Solicitation Amendment 002

This amendment is raised to publish the following questions and responses:

QUESTION

Attachment 1, Canada Occupational Health and Safety Regulation

Inspection and Testing

4.5 *Every elevating device and every safety device attached thereto shall be inspected and tested by a qualified person to determine that the prescribed standards are met*

- (a) before the elevating device and the safety device attached thereto are placed in service;*
- (b) after an alteration to the elevating device or a safety device attached thereto; and*
- (c) once every 12 months.*

1. Performing physical safety tests (outlined in the CSA B44 Code) is required to be completed & recorded by a site's maintenance elevator contractor. Duplicating these safety tests were not part of the scope of work for previous PWGSC safety inspection mandates. We would review maintenance logs and confirm completion of the required safety tests or identify overdue items. Please confirm if performing physical safety tests is expected to be completed as part of this current RFP's scope.
2. If performing physical safety tests is part of the RFP scope of work, assistance from a crew provided by the elevator contractor would be required. Please clarify if our pricing is to include payment for maintenance contractor attendance or if the cost is to be arranged by the Owner.

RESPONSE

PWGSC procurement policy regards contracting of combined inspection and maintenance as a potential conflict of interest.

As in previous years, this contract covers only the safety inspection aspect of the regulations.

Maintenance and repairs are contracted separately.

This request covers only the electrical aspects of the safety inspection.

Pricing for this contract does not include any provision for the attendance other contractors at the time of inspection.
