Amendment 001 has been raised to make the following changes:

On page 19 of 27, under **ANNEX “A”, STATEMENT OF WORK**

**DELETE:** In its entirety

**INSERT:**

## **1.0 General**

The Department of National Defence (DND) at 4 Wing, Cold Lake, Alberta has the requirement for the supply of all labour, materials, equipment and supervision to perform for snow clearing service over the winter months. The expected period for requests will be between October and April of each year.

One TA Contract will be awarded against this requirement for a duration of three year with two option periods of one year.

## **2.0 Requirement**

The Contractor is responsible for the clearing, hauling and disposing of snow and ice from all parking areas and access roads located outside the General Restricted Area (GRA) at 4 Wing, Cold Lake, Alberta. DND will provide a map to the awarded Contractor. Any area not indicated on the map will not be a requirement for the Contractor.

DND will provide the Contractor notification of changing weather and service requirements.

Snow may be piled or blown in areas that do not present unreasonable hazards to buildings and motorists but may also require hauling and disposal of snow in instances where such hazards cannot be avoided. The removal and disposal of the snow will be as directed by the Project Authority or their representative to snow dump areas on the base.

The parking lots and access areas must be cleared to a reasonable depth that maximizes traction for vehicle and pedestrian traffic, while minimizing damage to surfaces. Sand or other non-slip products will be applied by DND.

### **2.1 Hours of Operation**

The Contractor must be able to receive and respond to calls for service during all hours (normal and/or after business hours) by providing telephone numbers for regular services calls and after hours calls.

The work should be performed during outside regular business hours (23:00 to 6:00) or weekends to ensure all area are accessible before daily work commences.

#### **2.1.1 Response Time**

The Contractor must reply to an authorized request for service within 4 hours. The work must be performed within a time frame mutually agreed to by both parties and as stated on the TA form.

In case of an urgent snow removal, the Contractor must reply to an authorized request within 2 hours and work will commence immediately thereafter.

## **2.2 Equipment**

It is recommended that the Contractor, at minimum, have the following equipment and must possess the capability to handle the anticipated quantities of snow expected in the area.

- Front End Loader (with appropriate attachments);
- Tandem Dump Truck (10-12 cubic yards);
- Skid Steer, 4x4 (with appropriate attachments); and
- Road Grader, 6x4 wheeled.

The Contractor must supply all operators, equipment, repairs, servicing, maintenance, fuel and fluids of all equipment as applicable and ensure that all equipment is operated in a safe manner with public safety in mind only licenced and certified equipment operators.

### 2.3 Location

The Contractor must provide service to the primary areas listed in the table below in the order of the priority of service, with 1 being the greatest priority on an "as required" basis. Service will be provided to the secondary areas in the table below on an "as required" basis, and only after all primary service requirements have been cleared of snow and ice.

All areas include all parking areas and compounds and some access roads, associated with the following buildings.

Building Number	Building Name	Service Requirement	Order of Priority of Service
785 & 865*	Military Police Station & I Dent Parking Lot	Primary	1
648	Medley Terminal Parking Lot	Primary	2
