

ADDENDUM N° 1

Date: October 23, 2018

Title: Façade lighting – Canadian Embassy – Paris, France

Solicitation Number: 19-145757

The following supplements and/or supersedes the request for proposals documents issued on October 11, 2018. This addendum forms part of the contract documents and is to be read, interpreted, and coordinated with all other parts. Any change to the cost of the work as a result of this addendum is to be included in the price proposal. The following revisions supersede the information contained in the original Request for Proposals Package for the above-mentioned project to the extent referenced and shall become part thereof.

ADDENDUM

1. REQUEST FOR PROPOSAL, A7. PROPOSAL DELIVERY

REPLACE:

"In order for the proposal to be valid, it must be received no later than 14h00 local time (Ottawa, Ontario) on **October 25, 2018** referred to herein as the "Closing Date".

WITH:

In order for the proposal to be valid, it must be received no later than 14h00 local time (Ottawa, Ontario) on **November 2, 2018** referred to herein as the "Closing Date".

2. REQUEST FOR PROPOSAL, SR4. TECHNICAL PROPOSAL (70 POINTS)

REPLACE:

"Technical Proposals must not exceed forty (40) single-sided pages of 8½ "x 11" paper, minimum type face 10 pts. All material shall be printed on 8.5" x 11" or A4 paper. Material exceeding the thirty (30) page maximum will NOT be considered."

WITH:

"Technical Proposals must not exceed forty (40) single-sided pages of 8½ "x 11" paper, minimum type face 10 pts. All material shall be printed on 8.5" x 11" or A4 paper. Material exceeding the forty (40) page maximum will NOT be considered."

3. ATTACHMENT: 09-ambassedeCanada_dpgf.pdf

Replace the entirety of the document with the new version attached herein.

QUESTIONS & ANSWERS

- Q1.** In clause SR4 TECHNICAL PROPOSAL of the Request for Proposal document, it states that technical proposals must not exceed forty (40) single sided pages but later in the same section, it is indicated as 30 pages. What is the maximum number of pages permitted?

- A1.** The maximum number of pages is forty (40) single-sided pages. See Addendum #1, item 2 found above.

- Q2.** The dates indicated in the provisional schedule dated September 2018 are no longer valid. What are the new dates?

- A2.** The duration of the work phases remains unchanged. The dates shall be readjusted by the same number of days from the date of contract award.

- Q3.** The specification does not mention any particular mark or reference for the DMX controllers. Should a particular make or reference be priced for?

- A3.** Proponents are required to inquire with the lighting supplier as to the type of controller to be installed, which must be fully compatible with the lighting fixtures specified within the document "CCPT".

- Q4.** A lighting scenario is not specified in the document "CCPT". Should one be taken into account?

- A4.** Not in principle, except for exceptional events. Lighting scenarios shall be decided during the mock-up and final adjustments of the installation. The installation of a RJ45 socket outlet should be allowed for to control the scenario.

- Q5.** Can the control boxes be installed on the exterior?

- A5.** No, the control boxes cannot be installed on the exterior.

- Q6.** Does a drawing exist that shows the locations of the cable outlets on the road side façade?

- A6.** The document entitled "Carnet de détail – Éclairage extérieur façade rue" has been attached herein: Attachment: 130-130-PHI-DOE-19A-DET-TN-0092.pdf

Note 1: The external PLEXO boxes indicated have NOT been installed (see Question & Answer – item 5 found above).

Note 2: In the event that certain cable outlets do not already exist, a provisional quantity of ten (10) outlets to be created shall be priced. The pricing document "DPGF" has been revised and is attached herein (see Addendum #1 – item 3 found above).

Note 3: In addition, the proponents shall price for the repair and making good of the cable outlets (both existing and created), including: cutting back of the conduit to the face of the façade; sealing between the conduit and the stonework; sealing off the cables in the conduit; and repair and make good the stonework with a suitable coloured render. The pricing document "DPGF" has been revised and is attached herein (see Addendum #1 – item 3 found above).

- Q7.** During the proponents' conference of October 18, 2018, no cable outlets were seen to level 2 within courtyard 1 (courtyard with the large glass roof). Should cable outlets and the associated works be allowed for to level 2?
- A7.** No. No cable outlets are permitted at level 2 within courtyard 1. Cabling must come from level 1.

The proponents shall price for two (2) metal cable trunking, stone coloured finish, from level 1 to level 2 for the light fittings to level 2. The location of the trunking shall be positioned with agreement with the Project Manager and the Department Representative. The pricing document "DPGF" has been revised and is attached herein (see Addendum #1 – item 3 found above).

- Q8.** Would you confirm the scope of works required for the mock-up required by clause 2.1.4 of the specification document "CCTP"
- A8.** The following document entitled "Ambassade du Canada - Essais d'éclairage" has been attached herein to clarify the scope. Attachment: Ambassade du Canada Essais éclairage.pdf

- Q9.** Where are the master controllers located?
- A9.** They are located in the IT rack within the guard bubble in the ground floor. This room was visited by all proponents during the proponents' conference of October 18, 2018. These controllers are equally subject to verification as required by clause 2.3.3.2 "Boites d'alimentation et de controle" of the specification document "CTTP".

Note 1: The proponents shall also price for the installation of a RJ45 socket outlet including necessary connections enabling the control of a lighting scenario by a computer. The pricing document "DPGF" has been revised and is attached herein (see Addendum #1 – item 3 found above).

- Q10.** Who will make the formed holes within the metal bulkhead underneath the glazed canopy in courtyard 3 as this is not mentioned with the specification?

- A10.** The proponents shall price for this scope. The pricing document “DPGF” has been revised and is attached herein (see Addendum #1 – item 3 found above).
-

All other conditions and requirements remain unchanged

Date / Observations / Signature

Date / Observations / Signature

The figure consists of four side-by-side panels, each representing a different sample (A, B, C, and D) from a sequencing run. Each panel displays a series of vertical chromatogram traces, where each trace corresponds to a different sequencing cycle. The traces are composed of short horizontal segments, with the length of each segment indicating the signal intensity at that specific position. In panel A, there is a prominent, sharp peak in the middle of the sequence. Panel B shows a similar pattern but with more noise. Panel C has a very faint signal across most of the sequence. Panel D exhibits a distinct, repetitive pattern of signal intensities.

AMBASSADE DU CANADA ESSAIS D' ECLAIRAGE

19 OCTOBRE 2018

LES ESSAIS

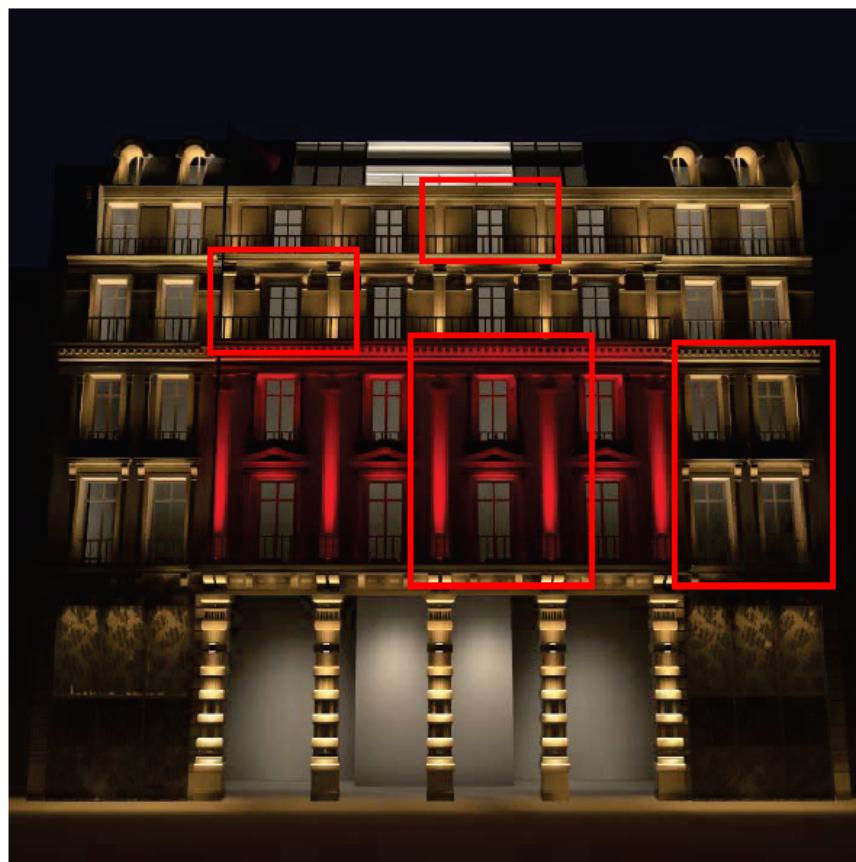

Compte tenu de la spécificité du bâtiment, l'Ambassade du Canada, deux essais / présentation d'éclairage en nocturne sur la façade principale sont inclus dans la présente prestation, pour valider les effets produits par les appareils d'éclairage, et la température de couleur des sources et ce, par le Maître d'Ouvrage.

Sont donc à prendre en compte pour l'établissement de l'offre, en référence au C.C.T.G. :

- Le dossier d'autorisation d'installation temporaire de la nacelle auprès de la Mairie de Paris
- La location et la mise à disposition in situ de la nacelle
- Et toutes les prestations de personnes pour la réalisation de la prestation en nocturne, tenant compte des spécificités d'accès de l'Ambassade du Canada.

Il est acté que le prêt des appareils d'éclairage pour les essais sera effectué par les fabricants référencés.

Pour permettre une aperçu de la globalité des effets, les zones de présentation des effets d'éclairage pour la façade principale seront les suivantes.

Pour les autres cours intérieures l'appareil d'éclairage spécifié en état de fonctionnement avec une rallonge électrique d'alimentation suffisamment longue pour atteindre l'emplacement prévu sur les plans est demandé.
