the project team). If the project team is the same for both areas than one proposal is fine.
