ARTIFICIAL INTELLIGENCE

Invitation to Qualify

This Amendment 013 is issued to provide the following information and answer questions from the industry:

- 1) At Annex 3, before the preamble titled Artificial Intelligence, insert the following:

These Terms and Conditions are part of the general framework that will be used in managing this ITQ. Depending on the product, service or solution (or combination thereof), Canada may select at the subsequent requirements stage, the appropriate clauses from this Annex in function of the need.

All provisions related to provision of source code in this Annex will be adjusted at the subsequent requirements stage, according to the type of product or good acquired, and according to GC policies and directives.

Question 086:

With regards to article 2.6 of Annex 2 of the ITQ, suppliers are being asked to agree to the contract terms and conditions of Annex 3 without having knowledge of the scope of services, objectives or deliverables in the future subsequent solicitations.

Answer 086:

The terms and conditions listed in Annex 3 are part of the general framework for which the appropriate clauses will be applied in subsequent RFP's in accordance with the requisite service, objective or deliverable. All pre-qualified suppliers under the source list will be provided the opportunity to review all aspects of future subsequent requirements prior to committing to providing a response. Suppliers are encouraged to review the additional text in amendment 013 of this solicitation and Annex 4 of the ITQ document for additional information and the solicitation process details.

ARTIFICIAL INTELLIGENCE

Invitation to Qualify

Question 087:

With regards to article 1.1 of Annex 2 of the ITQ, the license grant requires suppliers provide Canada the right to reverse engineer, decompile, decode, decrypt, disassemble, or derive any source code from the Software. Will Canada be seeking delivery of the source code for all future subsequent solicitations?

Answer 087:

This clause will only be used if applicable to the requirement. The source code requirements will be identified in each subsequent solicitation, as indicated in article 1.1 of Annex 3. Suppliers will have the opportunity to provide their feedback at that time.

All other terms and conditions remain the same.
