By Road, from the OTTAWA International Airport

1. From the airport take the AIRPORT PARKWAY to RIVERSIDE DR EAST
2. Follow RIVERSIDE DR EAST to HIGHWAY 417 EAST
3. Take HIGHWAY 417 EAST, past the ST-LAURENT BLVD exit, where HIGHWAY 417 splits, continue LEFT on HIGHWAY 174 (ROCKLAND)
4. Exit HIGHWAY 174 on BLAIR RD NORTH
5. Proceed on BLAIR RD NORTH, cross OGILVIE RD, and continue on to the traffic lights at the intersection of BLAIR and MONTREAL RD
6. Turn left onto MONTREAL RD and take the first immediate right onto the ramp leading down to the traffic circle. Stop at Building M-1 on the north side of the traffic circle. Ask the commissionaires in M-1 for directions to the NRC building, institute or staff member you seek.

By Road, from MONTRÉAL

1. Take MÉTROPOLITAIN 40 WEST and follow signs for OTTAWA and HIGHWAY 417 WEST
2. Follow 417 WEST to reach OTTAWA
3. Exit at HIGHWAY 174 EAST (ROCKLAND) when entering OTTAWA
4. Follow 174 EAST and exit at BLAIR RD NORTH (first exit after entering 174 EAST)
5. Follow BLAIR RD NORTH, cross OGILVIE RD, and continue on to the traffic lights at the intersection of BLAIR and MONTREAL RD
6. Turn left onto MONTREAL RD and take the first immediate right onto the ramp leading down to the traffic circle. Stop at Building M-1 on the north side of the traffic circle. Ask the commissionaires in M-1 for directions to the NRC building, institute or staff member you seek.

Formulaire de proposition – Marché de construction

Titre du projet M38- Phase 3 Rénovation

No. de Proposition: 18-22095

1.2 **Nom d'entreprise et adresse du soumissionnaire**

Nom _____

Adresse _____

Personne-ressource (nom en lettres moulées) _____

Téléphone (_____) _____ Téléc. (_____) _____

1.3 **Offre de prix**

Le soumissionnaire soussigné offre par les présentes à Sa Majesté du chef du Canada (ci-après appelée « Sa Majesté »), représentée par le Conseil national de recherches du Canada, d'exécuter et d'achever les travaux se rapportant au projet désigné ci-haut, conformément aux plans et devis et aux autres documents d'appel d'offres, à l'endroit et de la manière énoncés aux présentes, pour un montant total de _____, _____ \$ (montant numéraire uniquement) **dans la monnaie ayant cours légal au Canada (TPS/TVH en sus).**

Le montant de l'offre comprend toutes les taxes fédérales, provinciales et municipales applicables^(*). Cependant, si l'une des taxes imposées en vertu de la *Loi sur l'accise*, de la *Loi sur la taxe d'accise*, de la *Loi sur la sécurité de la vieillesse*, de la *Loi sur les douanes*, du tarif des douanes ou de toute autre loi provinciale imposant une taxe de vente au détail sur les achats de biens meubles incorporés à un bien immobilier est modifiée et que cette modification survient :

- .1 après que la présente proposition ait été mise à la poste ou livrée; ou
 - .2 si la présente proposition est révisée, après la dernière révision;
- le montant de l'offre de prix devra être diminué ou augmenté de la manière prévue à l'article CG22 des Conditions générales du contrat.

National Research Council Canada	Conseil national de recherches Canada
Administrative Services & Property management Branch (ASPM)	Direction des services administratifs et de la gestion de l'immobilier (SAGI)

1.3.1 Offre de prix (suite)

(*) Dans le cadre de la présente proposition, la taxe sur les produits et services (TPS) n'est pas une taxe applicable.

Dans la province de Québec, la taxe de vente du Québec (TVQ) ne doit pas être ajoutée au montant de l'offre, le gouvernement fédéral étant exempté de la TVQ. Les soumissionnaires doivent s'adresser directement au ministère du Revenu provincial pour récupérer toute taxe qu'ils sont appelés à verser sur des biens et services acquis dans le cadre de l'exécution du présent marché. Les soumissionnaires devraient cependant inclure dans le montant de leur offre de prix tout montant de TVQ pour lequel ils ne peuvent exiger un remboursement de taxe sur les intrants.

1.4 Acceptation et conclusion du marché

Le soumissionnaire soussigné s'engage, dans les quatorze (14) jours suivant l'avis confirmant l'acceptation de la présente proposition, à signer un contrat portant sur l'exécution des travaux, à condition que l'avis d'acceptation du Ministère parvienne au soumissionnaire dans un délai de trente (30) jours suivant la date de clôture de l'appel d'offres.

1.5 Délai d'exécution des travaux

Le soumissionnaire soussigné s'engage à achever les travaux dans le délai stipulé au devis, lequel commence à courir à compter de l'avis d'acceptation de la présente proposition.

1.6 Garantie de soumission

Le soumissionnaire soussigné joint à la présente proposition une garantie de soumission, conformément à l'article 5 des Instructions générales à l'intention des soumissionnaires.

Le soumissionnaire soussigné convient que dans l'éventualité où il refuse de conclure un contrat qu'il est tenu de conclure en vertu des présentes, tout dépôt de garantie fourni à titre de garantie de soumission sera retenu pour débit. Cependant, le Ministre peut, au nom de l'intérêt public, renoncer au droit de Sa Majesté de retenir pour débit le dépôt de garantie.

Le soumissionnaire soussigné convient que si la garantie de soumission n'est pas conforme aux modalités de l'article 5 des Instructions générales à l'intention des soumissionnaires, sa proposition peut être jugée irrecevable.

National Research Council Canada	Conseil national de recherches Canada
-------------------------------------	--

Administrative Services & Property management Branch (ASPM)	Direction des services administratifs et de la gestion de l'immobilier (SAGI)
---	---

1.7 Garantie d'exécution

Dans les quatorze (14) jours suivant l'avis d'acceptation de sa proposition, le soumissionnaire soussigné doit fournir une garantie d'exécution contractuelle, conformément à la section F, Conditions contractuelles, du contrat.

Le soumissionnaire soussigné convient que la garantie d'exécution visée par les présentes, si elle est fournie sous forme de lettre de change, sera versée au Trésor public du Canada.

1.8 Annexes

L'annexe n° n/a fait partie intégrante de la présente proposition.

1.9 Addenda

Le montant total de l'offre de prix porte sur l'exécution des travaux définis dans les addenda suivants :

N°	DATE	N°	DATE

(Les soumissionnaires doivent indiquer le numéro et la date des addenda.)

M38- Phase 3 rénovation

Le Conseil national de recherches du Canada, 1200 chemin Montréal Ottawa, ON, a une demande pour un projet qui comprend :

Phase 3 rénovation. Nouvelle éclairage, nouveau système électrique et mécanique.

1. GENERAL :

Adresser à le représentant ministériel (ou à son représentant) ou à l'Agent des contrats toute question portant sur tout aspect du projet. Ils sont les seuls autorisés à fournir des réponses.

On ne tiendra nullement compte des informations obtenues d'une personne autre que le représentant ministériel (ou son représentant) ou l'Agent des contrats et ce, autant à l'octroi du contrat qu'au cours des travaux.

Les entreprises souhaitant présenter des soumissions pour ce projet devraient obtenir les documents relatifs aux appels d'offres en s'adressant au fournisseur de service Achatsetventes.gc.ca AGAO. Si des addenda sont ajoutés, ils seront distribués par Achatsetventes.gc.ca AGAO. Les entreprises qui choisissent de préparer leurs soumissions en se fondant sur des documents d'appel d'offres provenant d'autres sources le font à leurs propres risques et seront tenues d'informer le responsable de l'appel d'offres de leur intention de soumissionner. Les trousse d'appel d'offres ne pourront être diffusées le jour même de la clôture des soumissions.

2. VISITE DU SITE OBLIGATOIRE

Les soumissionnaires ont l'obligation de participer à une des visites du site à la date et à l'heure prévues. Les soumissionnaires qui ont l'intention de présenter une soumission doivent envoyer au moins un représentant à cette visite.

Les visites de chantier se tiendront le 8 janvier et le 11 janvier, 2019 à **9 :00**. Rencontrer Allan Smith à l'édifice M-38, 1200 chemin Montréal Ottawa, ON. Les soumissionnaires qui, pour une raison quelconque, ne peuvent pas participer à la visite à la date et à l'heure prévues ne pourront obtenir un deuxième rendez-vous; leur soumission sera donc considérée comme non conforme. **AUCUNE EXCEPTION NE SERA FAITE.**

Pour prouver qu'ils ont participé à la visite du site, les soumissionnaires ou leurs représentants DOIVENT signer, lors de la visite, le formulaire de participation élaboré par l'autorité contractante. Les soumissionnaires ou leurs représentants ont la responsabilité de vérifier s'ils ont bien signé ce formulaire avant de quitter le site. Les soumissions présentées par des soumissionnaires qui n'ont pas participé à la visite du site ou qui ont oublié de signer le formulaire de participation seront considérées comme non conformes.

3. DATE DE FERMÉTURE :

La date de fermeture est le 4 février, 2019 14 :00

4. RÉSULTATS DE L'APPEL D'OFFRES :

À la fermeture de l'appel d'offres, les résultats de l'appel d'offre seront envoyés par télécopieur à tous les entrepreneurs qui auront soumis un appel d'offre.

5. CRITÈRES DE SÉCURITÉ OBLIGATOIRES POUR LES ENTREPRENEURS

5.1 EXIGENCES OBLIGATOIRES RELATIVES A LA SECURITE

- .1 L'entrepreneur doit détenir en permanence, pendant l'exécution du contrat à commandes, une attestation de vérification d'organisation désignée (VOD) en vigueur, délivrée par la Direction de la sécurité industrielle canadienne (DSIC) de Travaux publics et Services gouvernementaux Canada (TPSGC).
- .2 Les membres du personnel de l'entrepreneur devant avoir accès à des établissements de travail dont l'accès est réglementé doivent TOUS détenir une cote de FIABILITÉ en vigueur, délivrée ou approuvée par la DSIC de TPSGC.
- .3 L'entrepreneur doit respecter les dispositions:
 - a) de la Liste de vérification des exigences relatives à la sécurité et directive de sécurité (s'il y a lieu), reproduite à l'Annexe D;
 - b) du Manuel de la sécurité industrielle (dernière édition)@ <http://ssi-iss.tpsgc-pwgsc.gc.ca/msi-ism/msi-ism-fra.html>

5.2 VÉRIFICATION DE L'ATTESTATION DE SÉCURITÉ À LA CLÔTURE DES SOUMISSIONS

- .1 Le soumissionnaire doit détenir une attestation de vérification d'organisation désignée (VOD) en vigueur, délivrée par la Direction de la sécurité industrielle canadienne (DSIC) de Travaux publics et Services gouvernementaux Canada (TPSGC) **ET DOIT L'INCLURE AVEC LEUR SOUMISSION OU FAIRE SUIVRE DANS LES 48 HEURES SUIVANT LA DATE ET L'HEURE DE CLÔTURE DE L'APPEL D'OFFRE.** Des vérifications seront effectuées par l'intermédiaire de la DSIC pour confirmer l'attestation de sécurité du soumissionnaire. L'omission de se conformer à cette exigence rendra la soumission non conforme et celle-ci sera rejetée.
- .2 L'entrepreneur général doit nommer tous ses sous-traitants dans un délai de 72 heures suivant la clôture des soumissions, et ceux-ci doivent aussi détenir une attestation VOD valide et soumettre les noms, dates de naissance ou numéros de certificats de sécurité de toutes les personnes qui seront affectées au projet.
- .3 Il faut noter que les sous-traitants qui doivent exécuter des tâches pendant l'exécution du contrat subséquent doivent aussi satisfaire aux exigences obligatoires du contrat en matière de sécurité. De plus, aucune personne ne possédant pas le niveau de sécurité exigé ne sera admise sur le site. Le soumissionnaire retenu devra s'assurer que les exigences liées à la sécurité sont satisfaites pendant toute l'exécution du contrat. La Couronne ne sera tenue responsable d'aucun retard ni d'éventuels coûts supplémentaires liés à l'inobservation par l'entrepreneur des exigences en matière de sécurité. L'omission de satisfaire à ces exigences sera suffisante pour résilier le contrat pour cause d'inexécution.
- .4 Pour toute question concernant les exigences liées à la sécurité pendant la période de soumission, les soumissionnaires doivent communiquer avec l'agente de sécurité @ 613-993-8956.

6.0 CSPAA (COMMISSION DE LA SECURITE PROFESSIONNELLE ET DE L'ASSURANCE CONTRE LES ACCIDENTS DU TRAVAIL

.1 Tous les soumissionnaires doivent fournir une attestation de la CSPAAT valide avec leur offre ou avant l'attribution du contrat.

7.0 L'OMBUDSMAN DE L'APPROVISIONNEMENT

.1 Services de règlement des différends

Les parties reconnaissent que l'ombudsman de l'approvisionnement nommé en vertu du paragraphe 22.1(1) de la *Loi sur le ministère des Travaux publics et des Services gouvernementaux* veillera à proposer aux parties concernées un processus de règlement de leur différend, sur demande ou consentement des parties à participer à un tel processus de règlement extrajudiciaire en vue de résoudre un différend entre elles au sujet de l'interprétation ou de l'application d'une modalité du présent contrat, et obtiendra leur consentement à en assumer les coûts. Le Bureau de l'ombudsman de l'approvisionnement peut être joint par téléphone, au 1-866-734-5169 ou par courriel, à l'adresse boa.opo@boa-opo.gc.ca.

.2 Administration du contrat

Les parties reconnaissent que l'ombudsman de l'approvisionnement nommé en vertu du paragraphe 22.1(1) de la *Loi sur le ministère des Travaux publics et des Services gouvernementaux* examinera une plainte déposée par [*le fournisseur ou l'entrepreneur ou le nom de l'entité à qui ce contrat a été attribué*] concernant l'administration du contrat si les exigences du paragraphe 22.2(1) de la *Loi sur le ministère des Travaux publics et des Services gouvernementaux* et les articles 15 et 16 du *Règlement concernant l'ombudsman de l'approvisionnement* ont été respectées, et si l'interprétation et l'application des modalités ainsi que de la portée du contrat ne sont pas contestées. Le Bureau de l'ombudsman de l'approvisionnement peut être joint par téléphone, au 1-866-734-5169 ou par courriel, à l'adresse boa.opo@boa-opo.gc.ca.

.3 Le Bureau de l'ombudsman de l'approvisionnement (BOA) a été mis sur pied par le gouvernement du Canada de manière à offrir aux fournisseurs un moyen indépendant de déposer des plaintes liées à l'attribution de contrats de moins de 25 000 \$ pour des biens et de moins de 100 000 \$ pour des services. Vous pouvez soulever des questions ou des préoccupations concernant une demande de soumissions ou l'attribution du contrat subséquent auprès du BOA par téléphone, au 1-866-734-5169 ou par courriel, à l'adresse boa.opo@boa-opo.gc.ca. Vous pouvez également obtenir de plus amples informations sur les services qu'offre le BOA, en consultant son site Web, à l'adresse www.opo-boa.gc.ca.

Le représentant ministériel responsable ou son représentant: **Allan Smith**
Téléphone: **613 993-4926**

L'autorité contractante : **Alain Leroux** alain.leroux@nrc-cnrc.gc.ca
Téléphone : **613 991-9980**

INSTRUCTIONS AUX SOUMISSIONNAIRES

Article 1 - Réception des soumissions

- 1a) Aucune soumission reçue après le moment fixé pour la clôture des soumissions ne sera acceptée. LES SOUMISSIONS RECUES APRES LE MOMENT FIXÉ NE SONT PAS VALIDES et ne peuvent être prises en considération, peu importe la raison de leur retard.
- 1b) Une lettre ou une télécommunication imprimée envoyée par un soumissionnaire pour signifier un prix ne peut être considérée comme étant une soumission valide à moins qu'une soumission officielle n'ait été reçue sur la formule prescrite à cette fin.
- 1c) Il est loisible aux soumissionnaires de modifier leurs soumissions par lettre ou télécommunication imprimée mais à condition que de telles modifications ne soient pas reçues plus tard qu'au moment prévu pour la clôture des soumissions.
- 1d) Les modifications à la soumission qui sont transmises par télécopieur doivent être signées et doivent permettre d'identifier sans équivoque le soumissionnaire.

Toutes les modifications de ce genre doivent être envoyées à :

Conseil national de recherches Canada
Services d'approvisionnement
Alain Leroux, agent supérieur de contrats
Édifce M-58
Chemin Montréal, Ottawa (Ontario)
K1A OR6

Télécopieur: (613) 991-3297

Article 2 - Formule de soumission et qualifications

- 1) Toutes les soumissions doivent être présentées sur la formule de soumission - construction et être signées en conformité avec les exigences suivantes:
 - a) Société à responsabilité limitée : le nom complet de la société ainsi que le nom et le titre des fondés de signature autorisés doivent être imprimés dans l'espace prévu à cette fin. La signature des fondés de signature et le sceau de la société doivent être apposés.
 - b) Société de personne : le nom de l'entreprise ainsi que le(s) noms du (des) signataire(s) doivent être imprimés dans l'espace prévu. L'un ou plusieurs des associés doivent signer en présence d'un témoin qui, lui aussi, doit apposer sa signature. Un sceau de couleur adhésif doit être apposé en regard de chaque signature.
 - c) Entreprise à propriétaire unique : le nom de l'entreprise et le nom du propriétaire unique doivent être imprimés dans l'espace prévu. Le propriétaire est tenu de signer en présence d'un témoin qui doit lui aussi apposer sa signature. Un sceau de couleur adhésif doit être apposé en regard de chaque signature.
- 2) Toute modification à la partie imprimée de la formule de soumission - construction ou tout défaut de fournir l'information qui y est demandée peut invalider la soumission.

- 3) Toutes les rubriques de la formule de soumission - construction doivent être remplies et les corrections manuscrites ou dactylographiées apportées aux parties ainsi remplies doivent être paraphées par la ou les personnes qui signe(nt) la soumission au nom du soumissionnaire.
- 4) Les soumissions doivent être basées sur les plans, devis et documents de soumission fournis.

Article 3 - Contrat

- 1) L'entrepreneur devra signer un contrat semblable à la formule standard pour contrats de construction à prix fixe dont un exemplaire en blanc est annexé dos à la présente brochure pour information.

Article 4 - Destinataire de la soumission

- 1a) Les soumissions doivent être envoyées sous enveloppe cachetée adressée à l'Agent de contrats, **Conseil national de recherches, Services administratifs et gestion de l'immobilier, édifice M-58, 1200 chemin Montréal, Ottawa, ON. K1A 0R6** Canada, et la mention "Soumission relative à (inscrire le titre de travail apparaissant sur les dessins et le cahier des charges)" ainsi que le nom et l'adresse du soumissionnaire doivent apparaître sur l'enveloppe.
- 1b) Sauf dispositions contraires, les seuls documents à soumettre pour la soumission sont la formule de soumission et la garantie de soumission.

Article 5 - Garantie

- 1a) La garantie de soumission est requise. La garantie doit alors être soumise sous l'une ou l'autre des formes suivantes :
 - i) un chèque certifié payable au Receveur général du Canada et tiré sur un établissement membre de l'Association canadienne des paiements ou un établissement de crédit coopératif local membre d'une société centrale de crédit coopératif elle-même membre de l'Association canadienne des paiements OU
 - ii) des obligations du gouvernement du Canada, ou des obligations avec garantie inconditionnelle par le gouvernement du Canada quant au capital et aux intérêts, OU
 - iii) un cautionnement de soumission.
- 1b) Peu importe la forme de la garantie de soumission, elle ne devrait jamais dépasser la somme de 250 000 \$ calculée à 10% de la première tranche de 250 000 \$ du prix soumissionné, plus 5% de tout montant dépassant 250 000 \$.
- 2a) Une garantie de soumission doit être fournie avec chaque soumission. Elle peut aussi être envoyée séparément à condition qu'elle ne soit pas reçue plus tard qu'au moment prévu pour la clôture des soumissions. On doit fournir l'ORIGINAL de la garantie de soumission. Des garanties transmises par télécopieur ou des photocopies NE SONT PAS acceptées. **DEFAUT DE FOURNIR LA GARANTIE REQUISE RENDRA LA SOUMISSION INVALIDE.**
- 2b) Dans le cas où la soumission n'est pas acceptée, la garantie de soumission fournie en conformité avec l'article 8 sera retournée au soumissionnaire.
- 3a) L'adjudicataire doit fournir une garantie au plus tard 14 jours après réception d'un avis lui signifiant l'acceptation de sa soumission. Il doit fournir L'UN OU L'AUTRE des documents suivants :

- i) Un dépôt de garantie tel que décrit à l'alinéa 1b) ci-dessus ainsi qu'un cautionnement du paiement de la main d'oeuvre et des matériaux s'élevant à 50%, au moins, de la somme payable en vertu du contrat, OU
 - ii) Une garantie d'exécution et un cautionnement du paiement de la main d'oeuvre et des matériaux, chacun s'élevant à 50% du montant payable en vertu du contrat.
- 3b) Au cas où il ne serait pas possible d'obtenir un cautionnement du paiement de la main d'oeuvre et des matériaux, tel que requis aux termes de l'alinéa 3a) ci-dessus, en s'adressant par conséquent à au moins deux compagnies de garantie acceptables, un dépôt de garantie supplémentaire s'élevant à 10% exactement du montant payable en vertu du contrat doit être fourni.
- 3c) Lorsqu'une soumission a été accompagnée d'un dépôt de garantie tel que décrit à l'alinéa 1b) ci-dessus, le montant du dépôt de garantie requis en vertu de l'alinéa 3a) ci-dessus peut être réduit du montant du dépôt de garantie qui accompagnait la soumission.
- 3d) Les obligations doivent être de la forme approuvée et doivent être émises par des compagnies dont les obligations sont acceptées par le gouvernement du Canada. Des modèles de la forme approuvée des garanties à déposer par les soumissionnaires, des garanties d'exécution et des cautionnements du paiement de la main-d'oeuvre et des matériaux ainsi qu'une liste des compagnies de garantie acceptables peuvent être obtenus en s'adressant au Services d'approvisionnement, Conseil national de recherches du Canada, édifice M-22, chemin Montréal, Ottawa (Ontario) K1A 0R6, Canada.

Article 6 - Intérêt payé sur les dépôts de garantie

- 1) Les soumissionnaires sont avertis qu'ils doivent se mettre d'accord personnellement avec leurs banquiers relativement à l'intérêt, le cas échéant, payé sur le montant du chèque certifié accompagnant leur soumission. Le Conseil ne paiera pas d'intérêt sur ledit chèque en attendant l'adjudication du contrat et ne sera pas non plus responsable du paiement des intérêts en vertu de toute disposition prise par les soumissionnaires.

Article 7 - Taxe sur les ventes

- 1) Le montant de la soumission doit comprendre toutes les taxes prélevées en vertu de la Loi sur l'accise, de la Loi sur la taxe d'accise, de la Loi sur la sécurité de la vieillesse, de la Loi sur les douanes ou du Tarif des douanes en vigueur ou applicables à ce moment.
- 2) Au Québec, la taxe provinciale ne doit pas être incluse au montant soumissionné, car le Gouvernement Fédéral en est exclu. Les soumissionnaires devront faire les démarches nécessaires auprès du Ministère du Revenu provincial pour recouvrir toute taxe payée sur les biens et services dans le cadre de ce contrat.

Cependant, les soumissionnaires devraient inclure dans leur prix, les taxes provinciales pour lesquelles les remboursements ne s'appliquent pas.

Article 8 - Examen de l'emplacement

- 1) Tous les soumissionnaires examineront l'emplacement des travaux proposés avant d'envoyer leur soumission, étudieront minutieusement ledit emplacement et obtiendront tous les renseignements nécessaires à la bonne exécution du contrat. Aucune réclamation postérieure ne sera permise ou admise relativement à tout travail ou matériaux pouvant être requis et

nécessaires à la bonne exécution du présent contrat à l'exception des dispositions de l'article CG 35 des Conditions générales du cahier des charges général.

Article 9 - Erreurs, omissions, etc.

- 1a) Les soumissionnaires relevant des erreurs ou des omissions dans les dessins, le cahier des charges ou d'autres documents, ou ayant des doutes quant au sens ou à l'intention de n'importe quelle partie de ces derniers, devront en avvertir immédiatement l'ingénieur qui fera parvenir des directives ou des explications écrites à tous les soumissionnaires.
- 1b) Ni l'ingénieur, ni le Conseil ne seront responsables des directives orales.
- 1c) Les additions ou les corrections effectuées au cours de la présentation des soumissions seront incluses dans la soumission. Cependant, le contrat remplace toutes les communications, négociations et tous les accords, sous forme verbale ou écrite, se rapportant aux travaux et effectués avant la date du contrat.

Article 10 - Nul paiement supplémentaire pour accroissement des frais

- 1) Les seules autres modifications pouvant être apportées au prix forfaitaire sont celles précisées dans les Conditions générales du Cahier des charges général. Le prix forfaitaire ne sera pas modifié à la suite de changements dans les tarifs de transport, les cotes des changes, les échelles de salaire, le coût des matériaux, de l'outillage ou des services.

Article 11 - Adjudication

- 1a) Le Conseil se réserve le pouvoir et le droit de rejeter les soumissions provenant de parties ne possédant pas les connaissances et la préparation requises à la bonne exécution de la catégorie de travaux mentionnés dans les présentes et précisés dans les plans. Les soumissionnaires doivent fournir la preuve de leur compétence lorsque cela est exigée.
- 1b) Un soumissionnaire peut être tenu de faire parvenir au Services d'approvisionnement, Conseil national de recherches Canada, édifice M-58, chemin Montréal, Ottawa (Ontario) K1A 0R6, Canada, des copies non signées des polices d'assurance auxquelles il envisage de souscrire pour satisfaire aux exigences relatives aux assurances comprises dans les Conditions d'assurance du Cahier des charges général.
- 1c) Le Conseil ne s'engage pas à accepter la soumission la plus basse ni une soumission quelconque.

Article 12 - Taxe TPS

- 1) La TPS qui est maintenant en vigueur est applicable à cette proposition; cependant, l'entrepreneur devra proposer un prix NE COMPRENNANT PAS la TPS. La TPS détaillée séparément dans toutes les factures et demandes de paiement partiel présentées pour des produits fournis ou un travail accompli et sera payée par le Canada. Le montant de la TPS sera inclus dans le prix total du contrat. L'Entrepreneur convient de verser à Revenu Canada tout montant payé ou dû au titre de la TPS.

Entrepreneurs non résidents

Guide de la TVD 804F

Date de publication : août 2006

Dernière mise à jour : août 2010

ISBN: 1-4249-2010-8 (Imprimé), 1-4249-2012-4 (PDF), 1-4249-2011-6 (HTML)

Publication archivées

Avis aux lecteurs : Concernant la taxe de vente au détail (TVD) – Le 1^{er} juillet 2010, la taxe de vente harmonisée (TVH) de 13 % est entrée en vigueur en Ontario pour remplacer la TVD provinciale en la combinant avec la taxe fédérale sur les produits et services (TPS). Conséquemment, les dispositions de la TVD décrites dans cette page et dans d'autres publications ont expiré le 30 juin 2010.

A compter du 1^{er} juillet 2010, cette publication fait partie des archives pour la TVD **seulement**. Puisque ce document reflète la loi de la TVD qui était en vigueur au moment où il fut publié et peut ne plus être valide, veuillez l'utiliser avec prudence.

- Les renseignements contenus dans le présent Guide décrivent les responsabilités d'un entrepreneur non résident qui obtient un contrat en vue d'effectuer des travaux de construction en Ontario, ainsi que celles de ses clients ontariens. Veuillez prendre note que le présent Guide remplace la version précédente publiée en mars 2001.

Définition d'un entrepreneur non résident

Un entrepreneur non résident est un entrepreneur en construction dont le siège social est situé à l'extérieur de l'Ontario et qui a obtenu un contrat de construction pour effectuer des travaux en Ontario, mais qui n'a pas tenu de façon continue un établissement stable en Ontario au cours des douze mois qui ont précédé la signature du contrat, ou qui n'est pas une société constituée en Ontario. Un contrat de construction est un contrat pour ériger, remodeler ou réparer un bâtiment ou autre structure situé sur un terrain.

Un entrepreneur est une personne qui se livre à la construction, la modification, la réparation ou la rénovation de biens immobiliers et s'entend, sans s'y limiter,

1. d'un entrepreneur général et d'un sous-traitant,
2. d'un charpentier, d'un maçon, d'un tailleur de pierres, d'un électricien, d'un plâtrier, d'un plombier, d'un peintre, d'un décorateur, d'un paveur et d'un constructeur de ponts,
3. d'un entrepreneur en tôle, en carreaux et en terrazzo, en chauffage, en climatisation, en isolation, en ventilation, en pose de papier peint, en construction de routes, en revêtement de toiture et en ciment,

qui installe ou qui incorpore des articles dans un bien immobilier. (Consultez le Guide de la taxe de vente au détail n° 206F - Biens immobiliers et accessoires fixes).

Inscription et cautionnement

Tout entrepreneur non résident à qui l'on accorde un contrat de construction pour des travaux en Ontario doit s'inscrire auprès du ministère des Finances (ministère), Unité des programmes centralisés, et verser un cautionnement équivalent à 4 p. 100 du total de la valeur de chaque contrat. Ce cautionnement peut être acquitté en espèces, par chèque certifié (libellé à l'ordre du Ministre des Finances), par lettre de crédit ou par certificat de cautionnement.

Afin de s'inscrire auprès du ministère et pour obtenir plus de précisions sur le dépôt d'un cautionnement, les entrepreneurs peuvent communiquer avec l'Unité des programmes centralisés du ministère, 33, rue King Ouest, CP 623, Oshawa, Ontario, L1H 8H7, sans frais 1 866 ONT-TAXS (1 866 668-8297) ou télécopieur 905) 435-3617.

Tout entrepreneur non résident qui vend et qui fournit seulement des biens taxables à des clients de l'Ontario, ou qui fournit des services taxables en Ontario, peut obtenir un permis de vendeur régulier lui permettant de percevoir et remettre la TVD sur ses ventes. Tout entrepreneur non résident à qui un permis de vendeur régulier a été émis doit tout de même s'inscrire séparément auprès du ministère et verser un cautionnement s'il se voit accorder un contrat de construction en Ontario.

Lettre de conformité

Après avoir reçu le cautionnement, le ministère envoie à l'entrepreneur non résident une lettre de conformité en deux exemplaires attestant que les exigences relatives à la TVD ont bien été respectées. L'entrepreneur doit alors remettre un exemplaire de cette lettre à son client.

S'il omet de le faire, le client doit retenir 4 p. 100 de chaque paiement dû à l'entrepreneur non résident et remettre les sommes retenues au Ministre des Finances (le ministre). Les paiements doivent être envoyés à l'Unité des programmes centralisés en prenant soin d'y joindre les détails du contrat visé. Au lieu d'effectuer ces paiements de 4 p. 100, le client peut remettre au ministre un certificat de cautionnement équivalent à 4 p. 100 du prix contractuel total.

Remarque : Tout client qui néglige d'observer ces règles pourrait être tenu de verser une somme égale à 4 % de tous les montants payables à l'entrepreneur non résident ou tout autre montant qui, de l'avis du ministère, devrait être assujéti à la TVD à la suite de l'exécution du contrat.

Calcul de la TVD

Juste valeur

La TVD doit être versée sur la « juste valeur » des matériaux achetés ou importés en Ontario et utilisés pour l'exécution du contrat en Ontario. Par « juste valeur », on entend :

- le prix d'achat en devises canadiennes;
- tous les frais de manutention et de livraison facturés par le fournisseur; et
- tous les droits de douane ainsi que les taxes de vente et d'accise fédérales (mais non la taxe fédérale sur les produits et services [TPS]).

L'entrepreneur est aussi tenu de payer la TVD aux fournisseurs de l'Ontario au moment de l'achat ou de la location (avec ou sans bail) de services, matériaux, machines ou d'équipement taxables.

Machines et équipement - loués à bail

Lorsque des machines ou un équipement loués auprès d'un fournisseur de l'extérieur de l'Ontario sont apportés dans la province, la TVD est exigible sur les paiements de location pendant toute la période de séjour des machines et de l'équipement en Ontario.

Machines et équipement - appartenant à l'entrepreneur

1. Si un entrepreneur apporte des machines et de l'équipement en Ontario pour une durée inférieure à douze mois, la TVD applicable doit être calculée selon la formule suivante :

$$1/36 \times \text{valeur comptable nette à la date d'importation} \times \text{nombre de mois en Ontario} \times \text{taux de taxe.}$$

Aux fins de cette formule, la TVD est exigible pour chaque mois ou partie de mois pendant lesquels les biens se trouvent en Ontario. En outre, on considère qu'un mois constitue une période de 31 jours consécutifs, et qu'une partie de mois représente plus de 12 jours. La TVD exigible est fondée sur le nombre de jours où les machines et l'équipement se trouvent en Ontario et non sur le nombre de jours d'utilisation effective des machines ou de l'équipement.

Exemple: De l'équipement est apporté en Ontario le 28 mars et sorti de la province le 8 mai. L'équipement a donc séjourné pendant 41 jours dans la province. La TVD est alors payable sur les 31 premiers jours de séjour temporaire en Ontario vs l'usage de l'équipement. Étant donné que la période restante (10 jours) n'est pas considérée comme une partie d'un mois, aucune TVD n'est exigible sur cette période.

1. Si l'on prévoit que les machines ou l'équipement apportés en Ontario resteront dans cette province pendant plus de 12 mois, l'entrepreneur doit payer la TVD selon la formule suivante :

$$\text{valeur comptable nette à la date d'importation} \times \text{taux de taxe}$$

Si, au moment de l'importation des machines et de l'équipement, la durée du séjour n'est pas connue, le vendeur peut appliquer la formule (a). Si, par la suite, il s'avère nécessaire de garder les machines et l'équipement en Ontario pendant une durée dépassant 12 mois, la TVD versée selon (a) pourra être déduite du montant de la TVD payable selon (b).

À l'aide de la formule (a) ou (b) ci-dessus, les entrepreneurs calculeront et remettront la TVD exigible sur la déclaration à produire une fois le contrat dûment exécuté.

Fabrication de matériel à des fins personnelles

Il arrive qu'un entrepreneur doive fabriquer divers éléments, tels que des portes et fenêtres, pour exécuter son contrat de construction. Par fabrication, il faut entendre tout travail effectué dans une usine à l'extérieur d'un chantier de construction, une unité mobile ou un atelier sur un chantier de construction ou à proximité de ce dernier. La fabrication a lieu lors de la transformation de matières brutes en produits fabriqués qui seront utilisés dans l'exécution de contrats immobiliers.

Un entrepreneur est considéré comme un entrepreneur fabricant si :

1. les produits fabriqués sont destinés à un usage personnel dans l'exécution de contrats immobiliers; et que
2. le coût de fabrication des produits dépasse 50 000 \$ par an.

(Consultez le Guide de la taxe de vente au détail no 401F - Entrepreneurs- fabricants).

Contrat avec le gouvernement fédéral

Lorsqu'un entrepreneur non résident conclut un contrat de construction avec le gouvernement fédéral, pour la construction d'un bâtiment et(ou) l'installation d'équipement, c'est la nature de l'équipement qui détermine si le contrat doit être soumissionné sur une base taxe comprise ou taxe non comprise.

Les contrats pour la construction d'un bâtiment et l'installation d'équipement qui dessert directement ce bâtiment (par ex. les ascenseurs, escaliers roulants, luminaires, systèmes de chauffage central, air climatisé, etc.) doivent être soumissionnés sur une base taxe comprise. L'entrepreneur est considéré comme le consommateur des articles utilisés dans l'exécution de ces contrats et doit payer ou rendre compte de la TVD sur les articles utilisés aux fins de ces contrats. Le simple fait qu'un contrat soit conclu avec le gouvernement fédéral ne donne pas droit, en soi, à une exemption.

Les contrats pour l'installation d'équipement qui devient un accessoire fixe et qui ne dessert pas directement un bâtiment (par ex. le matériel de manutention, l'outillage de production, l'équipement de télécommunication et le matériel de formation) peuvent être soumissionnés sur une base taxe non comprise. Les entrepreneurs qui entreprennent des contrats de ce genre sont permis d'acheter un tel équipement en exemption de la TVD en remettant un Certificat d'exemption de taxe valide aux fournisseurs. Seul un entrepreneur non résident inscrit auprès du ministère et ayant versé un cautionnement peut remettre un Certificat d'exemption de taxe.

Exonérations

Il arrive que des entrepreneurs fournissent et installent de l'équipement ou du matériel pour certains clients ayant droit à une exemption de la TVD (par ex. fabricants, conseils de bandes indiennes, agriculteurs et organismes diplomatiques). Une fois installés, l'équipement ou les matériaux deviennent des biens immobiliers s'ils sont fixés en permanence au sol, ou des accessoires fixes s'ils sont fixés de façon permanente à un bâtiment ou une structure immobilière. Étant donné que la responsabilité de la TVD incombe à l'entrepreneur, ce dernier doit communiquer avec le ministère pour déterminer si le client est admissible à l'exonération, avant d'offrir un contrat taxe non comprise.

Indiens inscrits, bandes indiennes et conseils de bandes indiennes

L'entrepreneur non résident peut acheter des matériaux de construction en exemption de la TVD pour certains bâtiments et certaines structures situés dans des réserves. Le coût de ces projets doit être défrayé par un conseil de bande, et les bâtiments doivent servir à des fins communautaires, au bénéfice de la réserve. Dans le cas de contrats pour des projets de construction communautaires exonérés de taxe, le contrat doit être offert sur une base taxe non comprise. L'entrepreneur non résident peut acheter les matériaux sans payer la TVD s'il remet aux fournisseurs un Certificat d'exemption de taxe valide. Comme précisé ci-dessus, seul un entrepreneur non résident inscrit auprès du ministère et ayant versé un cautionnement peut remettre un Certificat d'exemption de taxe. (Consultez le Guide de la taxe de vente au détail n° 204F - Certificats d'exemption de taxe).

Les entrepreneurs non résidents doivent payer eux-mêmes la TVD sur les articles achetés à des fins d'incorporation à un bâtiment ou une structure, érigé à l'intention d'un Indien inscrit particulier dans une réserve. (Consultez le Guide de la taxe de vente au détail n° 808F - Indiens inscrits, bandes indiennes et conseils de bandes indiennes).

Exécution du contrat

Une fois le contrat dûment exécuté, l'entrepreneur qui a dû déposer un cautionnement doit remplir une « Déclaration de la taxe de vente au détail - Entrepreneurs non résidents [PDF - 93 KO] » qui est fournie par le ministère.

Lorsque le cautionnement a été acquitté en espèces ou par chèque certifié, le montant déposé peut être déduit de la TVD que l'entrepreneur doit payer. Si le montant de cette taxe est supérieur au montant déposé, l'entrepreneur doit verser la différence. Dans le cas contraire, si le montant déposé est supérieur au montant de la taxe exigible, la différence lui sera remboursée.

Si, au lieu d'un acquittement en espèces, un certificat de cautionnement a été déposé, ce dernier fera l'objet d'une main-levée une fois que le paiement de la taxe aura été intégralement acquitté. Toutes les déclarations peuvent faire l'objet d'une vérification.

Compagnies de cautionnement reconnues

Publiée septembre 2010

Voici une liste des compagnies d'assurance dont les cautionnements peuvent être acceptés par le gouvernement à titre de garantie.

1. Compagnie canadiennes

Assurance ACE INA
Allstate du Canada, Compagnie d'assurances
Ascentus Ltée, Les Assurances (cautionnement seulement)
Aviva, Compagnie d'Assurance du Canada
AXA Assurances (Canada)
AXA Pacific Compagnie d'assurance
Le Bouclier du Nord Canadien, Compagnie d'Assurance
Certas direct, compagnie d'assurances (cautionnement seulement)
Chubb, Compagnie d'assurances du Canada
Commonwealth, Compagnie d'assurances du Canada
Compagnie d'assurance Chartis du Canada (anciennement La Cie d'assurance commerciale AIG du Canada)
Co-operators General, Compagnie d'assurance
CUMIS, Compagnie d'assurances générales
La Dominion du Canada, Compagnie d'assurances générales
Échelon, Compagnie D'Assurances Générale (cautionnement seulement)
Economical, Compagnie Mutuelle d'Assurance
Elite, Compagnie d'assurances
La Compagnie d'Assurance Everest du Canada
Federated, Compagnie d'assurances du Canada
Federation, Compagnie d'assurances du Canada
La Compagnie d'assurance et de Garantie Grain
Gore Mutual Insurance Company
The Guarantee, Compagnie d'Amérique du Nord
Industrielle Alliance Pacifique, Compagnie d'Assurances Générales
Intact Compagnie d'assurance
Jevco, Compagnie d'assurances (cautionnement seulement)
Compagnie canadienne d'assurances générales Lombard
Compagnie d'assurance Lombard
Markel, Compagnie d'assurances du Canada
Missisquoi, Compagnie d'assurances
La Nordique compagnie d'assurance du Canada
The North Waterloo Farmers Mutual Insurance Company (fidélité du personnel seulement)
Novex Compagnie d'assurance (fidélité du personnel seulement)
La Personnelle, compagnie d'assurances
La Compagnie d'Assurance Pilot
Compagnie d'Assurance du Québec
Royal & Sun Alliance du Canada, société d'assurances
Saskatchewan Mutual Insurance Company
Compagnie d'Assurance Scottish & York Limitée
La Souveraine, Compagnie d'Assurance Générale
TD, Compagnie d'assurances générales
Temple, La compagnie d'assurance
Traders, Compagnie d'assurances générales
La Compagnie Travelers Garantie du Canada
Compagnie d'Assurance Trisura Garantie

Waterloo, Compagnie d'assurance
La Compagnie Mutuelle d'Assurance Wawanesa
Western, Compagnie d'assurances
Western, Compagnie de garantie

2. Compagnie provinciales

Les cautionnements de garantie des compagnies suivantes peuvent être acceptés à condition que le contrat de garantie soit conclu dans une province où la compagnie est autorisée à faire affaires, comme il est indiquée entre parenthèses.

AXA Boréal Assurances Inc. (I.-P.-É., N.-B., Qué., Ont., Man., C.-B.)
ALPHA, Compagnie d'assurances Inc. (Québec)
Canada West Insurance Company (Ont., Man., Sask., Alb., C.-B., T.-N.-O.) (cautionnement seulement)
La Capitale assurances générales inc. (T.-N.-L., N.-É., I.-P.-É., Qué. (cautionnement seulement), Man., Sask., Alb. C.-B., Nun., T.-N.-O., Yuk.)
Coachman Insurance Company (Ont.)
La Compagnie d'Assurance Continental Casualty (T.-N.-L., N.-É., I.-P.-É., N.-B., Qué., Ont., Man., Sask., Alb. C.-B., Nun., T.-N.-O., Yuk.)
GCAN Compagnie d'assurances (T.-N.-L., N.-É., I.-P.-É., N.-B., Qué., Ont., Man., Sask., Alb. C.-B., Nun., T.-N.-O., Yuk.)
The Insurance Company of Prince Edward Island (N.-É., I.-P.-É., N.-B.)
Kingsway Compagnie d'assurances générales (N.-É., N.-B., Qué., Ont., Man., Sask., Alb., et C.-B.)
La Compagnie d'Assurance Liberté Mutuelle (T.-N.-L., N.-É., I.-P.-É., N.-B., Qué., Ont., Man., Sask., Alb. C.-B., Nun., T.-N.-O., Yuk.)
Norgroupe Assurances Générales Inc.
Orléans, compagnie d'assurance générale (N.-B., Qué., Ont.)
Saskatchewan Government Insurance Office (Sask.)
SGI CANADA Insurance Services Ltd. (Ont., Man., Sask., Alb.)
Société d'assurance publique du Manitoba (Man.)
Union Canadienne, Compagnie d'assurances (Québec)
L'Unique assurances générales inc. (T.-N.-L., N.-É., I.-P.-É., N.-B., Qué. (cautionnement seulement), Ont. (cautionnement seulement), Man., Sask., Alb. C.-B. (cautionnement seulement), Nun., T.-N.-O., Yuk.)

3. Compagnie étrangères

Aspen Insurance UK Limited
Compagnie Française d'Assurance pour le Commerce Extérieur (fidélité du personnel seulement)
Eagle Star Insurance Company Limited
Société des Assurances Ecclésiastiques (fidélité du personnel seulement)
Lloyd's, Les Souscripteurs du
Mitsui Sumitomo Insurance Company, Limited
NIPPONKOA Insurance Company, Limited
Assurances Sampo du Japon
Tokio Maritime & Nichido Incendie Compagnie d'Assurances Ltée
XL Insurance Company Limited (cautionnement seulement)
Zurich Compagnie d'Assurances SA

Articles de convention

Contrat de construction – Articles de convention
(23/01/2002)

- A1 Contrat
- A2 Description des travaux et date d'achèvement
- A3 Prix du contrat
- A4 Adresse de l'entrepreneur
- A5 Tableau des prix unitaires

Articles de convention

Les présents Articles de convention faits en double le 8^{ième} jour de janvier, 2015

Entre

Sa Majesté la Reine, du chef du Canada (ci-après appelé “ Sa Majesté”) représentée par le Conseil National recherches du Canada. (ci-après appelé “ le Conseil”)

Et Les installations électriques Pichette Inc.

(ci-après appelé “l’Entrepreneur”)

Font foi que sa Majesté et l’Entrepreneur ont établi entre eux les conventions suivantes:

A1 Contrats

(23/01/2002)

- 1.1 Sous réserve des paragraphes A1.4 and A1.5, les documents constituant le contrat passé entre Sa Majesté et l’Entrepreneur (ci-après appelé le Contrat) sont:
 - 1.1.1 les présents Articles de convention;
 - 1.1.2 les documents intitulés “Plans et devis” et annexés aux présentes sous la cote “A”;
 - 1.1.3 le document intitulé “Modalités de paiement” et annexé aux présentes sous la cote “B”;
 - 1.1.4 le document intitulé, “Conditions générales” et annexé aux présentes sous la cote “C”;
 - 1.1.5 le document intitulé, “Conditions de travail” et annexé aux présentes sous la cote “D”;
 - 1.1.6 le document intitulé, “Conditions d’assurance” et annexé aux présentes sous la cote “E”;
 - 1.1.7 le document intitulé, “Conditions de garantie du contract” et annexé aux présentes sous la cote “F”; et
 - 1.1.8 toute modification au Contract en accord avec le Conditions générales.
 - 1.1.9 le document intitulé “Échelles de juste salaire pour les contrats fédéraux de construction”, désigné dans le présent document par l’appellation “Échelles de justes salaires”.

Articles de Convention

1.2 Le Conseil désigne de **SAGI**
du CNRC, du gouvernement du Canada, Ingénieur aux fins du Contrat et à toute fin, y compris aux fins
accessoires, l'adresse de l'Ingénieur est réputée être:

1.3 Dans le Contrat

1.3.1 "Entente à prix fixe" désigne la partie du Contrat où il est stipulé qu'un paiement global sera fait
en contrepartie de l'exécution des travaux auxquels elle se rapporte; et

1.3.2 "Entente à prix unitaire" désigne la partie du Contrat où il est stipulé que le produit d'un prix
multiplié par un nombre d'unité de mesurage d'une catégorie sera versé à titre de paiement pour
l'exécution des travaux visés par cette entente.

1.4 Toute dispositions du Contrat qui s'applique expressément et seulement à une Entente à prix unitaire ne
s'applique à aucune partie des travaux qui relève de l' Entente à prix fixe.

1.5 Toute dispositions du Contrat qui s'applique expressément et seulement à une Entente à prix fixe ne
s'applique à aucune partie des travaux qui relève de l' Entente à prix Unitaire.

A2 Description des travaux et date d'achèvement (23/01/2002)

2.1 Entre la date des présentes Articles de convention et le jour de , l'Entrepreneur exécute, avec
soin et selon le règles de l'art, à l'endroit et de la manière indiquée, les travaux suivants :

plus particulièrement décrits dans les Plans et devis, incluant les addenda no.

Articles de Convention

A3 Prix du marché

(23/01/2002)

- 3.1 Sous réserve de toute addition, soustraction, déduction, réduction ou compensation prévue en vertu du Contrat, Sa Majesté, aux dates et de la manière énoncées ou mentionnées dans les Modalités de paiement, paie à l'Entrepreneur:
- 3.1.1 la somme de \$ (TPS/TVH en sus), en considération et l'exécution des travaux ou des parties de travaux à laquelle s'applique l'Entente à prix fixe, et
- 3.1.2 une somme égale à l'ensemble des produits du nombre d'unités de mesurage de chaque catégorie de travail, d'outillage ou de matériaux indiqué dans le Certificat définitif de mesurage mentionné ou paragraphe CG44.8, ce nombre d'unités étant multiplié selon le cas par le prix de chaque unité indiquée dans le Tableau des prix unitaires relativement à l'exécution des travaux ou des parties de travaux qui ont fait l'objet d'une Entente à prix unitaire.
- 3.2 Pour le gouverne de l' Entrepreneur et des personnes chargées de l'exécution du Contrat au nom de sa Majesté, mais sans toutefois comporter une garantie ou un engagement de quelque nature de la part de l'une ou l'autre partie, il est estimé que la somme totale payable par Sa Majesté à l'Entrepreneur pour la partie des travaux qui a fait l'objet d'une Entente à prix unitaire, sera d'environ N/A \$
- 3.3 L'alinéa A3.1.1 ne s'applique qu'à une Entente à prix fixe.
- 3.4 L'alinéa A3.1.2 et le paragraphe A3.2 ne s'appliquent qu'à une Entente à prix unitaire.

A4 Adresse de L'Entrepreneur

(23/01/2002)

- 4.1 Aux fins du Contrat, y compris les fins accessoires, l'adresse de l'Entrepreneur est réputé être:

Articles de Convention

A5 Tableau des prix unitaires

(23/01/2002)

5.1 Il est convenu entre Sa Majesté et l'Entrepreneur que le tableau ci-après est le Tableau des prix unitaires pour le Contrat:

Colonne 1 Postes	Colonne 2 Catégorie de travail outillage ou de matériaux	Colonne 3 Unité de mesurage	Colonne 4 Quantité totale estimative	Colonne 5 Prix unitaire	Colonne 6 Prix total estimatif
		N/A			

5.2 Le Tableau des prix unitaires présenté au paragraphe A5.1 décrit la partie des travaux visée par l'Entente à prix unitaire.

5.3 La partie des travaux qui n'est pas décrite dans le Tableau des prix unitaires mentionné au paragraphe A5.2 est la partie des travaux visée par l'Entente à prix fixe.

FIN DE TABLE

1. DESCRIPTION DES TRAVAUX

- .1 Les travaux visés par le présent contrat comprennent rénovation dans l'édifice M-38 du Conseil national de recherches.

2. DESSINS

Les dessins suivants illustrent les travaux exécutés et font partie du présent contrat.

- .1 ASK01
- .2 ASK02
- .3 ASK03
- .4 5310-M001
- .5 5310-M201
- .6 5310-M202
- .7 5310-M301
- .8 5310-M302
- .9 5310-M401
- .10 5310-M402
- .11 5310-M403
- .12 5310-E04
- .13 5310-E05
- .14 5310-E06
- .15 5310-E07
- .16 5310-E08
- .17 5310-E09
- .18 5310-E10
- .19 5310-E11

3. ACHÈVEMENT DES TRAVAUX

- .1 Terminer tous les travaux dans les 16 semaines qui suivent la réception de l'avis d'acceptation de la soumission.

4. GÉNÉRALITÉS

- .1 Sans objet en français.
- .2 Fournir les items mentionnés dans les dessins ou dans les spécifications

5. MATÉRIEL ET PRODUITS SPÉCIFIÉS, DÉSIGNÉS ACCEPTABLES OU SUBSTITUTS

- .1 Les produits et le matériel spécifiés dans les dessins ou les devis ont été sélectionnés dans le but d'établir des normes de rendement et de qualité. Dans la plupart des cas, lorsque l'on précise la marque de commerce et le numéro de modèle de tout produit ou matériel, on indique aussi les noms d'autres fabricants qui seraient acceptables. Les entrepreneurs peuvent calculer le montant de leur soumission en se fondant sur les prix des produits et

du matériel fournis par n'importe quel des fabricants désignés comme étant des fournisseurs acceptables de produits ou de matériel particuliers.

- .2 En plus des fabricants spécifiés ou désignés comme étant acceptables, vous pouvez demander au représentant ministériel d'approuver d'autres fabricants, produits ou matériel. Pour faire approuver un produit en tant que substitut, vous devez remettre une demande par écrit au représentant ministériel au cours de la période fixée pour soumissionner, au plus tard dix (10) jours ouvrables avant la clôture de l'appel d'offres.
- .3 Vous devez attester par écrit que le substitut répond à toutes les exigences relatives aux dimensions, à la capacité, au rendement et à la qualité du matériel ou des produits spécifiés. En outre, il est entendu que l'entrepreneur assume tous les coûts qui sont reliés à l'acceptation des substituts proposés, ou qui en résultent.
- .4 L'approbation des substituts sera communiquée sous forme d'un Addendum aux documents de soumission.
- .5 Nous n'examinerons pas les demandes d'approbation d'autres fabricants, produits ou matériel qui sont incomplets et impossibles à évaluer ou qui sont soumises moins de dix (10) jours avant la clôture de l'appel d'offres.

6. NORMES MINIMALES

- .1 Se conformer aux exigences des normes minimales acceptables des divers codes fédéraux, provinciaux et municipaux pertinents tels le Code national du bâtiment, le Code national de prévention des incendies, le Code canadien de la plomberie, le Code canadien de l'électricité, le Code canadien de la sécurité sur les chantiers de construction et la Loi provinciale sur la sécurité dans la construction, ou les dépasser.
- .2 Effectuer les travaux conformément aux normes et codes dont il est fait mention, en vigueur ou révisés à la date de publication du présent devis.

7. SYSTÈME D'INFORMATION SUR LES MATIÈRES DANGEREUSES UTILISÉES AU TRAVAIL (SIMDUT)

- .1 L'entrepreneur doit se conformer aux lois fédérales et provinciales portant sur le SIMDUT. Les responsabilités de l'entrepreneur comprennent les tâches suivantes, sans s'y limiter :
 - .1 S'assurer de l'étiquetage acceptable de tout produit contrôlé introduit sur les lieux des travaux par l'entrepreneur lui-même ou un sous-traitant, ou l'un de leurs fournisseurs;
 - .2 Mettre à la disposition des travailleurs et du représentant ministériel des fiches techniques « santé - sécurité » (FTSS) portant sur ces produits contrôlés;
 - .3 Former ses propres ouvriers pour le SIMDUT et les produits contrôlés présents au chantier;
 - .4 Informer les autres entrepreneurs, les sous-traitants, le représentant ministériel, les visiteurs autorisés, ainsi que les représentants des organismes externes d'inspection, de la présence et de l'utilisation de ces produits sur les lieux des travaux.
 - .5 Le contremaître ou le surveillant des travaux doit pouvoir démontrer au représentant ministériel qu'il a reçu une formation portant sur le SIMDUT et qu'il est au courant des exigences de ce système. Le représentant ministériel peut

exiger le remplacement de cette personne, si celle-ci ne satisfait pas à l'exigence susmentionnée ou si le SIMDUT n'est pas mis en œuvre de façon acceptable.

8. PRESCRIPTIONS DU RÈGLEMENT 208, SECTION 18(A)

- .1 Tel que prescrit par le Règlement 208 de la Loi sur la santé et la sécurité au travail du Ministère du Travail de l'Ontario, nous vous avisons de la présence possible sur les lieux de travail visés par le présent contrat des matières désignées suivantes:
 - .1 Silice
 - .1 L'entrepreneur général a la responsabilité de s'assurer que tous les éventuels sous-traitants ont reçu une copie de liste des matières désignées qui peuvent être présentes sur le chantier

9. VENTILATION DES COÛTS

- .1 Avant de demander le premier paiement d'acompte, soumettre à l'approbation du représentant ministériel une ventilation des coûts.
- .2 Une fois approuvée, utiliser la ventilation des coûts comme base pour la soumission de toute autre demande.
- .3 Avant de rédiger et de soumettre une demande sous sa forme définitive, obtenir le consentement verbal du représentant ministériel quant au montant de cette demande.

10. SOUS-TRAITANTS

- .1 Dans les 72 heures qui suivent l'acceptation de la soumission, soumettre à l'étude du représentant ministériel une liste complète des sous-traitants.

11. INSIGNES D'IDENTIFICATION ET ENQUÊTES DE SÉCURITÉ DU PERSONNEL

- .1 Toute personne employée par l'Entrepreneur ou par un de ses sous-traitants et présents sur le chantier doit rencontrer les exigences d'une enquête de sécurité en accord avec la section intitulée Instructions Spéciales aux Soumissionnaires.
- .2 Toutes ces personnes doivent porter et garder visible une insigne d'identification émise par le Bureau de la sécurité du CNRC

12. HEURES DE TRAVAIL ET EXIGENCES D'ESCORTE

- .1 Les heures normales de travail au CNRC sont de 8h00 à 16h30, du lundi au vendredi inclusivement, sauf les congés fériés.
- .2 En tout autre temps, des laissez-passer spéciaux sont nécessaires pour avoir accès au chantier.
- .3 Obtenir la permission du représentant ministériel d'exécuter des tâches particulières avant de planifier tout travail après les heures normales de travail.
- .4 Après les heures normales de travail, il se peut qu'une escorte soit nécessaire. Défrayer les coûts de cette escorte si le représentant ministériel le demande.

13. CALENDRIER DES TRAVAUX

- .1 L'Entrepreneur doit soumettre un calendrier détaillé des travaux, indiquant les dates du début et de la fin des diverses étapes des travaux et le mettre à jour. Il doit remettre ce calendrier au représentant ministériel au plus tard deux semaines après l'adjudication du contrat et avant d'entreprendre tout travail au chantier.
- .2 Informer le représentant ministériel par écrit de toute modification apportée au calendrier,
- .3 14 jours avant la date d'achèvement prévue, planifier de faire une inspection provisoire avec le représentant ministériel.

14. RÉUNIONS

- .1 Tenir régulièrement des réunions aux heures et aux endroits approuvés par le représentant ministériel.
- .2 Aviser toutes les parties intéressées des réunions pour assurer une bonne coordination des travaux.
- .3 Le représentant ministériel déterminera les heures de réunions et assume la responsabilité d'enregistrer et distribuer le procès verbal.

15. DESSINS D'ATELIER

- .1 Soumettre au représentant ministériel, aux fins de vérification, les dessins d'atelier, la documentation et les échantillons prescrit deux semaines après l'adjudication du contrat.
- .2 Soumettre au représentant ministériel aux fins de vérification, une liste complète de tous les dessins d'atelier, la documentation et les échantillons prescrits et une confirmation écrite des dates de livraison correspondantes dans l'intérieur d'une (1) semaine, suite à la date d'approbation des dessins d'atelier, de la documentation et des échantillons. Cette liste devra être mise à jour sur une base de chaque deux semaines et n'importe quels changements à la liste devront être immédiatement notifiés par écrit au représentant ministériel.
- .3 Examiner les dessins d'atelier, la documentation et les échantillons avant de les soumettre.
- .4 Sauf avis contraire, soumettre 5 copies de tous les dessins d'atelier, de la documentation, ainsi que des échantillons pour vérification.
- .5 Demeurer responsable des erreurs et des omissions apparaissant dans les dessins d'atelier et la documentation et s'assurer qu'ils sont conformes aux documents contractuels même s'ils sont revus par le représentant ministériel.

16. ÉCHANTILLONS ET MAQUETTES

- .1 Soumettre des échantillons aux dimensions et quantités prescrites.
- .2 Si la couleur, le motif ou la texture sont des facteurs spécifiés, soumettre tout un éventail d'échantillons.
- .3 Monter des modèles et des maquettes au chantier, aux endroits qui conviennent le représentant ministériel.

- .4 Tout travail terminé est vérifié sur place d'après les modèles ou maquettes approuvés qui servent de normes pour la façon et les matériaux.

17. MATÉRIAUX ET MISE EN ŒUVRE

- .1 Pour le présent projet, n'utiliser que des matériaux neufs, sauf si noté autrement.
- .2 Seuls les travaux de première classe seront acceptés, non seulement en ce qui a trait à la sécurité, l'efficacité et la durabilité, mais aussi à l'exactitude du détail et au bon rendement.

18. OUVRAGES ET MATÉRIAUX FOURNIS PAR LE PROPRIÉTAIRE

- .1 Les ouvrages et matériaux non inclus dans ce contrat sont décrits sur les dessins et dans le devis.
- .2 Tous les matériaux retournés au Propriétaire doivent être transportés à un lieu d'entreposage désigné par le représentant ministériel.
- .3 Sauf indication contraire, prendre possession des matériaux fournis par le Propriétaire à leur lieu d'entreposage et assurer leur transport.
- .4 Responsabilités de l'Entrepreneur :
 - .1 les décharger à pied d'œuvre;
 - .2 en faire aussitôt l'inspection et signaler tout article endommagé ou défectueux;
 - .3 par écrit, informer le représentant ministériel des articles qui sont reçus en bon état;
 - .4 les manutentionner à pied d'œuvre, ce qui comprend leur déballage et leur entreposage;
 - .5 Réparer ou remplacer les articles endommagés au chantier.
 - .6 Installer et raccorder les produits finis conformément aux prescriptions.

19. VOIES D'ACCÈS

- .1 Prendre les dispositions nécessaires avec le représentant ministériel avant de commencer les travaux ou avant de transporter des matériaux et du matériel au chantier.
- .2 Obtenir l'approbation du représentant ministériel quant aux moyens d'accès normaux au chantier pendant la période de construction.
- .3 Obtenir l'approbation du représentant ministériel avant de suspendre temporairement les travaux sur le chantier; avant de retourner au chantier et avant de quitter le chantier à la fin des travaux.
- .4 Obtenir l'approbation du représentant ministériel avant de suspendre temporairement les travaux sur le chantier; avant de retourner au chantier et avant de quitter le chantier à la fin des travaux.
- .5 Aménager et entretenir des routes provisoires pendant les travaux.
- .6 Fournir le déneigement et l'enlèvement de la neige au besoin pendant la durée du contrat

- .7 L'Entrepreneur doit réparer et nettoyer les routes qu'il a dû utiliser au cours des travaux.

20. UTILISATION DU CHANTIER

- .1 Limiter les travaux sur le chantier aux secteurs approuvés par le représentant ministériel au moment de la soumission.
- .2 Tous matériel, structures, abris, etc. provisoires doivent se trouver dans les secteurs désignés.
- .3 Limiter le stationnement aux secteurs désignés.

21. ACCEPTATION DU CHANTIER

- .1 Avant d'entreprendre les travaux, l'Entrepreneur doit visiter le chantier et, en compagnie du représentant ministériel, revoir toutes les conditions qui pourraient toucher ses travaux.
- .2 Le début des travaux signifiera l'acceptation des conditions existantes.

22. BUREAU ET TÉLÉPHONE AU CHANTIER

- .1 L'Entrepreneur devra ériger, à ses frais, un bureau temporaire au chantier.
- .2 Au besoin, installer un téléphone et en assurer l'entretien.
- .3 Il est interdit d'utiliser les téléphones du CNRC, sauf en cas d'urgence.

23. INSTALLATIONS SANITAIRES

- .1 Fournir ses propres installations, et en assumer tous les frais.

24. SERVICES PROVISOIRES

- .1 L'Entrepreneur pourra bénéficier d'une source provisoire d'électricité à pied d'œuvre. Il devra fournir, sans frais, tous les raccords et matériaux nécessaires pour assurer ledit service au chantier.
- .2 Fournir et installer tous les centres de distributions, disjoncteurs, conduits, câblage, commutateur de déconnexion, transformateurs nécessaires à partir de la source d'électricité.
- .3 Il n'est permis d'utiliser le courant que pour les outils électriques, l'éclairage, les commandes, les moteurs, et non pas pour chauffer.
- .4 Sur demande, il sera possible de se raccorder provisoirement au réseau de distribution d'eau.
- .5 Assumer tous les frais pour amener l'eau aux endroits nécessaires.
- .6 Se conformer aux exigences du CNRC lors du raccordement aux réseaux existants, conformément aux articles "Coopération" et "Interruptions des services" de cette section".

25. DEVIS DESCRIPTIF, BULLETINS, DESSINS D'ARCHIVES

- .1 L'Entrepreneur doit conserver à pied d'œuvre une (1) copie à jour et en bon état de tous les devis, dessins et bulletins relatifs aux travaux; le représentant ministériel ou ses représentants doivent pouvoir les consulter en tout temps.
- .2 L'Entrepreneur doit annoter au moins une (1) copie du devis et des dessins pour y indiquer tous les travaux tels qu'ils ont été exécutés. Il doit la remettre au représentant ministériel avec la Demande de paiement pour le Certificat définitif d'achèvement des travaux.

26. COOPÉRATION

- .1 Coopérer avec le personnel du CNRC pour que les travaux de recherche courants soient interrompus le moins possible.
- .2 Faire, à l'avance, un calendrier de tous les travaux qui pourraient interrompre le travail normal exécuté dans l'édifice.
- .3 Faire approuver le calendrier par le représentant ministériel.
- .4 Donner un préavis écrit de 72 heures au représentant ministériel avant toute interruption projetée des installations, des secteurs, des corridors, des services mécaniques ou électriques, et attendre son autorisation.

27. MESURES DE PROTECTION ET ÉCRITEAUX AVERTISSEMENT

- .1 Fournir et installer tous les matériaux nécessaires pour protéger le matériel existant.
- .2 Ériger des écrans anti-poussière pour éviter que la poussière et les débris ne se répandent en dehors des limites des travaux.
- .3 Protéger contre la poussière le matériel et le mobilier avec des bâches et coller ces dernières au plancher, au moyen de ruban adhésif, pour que la poussière ne s'infilte pas.
- .4 Réparer ou remplacer, gratuitement et à la satisfaction du représentant ministériel, tout bien du Propriétaire endommagé pendant les travaux.
- .5 Protéger les édifices, les routes, les pelouses, les services, etc. contre tout dommage qui pourrait survenir suite à l'exécution des présents travaux.
- .6 Planifier et coordonner les travaux pour que l'eau, la poussière, etc. ne s'infilte pas dans les édifices.
- .7 Fermer toutes les portes, fenêtres, etc. qui pourraient permettre le passage de la poussière, de vapeurs, etc. dans les autres secteurs de l'édifice.
- .8 Fermer le secteur des travaux à la fin de chaque journée de travail et être responsable des lieux.
- .9 Fournir et installer en permanence des barrières de sécurité appropriées autour du chantier pour éviter que le public et le personnel du CNRC soient blessés pendant l'exécution des travaux.
- .10 Poser des écriteaux d'avertissement pour toutes les situations où il pourrait se produire des blessures (ex : Casque protecteurs obligatoires, danger, travaux, etc.) ou lorsque le représentant ministériel le demande.

- .11 Fournir et installer des abris provisoires au-dessus des entrées et des sorties de l'édifice pour assurer la protection des piétons. Tous ces abris doivent pouvoir résister aux intempéries et à la chute de débris

28. BILINGUISME

- .1 Tous les écriteaux, avis, etc. doivent être bilingues.
- .2 Toute identification de services exigée aux termes du présent contrat.

29. DISPOSITION DES OUVRAGES

- .1 Les localisations des équipements, appareils, raccords et ouvertures tel que spécifiées ou indiquées aux dessins doivent être considérées comme approximatives.
- .2 Situer les équipements, appareils et systèmes de distributions de façon à minimiser les interférences et maximiser l'espace utilisable et en accord avec les instructions du manufacturier pour un accès et entretien sécuritaire
- .3 Engager une personne compétente pour agencer les travaux selon les documents contractuels

30. ÉCARTS ET INTERFÉRENCES

- .1 Avant de débiter les travaux, examiner les dessins et le devis. Signaler aussitôt au représentant ministériel tout écart, défaut, omission ou interférence qui touchent les travaux.
- .2 Si, au cours des travaux, l'Entrepreneur trouve que les plans ne reflètent pas la réalité, il lui incombe de le signaler immédiatement par écrit au représentant ministériel, lequel doit rapidement vérifier les allégations.
- .3 Tout travail exécuté après cette découverte, jusqu'à ce qu'il soit autorisé, doit être fait aux risques de l'Entrepreneur.
- .4 Si des obstacles ou interférences mineures sont décelés en cours d'exécution et qu'ils n'avaient pas été signalés sur la soumission originale ou sur les plans et le devis, fournir et installer des doubles coudes ou des coudes ou modifier le tracé des services pour qu'il soit appropriés aux conditions du chantier, et ce sans frais supplémentaire.
- .5 Prendre les dispositions pour que tous les travaux ne gênent d'aucune façon l'exécution des autres travaux.

31. INSTRUCTIONS DU FABRICANT

- .1 Sauf indications contraires, se conformer aux plus récentes instructions écrites du fabricant concernant les matériaux et le matériel à utiliser et les méthodes de mise en place.
- .2 Aviser le représentant ministériel par écrit de toute divergence entre le présent devis et les instructions du fabricant; le représentant ministériel déterminera alors quel document a priorité.

32. CHAUFFAGE PROVISOIRE ET VENTILATION

- .1 Assumer les frais de la ventilation et du chauffage provisoire utilisés pendant la construction, y compris les frais d'installation, de combustible, d'exploitation, d'entretien et d'enlèvement du matériel.
- .2 Sauf si le représentant ministériel l'a autorisé, il est interdit d'utiliser des appareils de chauffage autonomes répandant des émanations dans les zones de travail.
- .3 Fournir et installer le matériel provisoire de chauffage et de ventilation requis dans les endroits fermés afin de:
 - .1 faciliter l'exécution des travaux.
 - .2 protéger les ouvrages et les matériaux contre l'humidité et le froid.
 - .3 réduire la condensation de l'humidité sur les surfaces à un niveau acceptable.
 - .4 assurer les niveaux de température ambiante et d'humidité indispensables pour l'entreposage, l'installation et la période de séchage requis des matériaux.
 - .5 assurer une ventilation adéquate afin de répondre aux exigences de santé publique concernant la sécurité dans les zones de travail.
- .4 Maintenir une température d'au moins 10o C (50oF) aux endroits spécifiés, partir du début des travaux de finition jusqu'au moment de l'acceptation du bâtiment par le représentant ministériel.
 - .1 Maintenir la température ambiante et l'humidité aux niveaux nécessaires pour assurer le bien être du personnel du CNRC.
- .5 Prendre les mesures nécessaires pour empêcher les accumulations dangereuses de poussières, fumées, buées, vapeurs et émanations, dans les zones occupées pendant les travaux de construction, y compris aussi les aires d'entreposage et les installations sanitaires.
 - .1 Évacuer les substances dangereuses de sorte que la santé des occupants ne soit pas mise en danger.
- .6 Assurer une surveillance constante et rigoureuse du fonctionnement du matériel de chauffage et de ventilation.
 - .1 Faire respecter les normes et les codes pertinents.
 - .2 Se conformer aux instructions de l'Agent de prévention des incendies du CNRC, ce qui comprend la désignation, sur demande, de gardiens de sécurité- incendie à temps complet.
 - .3 Faire respecter les normes de sécurité.
 - .4 Doter les appareils de combustion autonomes de mises à l'air libre vers l'extérieur.
- .7 Rédiger les soumissions en supposant que les installations et le matériel neufs ou existants ne pourront être utilisés pour le chauffage et la ventilation provisoire.
- .8 Une fois le contrat adjudgé, le représentant ministériel peut autoriser l'utilisation de l'installation permanente s'il peut y avoir entente sur ce qui suit:
 - .1 conditions d'utilisation, matériel spécial, protection et entretien, remplacement des filtres, etc.;

- .2 méthodes pour s'assurer que le caloporteur ne sera pas perdu et, dans le cas de la vapeur, entente sur ce qu'il adviendra du condensateur;
- .3 réduction du prix du contrat (s'il doit être débit);
- .4 prescriptions pertinentes aux garanties du matériel.

33. INTERRUPTIONS DES SERVICES

- .1 Lorsque les travaux impliquent le raccord a des services existants, exécuter les travaux en temps et manière pré-agrées avec le représentant ministériel et autres autorités ayant juridiction avec le minimum de perturbations au personnel du CNRC, a la circulation véhiculaire et de temps d'interruption du service. L'entrepreneur ne doit en aucun cas opérer les équipements du CNRC.
- .2 Avant de commencer les travaux, établir la localisation et l'étendue des lignes de services dans l'espace de travail et ou affectés par les travaux et aviser le représentant ministériel des constatations.
- .3 Fournir une cédule et obtenir l'approbation du représentant ministériel pour toute interruption ou fermeture de services actif et allouer un préavis de 72 heures.
- .4 Aviser le représentant ministériel immédiatement suivant la rencontre de services inconnus et confirmer la découverte par écrit
- .5 Afin de minimiser les interruptions, prévoir des déviations, des ponts, des sources d'alimentation de rechange, etc., au besoin
- .6 Protéger les services existants comme il se doit et effectuer aussitôt toutes les réparations nécessaires si des dommages surviennent.
- .7 Enlever tous les lignes de services abandonnés tel qu'indiqués dans les documents contractuels et tel qu'approuvé par le représentant ministériel, boucher et ou autrement sceller aux points de coupure. Noter et fournir une copie au représentant ministériel de la localisation de toutes les lignes de services maintenues, déroutées et ou abandonnées

34. DÉCOUPAGE ET RAPIÉÇAGE

- .1 Découper les surfaces existantes de façon à ce que les ouvrages s'agencent correctement entre eux.
- .2 Supprimer tous les articles indiqués ou prescrits.
- .3 Rapiécer et réparer, à la satisfaction du représentant ministériel, les surfaces qui ont été modifiées, découpées ou endommagées, avec des matériaux identiques.
- .4 Là où des nouveaux tuyaux passent à travers des travaux existants, percer une ouverture. La dimension de l'ouverture doit laisser un jeu de 12mm (1/2") autour des tuyaux ou de l'isolation de la tuyauterie. Ne pas percer, ni couper aucune surface sans l'approbation de le représentant ministériel.
- .5 Obtenir l'approbation écrite du représentant ministériel avant de percer des ouvertures dans les pièces de charpente neuves ou existantes.
- .6 Calfeutrer toutes les ouvertures où des câbles, conduits ou tuyaux passent à travers les murs avec un calfeutrante acoustique conforme à CAN/CGSB 19.21-M87.

- .7 Là où des câbles, conduits ou tuyaux passent à travers des murs ou des planchers coupe-feu, remplir l'espace avec des fibres de verre comprimées et calfeutrer avec un calfeutrant en accord avec CAN/CGSB-19.13 et NBC 3.1.7.

35. DISPOSITIFS DE FIXATION

- .1 Sauf autorisation expresse du représentant ministériel, il est interdit d'utiliser des pistolets à charge explosive.
- .2 Se conformer aux exigences de la norme ACNOR A-166, Pistolets d'ancrage à charge explosive.
- .3 Obtenir la permission du représentant ministériel avant d'utiliser tout genre d'outils percussion.

36. SURCHARGE

- .1 S'assurer qu'aucune partie de l'ouvrage ou de l'édifice ne supporte une charge susceptible de compromettre sa sécurité ou de causer une déformation permanente ou un dommage de structure.

37. DRAINAGE

- .1 Assurer le drainage et le pompage temporaires, selon les besoins, afin de garder les excavations et le chantier propres.

38. ENCEINTES ET FERMETURES DE LA CHARPENTE

- .1 Ériger et entretenir toutes les enceintes temporaires nécessaires pour protéger les fondations, le sous-sol, le béton, la maçonnerie, etc. contre le gel ou les dommages.
- .2 Ne pas les enlever tant que tout danger de dommage n'est pas écarté et tant que la cure n'est pas terminée.
- .3 Munir les ouvertures extérieures de fermetures protectrices provisoires à l'épreuve des intempéries, jusqu'à ce que les châssis, les vitres et les portes extérieures soient installés en permanence.
- .4 Fournir et installer des fermetures avec verrou, afin d'assurer la sécurité des installations du CNRC, et en être responsable.
- .5 Sur demande, remettre des clés au personnel de sécurité du CNRC.
- .6 Disposer les ouvrages avec soin et avec précision. Vérifier toutes les dimensions et en être responsable. Situer les points de repère généraux et prendre les mesures nécessaires pour empêcher leur déplacement.
- .7 Pendant toute la durée des travaux, voir à toujours être au courant des conditions du chantier et des travaux exécutés par tous les autres gens de métier, engagés dans le présent projet.
- .8 Sauf indication contraire, dissimuler tous les services, tuyauterie, câblage, conduits, etc. dans les planchers, les murs ou les plafonds.

39. ENTREPOSAGE

- .1 Pour ne pas que les outils, matériaux, etc. soient endommagés ou volés, prévoir un entrepôt et en être responsable.
- .2 Il est interdit d'entreposer des produits inflammables ou explosifs sur le chantier à moins que l'Agent de prévention des incendies du CNRC l'autorise.

40. EXAMEN GÉNÉRAL

- .1 Même si le représentant ministériel revoit périodiquement les travaux de l'Entrepreneur, ceci ne dégage pas l'Entrepreneur de sa responsabilité d'exécuter les travaux conformément aux documents contractuels. L'Entrepreneur doit effectuer son propre contrôle de la qualité pour vérifier si ses travaux sont conformes aux documents contractuels.
- .2 Informer le représentant ministériel de tout obstacles à la bonne conduite des travaux et obtenir son approbation pour la relocalisation

41. INSPECTION DES SERVICES ENFOUIS OU DISSIMULÉS

- .1 Avant de dissimuler tout service installé, s'assurer que tous les organismes d'inspection intéressés, y compris le CNRC, ont inspecté les ouvrages et ont assisté à tous les essais. Dans le cas contraire, l'Entrepreneur peut avoir à les découvrir à ses propres frais.

42. ESSAIS

- .1 A l'achèvement des travaux, ou sur demande du représentant ministériel et (ou) des inspecteurs des organismes locaux en cours d'exécution, et avant que tout service soit couverts et que le rinçage soit terminé, faire l'essai de toutes les installations en présence du représentant ministériel.
- .2 Obtenir tous les certificats d'acceptation ou tous les résultats d'essais des organismes compétents et les remettre le représentant ministériel. Dans le cas contraire, le projet ne sera pas complet.

43. OCCUPATION PARTIELLE

- .1 Le CNRC peut demander une occupation partielle de l'installation si les travaux se poursuivent au-delà de la date d'achèvement prévue.
- .2 Ne pas limiter l'accès à l'édifice, routes et services.
- .3 Ne pas encombrer inutilement le chantier de matériaux ou de matériel.

44. ÉVACUATION DES DÉCHETS

- .1 Évacuer, en toute sécurité hors des terrains du CNRC, tous les déchets, y compris les produits volatils; voir article "Sécurité-incendie et "Sécurité générale", section 01000.

45. NETTOYAGE PENDANT LA CONSTRUCTION

- .1 Sur une base quotidienne, garder les lieux et le secteur adjacent au campus, y compris les toits, exempts de débris et de déchets.

- .2 Apporter sur les lieux des conteneurs destinés à la cueillette des déchets et des débris.

46. NETTOYAGE FINAL

- .1 A la fin des travaux, effectuer le nettoyage final à la satisfaction du représentant ministériel.
- .2 Nettoyer toutes les nouvelles surfaces, les luminaires et les surfaces existantes touchés par les présents travaux, remplacer les filtres, etc.
- .3 Nettoyer tous les couvre-planchers souples et les préparer à recevoir le fini protecteur qui sera appliqué par le personnel du CNRC.

47. GARANTIE

- .1 Voir les conditions générales C, section GC32.
- .2 Veiller à ce que toutes les garanties soient adressées au nom de l'entrepreneur et du Conseil national de recherches du Canada.

48. MANUELS D'ENTRETIEN

- .1 À la fin des travaux et avant la décharge de garantie, soumettre deux (2) exemplaires bilingues des manuels d'entretien ou deux exemplaires de chacune des versions anglaises et françaises ainsi qu'une copie électronique de la même information.
- .2 Bien relier les données dans des cahiers à couverture rigide pour feuilles volantes.
- .3 Les manuels doivent renfermer les instructions d'exploitation et d'entretien, les garanties, les dessins d'atelier, la documentation technique, etc. touchant les matériaux et les appareils fournis aux termes du présent contrat.

FIN DE SECTION

1. EXIGENCES GÉNÉRALES DE SÉCURITÉ EN CONSTRUCTION

- .1 L'Entrepreneur doit prendre toutes les mesures nécessaires lors de l'exécution du contrat pour protéger le personnel (travailleurs, les visiteurs, le public général, etc...) et la propriété immobilière.
- .2 L'Entrepreneur est le seul responsable pour la sécurité de ses employés, des employés de ses sous-traitants et pour l'initiation, le maintien et la supervision des précautions, programmes et procédures de sécurité en rapport avec l'exécution des travaux.
- .3 L'Entrepreneur doit se conformer à la réglementation et les codes de sécurité Fédéraux, Provinciaux et municipaux et ainsi que la Loi sur la santé et la sécurité au travail (Ontario) à la Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail (CSPAAT). Advenant des conflits entre les dispositions de la législation ou des codes, les dispositions les plus sévères s'appliqueront.
- .4 La révision périodique du travail de l'Entrepreneur par le représentant ministériel en utilisant les critères des documents contractuels ne relève pas l'Entrepreneur de ses responsabilités vis-à-vis la sécurité lors de l'accomplissement des travaux selon les documents contractuels. L'Entrepreneur doit consulter avec le représentant ministériel pour s'assurer que cette responsabilité est acquitte
- .5 L'Entrepreneur doit s'assurer que seulement des personnes compétentes puissent avoir accès et travailler sur le chantier. Tout au cours du contrat toute personne qui n'observe pas ou n'applique pas les règlements de sécurité pourra être renvoyée du chantier.
- .6 Tous les équipements doivent être sécuritaires en bon état de fonctionnement et appropriés pour la tâche.
- .7 Suivant une évaluation du projet et des risques spécifiques au site des travaux, L'Entrepreneur doit développer un Plan de sécurité spécifique au Site
 - .1 Fournir une affiche montée dans un endroit visible du site du projet contenant les informations suivantes :
 - .1 Avis de Projet
 - .2 Politique de Sécurité Spécifique au site
 - .3 Une copie de Loi sur la santé et la sécurité au travail (Ontario)
 - .4 Un schéma du bâtiment indiquant toutes les sorties d'urgence
 - .5 Les procédures en cas d'urgence spécifiques au bâtiment.
 - .6 Une liste de contacts pour le CNRC, l'Entrepreneur et tous les sous-traitants impliqués
 - .7 Toutes fiches signalétiques SIMDUT pertinentes
 - .8 Les numéros téléphoniques d'urgence du CNRC
- .8 L'Entrepreneur doit fournir du personnel compétent pour appliquer son programme de sécurité ainsi que tout article applicable de la Loi sur la santé et la sécurité au travail et pour s'assurer que ces directives sont suivies

- .9 L'Entrepreneur doit orienter tous ces employés ainsi que ceux des sous-traitants sous sa juridiction
- .10 Le représentant ministériel exercera une surveillance pour s'assurer que les exigences de sécurité sont rencontrées, que les documents pertinents sont bien remplis et conservés. Le contrat pourra être annulé et l'Entrepreneur ou ses sous-traitants pourront être renvoyés du chantier advenant le non-respect répétitif des standards de sécurité
- .11 L'Entrepreneur devra rapporter tout accident ou incident qui résulte de l'exécution des travaux par l'Entrepreneur et impliquant l'Entrepreneur, le personnel du CNRC ou le public au représentant ministériel et aux autorités ayant juridiction.
- .12 Si pour effectuer ses travaux, l'entrée dans un laboratoire est requise, l'Entrepreneur devra être fournir une session d'orientation concernant la sécurité et les procédures spécifiques à ce laboratoire à ses employés ainsi qu'à ceux de ses sous-traitants suivant les instructions fournies par le responsable du laboratoire ou le représentant ministériel.

2. EXIGENCES DE SÉCURITÉ INCENDIE

.1 Autorité

1. Le Commissaire des incendies du Canada (CIC) est l'autorité en matière de sécurité incendie au CNRC.
2. Aux fins du présent document, le représentant ministériel est le représentant de la CNRC en charge du projet.
3. Respectez les normes suivantes publiées par le Bureau du commissaire des incendies du Canada:
 - a. Norme 301 'Norme Travaux de construction', juin 1982;
 - b. Norme 302 'Norme Travaux de soudage et de coupage au chalumeau', juin 1982.

.2 Usage du Tabac

1. Il est interdit de fumer dans les immeubles du CNRC, ainsi que sur les toits.
2. Respectez les écriteaux "DÉFENSE DE FUMER".

.3 Travail à chaud

- .1 Vous devez obtenir un permis de 'Travail à chaud' du représentant ministériel avant d'entreprendre des travaux de soudage, de brasage, de brûlage ou d'utilisation de chalumeaux et de salamandres ou d'une flamme nue.
- .2 Avant le début du travail à chaud, réexaminez l'aire de travaux avec le représentant ministériel pour déterminer le niveau de sécurité incendie nécessaire.

.4 Signalisation des Incendies

- .1 Soyez au courant de l'emplacement exact du téléphone et de l'alarme manuelle d'incendie les plus près, ainsi que le numéro de téléphone d'urgence.
- .2 SIGNALER immédiatement tout incident comportant un feu en procédant comme suit :
 - .1 Déclenchez l'alarme manuelle d'incendie le plus près;
 - .2 Téléphonnez au numéro de téléphone d'urgence suivant:

D'UN TÉLÉPHONE DU CNRC	333
D'UN AUTRE TÉLÉPHONE	(613) 993-2411

- .3 Lorsque vous signalez un incendie par téléphone, indiquez l'endroit exact du feu, le nom et le numéro du bâtiment, et soyez prêts à vérifier le lieu
- .4 La personne qui déclenche l'alarme manuelle d'incendie doit demeurer sur la scène d'incendie pour fournir les renseignements et les indications nécessaires au personnel du service d'incendie.

.5 Réseaux Détecteurs et Alarmes d'Incendie à l'Intérieur et à l'Extérieur

- .1 N'OBSTRUEZ PAS ET NE FERMEZ PAS LES RÉSEAUX DÉTECTEURS ET ALARMES D'INCENDIE SANS L'AUTORISATION DU REPRÉSENTANT MINISTÉRIEL..
- .2 LORS D'UNE INTERRUPTION D'UN RÉSEAU AVERTISSEUR, DES MESURES SPÉCIALES DÉFINIES PAR LE REPRÉSENTANT MINISTÉRIEL DOIVENT ÊTRE PRISES POUR S'ASSURER QUE LA PROTECTION INCENDIE SOIT MAINTENUE.
- .3 NE LAISSEZ PAS LES RÉSEAUX DÉTECTEURS ET AVERTISSEURS D'INCENDIE INACTIFS A LA FIN D'UNE JOURNÉE DE TRAVAIL SANS AVOIR AVISÉ LE REPRÉSENTANT MINISTÉRIEL ET OBTENU SON AUTORISATION. LE REPRÉSENTANT MINISTÉRIEL DOIT INFORMER L'API DES DÉTAILS À CHAQUE OCCASION.
- .4 N'UTILISEZ PAS LES BORNES D'INCENDIE NI LES RÉSEAUX DE COLONNES MONTANTES ET ROBINETS ARMÉS À D'AUTRES FINS QUE LA LUTTE CONTRE L'INCENDIE SANS L'AUTORISATION DU REPRÉSENTANT MINISTÉRIEL.

.6 Extincteurs d'Incendies

- .1 Fournissez au moins un extincteur à poudre ABC (20 lb) pour chaque site de travail à chaud.
- .2 Fournissez les extincteurs suivants pour les travaux d'asphalte chaud et de toiture:
 - .1 Près du pot de goudron - 1 extincteur à poudre ABC (20 lb);
 - .2 Toiture - 2 extincteurs à poudre ABC (20 lb)..

- .3 Prévoir des extincteurs munis:
 - .1 d'une goupille et d'un sceau;
 - .2 d'un manomètre;
 - .3 d'une étiquette portant la signature d'un préposé d'une compagnie d'entretien d'extincteurs d'incendie.
 - .4 d'une étiquette portant la signature d'un préposé d'une compagnie d'entretien d'extincteurs d'incendie.
- .4 Les extincteurs à l'anhydride carbonique (CO) ne sont pas considérés comme des substituts des extincteurs ci-dessus.

.7 Travaux de Toiture

- .1 Chaudières:
 - .1 Prévoyez l'emplacement des chaudières d'asphalte et le lieu d'entreposage avec le représentant ministériel avant la livraison au chantier. N'installez pas les chaudières sur une toiture ou sur un échafaudage et placez-les à une distance d'au moins 10 m (30 pi) de tout bâtiment..
 - .2 Les chaudières doivent être équipées de thermomètres ou de jauges en bon état de fonctionnement.
 - .3 N'utilisez pas les chaudières à des températures excédant 232C (450F).
 - .4 Assurez une surveillance permanente pendant l'usage des chaudières et fournissez des couvercles de métal pour étouffer les flammes en cas de feu dans les chaudières. Fournissez les extincteurs d'incendie exigés à l'article 2.6.
 - .5 Expliquez les capacités des récipients au représentant ministériel avant le début des travaux
 - .6 Ranger les bouteilles de gaz comprimé debout à une distance d'au moins 6M (20 pieds) de la chaudière.
- .2 Balais à franges ('vadrouilles'):
 - .1 N'utilisez que des balais à franges en fibres de verre pour toitures.
 - .2 Enlevez les balais à franges usagés du lieu de travail à la fin de chaque journée de travail.
- .3 Application au chalumeau::
 - .1 N'UTILISEZ PAS DE CHALUMEAUX À PROXIMITÉ DES MURS.
 - .2 N'UTILISEZ PAS DE CHALUMEAUX POUR APPLIQUER DES MEMBRANES SUR DU BOIS EXPOSÉS OU DANS DES CAVITÉS
 - .3 Assurez une surveillance incendie conformément à l'article 2.9 de la présente section.
- .4 Rangez tous les matériaux combustibles utilisés pour les toitures à une distance d'au moins 3 m (10 pi) de toute structure.

- .5 Les bouteilles de gaz doivent être protégées des dommages mécaniques et maintenues en position verticale et à au moins d'au moins 6m (20 pieds) de la chaudière.

.8 Operations de soudure et de meulage

- .1 L'Entrepreneur doit fournir des couvertures ignifuges, des dispositifs d'extraction de fumée, de écrans et autre équipements similaires pour prévenir l'exposition aux éclairs d'arc de soudure ou étincelles de meulage

.9 Surveillance Incendie

- .1 Assurez une surveillance incendie pendant au moins une heure après la fin d'une journée de travail à chaud.
- .2 Chauffage provisoire : voir la Section 01000, Instructions générales.
- .3 Dotez les équipes de repérage des incendies des extincteurs prévus à l'article 2.6.

.10 Obstruction des voies d'évacuation des chaussées, des couloirs, des portes et des ascenseurs

- .1 Avisez le représentant ministériel avant d'entreprendre tout travail qui entraverait le libre passage du personnel du service d'incendie et de son équipement. Cela englobe toute dérogation à la hauteur libre minimale, à l'édification de barricades et au creusage de tranchées.
- .2 Les parcours d'issue du bâtiment ne doivent nullement être obstrués sans la permission expresse du représentant ministériel, qui s'assurera que des parcours de remplacement seront maintenus.
- .3 Le représentant ministériel avisera l'API de tout obstacle pouvant justifier une planification et des dispositifs de communication plus poussés pour assurer la sécurité des occupants et l'efficacité des interventions de lutte contre l'incendie.

.11 Débris et Déchets

- .1 Limitez autant que possible les détrituts et les déchets et les ranger à une distance d'au moins 20 pieds des chaudières ou des torches.
- .2 Il est interdit de faire brûler des détrituts sur le chantier.
- .3 Bennes à déchets
 - .1 En consultation avec le représentant ministériel, déterminez un emplacement sûr et acceptable avant de livrer la benne au chantier ou installer des chutes.
 - .2 Ne pas excéder la capacité de remplissage des bennes et garder le périmètre libre de tous débris
- .4 Stockage:

- .1 Soyez extrêmement prudents lorsque vous devez stocker des déchets combustibles sur les lieux de travail. Maintenez les lieux le plus propre possible et bien ventilés et respectez les normes de sécurité.
- .2 Déposez les torchons et autres matériaux graisseux ou huileux sujets à la combustion spontanée dans des contenants approuvés et évacuez-les comme exigé au paragraphe 3.1.

.12 Liquides Inflammables

- .1 La manutention, le stockage et l'utilisation de liquides inflammables sont régis par le Code national de prévention des incendies du Canada en vigueur.
- .2 Les liquides inflammables comme l'essence, le kérosène et le naphtha, peuvent être gardés sur les lieux pour fins d'usage à brève échéance en quantités ne dépassant pas 45 litres (10 Gal Imp.) , à condition d'être stockés dans les bidons de sûreté portant le sceau d'approbation des LAC (ULC). Le stockage de plus grandes quantités de liquides inflammables aux fins de l'exécution des travaux qui nécessite l'autorisation du représentant ministériel.
- .3 Il est interdit de laisser des liquides inflammable sur les toits après les heures normales de travail
- .4 Il est interdit de transvaser des liquides inflammables à l'intérieur des bâtiments..
- .5 Il est interdit de transvaser des liquides inflammables à proximité de dispositifs à flamme nue ou de tout autre type de dispositif dégageant de la chaleur.
- .6 Il est interdit d'utiliser des liquides inflammables ayant un point d'éclair inférieur à 38C (100F, tels que le naphtha ou l'essence, comme solvants ou agents de nettoyage.
- .7 Stockez les liquides résiduels inflammables dans des récipients approuvés situés dans un endroit sûr bien ventilé. Les déchets constitués de liquides inflammables doivent être régulièrement évacués du chantier.
- .8 Lorsque des liquides inflammables, tels que des laques ou des uréthanes, sont utilisés, veillez à ce que la ventilation soit adéquate et éliminer toute source d'inflammation. Prévenez le représentant ministériel avant le début de tels travaux et une fois les travaux achevés.

3. Questions et/ou demandes d'explications

- .1 Adressez vos questions ou demandes d'explications concernant la sécurité incendie au représentant ministériel.

1.3 SUBMITTALS

- .1 Make submittals in accordance with Section 01 33 00 – Submittal Procedures.
- .2 Submit 3 copies of engineering calculations or data verifying the

capacity of the members and the ability of the assemblies to meet the design requirements.

- .3 Submit shop drawings in accordance with Section 01 33 00.
 - .1 Each shop drawing submitted shall bear the stamp and signature of a qualified Professional Engineer who is registered and licensed to practice in the Province of Ontario. The metal stud systems contractor shall retain the services of a Professional Structural Engineer for the Project and pay for engineering services in connection with shop drawings and review during construction of the metal stud systems.
 - .2 Include all necessary shop details and erection diagrams. Indicate member sizes, locations, thicknesses exclusive of coating, coatings and materials. Include connection details for attaching framing to itself and for attachment to the structure. Show splice details where permitted. Indicate dimension, openings, requirement of related work and critical installation procedures. Show temporary bracing required for erection purposes.
 - .3 Indicate design loads.
- .4 Do not fabricate until all submittals are reviewed by the Architect.
- .5 Submit 3 copies of field review reports from the Systems Contractors Structural Engineer.
- .6 Contractor shall retain and pay for a qualified Professional Engineer who is licensed to practice in the Province of Ontario, to verify and provide a written statement that installed steel stud systems will withstand factored loads identified in items listed above. The written statement shall bear the stamp and signature of the Professional Engineer.

1.4 DESIGN CRITERIA

- .1 Provide and pay for structural engineering and design for the following:
 - .1 Control Room 123 and B.F. WC 123A, wall and ceiling assembly.
 - .2 East wall stud wall along gridline 13 between gridlines B.6 and C.5.
- .2 The design for the entire wall system, framing, suspension system, and anchoring to the building structure shall be based on principles using factored loads and resistances.
- .3 Loads, load factors and seismic restraints shall be in accordance with the 2012 Ontario Building Code the User's Guide NBC 2015 Structural Commentaries, Commentary.
- .4 Resistances and resistance factors shall be determined in accordance with the 2012 Ontario Building Code and CAN/CSA-S136.

- .6 Design bridging to prevent member rotation and member translation perpendicular to the minor axis. Provide for secondary stress effects due to torsion between lines of bridging. Sheathing shall **not** be used to help restrain member rotation and translation perpendicular to the minor axis for: wind bearing studs.
- .7 Maximum deflections under specified loads shall be $L/600$.
- .8 Design components or assemblies to accommodate specified erection tolerances of the structure.
- .9 Wall stud framing spacing shall not exceed 400 mm o/c (16")
- .10 Allow for movement of the building structure. Design wind bearing stud end connections to accommodate deflections of the building structure such that the studs are not loaded axially.
- .11 Connections between stud framing members shall be by bolts, welding or sheet metal screws.
- .12 Resistances for sheet metal screw shall be based on the manufacturer's lower bound test values multiplied by the appropriate resistance factor, given in CAN3-S136.
- .13 Allow for appropriate end eccentricities in the design of axial load bearing members.
- .14 Design framing of openings to support glazed pressed metal screens, doors and windows.

**1.5 DELIVERY,
STORAGE AND
HANDLING**

- .1 Protect steel studs during transportation, site storage and installation in accordance with CSSBI Sheet Steel Facts #3.
- .2 Handle and protect galvanized materials from damage to zinc coating.

PART 2 – PRODUCTS

2.1 MATERIALS

- .1 Steel: to CSA S136, fabricated from ASTM A 653/A653M, grade as required for structural performance.
- .2 Zinc coated steel sheet: quality to ASTM A 653/A653M.
- .3 Welding materials: to CSA W59 and certified by Canadian Welding Bureau.
- .4 Screws: self-drilling, self-tapping sheet metal screws, corrosion protected with minimum zinc coating thickness of 0.008 mm.

- .5 Anchors: concrete expansion anchors or other suitable drilled type fasteners.
- .6 Bolts, nuts, washers: hot dipped galvanized to CAN/CSA-0164.
- .7 Touch up primer: zinc rich, to CAN/CGSB 1-GP-181.

2.2 STEEL STUD DESIGNATIONS

- .1 Colour code: to CSSBI Technical Bulletin Vol. 7, No. 2.

2.3 EXTERIOR WALL METAL FRAMING

- .1 EXTERIOR WALL CHANNEL STUD FRAMING: to ASTM C1007-latest edition; stud side 203 mm deep; 152 mm, and 92 mm as indicated on drawings; roll formed from minimum 18 gauge thickness (0.0428 inch – 1.09 mm) hot dip galvanized sheet steel; for screw attachment of cementitious and gypsum based sheathing boards and steel girth. Knock out service holes at 460 mm centres.
- .2 EXTERIOR STUD WALL FLOOR TRACKS: to ASTM C955-latest edition, in widths to suit stud sizes. 50 mm + flange height, to suit individual conditions; roll formed from minimum 18 gauge thickness (0.0428 inch – 1.09 mm), hot dip galvanized sheet steel. Increase gauge as required to meet design criteria.
- .3 EXTERIOR STUD WALL TOP TRACKS: to ASTM C955-latest edition, in width to suit stud sizes complete with long legged and slotted inner and outer top track to accommodate deflection of the building structure. Screwed top track deflection as per Bailey Construction Detail No. A3. Finish to match wall stud framing. Roll formed from minimum 18 gauge thickness (0.0428 inch – 1.09 mm). Increase gauge as required to meet design criteria.
- .4 Bridging: fabricated from same material and finish as studs, 38 x 12 x 1.09 mm minimum thickness.
- .5 Angle clips: fabricated from same material and finish as studs, 38 x 38 mm x depth of steel stud, 1.37 mm minimum thickness, capable of accommodating upward and downward vertical displacement of primary structure through positive mechanical attachment to stud web and capable of resisting forces imposed by the wall system.
- .6 Tension straps and accessories: as recommended by manufacturer and as required for structural performance.
- .7 Insulating strip: rubberized, moisture resistant 3 mm thick neoprene strip, 12 mm wide, with self-sticking adhesive on one (1) face, lengths as required.

PART 3 - EXECUTION

3.1 GENERAL

- .1 Do welding in accordance with CSA W59.
- .2 Certification of companies: CSA W47.1 for fusion welding and CSA W55.3 for resistance welding.
- .3 Do work to CSSBI S5.

3.2 ERECTION

- .1 Erect components to requirements of reviewed shop drawings.
- .2 Anchor tracks securely to structure at spacing required for structural performance.
- .3 Erect studs plumb, aligned and securely attached as required for structural performance.
- .4 Install studs at not more than 50.0 mm from abutting walls, openings, and each side of corners and terminations with dissimilar materials.
- .5 Brace steel studs with horizontal internal bridging at 1500 mm maximum and as required for structural performance.
 - .1 Fasten bridging to steel clips fastened to steel studs with screws or by welding.
- .6 Frame openings in stud walls to adequately carry loads by use of additional framing members and bracing as detailed on shop drawings.
- .7 Touch up welds with coat of zinc rich primer.

**3.3 ERECTION
TOLERANCES**

- .1 Plumb: not to exceed 1/500th of member length.
- .2 Camber: not to exceed 1/1000th of member length.
- .3 Spacing: not more than +/- 3.0 from design spacing.
- .4 Gap between end of stud and track web: not more than 4.0 m.

3.4 CUTOUTS

- .1 Maximum size of cutouts for services as follows:

Member Depth	Across Member Depth	Along Member Length	Centre to Centre Spacing (mm)
92	40 max.	105 max.	600 min.
102	40 max.	105 max.	600 min.
152	65 max.	115 max.	600 min.

- .2 Limit distance from centreline of last unreinforced cutout to end of member to less than 300 mm.

**3.5 STRUCTURAL
CERTIFICATION**

- .1 Upon completion of work, identified in Item 1.3 and 1.4, provide a certificate that shall state that the work has been performed in accordance with requirements of the Ontario Building Code and Regulations of Authorities in Jurisdiction. The certificate shall bear the seal of a qualified Structural Engineer who is licensed in the Province of Ontario.

- .4 CAN/ULC-S701-11, Standard for Thermal Insulation, Polystyrene, Boards and Pipe coverings.

- 1.3 SUBMITTALS**
- .1 Product Data:
 - .1 Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 00 10 00.
 - .2 Manufacturer's Instructions:
 - .1 Submit manufacturer's installation instructions.
- 1.4 QUALITY ASSURANCE**
- .1 Test Reports: certified test reports showing compliance with specified performance characteristics and physical properties.

PART 2 - PRODUCTS

- 2.1 INSULATION**
- .1 Semi-rigid insulation, Mineral fibre board: to CAN/ULC-S702, ASTM C 612.
 - .1 Density: 70 kg/m³.
 - .2 Surfaces: unsurfaced.
 - .3 Thickness: as indicated.
 - .4 Acceptable Material:
Rockwool Cavity Rock Insulation as manufactured by Rockwool Inc.
- 2.2 ACCESSORIES**
- .1 For concrete block or poured concrete - Insulation clips: impale type, perforated 50 x 50 mm cold rolled carbon steel 0.8 mm thick, adhesive back, spindle of 2.5 mm diameter annealed steel, length to suit insulation, 25 mm diameter washers of self locking type.

OR

Purpose-made plastic ribbed mechanical fasteners with head size of 40 mm dia., length to suit for fastening to concrete or concrete block.
 - .2 Adhesive as recommended by manufacturer, to CGSB 71-GP-24M, Type 1, compatible with insulation types, air/vapour barrier system and bituminous dampproofing

PART 3 - EXECUTION

- 3.1 MANUFACTURER'S INSTRUCTIONS**
- .1 Compliance: comply with manufacturer's written data, including product technical bulletins, product catalogue installation instructions, product carton installation instructions, and data sheets.

- 3.2 WORKMANSHIP**
- .1 Install insulation after building substrate materials are dry.
 - .2 Install insulation to maintain continuity of thermal protection to building elements and spaces.
 - .3 Cut and trim insulation neatly to fit spaces. Butt joints tightly, offset vertical joints. Use only insulation boards free from chipped or broken edges. Use largest possible dimensions to reduce number of joints.
 - .4 Offset both vertical and horizontal joints in multiple layer applications.
 - .5 Do not enclose insulation until it has been inspected and approved by Departmental Representative.
- 3.3 CAVITY WALL INSTALLATION**
- .1 Install mineral fibre insulation boards as detailed and as recommended by Insulation Manufacturer.
- 3.4 PERIMETER FOUNDATION INSULATION**
- .1 Extend boards on exterior and interior face of foundation wall and underslab as indicated.
- 3.5 CLEANING**
- .1 Upon completion of installation, remove surplus materials, rubbish, tools and equipment barriers.

 - .1 Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 01 33 00.
- .2 Manufacturer's Instructions:
 - .1 Submit manufacturer's installation instructions.

1.4 QUALITY ASSURANCE

- .1 Test Reports: certified test reports showing compliance with specified performance characteristics and physical properties.
- .2 Certificates: product certificates signed by manufacturer certifying materials comply with specified performance characteristics and criteria and physical requirements.

PART 2 PRODUCTS

2.1 INSULATION

- .1 Sound attenuation batt insulation: to CAN/ULC S702-latest edition, Type 1 (without membrane). Thickness to match depth of wall cavity.

.1 Acceptable Materials:

- .1 "Safe 'N' Sound" batt insulation and/or "Acoustical Fire Batts - AFB" as manufactured by Roxul Inc.
- .2 "Quiet Zone" noise stop blanket - 700 Series as manufactured by Owens Corning Canada Inc.
- .3 Eco Touch Pink Quite Zone Pink Fiberglas Acoustic Insulation.
- .4 "Noise Reducer" Sound Attenuation Batt by Certain Teed Insulation.

2.2 ACCESSORIES

.1 Insulation clips:

- .1 For concrete block and concrete back-up walls and gypsum sheathing boards - Impale type, perforated 50 x 50 mm cold rolled carbon steel 0.8 mm thick, adhesive back, spindle of 2.5 mm diameter annealed steel, length to suit insulation, 25 mm diameter washers of self locking type.
- .2 For Steel Stud back-up walls - Insulations screws complete with 50mm diameter white polypropylene washer. Screws to be of length to suit installation, corrosion resistance to DIN 50018.2.01 and ASTM B117, self-tapping, Phillips head screws. Retaining washer to be made of polypropylene and is to be a minimum of 50 mm diameter.

.1 Standard of Acceptance: Grid-Mate by, ITW Buildex

- .3 Nails: galvanized steel, length to suit insulation plus 25 mm, to CSA B111.
- .4 Staples: 12 mm minimum leg.
- .5 Tape: as recommended by manufacturer.

PART 3 EXECUTION

3.1 MANUFACTURER'S INSTRUCTIONS

- .1 Compliance: comply with manufacturer's written data, including product technical bulletins, product catalogue installation instructions, product carton installation instructions, and data sheets.

3.2 INSULATION INSTALLATION

- .1 Install insulation to maintain continuity of thermal protection to building elements and spaces and to ASTM C 1320.
- .2 Fit insulation closely around electrical boxes, pipes, ducts, frames and other objects in or passing through insulation.

- .3 Do not compress insulation to fit into spaces.
- .4 Keep insulation minimum 75 mm from heat emitting devices such as recessed light fixtures.
- .5 Install insulation where indicated. Lap ends and side flanges of membrane over framing members. Retain in position with nails, staples, insulation clips or wire ties installed as recommended by manufacturer. Tape seal butt ends and lapped side flanges. Do not tear or cut vapour barrier.
- .6 Fit insulation between window frame, door frame, and surrounding masonry opening, or other surfaces.
- .7 Do not enclose insulation until it has been inspected and approved by Architect.

3.3 CLEANING

- .1 Upon completion of installation, remove surplus materials, rubbish, tools and equipment barriers.

END OF SECTION

PART 1 GENERAL

1.1 SECTION INCLUDES

- .1 Materials and installation methods providing air vapour barrier materials and assemblies.

1.4 SUBMITTALS

- .1 Submit shop drawings in accordance with Section 01 33 00.

- .2 Submit manufacturer's product data sheets in accordance with Section 01 33 00.
- .3 Submit manufacturer's installation instructions in accordance with Section 01 33 00.

1.5 QUALITY ASSURANCE

- .1 Perform Work in accordance with Sealant and Waterproofer's Institute – Sealant and Caulking Guide Specification requirements for materials and installation.
- .2 Perform Work in accordance with National Air Barrier Association – Professional Contractor Quality Assurance Program and manufacturer's requirements for materials and installation.
- .3 At the beginning of the work and at all times during the execution of the work, allow access to work site by the air/vapour barrier membrane manufacturer's representative.
- .4 Components used in this section shall be sourced from one manufacturer, including sheet membrane, air/vapour barrier sealants, primers, mastics and adhesives.

1.6 MOCK-UP

- .1 Construct mock-up in accordance with Section 01 33 00.
- .2 Construct typical exterior wall panel, incorporating window and frame and sill, insulation, junction with roof system and illustrating materials interface and seals.
- .3 Locate where directed.
- .4 Allow 24 h for inspection of mock-up by Architect before proceeding with air/vapour barrier work.

1.7 DELIVERY, STORAGE AND HANDLING

- .1 Deliver, store and handle materials in accordance with Section 01 61 00 Common Product Requirements.
- .2 Deliver, store and handle materials in accordance with manufacturer's written instructions.
- .3 Avoid spillage. If spillage occurs and start clean up procedures.
- .4 Clean spills and leave area as it was prior to spill.
- .5 Deliver materials to the job site in undamaged and original packaging indicating the name of the manufacturer and product.
- .6 Store roll materials on end in original packaging.
- .7 Store adhesives and primers at temperatures of 5°C and above to facilitate handling.
- .8 Keep solvent away from open flame or excessive heat.
- .9 Protect rolls from direct sunlight until ready for use.

1.8 PROJECT ENVIRONMENTAL REQUIREMENTS

- .1 Do not install solvent curing sealants or vapour release adhesive materials in enclosed spaces without ventilation.
- .2 Maintain temperature and humidity recommended by materials manufacturers before, during and after installation.

1.9 SEQUENCING

- .1 Sequence work to permit installation of materials in conjunction with related materials and seals.

1.10 WARRANTY

- .1 Provide a three year warranty.
- .2 Warranty: Include coverage of installed sealant and sheet materials which fail to achieve air tight and watertight seal, exhibit loss of adhesion or cohesion, or do not cure.

PART 2 PRODUCTS

2.1 SHEET MATERIALS

- .1 Sheet air/vapour barrier membrane, an SBS modified bitumen, self-adhering sheet membrane complete with engineered thermoplastic film. Membrane shall have the following physical properties:
 - .1 ASTM E2357: Standard Test Method for Determining Air Leakage of Air Barrier Assemblies,
 - .2 Air leakage: <0.0001 CFM/ft² @1.6 lbs/ft² to ASTM E2178 and ASTM E283 and have no increased air leakage when subjected to a sustained wind load of 10.5 lbs/ft² for 1 hour and gust wind load pressure of 62.8 lbs/ft² for 10 seconds when tested at 1.6 lbs/ft² to ASTM E331,
 - .3 Vapour permeance: 0.03 perms to ASTM E96 (Desiccant Method),
 - .4 Membrane Thickness: 0.0394 inches (40 mils),
 - .5 Low temperature flexibility: -22 degrees F to CGSB 37-GP-56M,
 - .6 Elongation: 200% to ASTM D412-modified,
 - .7 Meets CAN/CGSB-51-33 Type I Water Vapor Permeance requirements
 - .8 Acceptable Material: Blueskin[®] SA manufactured by Henry; For application temperatures down to 10 degrees F use Blueskin[®] SA LT.

2.2 SEALANTS

- .1 Termination Sealant; a moisture cure, medium modulus polymer modified sealing compound having the following physical properties:
 - .1 Compatible with sheet air barrier, roofing and waterproofing membranes and substrate,
 - .2 Complies with Fed. Spec. TT-S-00230C, Type II, Class A,
 - .3 Complies with ASTM C 920, Type S, Grade NS, Class 25,
 - .4 Elongation: 450 – 550%,
 - .5 Remains flexible with aging,
 - .6 Seals construction joints up to 1 inch wide
 - .7 Acceptable Material: HE925 BES Sealant manufactured by Henry

2.3 INSULATION ADHESIVES

- .1 Insulation adhesive; a synthetic, trowel applied, rubber based adhesive, having the following physical properties:
 - .1 Compatibility: With air barrier membrane, substrate and insulation,
 - .2 Air leakage: 0.0026 CFM/ft² @ 2.1 lbs/ft² to ASTM E283,
 - .3 Water vapour permeance: 0.03 perms to ASTM E96,
 - .4 Long term flexibility: CGSB 71-GP-24M
 - .5 Acceptable Material: Air-Bloc 21 Insulation Adhesive manufactured by Henry

2.4 PRIMERS

- .1 Primer for self-adhering membranes at temperatures above 25 degrees F; a polymer emulsion based adhesive, quick setting. Primer shall have the following physical properties:
 - .1 Colour: Aqua,
 - .2 Weight: 8.7 lbs/gal,
 - .3 Solids by weight: 53%,
 - .4 Water based, no solvent odours,
 - .5 Drying time (initial set): 30 minutes at 50% RH and 70 degrees F
 - .6 Acceptable Material: Aquatac™ Primer manufactured by Henry

PART 3 EXECUTION

3.1 EXAMINATION

- .1 Verify that surfaces and conditions are ready to accept the Work of this section. Notify architect in writing of any discrepancies. Commencement of the work or any parts thereof shall mean acceptance of the prepared substrates.
- .2 All surfaces must be sound, dry, clean and free of oil, grease, dirt, excess mortar or other contaminants. Fill spalled areas in substrate to provide an even plane. Strike masonry joints flush.
- .3 Where curing compounds are used they must be clear resin based without oil, wax or pigments.
- .4 Do not proceed with application of air barrier membrane when rain is expected within 24 hours.
- .5 Condition materials to room temperature prior to application to facilitate handling.

3.2 PREPARATION

- .1 Surfaces must be sound, clean and free of oil, grease, dirt, excess mortar or other contaminants. Fill spalled areas in substrate to provide an even plane.
- .2 New concrete should be cured for a minimum of 14 days and must be dry before air/vapour barrier membranes are applied.
- .3 Ensure all preparatory Work is complete prior to applying primary air/vapour barrier membrane.

- .4 Mechanical fasteners used to secure sheathing boards or penetrate sheathing boards shall be set flush with sheathing and fastened into solid backing.
- .5 Apply primer at rate recommended by manufacturer to all areas to receive self-adhering sheet air/vapour barrier membrane and or through-wall flashing membrane as indicated on drawings by roller or spray and allow minimum 30 minute open time. Primed surfaces not covered by self-adhering membrane or self-adhering through-wall flashing membrane during the same working day must be re-primed.

3.3 INSTALLATION

- .1 Install materials in accordance with manufacturer's instructions.

.2 INSIDE AND OUTSIDE CORNERS

- .1 Seal inside and outside corners of sheathing boards with a strip of self-adhering air/vapor barrier membrane extending a minimum of 3 inches on either side of the corner detail.
 - .1 Prime surfaces as per manufacturers' instructions and allow to dry.
 - .2 Align and position self-adhering transition membrane, remove protective film and press firmly into place. Ensure minimum 2 inches overlap at all end and side laps of membrane.
 - .3 Roll all laps and membrane with a counter top roller to ensure seal.

.3 TRANSITION AREAS

- .1 Tie-in to structural beams, columns, floor slabs and intermittent floors, parapet curbs, foundation walls, roofing systems and at the interface of dissimilar materials as indicated in drawings with self-adhering air/vapor barrier membrane.
 - .1 Prime surfaces as per manufacturers' instructions and allow to dry.
 - .2 Align and position self-adhering transition membrane, remove protective film and press firmly into place. Provide minimum 3 inch lap to all substrates.
 - .3 Ensure minimum 2 inch overlap at all end and side laps of membrane.
 - .4 Roll all laps and membrane with a counter top roller to ensure seal.

.4 WINDOWS AND ROUGH OPENINGS

- .1 Wrap rough openings with self-adhered air/vapour barrier membrane as detailed.
 - .1 Prime surfaces as per manufacturer's instructions and allow to dry.
 - .2 Align and position self-adhering transition membrane, remove protective film and press firmly into place. Ensure minimum 2 inch overlap at all end and side laps of membrane.
 - .3 Roll all laps and membrane with a counter top roller to ensure seal.

.5 THROUGH-WALL FLASHING MEMBRANE

- .1 Apply through-wall flashing membrane along the base of masonry veneer walls and over shelf angles as detailed.
 - .1 Prime surfaces and allow to dry, press membrane firmly into place, overlap minimum 2 inches at all end and side laps. Promptly roll all laps and membrane to ensure the seal.
 - .2 Applications shall form a continuous flashing membrane and shall extend up a minimum of 8 inches up the back-up wall.
 - .3 Seal the top edge of the membrane where it meets the substrate using termination sealant. Trowel-apply a feathered edge to seal termination to shed water.
 - .4 Install through-wall flashing membrane and extend 1/2 inch from outside edge of veneer. Provide end dam flashing as detailed.

.6 PRIMARY AIR/VAPOUR BARRIER

- .1 Apply self-adhering air/vapour barrier membrane complete and continuous to prepared and primed substrate in an overlapping shingle fashion and in accordance with manufacturer's recommendations and written instructions. Stagger all vertical joints.
 - .1 Prime surfaces as per manufacturers' instructions and allow to dry.
 - .2 Align and position self-adhering air/vapour barrier membrane, remove protective film and press firmly into place. Ensure minimum 2 inch overlap at all end and side laps of membrane.
 - .3 Roll all laps and membrane with a counter top roller to ensure seal.
 - .4 At the end of each days work seal the top edge of the membrane where it meets the substrate with termination sealant. Trowel apply a feathered edge to seal termination and shed water.

3.4 INSTALLATION OF INSULATION

- .1 Coordinate with Wall Insulation for insulating materials.
- .2 Apply insulation adhesive in a serpentine pattern over the air barrier membrane.
 - .1 Dab Method: Apply walnut-sized dabs of insulation adhesive spaced 6 inches on centre to substrate. Apply insulation using sufficient hand pressure to compress dabs up to 2 inches.
 - .2 Bead Method: Apply ¼ inch beads 6 inches on centre in a serpentine pattern.
- .3 Immediately embed insulation into the adhesive and press firmly into place to ensure full contact. Apply additional adhesive if allowed to skin over.

3.5 PROTECTION OF WORK

- .1 Damp substrates must not be inhibited from drying out. Do not expose the backside of the substrate to moisture or rain.
- .2 Cap and protect exposed back-up walls against wet weather conditions during and after application of membrane.
- .3 Air/Vapour barrier membrane is not designed for permanent exposure. Good practice calls for covering as soon as possible.

- .4 Ensure finished work is protected from climatic conditions.

3.6 AIR/VAPOUR BARRIER MEMBRANE

- .1 Pre-apply membrane sealing compound to changes in-plane and out-of-plane variations.
- .2 Apply membrane complete and continuous to primed substrate in an overlapping shingle fashion and in accordance with manufacturer's recommendations and written instructions. Stagger all vertical joints.
- .3 Align, position and dry-fit sheet membrane, remove protective film and press firmly into place. Ensure minimum 50 mm overlap at all end and side laps. To ensure full adhesion, promptly apply pressure by rolling all membrane surfaces using acceptable roller. Re-roll laps.
- .4 At the end of each day's work, seal the top edge of the membrane where it meets the substrate using membrane sealing compound. Trowel apply a feathered edge to seal termination and shed water.
- .5 Ensure all projections, including anchors are properly sealed with a caulk application of membrane sealing compound.
- .6 Membrane applied to the underside of substrate shall receive special attention on application to ensure maximum surface area adhesion is obtained.
- .7 Use sheets of largest practical size to minimize joints.
- .8 Before work is concealed, inspect sheets for continuity. Repair punctures and tears with membrane patches, at least 50 mm wider than the defect, on all sides. Seal edges of repair patches with membrane sealing compound.

END OF SECTION

PART 1 - GENERAL

- 1.1 SECTION INCLUDES** .1 Materials, preparation and application for caulking and sealants.
- 1.2 RELATED WORK** .1 Masonry Procedures Section 04 05 00
.2 Acoustical caulking Section 09 21 16
- 1.3 REFERENCES** .1 American Society for Testing and Materials International, (ASTM)
- .1 ASTM C 919-Latest Edition, Standard Practice for use of Sealants in Acoustical Applications.
 - .2 ASTM C 661 - Standard Test Method for Indentation Hardness of Elastomeric Type Sealants by means of a Durometer.
 - .3 ASTM C 794 - Test Method for Adhesion-in-Peel of Elastomeric Joint Sealants.
 - .4 ASTM C834 - Specification for Latex Sealants.
 - .5 ASTM C 920 - Specification for Elastomeric Joint Sealants.
 - .6 ASTM C 1087 - Test Method for Determining Compatibility of Liquid-Applied Sealants with Accessories Used in Structural Glazing Systems.
 - .7 ASTM C 1193 - Guide for Use of Joint Sealants.
 - .8 ASTM C 1248 - Test Method for Staining of Porous Substrate by Joint Sealants.
 - .9 ASTM C 1311 - Specification for Solvent Release Sealants.
 - .10 ASTM C 1330 - Cylindrical Sealant Backing for Use with Cold Liquid Applied Sealants.
 - .11 ASTM D 412 - Test Methods for Vulcanized Rubber and Thermoplastic Elastomers—Tension.
 - .12 ASTM D 624 - Test Method for Tear Strength of Conventional Vulcanized Rubber and Thermoplastic Elastomers.
 - .13 ASTM D 2240 - Test Method for Rubber Property - Durometer Hardness.
 - .14 ASTM E 283 - Test Method for Determining Rate of Air Leakage Through Exterior Windows, Curtain Walls, and Doors Under Specified Pressure Differences Across the Specimen.

- .18 ASTM C1135 – Standard Test Method for Determining Tensile Adhesion Properties of Structural Sealants.
- .19 ASTM D412 - Standard Test Method for Vulcanized Rubber and Thermoplastic Rubbers and Thermoplastic Elastomers – Tension.
- .20 ASTM D2202 – Standard Test Method for Slump of Sealants.

.2 Canadian General Standards Board (CGSB)

- .1 CAN/CGSB-19.13-M87, Sealing Compound, One-Component, Elastomeric, Chemical Curing.
- .2 CAN/CGSB-19.24-M90, Multi-component, Chemical Curing Sealing Compound.

.3 Department of Justice Canada (Jus)

- .1 Canadian Environmental Protection Act, 1999 (CEPA).

.4 Health Canada/Workplace Hazardous Materials Information System (WHMIS)

- .1 Material Safety Data Sheets (MSDS).

.5 Transport Canada (TC)

- .1 Transportation of Dangerous Goods Act, 1992 (TDGA).

.6 Underwriter's Laboratories of Canada (ULC)

- .1 CAN/ULC S102-07 Standard Method of Test for Surface Burning Characteristics of Building Materials and Assemblies.

1.4 SUBMITTALS

.1 Submit product data in accordance with Section 01 33 00 - Submittal Procedures.

.2 Manufacturer's product to describe.

- .1 Caulking compound.
- .2 Primers.
- .3 Sealing compound, each type, including compatibility when different sealants are in contact with each other.

.3 Submit samples in accordance with Section 01 33 00 - Submittal Procedures.

- .4 Submit duplicate samples of each type of material and colour.
- .5 Cured samples of exposed sealants for each colour where required to match adjacent material.
- .6 Submit manufacturer's instructions in accordance with Section 01 33 00 – Submittal Procedures.
 - .1 instructions to include installation instructions for each product used.

**1.5 QUALITY
ASSURANCE / MOCK-UP**

- .1 Construct mock-up in accordance with Section 01 33 00.
- .2 Construct mock-up to show location, size, shape and depth of joints complete with back-up material, primer, caulking and sealant.
- .3 Mock-up will be used:
 - .1 To judge workmanship, substrate preparation, operation of equipment and material application.
- .4 Locate where directed.
- .5 Allow 48 hours for inspection of mock-up by Consultant before proceeding with sealant work.
- .6 When accepted, mock-up will demonstrate minimum standard of quality required for this Work. Approved mock-up may remain as part of finished Work.
- .7 Adhesion test: Apply silicone sealant to small area and perform adhesion test in accordance with ASTM C1193, Method A, to determine if primer is required to achieve adequate adhesion. If necessary, apply primer at rate and in accordance with manufacturer's instructions.

1.6 WARRANTY

- .1 Provide a written warranty in the name of the Owner: Original statement on Installer's letterhead in which Installer agrees to repair or replace joint sealants that demonstrate deterioration or failure within warranty period specified.
 - .1 Warranty Period: Five years from date of Certificate of Substantial Performance.
- .2 Special Manufacturer's Warranty: Manufacturer's Standard form in which joint sealant manufacturer agrees to furnish joint sealants to repair or replace those that demonstrate deterioration or failure under normal use within warranty period specified.

.1 Warranty Period for Silicone Sealants: 20 years date of Certificate of Substantial Performance.

.3 Warranty Conditions: Special warranties exclude deterioration or failure of joint sealants in normal use due to structural movement resulting in stresses on joint sealants exceeding sealant manufacturer's written specifications, joint substrate deterioration, mechanical damage, or normal accumulation of dirt or other contaminants.

**1.7 DELIVERY,
STORAGE AND HANDLING**

.1 Deliver, handle, store and protect materials in accordance with Section 01 61 00.

.2 Deliver and store materials in original wrappings and containers with manufacturer's seals and labels, intact. Protect from freezing, moisture, water and contact with ground or floor.

**1.8 WASTE MANAGEMENT
AND DISPOSAL**

.1 Separate waste materials for recycling.

.2 Remove from site and dispose of packaging materials at appropriate recycling facilities.

.3 Collect and separate for disposal packaging material in appropriate on-site bins for recycling in accordance with Waste Management Plan.

.4 Place materials defined as hazardous or toxic in designated containers.

.5 Handle and dispose of hazardous materials in accordance with the CEPA, TDGA, Regional and Municipal regulations.

.6 Unused sealant material must not be disposed of into sewer system, into streams, lakes, onto ground or in other location where it will pose health or environmental hazard.

.7 Divert unused joint sealing material from landfill to official hazardous material collections.

.8 Empty plastic joint sealer containers are not recyclable. Do not dispose of empty containers with plastic materials destined for recycling.

.9 Fold up metal banding, flatten, and place in designated area for recycling.

**1.9 PROJECT
CONDITIONS**

.1 Environmental Limitations:

- .1 Do not proceed with installation of joint sealants under following conditions:
 - .1 When ambient and substrate temperature conditions are outside limits permitted by joint sealant manufacturer or are below 4.4 degrees C.
 - .2 When joint substrates are wet.
- .2 Joint-Width Conditions:
 - .1 Do not proceed with installation of joint sealants where joint widths are less than those allowed by joint sealant manufacturer for applications indicated.
- .3 Joint-Substrate Conditions:
 - .1 Do not proceed with installation of joint sealants until contaminants capable of interfering with adhesion are removed from joint substrates.

1.10 ENVIRONMENTAL REQUIREMENTS

- .1 Comply with requirements of Workplace Hazardous Materials Information System (WHMIS) regarding use, handling, storage, and disposal of hazardous materials; and regarding labelling and provision of Material Safety Data Sheets (MSDS) acceptable to Labour Canada.
- .2 Conform to manufacturer's recommended temperatures, relative humidity, and substrate moisture content for application and curing of sealants including special conditions governing use.
- .3 Ventilate area of work by use of approved portable supply and exhaust fans.

PART 2 - PRODUCTS

2.1 SEALNT MATERIALS

- .1 Products and manufacturers specified establish performance and quality required and are not intended to restrict submission by other manufacturers.
- .2 Acceptance of Products from other manufacturers will be subject to review by the Consultant, for conformity with the Specifications and meeting the physical characteristics of the specified Products. Include compliance with referenced standards. Submittals which do not include adequate data for the product evaluation will not be considered.
- .3 If unapproved, substitute products are included in the bid, the specified Products shall be provided without additional compensation.
- .4 Do not use caulking that emits strong odours, contains toxic chemicals or is not certified as mould resistant in air handling units.

- .5 When low toxicity caulks are not possible, confine usage to areas which off gas to exterior, are contained behind air barriers, or are applied several months before occupancy to maximize off gas time.
- .6 Where sealants are qualified with primers use only these primers.
- .7 Compatibility: Provide joint sealants and accessory materials that are compatible with one another, and with materials in close proximity under use conditions, as demonstrated by sealant manufacturer using ASTM C1087 testing and related experience.
- .8 Joint Sealant Standard: Comply with ASTM C 920 and other specified requirements for each liquid-applied joint sealant.
- .9 Stain Test Characteristics: Where sealants are required to be non-staining, provide sealants tested per ASTM C 1248 as non-staining on porous joint substrates indicated for Project.

**2.2 SEALANT
MATERIAL DESIGNATIONS**

- .1 Type 1: Single-Component, Nonsag, Neutral-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 100/50, for Use T, NT; SWRI validation.
 - .1 Basis of Design Product: **DOW CORNING® 790 Silicone Building Sealant.**
 - .2 Hardness, ASTM C 661: 15 durometer Shore A.
 - .3 Volatile Organic Compound (VOC) Content: 26 g/L maximum.
 - .4 Staining, ASTM C 1248: None on concrete, granite, limestone, and brick.
 - .5 Colour: As selected by Architect from manufacturer's full line.
- .2 Type 2: Single-Component, Nonsag, Neutral-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 50, for Use NT; SWRI validation.
 - .1 Basis of Design Product: **DOW CORNING® 756 SMS Building Sealant.**
 - .2 Hardness, ASTM C 661: 35 durometer Shore A.
 - .3 Volatile Organic Compound (VOC) Content: 60 g/L maximum
 - .4 Staining, ASTM C 1248: None on white marble.
 - .5 Colour: As selected by Architect from manufacturers full line.
- .3 Type 4: Single-Component, Nonsag, Neutral-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 50, for Use NT, G, A, and O; SWRI validation.

- .1 Basis of Design Product: **DOW CORNING® 795 Silicone Building Sealant.**
 - .2 Hardness, ASTM C 661: 35 - 45 durometer Shore A.
 - .3 Volatile Organic Compound (VOC) Content: 32 g/L maximum
 - .4 Staining, ASTM C 1248: None on concrete, granite, limestone, and brick.
 - 5 Colour: As selected by Architect from manufacturers full line.
- .4 Type 6: Single-Component, Nonsag, Neutral-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 25, for Use NT; SWRI validation.
- .1 Basis of Design Product: **DOW CORNING® 758 Silicone Weather Barrier Sealant.**
 - .2 Hardness, ASTM D 2240: 45 durometer Shore A.
 - .3 Volatile Organic Compound (VOC) Content: 61 g/L maximum
 - .4 Colour: White.
- .5 Type 7: Single-Component, Nonsag, Acid-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 25, for Use NT.
- .1 Basis of Design Product: **DOW CORNING® 999-A Silicone Building & Glazing Sealant.**
 - .2 Hardness, ASTM D 2240: 25 durometer Shore A minimum.
 - .3 Volatile Organic Compound (VOC) Content: 36 g/L maximum
 - .4 Ultimate Tensile, ASTM D 412: 325 psi (1.2 MPA) at 21 day cure (Dumbbell)
 - .5 Colour: As selected by Architect from manufacturers full line.
- .6 Type 8: Mildew-Resistant, Single-Component, Nonsag, Acid-Curing Silicone Joint Sealant: ASTM C 920, Type S, Grade NS, Class 25, for Use NT.
- .1 Basis of Design Product: **DOW CORNING® 786 Silicone Sealant.**
 - .2 Hardness, ASTM D 2240: 25 durometer Shore A
 - .3 Volatile Organic Compound (VOC) Content: 36 g/L maximum.
 - .4 NSF Standard 51 and FDA Regulation No. 21 CFR 177.2600 compliant.
 - .5 Colour: As selected by Architect from manufacturer's standard colours.

- .7 Type 9: Latex Joint Sealant: Siliconized acrylic latex, ASTM C 834, Type OP, Grade NF.
- .8 Type 10: Butyl-Rubber-Based Joint Sealant: ASTM C 1311.
- .9 PRE-FORMED JOINT SEALANTS
 - .1 Type 11: Preformed Silicone Elastomer Extrusion: Highly flexible low-modulus flashing and transition material for bonding to substrates with silicone sealant. SWRI validation.
 - .1 Basis of Design Product: **DOW CORNING® 123 Silicone Seal.**
 - .2 Surface: Textured.
 - .3 Bonding Sealant: Manufacturer's recommended neutral-curing silicone.
 - .4 Hardness, ASTM D 2240: 25 durometer Shore A, minimum.
 - .5 Colour: As selected by Architect from manufacturer's full line.
 - .2 Type 12: Preformed Silicone Elastomer Custom Two- and Three- Dimension Extrusion: Highly flexible flashing and transition material for bonding to substrates with silicone sealant.
 - .1 Basis of Design Product: **DOW CORNING® 123 Silicone Seal Custom Designs H.C.**
 - .2 Formulation: General Purpose.
 - .3 Shape: Multi-dimensional as indicated on drawings and approved shop drawings and as required to fit and functionally seal specific application and prevent air and water penetration
 - .4 Bonding Sealant: Manufacturer's recommended neutral-curing silicone.
 - .5 Colour: As selected by Architect from manufacturer's full line.
- .10 WEATHER BARRIER TRANSITIONS
 - .1 Type 13: Silicone Elastomer Weather Barrier Transition: Highly flexible clear flashing and transition strip and pre-molded corners for bonding with silicone sealant to weather barrier substrates and to adjacent curtain wall, storefront, and window frames and other transition substrates.
 - .1 Basis of Design Product: **DOW CORNING® Silicone Transition Strip (STS).**

- .2 Hardness, ASTM D 2240: 50 - 60 durometer Shore A.
 - .3 Colour: Translucent
 - .4 Air Infiltration, ASTM E 283: Maximum 0.025 cfm/sq. ft. (0.127 L/s per sq. m) at 6.24 lbf/sq. ft. (300 Pa).
 - .5 Water Penetration under Static Pressure, ASTM E 331: None at 15 lbf/sq. ft. (720 Pa).
 - .6 Movement Capability: Not less than plus 200, minus 75 percent.
 - .7 Tensile Strength, ASTM D 412: Not less than 800 psi (5.5 MPa).
 - .8 Tear Strength, ASTM D 624: Not less than 200 psi (16 kN/m).
 - .9 Elongation, ASTM D 412: Not less than 400 percent.
 - .10 Bonding Sealant: Manufacturer's recommended neutral-curing silicone.
- .11 ACOUSTICAL SEALANT
- .1 Type 14 – Acoustical Sealant
 - .1 Foam sealant.
 - .2 Flames Spread Rating: < 25, in accordance With CAN/ULC-S102.
 - .3 Smoke Development Classification: < 50, in accordance with CAN/ULC-S102.
 - .4 Sealants must have a VOC limit of less than 250 g/L, as per SCAQMD Rule 1168, October 2003.
 - .2 Type 15 – Acoustical Sealant, Paintable.
 - .1 To ASTM C834.
 - .2 Sealants must have a VOC limit of less than 250 g/L, as per SCAQMD Rule 1168, October 2003.
 - .3 Colour: white.
- .12 EXPANSION JOINT SEAL
- .1 Type 16 – Seismic Expansion Joint
 - .1 Waterproof seal with thermal insulation with 100% movement capability, UV stability, and with colour coordination with adjacent surfaces.
 - .2 Preformed sealant shall be silicone pre-coated, preformed, pre-compressed, self-expanding, sealant system. Expanding foam to be cellular foam impregnated with a water-based, non-drying, 100% acrylic dispersion. Seal shall combine factory-applied, low-modulus silicone and a backing of

acrylic-impregnated expanding foam into a unified hybrid sealant system.

- .3 Material shall be capable of movements of +50%, -50% (100% total) of nominal material size
- .4 Silicone external color facing to be factory-applied to the foam while it is partially pre-compressed to a width greater than maximum joint extension and cured before final compression. When compressed to final supplied dimension, a bellow(s) to handle movement must be created in the silicone coating. Silicone coating shall be available in a range of not less than 26 standard colors for coordination with adjacent building materials.
- .5 Acceptable manufacturer: SEISMIC COLORSEAL as manufactured by EMSEAL JOINT SYSTEMS LTD

2.3 SEALANT SELECTION

- .1 Perimeters of exterior openings where aluminum and FRP frames meet exterior facade of building (insulated metal wall panels): Sealant Type 2 or Type 4.
- .2 Expansion and control joints in exterior surfaces of poured-in-place concrete walls: Sealant Type 1.
- .3 Expansion and control joints in exterior surfaces of precast, architectural wall panels: Sealant Type 1.
- .4 Control and expansion joints in exterior surfaces of unit masonry walls: Sealant Type 1 or Type 4.
- .5 Coping joints and coping-to facade joints: Sealant Type 2.
- .6 Cornice and wash or horizontal surface joints: Sealant Type 2.
- .7 Exterior joints in horizontal wearing surfaces (as itemized): Sealant Type 1.
- .8 Seal interior perimeters of exterior openings as detailed on drawings: Sealant Type 1 or Type 4.
- .9 Control and expansion joints on the interior of exterior poured-in place concrete walls: Sealant Type 1.
- .10 Control and expansion joints on the interior of exterior surfaces of unit masonry walls: Sealant Type 1.
- .11 Interior control and expansion joints in floor surfaces: Sealant Type 1.
- .12 Perimeters of interior frames, as detailed and itemized: Sealant Type 4.
- .13 Interior masonry vertical control joints (block-to-block, block-to-concrete, and intersecting masonry walls): Sealant Type 1.

- .14 Joints at tops of non-load bearing masonry walls at the underside of poured concrete: Sealant Type 1.
- .15 Perimeter of bath fixtures (e.g. sinks, tubs, urinals, waterclosets, basins, vanities): Sealant Type 8.
- .16 Exposed interior control joints in drywall: Sealant Type 9.
- .17 Acoustical Partitions as detailed and in accordance with Section 09 21 16 – Gypsum Board: Sealant Type 3: Acoustical for concealed applications, except in return air plenums where fire stopping sealants specified in Section 07 84 00 shall be used.
- .18 Acoustical Partitions as detailed and in accordance with Section 09 21 16 – Gypsum Board: Sealant Type 4: Acoustical for exposed applications.
- .19 Top of ceramic tile bases, top and sides of countertops and backsplash: Sealant Type 8.
- .20 Exterior door thresholds bead of sealant over entire length of threshold: Sealant Type 2.
- .21 Glazing butt sealant: Type 7 for clear interior or Type 4 for exterior.
- .22 Air Barrier membranes to facades or window frames: Sealant Type 6.
- .23 Expansion joint between new and existing building: Sealant Type 16.
- .24 Penetrations through non-fire rated floor slabs and walls: Sealant Type 1 on both sides of penetration, and semi-rigid insulation and sealant backing to fill cavity.

2.4 ACCESSORIES

- .1 Joint Substrate Primers: Substrate primer recommended by sealant manufacturer for application.
- .2 Cylindrical Sealant Backing: ASTM C 1330, Type B non-absorbent, bi-cellular material with surface skin, or Type O open-cell polyurethane, as recommended by sealant manufacturer for application.
- .3 Bond Breaker Tape: Polymer tape compatible with joint sealant materials and recommended by sealant manufacturer.

2.5 JOINT CLEANER

- .1 Non-corrosive and non-staining type, compatible with joint forming materials and sealant recommended by sealant manufacturer.
- .2 Primer: as recommended by manufacturer.

PART 3 - EXECUTION

- 3.1 PROTECTION** .1 Protect installed Work of other trades from staining or contamination.
- 3.2 SURFACE PREPARATION** .1 Examine joint sizes and conditions to establish correct depth to width relationship for installation of backup materials and sealants.
- .2 Clean bonding joint surfaces of harmful matter substances including dust, rust, oil grease, and other matter which may impair Work.
- .3 Do not apply sealants to joint surfaces treated with sealer, curing compound, water repellent, or other coatings unless tests have been performed to ensure compatibility of materials. Remove coatings as required.
- .4 Ensure joint surfaces are dry and frost free.
- .5 Prepare surfaces in accordance with manufacturer's directions.
- 3.3 PRIMING** .1 Where necessary to prevent staining, mask adjacent surfaces prior to priming and caulking.
- .2 Prime sides of joints in accordance with sealant manufacturer's instructions immediately prior to caulking.
- 3.4 BACKUP MATERIAL** .1 Apply bond breaker tape where required to manufacturer's instructions.
- .2 Install joint filler to achieve correct joint depth and shape, with approximately 30% compression.
- 3.5 MIXING** .1 Mix materials in strict accordance with sealant manufacturer's instructions.
- 3.6 APPLICATION** .1 Sealant:
- .1 Apply sealant in accordance with manufacturer's written instructions.
- .2 Mask edges of joint where irregular surface or sensitive joint border exists to provide neat joint.
- .3 Apply sealant in continuous beads.
- .4 Apply sealant using gun with proper size nozzle.

- .5 Use sufficient pressure to fill voids and joints solid.
 - .6 Form surface of sealant with full bead, smooth, free from ridges, wrinkles, sags, air pockets, embedded impurities.
 - .7 Tool exposed surfaces before skinning begins to give slightly concave shape.
 - .8 Remove excess compound promptly as work progresses and upon completion.
- .2 Curing:
- .1 Cure sealants in accordance with sealant manufacturer's instructions.
 - .2 Do not cover up sealants until proper curing has taken place.
- .3 Cleanup:
- .1 Clean adjacent surfaces immediately and leave Work neat and clean.
 - .2 Remove excess and droppings, using recommended cleaners as work progresses.
 - .3 Remove masking tape after initial set of sealant.

END OF SECTION

PART 1 - GENERAL

- 1.1 SECTION INCLUDES**
- .1 Non-fire rated acoustic pressed steel frames.
 - .2 Non-fire rated acoustic hollow metal doors.
 - .3 Perimeter and bottom acoustic seals, threshold and astragal.
- 1.2 RELATED SECTIONS**
- .1 Section 04 05 12: Masonry grout fill of metal frames.
 - .2 Section 07 92 00 – Joint Sealing: Caulking between door assemblies and adjacent construction.
 - .3 Section 09 91 23 – Painting: Field Painting of doors and frames.
- 1.3 REFERENCES**
- .1 ASTM A653/A653M-15e1 - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process.
 - .2 ASTM E90-09(2016) - Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions and Elements.
 - .3 ASTM E413-16 - Classification for Rating Sound Insulation.
 - .4 AWS D1.1/D1.1M:2015, Structural Welding Code - Steel.
 - .5 CSA G40.20-13/G40.21-13 - General requirements for rolled or welded structural quality steel / Structural quality steel.
 - .6 CSDMA, Selection and Usage Guide for Steel Doors and Frames, 2009.
 - .7 HMMA 802-07 - Manufacturing of Hollow Metal Doors and Frames.
 - .8 HMMA 840-07 - Installation and Storage of Hollow Metal Doors and Frames.
 - .9 HMMA 865-13 - Guide Specifications For Swinging Sound Control Hollow Metal Doors and Frames.
 - .10 National Building Code 2015.

1.4 SUBMITTALS

- .1 Section 00 10 00: Submission procedures.
- .2 Product Data: Provide product data on door construction.
- .3 Shop Drawings: Indicate door and frame elevations, anchor types and spacing, closure methods, finishes, location of cut-outs for hardware.
- .4 Samples: Submit manufacturer's door finish samples.
- .5 Test Data:
 - .1 Submit test data indicating compliance with the performance requirements specified in Section 2.2.
 - .2 Include laboratory name, test report number, and date of test.
 - .3 Submit certification from internationally recognized testing laboratory.
- .6 Installation Instructions: Submit manufacturer's installation instructions.

1.5 QUALITY ASSURANCE

- .1 Perform Work to requirements of CSDMA (Canadian Steel Door Manufacturers Association), HMMA (Hollow Metal Manufacturers Association) standards.
- .2 Provide Products of this section from a single manufacturer, unless components are referenced specifically in other sections.
- .3 Manufacturer: Minimum 5 years documented experience manufacturing sound control door assemblies.
- .4 Pre-installation Meeting: Convene a pre-installation meeting 1 week before installation of acoustic door and frame assemblies. Require attendance from relevant subcontractors, consultants, and manufacturer's representative. Review installation and coordination with other work.

1.6 DELIVERY, STORAGE AND PROTECTION

- .1 Comply with HMMA 840, and manufacturer's written instructions.
- .2 Weld minimum two temporary jamb spreaders per frame prior to shipment on frames shipped in one piece.
- .3 Remove doors and frames from wrappings or coverings upon receipt on site and inspect for damage.
- .4 Store in vertical position, spaced with blocking to permit air circulation between components. Stand doors on top end, to avoid damage to bottom end.

- .5 Store materials out of water and covered to protect from damage.
- .6 Clean and touch up scratches or disfigurement caused by shipping or handling with zinc-rich primer.

1.7 WARRANTY

- .1 Manufacturer's Limited Warranty: Five (5) years from date of supply, covering material and workmanship.

PART 2 – PRODUCTS

2.1 MANUFACTURERS

Basis of design: Alternative manufacturers may be accepted if acoustic performance requirements can be met or exceeded. Refer to Section 00 21 13 Instructions to Bidders for substitution requirements.

400	55	44	44
500	57	45	45
630	59	46	46
800	61	47	47
1000	63	48	48
1250	66	49	49
1600	69	49	49
2000	71	49	49
2500	72	49	49
3150	75	49	49
4000	77	51	49
5000	79	53	45
6300	79	53	45
8000	79	53	45
10000	79	53	45

- .2 Metal Doors, frames and anchoring system shall be designed to withstand factored loads in accordance with National Building Code 2015, and applicable standards.

2.3 MATERIALS

- .1 Sheet Steel:
 - .1 Galvanized steel to ASTM A653/A653M, ZF75 (A25), minimum 1.5 mm (16 ga).
- .2 Reinforcement: Same material as sheet steel.

2.4 FABRICATION

- .1 Manufacture doors and frames to meet the specified performance ratings with minimum door surface density indicated below.

- .2 Steel Sound Control Doors:
 - .1 Sheet steel faces, thickness, design, and core suitable to achieve specified acoustic performance.
 - .2 Acoustic core construction, longitudinal edges tacked and filled seamless.
 - .3 Reinforce doors where surface-mounted hardware is required.
 - .4 Drill and tap for mortised, templated hardware.
 - .5 Top Channel: Minimum 14ga welded steel channel tacked and filled seamless.
 - .6 Bottom Channel: Minimum 14ga welded steel channel to fit bottom seal.
 - .7 Structural steel core to prevent racking and allow site assembly of oversized doors if required due to size.
 - .8 Doors shipped in 1 section up to 5' wide x 12' tall. Doors over 5' wide or 12' tall may be shipped in multiple sections for site assembly by door installer.
 - .9 Hollow door shall be stiffened with steel ribs and all voids filled with semi-rigid insulation minimum density 24 kg/m³.
 - .10 Astragals: Metal acoustic astragals with integral acoustic seals for double doors. Standard overlapping active/inactive.
- .3 Steel Sound Control Frames:
 - .1 Sheet steel, metal thickness as required to maintain specified performance ratings, mitred corners, fully welded seams.
 - .2 Structural steel reinforced frame to support the weight of the doors.
 - .3 Frame shipped in 1 piece when smallest overall dimension is no more than 109". Frames with overall width and height over 109" to be shipped in multiple pieces for site assembly by frame installer.
 - .4 Provide anchors for the installation in masonry walls, existing masonry walls and concrete walls. Anchors type, spacing, installation method shall meet structural requirements specific for door type, size, wall type, and weight.
- .4 Install and adjust perimeter and bottom acoustic seals around frames and mullions.
- .5 Affix permanent nameplates to door and frame, indicating manufacturer's name, and STC rating of the provided TL test data for the corresponding door design.

2.5 FINISHES .1 Factory Door Finish: Factory applied zinc phosphate primer; apply touch up primer where Product has been welded and ground smooth.

2.6 ACCESSORIES

- .1 Hinges: By door manufacturer.
- .2 Latching Hardware: Commercial Grade Door latches, hinges, and surface bolts supplied by door manufacturer.
- .3 Primer: Rust inhibitive zinc phosphate.
- .4 Threshold: Smooth top to provide a seal for door in closed position.
- .5 Steel Astragal: Supplied loose for field installation by door installer. Overlapping astragal to be a minimum 2 mm (14 ga) thick.
- .6 Acoustic seals: Provide perimeter and bottom seals to meet the specified acoustic rating.

PART 3 – EXECUTION

3.1 INSTALLATION

- .1 Install components to manufacturer's written instructions.
- .2 Fully grout or concrete fill frames installed using masonry or existing wall anchors.
- .3 Door and seals to be installed by door manufacturer or certified installers, supervised by door manufacturer's representative.
- .4 Install steel doors and frames to CSDMA HMMA 840 standards.
- .5 Utilize welders certified by Canadian Welding Bureau (CWB) for field welding.
- .6 Coordinate with masonry, gypsum board, and concrete wall construction for anchor placement.
- .7 Set frames plumb, square, level at correct elevation.
- .8 Allow for deflection to ensure that structural loads are not transmitted to frame.
- .9 Adjust operable parts for correct clearances and function.
- .10 Install and adjust perimeter and bottom acoustic seals.
- .11 Finish paint in accordance with Section 09 91 23.
- .12 Touch up painted finishes where damaged.

**3.2 ERECTION
TOLERANCES**

- .1 Maximum deviation from square, alignment, twist and plumb:
± 0.75 mm (1/32") over a 7' span.

**3.3 FIELD QUALITY
CONTROL**

- .1 Provide qualified manufacturer's representative to instruct installers on the proper installation and adjustment of door assemblies.
- .2 Provide manufacturer's representative to inspect door installation, and test minimum five (5) cycles of operation. Correct any deficient doors.

.14 CAN/CGSB-69.35-M89/ANSI/BHMA A156.19-2013, Power Assist and Low Energy Power Operated Doors.
.15 CAN/CSA-B651-04.
.16 All hardware for fire rated openings shall meet ULC or Warnock-Hersey testing as required.
.17 All fire and life safety codes shall be met as required by the authority having jurisdiction.
- 1.3 SUBMITTALS** .1 Product Data:
.1 Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 00 10 00 - Submittal Procedures.

- .2 Hardware List:
 - .1 Submit contract hardware list in accordance with Section 00 10 00 - Submittal Procedures.
 - .2 Indicate specified hardware, including make, model, material, function, size, finish and other pertinent information.
- .3 Manufacturer's Instructions:
 - .1 Submit manufacturer's installation instructions.
- .4 Closeout Submittals
 - .1 Provide operation and maintenance data for door closers, locksets, door holders, electrified hardware for incorporation into manual specified in Section 00 10 00 - Closeout Submittals.
- .5 Submit template information to the contractor for distribution to related trades.
- .6 Provide with templates and hardware schedule, catalogue cuts of all products proposed.

1.4 QUALITY ASSURANCE

- .1 Regulatory Requirements:
 - .1 Hardware for doors in fire separations and exit doors certified by a Canadian Certification Organization accredited by Standards Council of Canada.
- .2 Test Reports: certified test reports showing compliance with specified performance characteristics and physical properties.
- .3 Certificates: product certificates signed by manufacturer certifying materials comply with specified performance characteristics and criteria and physical requirements.
- .4 The supplier of finishing hardware shall be regularly involved in the sale and distribution of Builders Hardware for Commercial Projects of this nature
- .5 The Company shall employ a qualified hardware consultant to oversee the scheduling, detailing, ordering and coordination of this project.

1.5 DELIVERY, STORAGE, AND HANDLING

- .1 Packing, Shipping, Handling and Unloading:
 - .1 Deliver, store, handle and protect materials in accordance with Section 00 10 00.
 - .2 Package each item of hardware including fastenings, separately or in like groups of hardware, label each package as to item definition and location.
- .2 Storage and Protection:
 - .1 Store finishing hardware in locked, clean and dry area.

- 1.6 MAINTENANCE**
- .1 Extra Materials:
 - .1 Provide maintenance materials in accordance with Section 00 10 00 - Closeout Submittals.
 - .2 Supply two sets of wrenches for door closers, locksets.
 - .2 Provide maintenance data, parts lists, and manufacturer's instruction for each type door closers, locksets, door holders and fire exit hardware for incorporation into maintenance manual.

- 1.7 HARDWARE REQUIREMENTS**
- .1 NRC has a bonded locksmith for our keying system on standing contract. See contract coordinator for information.
 - .2 Contractor will be responsible to have all cylinders keyed by NRC bonded locksmith on standing offer contract.
 - .3 Contractor will be responsible to carry all associated costs for cylinders and keying of same with NRC bonded standing offer locksmith.

- 1.8 WARRANTY**
- .1 All hardware shall be warranted for a period of one (1) year from date of substantial completion.
 - .2 Door closers shall be warranted for a period of ten (10) years, and electric HDCP operators for a period of two (2) years from date of substantial completion.
 - .3 Material will be covered against manufacturing defects of breakage, willful damage excluded.

PART 2 - PRODUCTS

- 2.1 HARDWARE ITEMS**
- .1 Use one manufacturer's products only for similar items.

- 2.2 MATERIALS**
- .1 All hardware shall be supplied complete with the necessary screws, bolts and other fasteners so as to anchor the hardware in position to the consultants' approval.
 - .2 Exposed fastening devices to match finish of hardware.
 - .3 Where a pull is scheduled on one side of door and push plate on other side, supply fastening devices, and install so pull can be secured through door from reverse side. Install push plate to cover fasteners.
 - .4 Push plates and kickplates are to be supplied complete with

self-tapping countersunk flat head, flush mounting screws to suit door material.

2.3 DOOR HARDWARE

- .1 Hinges (3 per Door):
 - .1 Interior doors: Dorex 114.3mm x 101.6mm x 179 454 NRP X C15.
 - .2 Exterior doors "Dorex" BB1079-454-26D-NRP.
 - .3 Security enabled doors: Von Duprin EPT2 Transfer Hinge.
 - .4 Hager Hinge (Roton) – Continuous Hinge
- .2 Latching devices: Apply to all buildings other than buildings M-50 and M-55.
 - .1 Lockset "Yale" AU-5307LN x 626.
 - .2 Latchset "Yale" AU-5301LN x 626.
 - .3 Storeroom "Yale" AU-5305LN x 626, keyed on approach side for use with HES 4500 electric strike.
- .3 Latching devices: Apply to building M-50 only.
 - .1 Lockset: "Corbin" CL-3651 X626 x NZD.
 - .2 Latchset: "Corbin" CL-3610 x 626 x NZD.
- .4 Latching devices: Apply to building M-55 only.
 - .1 Lockset: "Sargent" 10G05LL x 26B.
 - .2 Latchset: "Sargent" 10U65LL x 26B.
- .5 Cylinders:
 - .1 Medeco, keyed to NRC key plan M19CA5 by Lister Lock.
 - .2 Contractor to carry all costs associated with keying of doors.
- .6 Electric Strikes:
 - .1 Pre-wired by door supplier.
 - .2 Model: HES 4500.
- .7 Closers: Standard duty on:
 - .1 Interior doors "Norton" 1600BC-Reg x AL. Parallel arm.
 - .2 Exterior doors "LCN" 4040XP Rw/Pa-AL (regular arm/parallel arm bracket)
 - .1 Include integral overhead stop.
- .8 Astragal: Provide 5mm thick clear anodized aluminum astragal c/w nylon brush sweep on active leaf.
 - .1 K.N.Crowder W24S clear anodized aluminum brush sweep.

- .9 Single Door Exit devices: modern-narrow stile with exit trim.
 - .1 Sargent ASSA ABLOY 8500 Series
8515xET-704-RHR-15-26D-36
- .10 Paired Door Exit devices: modern-narrow stile with exit trim.
 - .1 Sargent ASSA ABLOY 8300 Series
8315-F-xET-704-RHR-15-26D-36
 - .1 Auxiliary items: open back strike 815 with tamper proof plate.
- .11 Door bottom seal: heavy duty, door seal of extruded aluminum frame and closed cell neoprene weather seal, closed ends, adjustable with automatic retract mechanism when door is open.
 - .1 K.N. Crowder CT-52 (surface mounted OR semi-mortised)
- .12 Flush Bolt: lever action, with flat plate shoe on inactive leaf.
 - .1 Ives FB458 12" Manual 626.
- .13 Threshold: Full length and width of opening, extruded aluminum, with thermal break of rigid PVC.
 - .1 K.N. Crowder CT45
- .14 Door Holder: Provide "Hager" Kick down Door Holder 270C. S1-sprayed aluminum finish.
- .15 Door Stops: Floor Mounted Door Stops
 - .1 Acceptable Manufacturer:
 - .1 "Hager" 243F, Light duty dome stop – High, or approved equal.
- .16 Weatherstripping:
 - .1 Head and jamb seal:
 - .1 Extruded aluminum frame and hollow closed cell neoprene insert, clear anodized finish.
 - .2 Adhesive backed neoprene material.

2.4 FASTENINGS

- .1 Supply screws, bolts, expansion shields and other fastening devices required for satisfactory installation and operation of hardware.
- .2 Exposed fastening devices to match finish of hardware.
- .3 Where pull is scheduled on one side of door and push plate on other side, supply fastening devices, and install so pull can be secured through door from reverse side. Install push plate to cover fasteners.

- .4 Use fasteners compatible with material through which they pass.

2.5 KEYING

- .1 Doors, locks to be keyed as directed by Departmental Representative.
- .2 Provide keys in duplicate for every lock in this Contract.
- .3 Provide three master keys for each MK or GMK group.
- .4 Stamp keying code numbers on keys and cylinders.
- .5 Provide construction cores.
- .6 Provide all permanent cores and keys to Departmental Representative.

PART 3 - EXECUTION

3.1 MANUFACTURER'S INSTRUCTIONS

- .1 Compliance: comply with manufacturer's written data, including product technical bulletins, product catalogue installation instructions, product carton installation instructions, and data sheets.
- .2 Furnish metal door and frame manufacturers with complete instructions and templates for preparation of their work to receive hardware.
- .3 Furnish manufacturers' instructions for proper installation of each hardware component.

3.2 INSTALLATION

- .1 Install hardware to standard hardware location dimensions in accordance with Canadian Metric Guide for Steel Doors and Frames (Modular Construction) prepared by Canadian Steel Door and Frame Manufacturers' Association.
- .2 Where door stop contacts door pulls, mount stop to strike bottom of pull.
- .3 Install key control cabinet.
- .4 Use only manufacturer's supplied fasteners. Failure to comply may void manufacturer's warranties and applicable licensed labels. Use of "quick" type fasteners, unless specifically supplied by manufacturer, is unacceptable.
- .5 Remove construction cores when directed by Departmental Representative; install permanent cores and check operation of locks.

- .6 Weatherstripping and surface smoke seals shall not be installed until final coat of paint has been applied to door and frame and is completely dry.

3.3 INSTALLATION

- .1 Standard mounting heights are as follows:
- | | |
|---------------------------|---|
| Locks/Latches: | 40-5/16" centre strike to finished floor |
| Deadlock/Nightlatch: | 47" centre of strike to finished floor |
| Exit Device: | 40-5/16" centre of push bar to finished floor |
| Push Plates: | 1143 mm (45") from centre of plate to finished floor |
| Door Pulls: | 1067 mm (42") from centre of pull to finished floor |
| Automatic Door Operators: | Minimum 900 mm – maximum 1100 mm bottom of push plate to finished floor |
- .2 The above mounting heights are to be considered a general guide unless conditions such as intermediate rails, line of glass lights, etc., dictate otherwise. Installer must carefully check manufacturer's installation instructions packed with hardware products. In particular, the installation heights when using mullions and/or vertical rod devices may be predetermined by certain manufacturers.
- .3 All mineral core fire doors shall have pilot holes of 1/8" dia. predrilled for installation of hinges, and screws shall be turned into pilot holes by use of manual or "Yankee" screw driver. If installer does not follow this method, it may void door manufacturer's warranty.
- .4 Kickplates are to be installed 1/4" (6.35mm) maximum up from the bottom edge of door push side, with the exception of doors where a lip threshold is being used. Then install kickplates to clear threshold not greater than a 1/4" (6.35mm). On single doors, install in the centre of the door equally spaced to clear between the frame jamb stops and/or weatherstripping. On pairs of doors, install 1/4" (6.35mm) maximum from meeting edge of doors and the correct distance away from hinge edge of door to clear frame jamb stop and/or weatherstrip.
- .5 Thresholds are to be extended in full width of door rough opening and are to be coped around the frames. Installer to caulk threshold base to ensure proper seal.
- .6 Width of threshold shall be coordinated and adjusted to specific door opening and shall fully cover top of foundation wall.
- .7 Weatherstripping and surface smoke seals are not to be installed until final coat of paint has been applied to the door and frame and is completely dry (except for W20P type, which must be installed prior to installation of door closers and panic sets)>
- .8 Install key cabinet as directed by the Owner on site.

3.4 ADJUSTING

- .1 Adjust door hardware, operators, closures and controls for optimum, smooth operating condition, safety and for weather tight closure.
- .2 Lubricate hardware, operating equipment and other moving parts.
- .3 Adjust door hardware to provide tight fit at contact points with frames.

3.5 CLEANING

- .1 Perform cleaning after installation to remove construction and accumulated environmental dirt.
- .2 Clean hardware with damp rag and approved non-abrasive cleaner, and polish hardware in accordance with manufacturer's instructions.
- .3 Remove protective material from hardware items where present.
- .4 Upon completion of installation, remove surplus materials, rubbish, tools and equipment barriers.

1.2 REFERENCES

- .1 ASTM F1233 – 08 (2013) Test Method for Security Glazing Materials and Systems.
- .2 CAN/CGSB-12.1 – M90 Tempered or Laminated Safety Glass.
- .3 Laminators Safety Glass Association Standards Manual.

1.3 PERFORMANCE REQUIREMENTS

- .1 Provide continuity of building enclosure vapour and air barrier using glass and glazing materials as follows:
 - .1 Utilize interior lite of multiple lite sealed units for continuity of air and vapour seal.
- .2 Size glass to withstand wind loads, dead loads and positive and negative live loads acting normal to plane of glass to a design pressure in accordance with the National Building Code as measured in accordance with ASTM E330-02.
- .3 Limit glass deflection to 1/200 flexural limit of glass with full recovery of glazing materials.

1.4 SAMPLES

- .1 Submit two 300 x 300 mm (1'-0" X 1'-0") samples of glass for approval by Engineer in accordance with Section 00 10 00.

1.5 SHOP DRAWINGS

- .1 Submit manufacturer's printed product literature, specifications and data sheet in accordance with Section 00 10 00 – General Instructions.

Specifications and product data shall include:

- Type of glass and thickness
- U-Value
 - .1 Winter night
 - .2 Summer day
- Transmittance:
 - .1 Visible
 - .2 Solar
- Reflectance:
 - .1 Visible %out
 - .2 Visible %in
- Solar % out

- Shading Co-efficient (sc)
- Solar Heat Gain Co-efficient (SHGC)

- 1.6 WARRANTY** .1 For work of this section, the 120 months warranty period.
- 1.7 MAINTENANCE DATA** .1 Provide maintenance data including cleaning instructions for incorporation into maintenance manual specified in Section 00 10 00.

PART 2 - PRODUCTS

- 2.1 GLASS MATERIALS** .1 Safety glass: tempered to CAN/CGSB-12.1-M90, glazing quality of thickness indicated
- 2.2 GLAZING & SEALING COMPOUND MATERIALS**
- .1 Only compounds listed on the CGSB Qualified Products List are acceptable for use on this project.
- .2 Sealing compound: two component, polysulphide, CANCGSB-19.24-M90, type 2, Class A, colour selected by Departmental Representative.
- .3 Setting blocks: Neoprene, 80 Shore "A" durometer hardness to ASTM D2240-02b, minimum 100 mm x width of glazing rabbet space minus 1.5 mm x height.
- .4 Spacer shims: Neoprene, 50-60 Shore "A" durometer hardness to ASTM D2240-02b, 75 mm long x one-half height of glazing stop x thickness to suit application. Self adhesive on one face.
- .5 Glazing tape: Preformed butyl compound, 10-15 Shore "A" durometer hardness to ASTM D2240-02b; coiled on release paper: thickness and width as recommended by manufacturer: black colour.
- .6 Glazing splines: manufacturer's standard dry glazing splines to suit aluminum extrusion.
- .7 Glazing clips: manufacturer's standard type.
- .8 Lock-strip gaskets: to ASTM C542-94 (1999).
- .9 Primer-sealers and cleaners: to glass manufacturer's standard.

PART 3 - EXECUTION

- 3.1 EXAMINATION**
- .1 Verify that openings for glazing are correctly sized and within tolerance.
 - .2 Verify that surfaces of glazing channels or recesses are clean, free of obstructions, and ready to receive glazing.
- 3.2 PREPARATION**
- .1 Remove protective coating and clean contact surfaces with solvent and wipe dry.
 - .2 Seal porous glazing channels or recesses with substrate compatible primer or sealer.
 - .3 Prime surfaces scheduled to receive sealant.
- 3.3 WORKMANSHIP**
- .1 Place setting blocks in accordance with manufacturer's instructions.
 - .2 Install glass, rest on setting blocks, ensure full contact and adhesion at perimeter.
 - .3 Install removable stops, without displacing tape or sealant.
 - .4 Provide edge clearance of 3 mm (1/8") minimum.
 - .5 Apply cap bead of sealant at exterior void.
 - .6 Apply sealant to uniform and level line, flush with sightline and tooled or wiped with solvent to smooth appearance.
 - .7 Do not cut or abrade tempered, heat treated, or coated glass.
- 3.4 CLEANING**
- .1 Immediately remove sealant, compound droppings and glazing materials from finish surfaces.
 - .2 Remove labels after work is complete.
 - .3 Clean all glass.

END OF SECTION

ABBREVIATIONS

CB	CONCRETE BLOCK
CT-1	CERAMIC TILES - 300x600mm - EPOXY GROUT
CTB	CERAMIC TILE BASE - 600 X 160 MM HIGH - EPOXY GROUT
E	EXISTING
EC	EXISTING CONCRETE
ECB	EXISTING CONCRETE BLOCK
ECS	EXISTING CONCRETE AND CLEAR SEALER
EGBA	EXISTING GYPSUM BOARD - ABUSE RESISTANT TYPE
EIMWP	EXISTING INSULATED METAL WALL PANEL
ESTSTR	EXISTING STEEL STRUCTURE AND METAL DECK
GB	GYPSUM BOARD
GBA	GYPSUM BOARD - ABUSE RESISTANT TYPE
GBM	GYPSUM BOARD - MOISTURE RESISTANT TYPE

P	PAINT FINISH
R	RUBBER BASE
TC	SPECIAL ACRYLIC PAINT COATING FOR HUMID AREAS

IN ADDITION TO WORK INDICATED IN THE FINISH SCHEDULE, NOTE THE FOLLOWING:

- 1 EXCEPT WHERE NOTED OTHERWISE ALL BASES SHALL BE 100 mm HIGH.
- 2 PAINT ALL PRESSED METAL DOOR FRAMES AND FRAMES FOR GLAZED SCREENS.
- 3 THE FINISH SCHEDULE SHALL BE READ IN CONJUNCTION WITH INFORMATION INDICATED ELSEWHERE ON DRAWINGS AND IN SPECIFICATIONS. IN THE EVENT OF DISCREPANCIES THE MOST STRINGENT REQUIREMENT SHALL GOVERN.
- 4 PAINT ACCESS DOORS AND PANELS SAME COLOUR AS WALL, CEILING OR BULKHEAD IT IS INSTALLED IN.
- 5 IN THE EVENT A ROOM IS NOT IDENTIFIED IN THE FINISH SCHEDULE, SUCH ROOMS SHALL BE FINISHED TO A MINIMUM STANDARD AS FOLLOWS: FLOOR: CS; BASE: R; WALLS: P; CEILING:AT.
- 6 COORDINATE CEILING HEIGHTS INDICATED IN FINISH SCHEDULE WITH HEIGHTS INDICATED ON REFLECTED CEILING PLANS AND SECTION DETAILS.
- 7 PAINT ALL GYPSUM BOARD BULKHEADS AND SOFFITS.
- 8 PAINT ALL STEEL ITEMS, EXCEPT FACTORY FINISH OR STAINLESS STEEL.
- 9 IN JUNCTION BETWEEN ALL CT FLOORING, & CONCRETE, PROVIDE EXTRUDED ALUMINUM TRANSITION TRIM.
- 10 AT THE JUCTION OF DISSIMILAR FLOOR FINISHES, PROVIDE FLOOR LEVELING AS REQUIRED TO ACHIEVE SMOOTH AND LEVEL FINISH BETWEEN THE TWO MATERIALS.
- 11 DO NOT PAINT FACTORY PRE-FINISHED SURFACES UNLESS NOTED OTHERWISE.

- .15 ASTM C 1178/C1178M-01, Specification for Glass Mat Water-Resistant Gypsum Backing Board.

.4 Association of the Wall and Ceilings Industries International (AWEI)

.5 Canadian General Standards Board (CGSB)

- .1 CAN/CGSB-51.34-M86(R1988), Vapour Barrier, Polyethylene Sheet for Use in Building Construction.
- .2 CAN/CGSB-71.25-M88, Adhesive, for Bonding Drywall to Wood Framing and Metal Studs.

.6 Underwriters' Laboratories of Canada (ULC)

- .1 CAN/ULC-S102, Surface Burning Characteristics of Building Materials and Assemblies.

1.3 DELIVERY, STORAGE AND HANDLING

- .1 Deliver materials in original packages, containers or bundles bearing manufacturers brand name and identification.
- .2 Store materials inside, level, under cover. Keep dry. Protect from weather, other elements and damage from construction operations and other causes.
- .3 Handle gypsum boards to prevent damage to edges, ends or surfaces. Protect metal accessories and trim from being bent or damaged.

1.4 SITE ENVIRONMENTAL REQUIREMENTS

- .1 Maintain temperature minimum 10 degrees C, maximum 21 degrees C for 48 hours prior to and during application of gypsum boards and joint treatment, and for at least 48 hours after completion of joint treatment.
- .2 Apply board and joint treatment to dry, frost free surfaces.
- .3 Ventilation: Ventilate building spaces as required to remove excess moisture that would prevent drying of joint treatment material immediately after its application.

- 1.5 SAMPLES** .1 Submit duplicate 300 mm x 300 mm samples of the specified water resistant gypsum board in accordance with Section 01 34 00.
- 1.6 FIRE RATED CONSTRUCTION** .1 Provide fire rated wall, columns and structural braces for fire protection assemblies as indicated on drawings to ULC and WHI Test Designs and National Building Code Fire Performance Requirements. Refer to assemblies identified on drawings.
- 1.7 SHOP DRAWINGS AND SUBMITTALS** .1 Provide engineering submittal and shop drawings in accordance with Section 09 22 16.

PART 2 - PRODUCTS

- 2.1 GYPSUM BOARD PANELS**
- .1 Type 'X' interior, plain paper faced gypsum core panel to ASTM C1396M, 13 mm (where shown for horizontal shaft wall construction only), 16 mm thick, as indicated on drawings 1200 mm wide by maximum practical lengths, ends square cut, edges tapered with round edges.
- .2 Abuse resistant gypsum board: 16 mm thick Type X, and 13 mm thick Type C (for Two and Four Room facilities – outer room wall IM4), 1200 mm wide as indicated on drawings by maximum practical length.
- .1 Acceptable Material:
- .1 MoldTough VHI as manufactured by CGC;
- .2 Extreme Impact as manufactured by CertainTeed Gypsum.
- .3 Paperless Interior Glass Mat Gypsum Panels to ASTM C 473, ASTM C 630 and ASTM D 3273, 16mm thick, 1200mm wide by maximum practical lengths, ends square cut, edges tapered with round edges, Type X.
- .1 Acceptable Product:
- .1 DensArmour Plus Paperless Interior Drywall as manufactured by Georgia-Pacific Corporation
- 2.2 METAL FURRING AND SUSPENSION SYSTEMS** .1 Metal Furring Runners 0.87 mm (20 gauge), Hangers, Tie Wires, Inserts, Anchors: to ASTM C1002-04, hot dipped, galvanized.

- .2 Drywall Furring Channels: 0.87 mm (20 gauge) core thickness galvanized steel channels for screw attachment of all kinds of gypsum boards specified herein.

2.3 FASTENINGS AND ADHESIVES

- .1 Nails and Screws: to ASTM C954-04, bugle head, fine thread, rust-resistant, sharp point drywall screw for light gauge metal framing or furring. Type S-12, bugle head, fine thread, rust-resistant, drill point drywall screw for heavy gauge (12-22 gauge) steel framing. Screws for exterior application shall be zinc coated or stainless steel.
- .2 Stud adhesive: to CAN/CGSB-71.25-M88.
- .3 Laminating compound as recommended by manufacturer.
- .4 Drywall Construction Adhesive: latex based construction adhesive PL 200.

2.4 JOINT TREATMENT MATERIAL

- .1 For Interior Use:
 - .1 Joint tape: 50 mm wide, high strength cross fibre paper tape for reinforcing joints, as manufactured by C.G.C. Inc.
 - .2 Joint compound: ready-mixed all-purpose drywall compound as manufactured by C.G.C. Inc.
- .2 For Paperless Glass Mat Interior Drywall
 - .1 Joint tape for interior paperless drywall, 50 mm wide, 10 x 10 woven glass mesh joint tape
 - .2 Joint compound for Dens-Glass Gold: horizontal surfaces, G.P. gypsum "Speed Set 90" as manufactured by Georgia Pacific
- .3 For Abuse Resistant Gypsum Board
 - .1 Joint tape: 50 mm wide, high strength cross fibre paper tape for reinforcing joints, as manufactured by CGC Inc.
 - .2 Pre-filling and Filling Joint Compound: High Density 90 by Certain Teed or Durabond 90 by CGC Inc.
 - .3 Finishing Joint Compound: Ready mixed all-purpose drywall compound as manufactured by CGC Inc.

2.5 ACCESSORIES

- .1 Drywall casing and corner beads, trims, reveals, control joints and furring/framing accessories: 26 gauge, galvanized steel as manufactured by C.G.C. Inc., Bailey Metal Products Ltd., and Fryreglet.
 - .1 Casing Beads: 200-B metal trim by C.G.C.
D-200 drywall metal trim by Bailey
 - .2 Corner Beads: Dur-A-Bead No. 114 (90° and 130°)
by C.G.C.
D-100-90° by Bailey
D-100-130° by Bailey

- .3 Control Joints: Control Joint No. 093 by C.G.C.
 - .4 Extruded Aluminum Reveal Molding: DRM-50-50, DRM-50-100, DRMF-50-100
Fryreglet , refer to drawings for location
 - .5 Channel Trim: 4411 channel trim by Bailey
 - .6 Angle Framing Trim: D-300 reveal trim by Bailey
D-500 angle trim by Bailey
D-700 angle trim by Bailey
130° angle trim by Bailey
 - .7 Edge Mouldings and Trims: Custom shapes and profiles in galvanized steel or extruded aluminium to arrangements and types as indicated on drawings by Bailey.
- .2 Acoustic Sealant: to CAN/CGSB-19.24-M90.
- .1 Sealants acceptable for use on this project must be listed on CGSB Qualified Product List issued by CGSB Qualification Panel for Joint Sealants. Refer also to Section 07270.
- .3 Polyethylene: to CAN/CGSB-51GP-51M, Type 2.
- .4 Insulating Strip: rubberized, moisture resistant, 3 mm thick closed cell neoprene strip, 25 mm wide, with self sticking permanent adhesive on one (1) face; lengths as required.
- .5 Sound Attenuation Batts: Friction fit, thickness to suit and to fill entire width of stud wall. Acceptable material as specified in Section 07 21 16.
- .6 Fire Stopping Material: Refer to Specification Section 07 84 00.
- .7 Adhesive for Trim Accessories: "premium grade" contact cement.

PART 3 - EXECUTION

3.1 ERECTION

- .1 Do application and finishing of gypsum board in accordance with ASTM C 840 except where specified otherwise.
- .2 Do application of gypsum sheathing in accordance with ASTM C 1280.

- .3 Erect hangers and runner channels for suspended gypsum board ceilings in accordance with ASTM C 8440 except where specified otherwise.
- .4 Support light fixtures by providing additional ceiling suspension hangers within 150 mm of each corner and at maximum 600 mm around perimeter of fixture.
- .5 Install work level to tolerance of 1:1200.
- .6 Frame with furring channels, perimeter of openings for access panels, light fixtures, diffusers, grilles.
- .7 Install furring channels parallel to, and at exact locations of steel stud partition header track.
- .8 Furr for gypsum board faced vertical bulkheads within and at termination of ceilings.
- .9 Furr above suspended ceilings for gypsum board fire and sound stops and to form plenum areas as indicated.
- .10 Install wall furring for gypsum board wall finishes in accordance with ASTM C 840, except where specified otherwise.
- .11 Furr openings and around built-in equipment, cabinets, access panels, on four sides. Extend furring into reveals. Check clearances with equipment suppliers.
- .12 Furr duct shafts, beams, columns, pipes and exposed services where indicated.
- .13 Erect drywall resilient furring transversely across studs, joists, spaced maximum 600 mm on centre and not more than 150 mm from ceiling/wall juncture.

**3.2 INTERIOR SUSPENDED
AND FURRED CEILINGS
AND BULKHEADS SUSPENSION
SYSTEM**

- .1 Erect hangers and runner channels for suspended gypsum board ceilings in accordance with C.G.C. "Gypsum Construction Handbook" except where specified otherwise.
- .2 Install work level to tolerance of 1:1200.
- .3 4 mm (9 gauge) hangers shall be spaced not over 1200 mm for interior applications, in the direction of the 33 mm main runner channels and not over 1200 mm for interior applications, and not over 900 mm for exterior applications in the direction at right angles to the main runners, and within 150 mm of the ends of main runner runs and of boundary walls or similar interruptions of ceiling continuity.
- .4 Main runners shall be placed not over 1200 mm oc for internal applications, and maximum 900 mm oc for exterior applications, properly positioned, levelled, and hangers shall be

saddle tied along runner.

- .5 Main runners shall not be let into nor come in contact with abutting walls. Runner channels shall be located within 150 mm, 6" of the walls to support the ends of the furring channels.
- .6 Except where shown otherwise, metal furring channels shall be spaced 450 mm o.c. for internal application and 300 mm oc for exterior application. Metal furring channels shall be securely clipped with furring channel clips or saddle tied with two (2) strands of 16 gauge tie wire to main runners or main support members and shall not be let into or come in contact with abutting masonry walls.
- .7 End splices shall be provided by nesting channels or studs no less than 200 mm and securely attached with wire.
- .8 Metal furring channel clips shall be installed on alternate sides of the main runner channel. Wire tie metal furring channel to 38 mm channel and to main support members when clips cannot be alternated.
- .9 At light fixtures or any openings that interrupt the main runner or channels, reinforce grillage with 19 mm cold rolled channels, wire tied atop and parallel to the main runner channels. Provide gypsum board boxing over fixtures or other devices to maintain fire resistance rating of one (1) hour where rating is required. Size boxing of recessed light fixtures to meet fixture manufacturer's requirements for dissipation of heat.
- .10 Support light fixtures by providing additional ceiling suspension hangers within 150 mm of each corner and at maximum 600 mm around perimeter of fixture.
- .11 Frame with furring channels, perimeter of openings for access panels, light fixtures, diffusers, grilles.
- .12 Install 22 x 68 mm C.G.C. furring channels parallel to, and at exact locations of steel stud partition header track.
- .13 Furr for gypsum board faced vertical bulkheads within or at termination of ceilings. Vertical furring shall be braced type wherever possible. Where bracing is impractical, furring shall be sized to suit the condition prevailing.
- .14 Furr above suspended ceilings for gypsum board sound barriers and to form plenum areas as indicated.

3.3 INSTALLATION OF SOUND ATTENUATION BATTS

- .1 Provide sound attenuation batts in all interior steel stud wall cavities and/or as indicated.
- .2 At junction between top of a fire-rated or non-rated walls and steel deck. Install at top of wall fire-rated firestopping assembly. Refer also to Specification Section 07 84 00.

- .3 Install blanket insulation using approved by manufacturer adhesive and mechanically fasteners at 200 mm o.c. along edges and at 300 mm o.c. on field. Use impaling pins with plastic or metal black retaining plates.

3.4 WALL FURRING

- .1 Install wall furring for gypsum board wall finishes in accordance with C.G.C. "Gypsum Construction Handbook, except where specified otherwise. Use metal studs for furring where indicated.
- .2 Frame openings and also around built-in equipment, cabinets, access panels, on four (4) sides. Extend furring into reveals. Check clearances with equipment suppliers.
- .3 Furr duct shafts, beams, columns, pipes and exposed services.

3.5 RESILIENT FLOORING

- .1 Erect drywall resilient furring transversely spaced maximum 400 mm o.c. and not more than 150 mm from ceiling/wall juncture. Secure to each support.

3.6 GYPSUM BOARD APPLICATION (INTERIOR)

- .1 Do not apply gypsum board until bucks, anchors, blocking, electrical and mechanical work are reviewed by the Architect.
- .2 Apply 12 mm diameter bead of acoustic and fire stopping sealant continuously around perimeter of each face of partitioning to seal gypsum board/structure junction where partitions abut fixed building components. Seal full perimeter of cut-outs around electrical boxes, ducts, etc., in partitions where perimeter is sealed with acoustical sealant.
- .3 Install acoustic fibrous material in all metal stud partitions both above and below the ceiling to achieve minimum STC 45 rating for partition.
- .4 Install specified layers of the specified wallboard to steel studs as indicated.
- .5 Apply the specified number of layers of gypsum wallboard over steel studs:

One (1) layer: vertically;
Two (2) layers: first layer vertically, second layer horizontally.
- .6 Gypsum wallboard shall be screwed at 300 mm on centres at a maximum in the field of the board and 200 mm, 8" on centres along the vertical abutting edges.
- .7 Use 31.7 mm (1-1/4") screws for one (1) layer of wallboard; 63.4 mm (2-1/2") screws for two (2) layers of wallboard:

First layer: apply with screws as specified in para .7 above.

Second layer: laminate over first layer using the specified compound.

- .8 Install sound attenuation batts as specified herein at all interior partitions, and elsewhere specified herein or shown on the drawings. Press in tightly and staple to the back side of one (1) face of the partition.
- .9 Joints on opposite sides of the partition shall occur on different studs. Cut wallboard neatly to fit around all interruptions.
- .10 Install sealant at the perimeter and on both sides of all walls and at all interruptions.
- .11 All visible internal and external angles formed by the intersection of either wallboard surfaces or other surfaces shall be treated with galvanized steel trims, as specified herein and as indicated.
- .12 Carry all partitions to underside of concrete structure. Pack all gaps between deck and top of partitions with the specified sound attenuation batts. Use ULC approved fire stopping material for walls which are required to provide a smoke barrier or fire rating.
- .13 All abutting end or edge joints shall occur over the web surface of the furring channel and shall be fitted neatly and accurately with end joints staggered.
- .14 Gypsum wallboard shall be properly supported around all cut-outs and openings in the ceiling.
- .15 Install casing beads around perimeter of suspended soffits, bulkheads, and in addition, elsewhere where indicated on drawings.
- .16 For diffusers and access panels see also mechanical specifications and mechanical drawings for details to be complied with.
- .17 Within ceiling spaces; install smoke seal as specified in Section 07 84 00.

3.7 INSTALLATION – GENERAL

- .1 Erect accessories straight, plumb or level, rigid and at proper plane. Use full length pieces where practical. Make joints tight, accurately aligned and rigidly secured. Mitre and fit corners accurately, free from rough edges. Secure at 150 mm on centre.
- .2 Install casing beads around perimeter of suspended ceilings.
- .3 Install casing beads where gypsum board butts against surfaces having no trim concealing junction and where indicated.
- .4 Install insulating strips continuously at edges of gypsum board and casing beads abutting metal window and exterior door frames, to provide thermal break.

- .5 Install shadow mould at gypsum board/ceiling juncture as indicated. Minimize joints; use corner pieces and splicers.
- .6 Construct control joints of preformed units set in gypsum board facing and supported independently on both sides of joint.
- .7 Locate control joints where indicated at changes in substrate construction..
- .8 Install control joints straight and true.
- .9 Construct expansion joints as detailed, at building expansion and construction joints.
- .10 Install expansion joint straight and true.
- .11 Install access doors to electrical and mechanical fixtures specified in respective sections.
 - .1 Rigidly secure frames to furring or framing systems.
- .12 Finish face panel joints and internal angles with joint system consisting of joint compound, joint tape and taping compound installed according to manufacturer's directions and feathered out onto panel faces.
- .13 Gypsum Board Finish: finish gypsum board walls and ceilings to following levels in accordance with Association of the Wall and Ceiling Industries (AWCI) International Recommended Specification on Levels of Gypsum Board Finish:
 - .1 In plenum areas above suspended ceilings, Level 1: Embed tape for joints and interior angles in joint compound. Surfaces to be free of excess joint compound; tool marks and ridges are acceptable.
 - .2 Where water resistant gypsum backing board is used, Level 2: Embed tape for joints and interior angles in joint compound and apply one separate coat of joint compound over joints, angles, fastener heads and accessories; surface free of excess joint compound; tool marks and ridges are acceptable.
 - .3 At all exposed surfaces – Level 5: Embed tape for joints and interior angles in joint compound and apply three separate coats of joint compound over joints, angles, fastener heads and accessories; apply a thin skim coat of joint compound to entire surface; surfaces smooth and free of tool marks and ridges.
- .14 Finish corner beads, control joints and trim as required with two coats of joint compound and one coat of taping compound, feathered out onto panel faces.
- .15 Fill screw head depressions with joint and taping compounds to bring flush with adjacent surface of gypsum board so as to be invisible after surface finish is completed.

- .16 Sand lightly to remove burred edges and other imperfections. Avoid sanding adjacent surface of board.
 - .17 Completed installation to be smooth, level or plumb, free from waves and other defects and ready for surface finish.
 - .18 Apply one coat of white primer sealer over surface to be textured. When dry apply textured finish in accordance with manufacturer's instructions.
- 3.8 ACCESS DOORS**
- .1 Install access doors to electrical or mechanical fixtures specified in respective Sections.
 - .2 Rigidly secure frames to furring or framing system.
- 3.9 TRIM**
- .1 Minimize joints; use corner pieces as specified herein.
- 3.10 INSTALLATION OF GYPSUM WALLBOARD TREATMENT JOINT TREATMENT**
- .1 All junctions of wallboard panels shall be taped and filled in accordance with the following.
 - .1 Joint compounds shall be mixed in accordance with manufacturer's instructions and C.G.C. "Gypsum Construction Handbook".
 - .2 Prefill abutting rounded edges of eased edge gypsum wallboard with pre-fill compound. Leave a depression for tape.
 - .3 Apply the specified reinforced tape; embed it in joint compound and fold it and embed it in all angles to provide a true angle.
 - .4 A filling coat shall be applied over the embedding coat to fill board tapers flush with the wallboard surface. On joints with no taper the fill coat shall cover the tape and feather out at least 100 mm on either side of the tape.
 - .5 A finishing coat shall be applied to the fill coat and feathered to a smooth uniform finish.
 - .6 To provide a smooth surface, sanding shall occur between coats and following the final application of compound.
- .11 INSTALLATION OF PAPERLESS GLASS MAT GYPSUM PANELS**
- .1 Proceed as per paragraph 3.6 except as noted below.
 - .2 At interior ceilings and walls where indicated:

- .1 Install 16mm DensArmour Plus gypsum panels perpendicular to metal framing. Stagger end joints over framing. Butt joints together, Apply water resistant sealant to edges, ends, cut-outs with exposed core, and to fastener heads.
- .2 Install control joints to manufacturer's recommendations and as indicated on drawings.
- .3 Apply the specified reinforced tape; embed it in joint compound as specified and fold it and embed it in all angles to provide a true angle.
- .4 A filling coat shall be applied over the embedding coat to fill board tapers flush with the wallboard surface. On joints with no taper the fill coat shall cover the tape and feather out at least 100 mm on either side of the tape.
- .5 A finishing coat shall be applied to the fill coat and will be feathered to a smooth uniform finish.
- .6 To provide a smooth surface, sanding shall occur between coats and following the final application of compound.

3.13 CONTROL JOINTS

- .1 Construct control joints of preformed units set in gypsum board facing and supported independently on both sides of joint.
- .2 Provide continuous polyethylene dust barrier behind and across control joints.
- .3 For interior work, locate control joints at changes in substrate construction at approximate 5 m spacing on walls, at approximate 10 m spacing on ceilings and as indicated on drawings. Provide additional control joints as required to accommodate deflection of the building structure.
- .4 For exterior work, locate control joints as per manufacturer's recommendations and as indicated on drawings.
- .5 Install control joints straight and true.

3.14 PATCHING AND MAKING GOOD

- .1 Patch and make good new surfaces cut, damaged or disturbed, to Architect's approval.
- .2 Making good shall extend beyond the immediate limits of the disturbed surfaces to ensure the imperceptible continuity of existing decor.

END OF SECTION

PART 1 - GENERAL

- 1.1 RELATED WORK**
- .1 Masonry Anchorage and Reinforcing Section 04 05 19
 - .2 Concrete Unit Masonry Section 04 22 00
 - .3 Blanket Insulation Section 07 21 16
 - .4 Metal Doors, Frames and Screens Section 08 11 00
 - .5 Gypsum Board Section 09 21 16
- 1.2 FIRE RATED CONSTRUCTION**
- .1 Provide wall assemblies for fire rated partitions to ULC test designs.
- 1.3 REFERENCE STANDARDS**
- .1 Referenced standard shall be the latest edition except where specified otherwise:
 - .1 User's Guide NBC 2015 Structural Commentaries (Part 4 of Division B)
 - .2 Ontario Building Code 2012
 - .3 CAN/CSA-S136, current edition - Cold Formed Steel Structural Members
 - .4 CSA-W47.1, current edition - Certification of Companies for Fusion Welding of Steel Structures
 - .5 CSA-W59, current edition - Welded Steel Construction (Metal Arc Welding)
 - .6 ASTM-A653/A653M Standard Specification for Steel Sheet Zinc-Coated (Galvanized) or Zinc Iron Alloy Coated
 - .7 ASTM-C954 Standard Specification for Steel Drill Screws for Application of Gypsum Panel Products or Metal
- 1.4 DESIGN CRITERIA**
- .1 Provide and pay for structural engineering and design for the following:
 - .1 For interior walls with masonry veneer facing.
 - .2 For interior walls that support millwork and equipment.
 - .3 For suspended drywall soffits and bulkheads.
 - .4 For interior walls with top installed "Z"-shaped clips, refer to Drawings and System No. HW-D-0571 assembly.
 - .2 The design for the entire wall system, framing, suspension system, and anchoring to the building structure shall be based on principles using factored loads and resistances.

- .3 Loads, load factors and seismic restraints shall be in accordance with the 2012 Ontario Building Code the User's Guide NBC 2015 Structural Commentaries, Commentary.
- .4 Resistances and resistance factors shall be determined in accordance with the 2012 Ontario Building Code and CAN/CSA-S136.
- .5 Conform to the requirements of specified fire rated assemblies.
- .6 Design bridging to prevent member rotation and member translation perpendicular to the minor axis. Provide for secondary stress effects due to torsion between lines of bridging. Sheathing shall **not** be used to help restrain member rotation and translation perpendicular to the minor axis for: wind bearing studs.
- .7 Maximum deflections under specified loads shall be $L/600$.
- .8 Design components or assemblies to accommodate specified erection tolerances of the structure.
- .9 Wall stud framing spacing shall not exceed 400mm o/c (16")
- .10 Allow for movement of the building structure. Design wind bearing stud end connections to accommodate deflections of the building structure such that the studs are not loaded axially.
- .11 Connections between stud framing members shall be by bolts, welding or sheet metal screws.
- .12 Resistances for sheet metal screw shall be based on the manufacturer's lower bound test values multiplied by the appropriate resistance factor, given in CAN3-S136.
- .13 Allow for appropriate end eccentricities in the design of axial load bearing members.
- .14 Design framing of openings to support glazed pressed metal screens, doors and windows.

1.5 SUBMITTALS

- .1 Submit representative pieces of all framing component parts including mechanical fasteners if used. The length of pieces submitted need not exceed 300 mm. Tag pieces with the name of the part, the metal thickness exclusive of coating and the manufacturer.
- .2 Submit 3 copies of engineering calculations or data verifying the capacity of the members and the ability of the assemblies to meet the design requirements.
- .3 Submit shop drawings in accordance with Section 01 33 00.
 - .1 Each shop drawing submitted shall bear the stamp and signature of a qualified Professional Engineer who is registered and licensed to practice in the Province of Ontario.

The metal stud systems contractor shall retain the services of a Professional Structural Engineer for the Project and pay for engineering services in connection with shop drawings and review during construction of the metal stud systems.

- .2 Include all necessary shop details and erection diagrams. Indicate member sizes, locations, thicknesses exclusive of coating, coatings and materials. Include connection details for attaching framing to itself and for attachment to the structure. Show splice details where permitted. Indicate dimension, openings, requirement of related work and critical installation procedures. Show temporary bracing required for erection purposes.
- .3 Indicate design loads.
- .4 Do not fabricate until all submittals are reviewed by the Architect.
- .5 Submit 3 copies of field review reports from the Systems Contractors Structural Engineer.
- .6 Contractor shall retain and pay for a qualified Professional Engineer who is licensed to practice in the Province of Ontario, to verify and provide a written statement that installed steel stud systems will withstand factored loads identified in items listed above. The written statement shall bear the stamp and signature of the Professional Engineer.

PART 2 - PRODUCTS

2.1 MATERIALS

- .1 **NON-LOADBEARING CHANNEL STUD FRAMING FOR INTERIOR USE:** to ASTM C645-latest edition; 41 mm, 64 mm, 92 mm, 152 mm and 203 mm deep x 0.53 mm (25 gauge) minimum thickness; roll formed from electrogalvanized steel sheet, for screw attachment of gypsum board. Knock out service holes at 460 mm centres. Increase stud thickness (gauge) as required to meet design criteria for interior walls steel channel stud framing.
- .2 **FLOOR AND TOP TRACKS FOR INTERIOR STUD WALLS:** to ASTM C645-latest edition; in widths to suit stud sizes, minimum 40 mm flange height, long legged and slotted, inner and outer top track to accommodate deflection of the building structure. Top tracks for partitions located below steel roof or floor structures shall be deflection tracks which allow maximum 25 mm deflection of building structure. Tracks roll formed from minimum 25 gauge. Increase gauge as required to meet design criteria.
- .3 **METAL CHANNEL STIFFENER FOR STUD WALLS:** 2 mm thick by minimum 38 mm wide cold rolled steel, coated with rust inhibitive coating.

- .4 SHAFT WALL CONSTRUCTION: C-H metal studs, and E metal studs, 64 mm, 102 mm, 152 mm, and Type S drywall screws.
- .5 RESILIENT CHANNELS: to ASTM C645-latest edition; 25 gauge, electrogalvanized steel sheet; channel 13 mm deep.
- .6 FURRING CHANNELS: to ASTM C645-latest edition; 20 gauge electrogalvanized steel sheet; channels hat-shaped 22 mm deep.
- .7 ACOUSTICAL SEALANT: to ASTM-C919, latest edition.
- .8 INSULATING STRIP: rubberized, moisture resistant 3 mm thick neoprene strip, 12 mm wide, with self-sticking adhesive on one (1) face, lengths as required.
- .9 SCREWS, "Z"-clips for ULC System No. HW-D-0571, AND FASTENINGS FOR STUD WALL SYSTEM: purpose-made to suit application, to ASTM 954-04, Type S, shall be zinc coated, use stainless steel for exterior stud wall system.

PART 3 - EXECUTION

3.1 ERECTION OF NON LOAD BEARING CHANNEL STUD FRAMING FOR INTERIOR USE

- .1 Design wind pressures shall conform to section 59, Commentary I of User's Guide NBC 2015 Structural Commentaries.
- .2 Align partition tracks at floor and underside of metal deck and concrete structure and secure at 400 mm o.c. maximum.
- .3 Place studs vertically at 400 mm o.c. and not more than 50 mm from abutting walls, and at each side of openings and corners. Position studs in tracks at floor and ceiling. Cross brace steel studs as required to provide rigid installation to manufacturer's instructions.
- .4 Erect metal studding to tolerance of 1:1000.
- .5 Attach studs to bottom and top track or as detailed on drawings, using screws or crimp pop rivets.
- .6 Coordinate simultaneous erection of studs with installation of service lines. When erecting studs ensure web openings are aligned.
- .7 Coordinate erection of studs with installation of door/window frames and special supports or anchorage for work specified in other Sections.
- .8 Provide two (2) or more studs extending from floor to ceiling at each side of openings wider than stud centres specified or as shown on drawings. Secure studs together, 50 mm apart using column clips or other approved means of fastening placed alongside frame anchor clips.

- .9 .1 Provide one row of continuous horizontal of stiffener for all interior stud walls.
- .9 .2 At partitions over 3500 mm (12'-0") high provide two (2) rows. There upon provide one additional row of horizontal stiffener for every 1500 mm (5'0") height of partition.
- .10 Erect track at head of door/window openings and sills of sidelight/window openings to accommodate intermediate studs. Secure track to studs at each end, in accordance with manufacturer's printed instructions. Install intermediate studs above and below openings in same manner and spacing as wall studs.
- .11 Provide 40 mm stud or furring channel and wood blocking as required secured between studs for attachment of millwork, fixtures, etc., and other items including wall stops for doors, towel rails, etc., attached to steel stud partitions.
- .12 Install steel studs or furring channel between studs for attaching electrical and other boxes.
- .13 Extend partitions to underside metal deck and/or concrete except where noted otherwise.
- .14 Maintain clearance under steel structure to avoid transmission of structural loads to studs. Use 50 mm leg top tracks with stud connections at these locations to allow for movement. Refer to drawings for additional details.
- .15 Install continuous insulating strips to isolate studs from uninsulated surfaces.
- .16 Install two (2) continuous beads of sealant behind studs and tracks around perimeter of all partitions.
- .17 Extend studs vertically and tie to structure to provide lateral stability.
- .18 Provide diagonal bracing above ceilings as required to meet design criteria.
- .19 To maintain continuity of fire separation or sound separation of interior intersecting walls, extend entire wall assembly into exterior steel studs wall cavity and up to interior face of exterior sheathing board.
- .20 Frame all openings in fire rated partitions, inclusive of mechanical and electrical Channel openings, to ULC-G21, Figures 4, 5, 6, 7, 8 for and 15, ULC CR 1255, Figures 1 and 2, and ULC Certification Bulletin #80-5 (bound in at the end of this section of specifications).

**3.2 STRUCTURAL
CERTIFICATION**

- .1 Upon completion of work, identified in Item 1.4 and 1.5, provide a certificate that shall state that the work has been performed in

accordance with requirements of the Ontario Building Code and Regulations of Authorities in Jurisdiction. The certificate shall bear the seal of a qualified Structural Engineer who is licensed in the Province of Ontario.

 - .5 Terrazzo Tile and Marble Association of Canada (TTMAC)
 - .1 Tile Specification Guide 093000, Tile Installation Manual.
 - .2 Tile Maintenance Guide.
- 1.3 PRODUCT DATA**
- .1 Submit product data in accordance with Section 00 10 00
 - .2 Include manufacturer's information on:
 - .1 Ceramic tile, marked to show each type, size, and shape required.
 - .2 Chemical resistant mortar and epoxy grout.
 - .3 Transition strip.
 - .4 Flexible membrane.
 - .5 Leveling compound.
 - .6 Adhesives.

1.4 SAMPLES

- .1 Submit samples in accordance with Section 00 10 00
- .2 Wall tile: submit duplicate sample panels of each colour, size.
- .3 Floor tile: submit duplicate sample panels of each colour.
- .4 Transition and reducer strips: each type and profile.

**1.5 DELIVERY,
STORAGE AND
HANDLING**

- .1 Deliver materials in containers with labels legible and intact and grade-seals unbroken.
- .2 Store material so as to prevent damage or contamination.
- .3 Store materials in a dry area, protected from freezing, staining and damage.
- .4 Store cementitious materials on a dry surface.

**1.6 ENVIRONMENTAL
CONDITIONS**

- .1 Maintain air temperature and structural base temperature at ceramic tile installation area above 12 ° C for 48 h before, during, and 48 h after, installation.
- .2 Do not install tiles at temperatures less than 12 ° C or above 38 ° C.
- .3 Do not apply epoxy mortar and grouts at temperatures below 15 ° C or above 25 ° C.

1.7 EXTRA MATERIAL

- .1 Provide maintenance materials in accordance with Section 00 10 00.
- .2 Provide minimum 5% of each type and colour of tile required for project for maintenance use. Store where directed.
- .3 Maintenance material to be of same production run as installed material.

PART 2 - PRODUCTS

2.1 FLOOR TILE

- .1 CT-1 Floor Tiles
 - .1 Ceramic Tiles: to CAN/CGSB-75.1, Type S, Class M21, slip resistant surface.
 - .2 Acceptable Material:
 - .1 CT-1: By Olympic Yuza New Series – Lead Grey, Size: 300 x 600 mm.

2.2 WALL TILE		NOT USED
2.3 THIN SET MORTAR AND ADDITIVES	.1	Acceptable Material: .1 Thin-Set Mortar: .1 Flextile 51 as manufactured by Flextile Ltd. .2 Additive: .1 Flextile 44 as manufactured by Flextile Ltd.
	.2	Water: potable and free of minerals and chemicals which are detrimental to mortar and grout mixes.
2.4 BOND COAT	.1	Latex Portland Cement mortar: to ANSI A108.1, two-component universal dry-set mortar.
2.5 WATERPROOFING SYSTEM	.1	Flexible, load-bearing waterproofing system which consists of an elastomeric latex compound with a reinforcing fabric.
	.2	Acceptable Material: .1 Flextile WP-980 as manufactured by Flextile Ltd.
2.6 GROUT	.1	Chemical-Resistant Grout: .1 Epoxy grout: to ANSI A108.1, having quality, colour and characteristics to match epoxy bond coat. Adhesive and grout by same manufacturer. .2 Colour: Silver Grey. .3 Acceptable Material: .1 Two component flex-epoxy 100 as manufactured by Flextile Ltd.
2.7 ACCESSORIES	.1	Transition and Reducer Strips: purpose made metal anodized aluminum type. .1 At wall or floor tile termination or transition between dissimilar finishes use anodized aluminum profiles manufactured by Schluter Systems Inc. .1 Floor transition between dissimilar materials: Schluter – Schiene or approved equal .2 Wall outside corner: Schluter – Quadec. .3 Wall termination: Schluter – Jolly. .4 Floor transition between dissimilar materials – Schluter – Reno-TK. .5 Floor expansion/control joint: Schluter – Dilex – BWS.

- .2 Sealant: in accordance with Section 07 92 10 - Joint Sealing.

2.8 MIXES

- .1 Portland Cement:
 - .1 Scratch coat: 1 part portland cement, 1/5 to 1/2 parts hydrated lime to suit job conditions, 4 parts sand, 1 part water, [and latex additive where required]. Adjust water volume depending on water content of sand.
 - .2 Slurry bond coat: portland cement and water mixed to creamy paste. Latex additive may be included.
 - .3 Mortar bed for floors: 1 part portland cement, 4 parts sand, 1 part water. Adjust water volume depending on water content of sand. Include Latex additive.
 - .4 Mortar bed for walls: 1 part portland cement, 1/5 to 1/2 parts hydrated lime to suit job conditions, 4 parts sand and 1 part water. Adjust water volume depending on water content of sand. Include Latex additive.
 - .5 Levelling coat: 1 part portland cement, 4 parts sand, minimum 1/10 part latex additive, 1 part water including latex additive.
 - .6 Bond or setting coat: 1 part portland cement, 1/3 part hydrated lime, 1 part water.
 - .7 Measure mortar ingredients by volume.
- .2 Dry set mortar: mix to manufacturer's instructions.
- .3 Organic adhesive: pre-mixed.
- .4 Mix bond and levelling coats, and grout to manufacturer's instructions.
- .5 Adjust water volumes to suit water content of sand.

2.9 PATCHING AND LEVELING COMPOUND

- .1 Polymer modified, cementitious self-levelling underlayment, manufactured specifically for resurfacing and leveling concrete floors. Products containing gypsum are not acceptable.
- .2 Have not less than the following physical properties:
 - .1 Compressive strength – 33.1 MPa (@ 28 days).
 - .2 Density - 1.9 (Wet).
- .3 Capable of being applied in layers up to 50 mm thick, being brought to feather edge, and being trowelled to smooth finish.
- .4 Ready for use in 4 hours after application.
- .5 Acceptable Material:
 - .1 59 Flex-Flo self-levelling underlayment as manufactured by Flextile Ltd.
 - .2 Primer: Flextile 4040 as manufactured by Flextile Ltd.

**2.10 CLEANING
COMPOUNDS**

- .1 Specifically designed for cleaning masonry and concrete and which will not prevent bond of subsequent tile setting materials including patching and leveling compounds and elastomeric waterproofing membrane and coat.
- .2 Materials containing acid or caustic material are not acceptable.

PART 3 - EXECUTION

3.1 WORKMANSHIP

- .1 Do tile work in accordance with TTMAC Tile Installation Manual, "Ceramic Tile", except where specified otherwise.
- .2 Apply tile to clean and sound surfaces.
- .3 Fit tile around corners, fittings, fixtures, drains and other built-in objects. Maintain uniform joint appearance. Cut edges smooth and even. Do not split tiles.
- .4 Maximum surface tolerance 1:800.
- .5 Make joints between tile uniform and approximately 1.5 mm wide, plumb, straight, true, even and flush with adjacent tile. Ensure sheet layout not visible after installation. Align patterns.
- .6 Lay out tiles so perimeter tiles are minimum 1/2 size.
- .7 Sound tiles after setting and replace hollow-sounding units to obtain full bond.
- .8 Make internal angles square.
- .9 Use transition strip at termination of wall tile panels.
- .10 Install transition or reducer strips at junction of tile flooring and dissimilar materials.
- .11 Allow minimum 24 h after installation of tiles, before grouting.
- .12 Clean installed tile surfaces after installation and grouting cured.
- .13 Install waterproofing system under floor tiles and on walls up to 300 mm above top of floor.
- .14 Install self-levelling underlayment under floor tiles.

END OF SECTION

PART 1 - GENERAL

- 1.1 RELATED WORK**
- .1 Room Finish Schedule Refer to Drawings
 - .2 Colour Code Marking Banks for Identification of Piping and Ductwork Mechanical
- 1.2 DESCRIPTION**
- .1 Section includes: All labour, material, tools, and other equipment, services and supervision required to complete all exterior and interior painting of new surfaces and repainting of existing surfaces as indicated on the Finish Schedules and the full extent of the drawings and specifications.
 - .2 Work under this section shall also include but not necessarily be limited to:
 - .1 Moisture testing of substrates.
 - .2 Surface preparation of substrates as required for acceptance of paint, including cleaning, small crack repair, patching and making good surfaces and areas to the limits defined under MPI preparation requirements, and under MPI Repainting Manual Preparation requirements.
 - .3 Specific pre-treatment noted herein or as specified in the MPI Architectural Painting Specification Manual and the MPI Repainting Manual requirements.
 - .4 Sealing and priming surfaces for painting and repainting in accordance with in the MPI Architectural Painting Specification Manual and the MPI Repainting Manual requirements.
 - .5 Provision of safe and adequate ventilation as required, and over and above ventilation supplied by others, where toxic and/or volatile flammable materials are being used.
- 1.3 EXAMINATION**
- .1 Examine all drawings and Finish and Door Schedules to determine extent of interior and exterior work.
 - .2 Report in writing to the Architect any defects in work affecting the work of this Section.
 - .3 Commencement of work shall be construed as evidence of acceptance of underlying surfaces as satisfactory.
 - .4 Work shall not take place or be left to dry in any area where the temperature is below 10 degrees C.
- 1.4 REFERENCE STANDARDS**
- .1 Except where more stringent requirements are specified, the following reference standard shall govern the work of this Section:

- .1 Canadian General Standards Board
(CGSB)CAN/CGSB-85,100-M81: Painting
- .2 Master Painters Institute (MPI) Architectural Painting Specification Manual and Maintenance Repainting Manual (MPI Manuals), including Identifiers, Evaluation, Systems, preparation and painting of exterior and interior surfaces and Approved Product List, latest editions, and referenced herein as the MPI Manual , as issued by the local MPI Accredited Quality Assurance Association having jurisdiction
- .3 Test Method for Measuring Total Volatile Compound Content of Consumer Products, Method 24 (for Surface Coatings) of the Environmental Protection Agency (EPA)
- .4 National Fire Code of Canada

1.5 QUALITY ASSURANCE

- .1 Comply with the requirements of the MPI Manuals, except where more stringent requirements are specified.
- .2 Qualifications of Applicators:
 - .1 Applicator shall have a minimum of 5 years proven satisfactory experience and shall show proof before commencement of work that he will maintain a qualified crew of painters throughout the duration of the work. When requested, submit a list of the last three comparable jobs including, name and location, specifying authority/project manager, start and completion dates and cost amount of the painting work.
 - .2 Only qualified journeymen who have a "Tradesman Qualification Certificate of Proficiency" shall be engaged in painting and decorating work. Apprentices may be employed provided they work under the direct supervision of a qualified journeyman in accordance with trade regulations.
- .3 Pre-application Meeting
 - .1 Convene a pre-application meeting for the Products specified in this Section. Attendees must include, as a minimum, representatives of the following:
 - .1 Contractor (Site Superintendent & Project Manager)
 - .2 Application Subcontractor (Site Foreman & Project Manager)
 - .3 Product Manufacturers and/or Distributors (Technical Representatives)
 - .4 Related Subcontractors (i.e. Mechanical and/or Electrical)
 - .5 Consultant
- .4 Retain purchase orders, invoices and other documents to prove

conformance with noted MPI requirements when requested by the Architect.

1.6 SUBMITTALS

- .1 Submit required submittals in accordance with Section 01 33 00.
- .2 MPI Manual:
 - .1 Submit 1 copy each, of MPI Manuals – latest edition, and maintain at site office for reference.
- .3 Product Data and List of Products:
 - .1 Submit manufacturer's Product Data Sheets for Products proposed for use in the work of this section as identified in "Approved Product List" section of the MPI Painting Manual. Correlate Products to Schedule furnished by Consultant.
- .4 Samples and Colours:
 - .1 Colours: Architect will furnish paint colour numbers and colour schedule indicating colour locations.
 - .2 Samples for initial selection:
 - .1 Submit manufacturer's colour charts showing full range of colours available including light and deep dark tones, for each type of finish material indicated for colour selection by Consultant.
 - .2 Consultant shall have complete freedom in choice of colours in compiling colour schedule and will not necessarily select colours from standard colour charts of manufacturer of Products specified.
 - .1 Colour schedule: to be provided by the Consultant. Allow for a maximum of 5 field colours and 10 strong accent colours.
 - .3 Samples for verification:
 - .1 Submit 3 samples on 200 mm x 305 mm (8" x 12") material of same type as that on which coating is to be applied, for Consultant's approval, at least 30 days before materials are required.
 - .2 Identify each sample as to Project, finish, formula, colour name, number, gloss name and number, date and name of Contractor and painting Subcontractor.
- .5 Mock-ups:
 - .1 Provide full finished mock-up installation of each paint colour, for indicated surfaces and mock-up size, showing colour and finish selected by Consultant, under lighting conditions matching final area lighting, for acceptance by Consultant. Locate at Place of the Work as part of finished installation if accepted.
 - .1 Concrete block, concrete and gypsum board: 9.3 m²

- (100ft²).
- .2 Hollow metal doors and frames: 1 door and frame for each finish specified.
- .3 Painted wood base.

.6 Closeout submittals:

- .1 Submit closeout submittals in accordance with Section 01 73 10.
- .2 Maintenance Materials:
 - .1 Provide 2 sealed containers, each of 4 litres (1 gallon) capacity of each paint product in each colour used in the Work for Owner's maintenance use. Containers shall be new, clearly labelled with manufacturer's name, type of paint, colour and colour number. Store at Place of the Work where directed by Owner.

**1.7 ENVIRONMENTAL
REQUIREMENTS**

- .1 Comply with environmental requirements of the MPI Manuals.
- .2 Perform no painting work when ambient air and substrate temperatures are below 10°C for both interior and exterior work, unless suitable weatherproof covering and sufficient heating and ventilation facilities are in place in accordance with MPI Manuals
- .3 Perform no painting work when relative humidity is above 85% or when dew point is less than 3°C (5°F) variance between air/surface temperature.
- .4 Check moisture content of surfaces to be painted using properly calibrated electronic moisture meter approved by paint manufacturer, and Consultant, or other approved method. Maximum moisture contents shall be in accordance with manufacturer's recommendations and as follows:
 - .1 Concrete and concrete masonry (clay and concrete brick/block): Maximum 12%
 - .2 Gypsum board and plaster: 15%
 - .3 Wood: Maximum 15%
- .5 Conduct moisture tests on concrete floors using cover patch test method.
- .6 Test concrete, masonry and plaster surfaces for alkalinity.

**1.8 DELIVERY,
STORAGE AND
HANDLING**

- .1 Deliver painting materials in sealed, original labelled containers bearing manufacturer's name, brand name, type of paint or coating and colour designation, standard compliance, materials content as well as mixing and/or reducing and application requirements.
- .2 Store paint products and materials in original labelled containers in

secure (lockable), dry, heated and well ventilated single designated area meeting minimum requirements of both paint manufacturer and authorities having jurisdiction, and at a minimum ambient temperature of 7°C.

- .3 Protect floor and wall surfaces of storage area. Protect floors with sheets or clean plywood or metal pans where mixing is being carried out.

1.9 WARRANTY

- .1 Provide a Painting Association Warranty for work of this section for a period of 2 years.
- .2 Throughout warranty period, painting systems shall remain free from failure due to causes including: material failure; surface preparation less than that specified; and paint film thickness less than that specified, or when not specified, less than that coverage recommended by manufacturer.
- .3 Presence of any of the following during the warranty period shall constitute failure: visible corrosion, film peeling, blistering, checking, scaling, embrittling or general film disintegration; and poor adhesion as determined by tape "peel-off" test procedures.

1.10 COMPLETION SCHEDULE

- .1 Furnish a schedule showing expected completion of the respective coats of paint for the various areas and surfaces. Keep this schedule current as the job progresses.

1.11 COLOUR SCHEDULE

- .1 A colour schedule will be prepared as the job progresses by the Architect. The final selection of colours and surface textures of all finishes throughout shall rest solely with the Architect.

PART 2 - PRODUCTS

2.1 MATERIALS

- .1 Materials shall be premium grade, Only products listed in MPI Manuals shall be used in the work unless specified otherwise.

Acceptable Material: Sherwin Williams Product line
- .2 The products of generally only one (1) manufacturer shall be used on the project and the Architect shall be notified of the products to be used prior to delivery of the materials to the site.
- .3 Water-borne surface coatings must be manufactured and transported in a manner that steps of process, including disposal of waste products arising therefrom, will meet requirements of applicable

governmental acts, by-laws and regulations including, for the facilities located in Canada, Fisheries Act and Canadian Environmental Protection Act (CEPA).

- .4 Other paint materials, such as linseed oil, shellac, and the like, shall be highest quality products of an approved manufacturer listed in the MPI Manual and shall be compatible with other coating materials as required.
- .5 Paint materials shall have good flowing and brushing properties and shall dry or cure free of blemishes or sags.
- .6 Where required, paints and coatings shall meet flame spread and smoke developed ratings designated by building code requirements and/or authorities having jurisdiction.
- .7 Paints and coatings materials used within the weatherproofing system shall not exceed the VOC content limits of the following criteria.
 - .1 Interior paints and coatings: to following Green Seal GS-11 VOC limits:
 - .1 Flat coating type: 50 gm/L.
 - .2 Non-flat coating type: 100 gm/L.
 - .2 Anti-corrosive and anti-rust paints applied to interior ferrous metal substrates:
Green Seal Standard GC-03, Anti-Corrosive Paints.
 - .3 Clear wood finishes, floor coatings, stains, and shellacs applied to interior elements: South Coast Air Quality Management District (SCAQMD) Rule 1113, Architectural Coatings.
- .8 Paints and coatings materials used to the exterior of the weatherproofing system shall not exceed the VOC content limits of the following criteria.
 - .1 Exterior paints coatings: Green Seal GS-11: to following Green Seal VOC limits:
 - .1 Flat coating type: 100 gm/L.
 - .2 Non-flat coating type: 200 gm/L.

2.2 EQUIPMENT

- .1 Painting and coating equipment in accordance with written requirements of MPI Manual.

2.3 MIXING AND TINTING

- .1 Unless otherwise specified, paints shall be ready-mixed. Re-mix prior to application to ensure colour and gloss uniformity.
- .2 Paste, powder or catalysed paint mixes shall be mixed in accordance with manufacturer's written instructions.
- .3 Perform colour tinting operations prior to delivery of paint to Place of

the Work.

- .4 Where thinner is used, addition shall not exceed paint manufacturer's recommendations.

2.4 GLOSS / SHEEN RATINGS

- .1 Paint gloss shall be defined as the sheen rating of applied paint, in accordance with the following MPI values:

Gloss Level	Description	Units @ 60 degrees	Units @ 85 degrees
G1	Matte or Flat finish	0 to 5	10 maximum
G2	Velvet finish	0 to 10	10 to 35
G3	Eggshell finish	10 to 25	10 to 35
G4	Satin finish	20 to 35	35 minimum
G5	Semi-Gloss finish	35 to 70	
G6	Gloss finish	70 to 85	
G7	High-Gloss finish	>85	

- .2 Gloss level ratings of painted surfaces shall be as specified herein and as noted.

PART 3 - EXECUTION

3.1 PROTECTION

- .1 Protect surrounding or adjacent work by adequately covering with tarpaulins or similar coverings.
- .2 Any damage which results from failure to provide proper protection shall be made good.
- .3 Before commencement of work all electric plates, surface hardware and other fixtures shall be removed and shall be replaced when painting is completed.

3.2 EXTENT OF EXTERIOR PAINTING

- .1 All items which are not prefinished and which are installed at the exterior of the building shall be painted.
- .2 All exterior mechanical and electrical equipment, inclusive of exposed pipes, conduits, and duct work, shall be painted.
- .3 All miscellaneous metal items and bollards shall be painted.

3.3 EXTENT OF

- .1 As indicated in Room Finish Schedule, drawings and specifications.

**INTERIOR PAINTING OF
NEW WORK AND REPAINTING
OF EXISTING SURFACES**

- .2 All interior mechanical and electrical equipment, inclusive of exposed pipes and ducts, shall be painted.
- .3 All miscellaneous metal items, bollards, stairs, gratings shall be painted.

**3.4 CONDITIONS OF
SURFACES**

- .1 Prior to commencement of work of this section, thoroughly examine surfaces scheduled to be painted.
- .2 Check moisture content and PH of surfaces to be painted in accordance with paragraph above titled Environmental Requirements.
- .3 Inspect surfaces to be coated for gouges, marks, nibs, and other defects and properly prepare patching, filling, smoothing or other surface preparation necessary to ensure satisfactory finish.
- .4 Report in writing any condition adversely affecting work of this section.
- .5 Proceed with work only when surfaces and conditions are satisfactory. Remove dust, grease, rust, scale and extraneous matter, tool and machine marks and insects from surfaces which could be detrimental to a satisfactory and acceptable finish.

3.5 PREPARATION

- .1 Comply with manufacturer's written instructions and recommendations in "MPI Manual" applicable to substrates indicated.
- .2 Remove hardware, covers, plates, and similar items already in place that are removable and are not to be painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and painting.
 - 1. After completing painting operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.
- .3 Clean substrates of substances that could impair bond of paints, including dust, dirt, oil, grease, and incompatible paints and encapsulants.
 - 1. Remove incompatible primers and reprime substrate with compatible primers or apply tie coat as required to produce paint systems indicated.
- .4 Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's written instructions.
 - 1. Concrete Floors: Remove oil, dust, grease, dirt, and other foreign materials. Comply with SSPC-SP-13/NACE 6 or ICRI 03732.
- .5 Masonry Substrates: Remove efflorescence and chalk. Do not paint

surfaces if moisture content or alkalinity of surfaces or mortar joints exceed that permitted in manufacturer's written instructions.

- .6 Steel Substrates: Remove rust, loose mill scale, and shop primer, if any. Clean using methods recommended in writing by paint manufacturer[.] [but not less than the following:
 1. SSPC-SP 2, "Hand Tool Cleaning."
 2. SSPC-SP 3, "Power Tool Cleaning."
 3. SSPC-SP 7/NACE No. 4, "Brush-off Blast Cleaning."
 4. SSPC-SP 11, "Power Tool Cleaning to Bare Metal."
- .7 Shop-Primed Steel Substrates: Clean field welds, bolted connections, and abraded areas of shop paint, and paint exposed areas with the same material as used for shop priming to comply with SSPC-PA 1 for touching up shop-primed surfaces.
- .8 Galvanized-Metal Substrates: Remove grease and oil residue from galvanized sheet metal fabricated from coil stock by mechanical methods to produce clean, lightly etched surfaces that promote adhesion of subsequently applied paints.
- .9 Aluminum Substrates: Remove loose surface oxidation.
- .10 Wood Substrates:
 1. Scrape and clean knots, and apply coat of knot sealer before applying primer.
 2. Sand surfaces that will be exposed to view, and dust off.
 3. Prime edges, ends, faces, undersides, and backsides of wood.
 4. After priming, fill holes and imperfections in the finish surfaces with putty or plastic wood filler. Sand smooth when dried.
- .11 Cotton or Canvas Insulation Covering Substrates: Remove dust, dirt, and other foreign material that might impair bond of paints to substrates.

3.6 APPLICATION

- .1 Apply paints according to manufacturer's written instructions and to recommendations in "MPI Manual."
- .2 Use applicators and techniques suited for paint and substrate indicated.
- .3 Paint surfaces behind movable equipment and furniture same as similar exposed surfaces. Before final installation, paint surfaces behind permanently fixed equipment or furniture with prime coat only.
- .4 Paint front and backsides of access panels, removable or hinged covers, and similar hinged items to match exposed surfaces.
- .5 Do not paint over labels of independent testing agencies or equipment name, identification, performance rating, or nomenclature plates.

- .6 Primers specified in painting schedules may be omitted on items that are factory primed or factory finished if acceptable to topcoat manufacturers.
- .7 Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of same material are to be applied. Tint undercoats to match colour of topcoat, but provide sufficient difference in shade of undercoats to distinguish each separate coat.
- .8 If undercoats or other conditions show through topcoat, apply additional coats until cured film has a uniform paint finish, colour, and appearance.
- .9 Paint colours shall be in accordance with the colour schedule prepared by the Architect at a later date.
- .10 The different surfaces in any one (1) room will not necessarily be one (1) colour. Doors, walls, and other elements within rooms shall be painted with different strong accent colours. The total number of strong accent colours in the project shall be limited to ten (10). A total of five (5) basic wall colours shall be used. Doors shall be painted a different colour from door frame. Doors shall be a different colour from walls. Radiator covers shall be painted in strong accent colours.
- .11 In the Room Finish Schedule, where surfaces in rooms are specified to be painted, all elements fixed to those surfaces including frames of openings, doors, exposed new metal surfaces, shall be painted unless otherwise specified. Paint behind radiator covers.
- .12 Apply each coat at the proper consistency in accordance with the manufacturer's directions.
- .13 Sand lightly between coats when enamel or varnish is applied to wood or metal.
- 14 Regardless of the number of coats specified for any surface, apply sufficient number of extra coats of paint to produce a solid, uniform appearance and coverage in the opinion of the Architect.
- .15 Paint shall be applied by brush, roller, and airless spray. Reduce paint materials in strict accordance with the manufacturer's directions.
- .16 Top and bottom edges of doors shall receive the same finish as the face of the door.
- .17 Do not paint unless substrates are acceptable and/or until environmental conditions (heating, ventilation, lighting and completion of work of other sections) are acceptable for applications of Products.
- .18 Apply primer, paint or stain in accordance with MPI Manual Premium Grade finish requirements.
- .19 Apply paint and coatings within an appropriate time frame after

cleaning when environmental conditions encourage flash-rusting, rusting, contamination or manufacturer's paint specifications require earlier applications.

- .20 Painting coats specified are intended to cover surfaces satisfactorily when applied at proper consistency and in accordance with manufacturer's recommendations.
- .21 Unless otherwise approved by Architect, apply a minimum of 4 coats of paint where deep or bright colours are used to achieve satisfactory results.
- .22 Sand and dust between each coat to provide an anchor for next coat and to remove defects visible from a distance up to 1000mm (39").
- .23 Do not apply finishes on surfaces that are not sufficiently dry. Unless manufacturer's directions state otherwise, each coat shall be sufficiently dry and hard before a following coat is applied.
- .24 Prime coat of stain or varnish finishes may be reduced in accordance with manufacturer's directions.
- .25 Paint finish shall continue through behind wall-mounted items (i.e. chalk and tack boards).
- .26 Exposed means visible in complete work including interiors of cupboards and closets, tops of doors, trim, and the like, whether in sight line or not, including behind surface mounted fixtures and heating units.
- .27 Consultant shall have right to make changes in colour tone of finishes prior to final coat to obtain desired results without additional cost to Owner.
- .28 Access doors, prime coated butts and other prime painted hardware, registers, and covers, exposed piping and electrical panels shall be painted to match adjacent surfaces in terms of colour texture and sheen, unless otherwise indicated.

**3.7 FIELD QUALITY
CONTROL/STANDARD OF
ACCEPTANCE**

- .1 Painted exterior and interior surfaces shall be considered to lack uniformity and soundness if any of the following defects are apparent to the Consultant:
 - .1 Brush / roller marks, streaks, laps, runs, sags, drips, heavy stippling, hiding or shadowing by insufficient application methods, skipped or missed areas, and foreign materials in paint coatings.
 - .2 Evidence of poor coverage at rivet heads, plate edges, lap joints, crevices, pockets, corners and re-entrant angles.
 - .3 Damage due to touching before paint is sufficiently dry or any other contributory cause.
 - .4 Damage due to application on moist surfaces or caused by

- .5 inadequate protection from weather.
Damage and/or contamination of paint due to blown contaminants (dust, spray paint, etc.).
- .2 Painted surfaces shall be considered unacceptable if any of the following are evident under natural lighting source for exterior surfaces and final lighting source (including daylight) for interior surfaces.
 - .1 Visible defects are evident on vertical surfaces when viewed at normal viewing angles from a distance of not less than 1000 mm (39").
 - .2 Visible defects are evident on horizontal surfaces when viewed at normal viewing angles from a distance of not less than 1000 mm (39").
 - .3 Visible defects are evident on ceiling, soffit and other overhead surfaces when viewed at normal viewing angles).
 - .4 When final coat on any surface.
- .3 Painted surfaces rejected by the Consultant shall be made good at the expense of the Subcontractor. Small affected areas may be touched up; large affected areas or areas without sufficient dry film thickness of paint shall be repainted. Runs, sags, of damaged paint shall be removed by scraper or by sanding prior to application of paint.

3.8 CLEANING

- .1 Promptly as work proceeds and on completion of Work, remove paint where spilled, splashed or spattered during the progress of the Work keep the premises free from unnecessary accumulation of tools, equipment, surplus materials and debris; and the conclusion of the work leave the premises clean. Do not scratch or damage adjacent finished surfaces.
- .2 At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.
- .3 Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.
- .4 At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.9 INTERIOR AND EXTERIOR PAINT SYSTEMS

- .1 System references listed are based on MPI Manual and are Premium Grade, Low VOC, unless listed otherwise
- .2 New Gypsum Board – Walls: to MPI, INT 9.2B, High Performance Interior System, Premium Grade:
 - .1 One (1) coat of primer-sealer MPI 50.

- Acceptable Material: ProMar® 200 Zero VOC Latex Primer, B28W2600 by Sherwin Williams
- .2 Two (2) coats of, high performance, pre-catalized water based epoxy. Eggshell Finish, MPI 139.
Acceptable Material: "PRO Industrial Pre-catalyzed Waterbased Epoxy, K45 Series" by Sherwin Williams
- .3 New Gypsum Board – Ceilings and Bulkheads: to MPI, INT 9.2B, High Performance Interior System, Premium Grade:
- .1 One (1) coat of primer-sealer MPI 50.
Acceptable Material: ProMar® 200 Zero VOC Latex Primer, B28W2600 by Sherwin Williams
- .2 Two (2) coats of, professional quality, washable, interior vinyl acrylic. Flat Finish.
Acceptable Material: ProMar® 200 Zero VOC Interior Latex Flat, B30-2600 Series by Sherwin Williams
- .4 New Gypsum Board (in damp areas indicated in the Finish Schedule as "TC") to MPI, INT 9.2F Two Component Epoxy (Tile-Like) Waterborne, Premium Grade
- .1 One (1) coat of primer-sealer MPI 50
- .2 Two (2) coats of water based catalyzed epoxy resin Satin Finish, MPI 115
Acceptable Material: "Pro Industrial WB Epoxy" by Sherwin Williams"
- .5 Concrete Block and Poured Concrete Walls to MPI, INT 4.2K, High Performance Acrylic, Premium Grade:
- .1 One (1) coat of Heavy Duty block filler MPI 4
- .2 Two (2) coats of water based catalyzed epoxy resin Satin Finish, MPI 151.
Acceptable Material: "Heavy Duty Block Filler" and "Pro Industrial Pre-catalyzed Waterbased Epoxy Coating, K45 Series" by Sherwin Williams.
- .6 Concrete Floors to MPI, INT 3.2C, Two Component Epoxy, Premium Grade:
- .1 One (1) coat of two component catalyzed semi-gloss epoxy resin. Reduce in accordance with manufacturer's instructions. MPI 77.
- .2 Two (2) coats of two component catalyzed epoxy resin, Gloss finish, MPI 77.
Acceptable Material: "Tile-Clad Epoxy" by Sherwin Williams Series 7100' with sharp grip.
- .7 Exterior Metalwork (except copper, stainless steel, aluminum and factory finish coated metalwork). Acceptable material by Sherwin Williams:
- .1 Zinc Clad 5 b69a45 primer
- .2 Intermediate coat with Macropoxy 646 b58w610

- .3 Final coat of urethane 2 component b65w611 Acrolon HS. Semi Gloss Finish
- .8 Galvanized and Zinc Coated Metal Roof Deck and Exposed Roof Structure painted to MPI, INT 5.1C, Waterborne Dry Fall:
 - .1 Two (2) coats of premium quality waterborne acrylic dry fall, Semi Gloss Finish, MPI 226.
Acceptable Material: "Pro Industrial Dryfall" by Sherwin Williams.
- .9 Interior Woodwork designated for painting, (wood doors, trim, etc) to MPI, INT 6.3Q, High Performance Polyurethane, Premium Grade:
 - .1 One (1) coat of enamel undercoat MPI 130
 - .2 Two (2) coats of High performance Polyurethane, MPI 130
Acceptable Material: "Wood Classic WB Polyurethane, Satin Finish" by Sherwin Williams.
- .10 On surfaces designated for stain and varnish finish to MPI, INT 6.4G, Semi-Transparent Stain/Polyurethane Varnish, Premium Grade:
 - .1 One (1) coat of paste filler. Tint filler shall match stain colour. MPI 102
 - .2 One (1) coat of semi-transparent stain to CAN/CGSB 1.145M, Type 2 colour at Architect's discretion
 - .3 One (1) coat semi-gloss polyurethane varnish (reduced as per manufacturer's instructions) to CAN/CGSB 1.176, lightly sanded MPI 102
 - .4 One (1) coat polyurethane varnish to CAN/CGSB 1.176, lightly sanded MPI 56
 - .5 One (1) polyurethane varnish, Satin finish to CAN/CGSB 1.176, MPI 56
Acceptable Material: "Wood Classic WB Polyurethane" by Sherwin Williams.
- .11 On surfaces designated to receive clear varnish finish to MPI, INT 6.4L, Clear Polyurethane Varnish, Premium Grade:
 - .1 One (1) coat of paste filler. filler shall match wood colour. MPI 102
 - .2 One (1) coat polyurethane varnish (reduced as per manufacturer's instructions) to CAN/CGSB 1.176, lightly sanded, MPI 56
 - .3 One (1) coat polyurethane varnish to CAN/CGSB 1.176, lightly sanded MPI 56
 - .4 One (1) coat polyurethane varnish, Satin Finish, to CAN/CGSB 1.176. MPI 56
Acceptable Material: "Wood Classic WB Polyurethane" by Sherwin Williams.
- .12 For all interior metalwork, High Performance Acrylic, Premium Grade

to MPI INT 5.3B

- .1 One (1) coat of DTM 100% acrylic primer MPI 107
- .2 Two (2) coats of high performance, gloss DTM 100% acrylic Enamel, Semi Gloss Finish, MPI 153
Acceptable Material: "Pro Industrial Pro-Cryl Universal Primer" and "Pro Industrial Acrylic Coating" by Sherwin Williams.

- .13 Interior of Ductwork visible through grilles or diffusers:
 - .1 One (1) coat matt black conforming to CAN/CGSB 1.114. May be spray applied.
- .14 Gypsum Board "Green" Wall; Room 217 – 7&8 Drama:
 - .1 Two (2) coats of white primer Rosco Tough Prime by Rosco. Minimum film thickness: 3 mil, dry film.
 - .2 Three (3) coats of chroma key matte green paint.
 - .3 Acceptable Material: Chroma Key by Rosco.

3.10 MECHANICAL AND ELECTRICAL EQUIPMENT

- .1 Paint exposed conduits, pipes, hangers and other mechanical and electrical equipment occurring in finished areas as well as inside cupboards and cabinet work. Colour and texture to match adjacent surfaces except as noted otherwise. Do not paint inside mechanical cabinets.
- .2 Fire protection piping shall be red 509-102 in accordance with MPI 5.3B, High Performance Acrylic. For Acceptable Materials see Item 3.9, this Section.
- .3 Natural gas piping shall be yellow 505-101 in accordance with MPI 5.3B, High Performance Acrylic. For Acceptable Materials see Item 3.9, this Section.
- .4 Keep sprinkler heads free of paint.
- .5 Paint both sides and edges of plywood backboards for equipment before installation. Leave equipment in original finish except for touch-ups as required. Do not paint over name plates.
- .6 Finish paint primed mechanical and electrical items with minimum 2 coats of paint. Include for the following list unless otherwise indicated:
 - .1 Conduit
 - .2 Ductwork
 - .3 Pipes
 - .4 Hangers
- .7 Prime and paint exposed insulated and bare pipes. Prime and paint exposed conduits and electrical raceways, fittings, outlet boxes, junction boxes, pull boxes and similar items. Use heat resistant epoxy paint on pipes and surfaces where operating surface temperature exceeds 65°C.
- .8 Coordinate the painting of pipes, and coverings with mechanical

contractor applying colour banding, flow arrows and pipe identification after the painting of pipes and coverings.

- .9 Paint work to match adjacent walls and ceilings unless directed otherwise.
- .10 Paint and finish wall surfaces behind convectors and new architectural woodwork. Walls to be finished prior to installation of convector covers and new architectural woodwork. Touch up walls after covers are installed as necessary to make good installation damage.

1.3 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 00 10 00.
- .2 Indicate size and description of components, base material, surface finish inside and out, hardware and locks, attachment devices, description of rough-in-frame, building-in details of anchors for grab bars.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for toilet and bath accessories for incorporation into manual specified in Section 00 10 00 - Closeout Submittals.

PART 2 - PRODUCTS

- 2.1 MATERIALS**
- .1 Sheet steel: to ASTM A 653/A653M with ZF001 designation zinc coating.
 - .2 Stainless steel sheet metal: to ASTM A 167, Type 304, with No. 4 finish.
 - .3 Stainless steel tubing: Type 304 peened finish..
 - .4 Fasteners: concealed screws and bolts hot dip galvanized, exposed fasteners to match face of unit. Expansion shields fibre, lead or rubber as recommended by accessory manufacturer for component and its intended use.
- 2.2 COMPONENTS**
- .1 **Shower curtain "SC":** 0.2 mm thick translucent vinyl anti-bacterial shower curtain. Provide curtain hold-back hook and chain at each curtain.
 - .1 Acceptable material:
 - .1 Hold back hook and chain: Frost Code 1144-500.
 - .2 Shower Curtain: Frost Code 1144-502.
 - .3 Stainless steel Curtain Hooks (Pack of 12): Frost Code 1144-501L.
 - .2 **Shower rods "SR":** 25 mm dia stainless steel tubing of required length with satin chrome finished flanges. Shower rod material and anchorage to withstand downward pull of 0.9 kN.
 - .1 Acceptable material:
 - .1 Shower Rod: Bobrick B-207.
 - .4 **Coat hook "CH":** stainless steel with concealed fasteners.
 - .1 Acceptable material:
 - .1 Frost, Code 1138S.
 - .5 **Waste receptacle "WR":** Type semi-recessed, 12 gallon stainless steel.
 - .1 Acceptable material:
 - .1 American Specialties Model No. 0458.
 - .6 **Mirror "MIRR":** wall mounted unit, fixed framed mirror 6 mm to CAN/CGSB-12.5, stainless steel frame with shelf.
 - .1 Acceptable material:
 - .1 Frost Stock Series Mirror, Fixed: Frost Code 941-1836
 - .7 **Mirror Shelf "MS":** Stainless steel shelf.
 - .1 Acceptable material:
 - .1 Frost, Code 950-24 Series.
 - .8 **Grab Bars L-shaped "GBL":** 32 mm o.d., stainless steel (peened finish), L-shaped, 90° angle, 760 mm horizontal x 760 mm vertical,

- concealed fasteners
- .1 Acceptable material:
 - .1 Frost, Code 1003 – 30" x 30" Supply right or left hand grab bars as required to suit arrangement.
- .9 **Horizontal Grab Bars "HGB"**: 32 mm o.d., stainless steel (peened finish), horizontal grab bar. Concealed fasteners.
 - .1 Acceptable material:
 - .1 Frost, Code 1001 - 24" and 42"
- .10 **Vertical Grab Bars "VGB"**: 32 mm o.d., stainless steel, vertical grab bar. Concealed fasteners, peened grip surface.
 - .1 Acceptable material:
 - .1 Frost, Code 1001 – 24", 30", and 48"
- .11 **TILT MIRROR "MIRT"**: Tilt mirror 24"W x 36"H, scrim backing, tempered glass. Stainless steel frame.
 - .1 Acceptable material:
 - .1 Frost, Code 941FT-2436 Series

2.3 FABRICATION

- .1 Weld and grind joints of fabricated components flush and smooth. Use mechanical fasteners only where approved.
- .2 Wherever possible form exposed surfaces from one sheet of stock, free of joints.
- .3 Brake form sheet metal work with 1.5 mm radius bends.
- .4 Form surfaces flat without distortion. Maintain flat surfaces without scratches or dents.
- .5 Back paint components where contact is made with building finishes to prevent electrolysis.
- .6 Hot dip galvanize concealed ferrous metal anchors and fastening devices to CSA G164.
- .7 Shop assemble components and package complete with anchors and fittings.
- .8 Deliver inserts and rough-in frames to job site at appropriate time for building-in. Provide templates, details and instructions for building in anchors and inserts.
- .9 Provide steel anchor plates and components for installation on studding and building framing.

PART 3 - EXECUTION

3.1 INSTALLATION

- .1 Install and secure accessories rigidly in place as follows:
 - .1 Stud walls: install steel back-plate to stud prior to plaster or drywall finish. Provide plate with threaded studs or plugs.
 - .2 Hollow masonry units or existing plaster/drywall: use toggle bolts drilled into cell/wall cavity.
 - .3 Solid masonry, marble, stone or concrete: use bolt with lead expansion sleeve set into drilled hole.
 - .4 Toilet/shower compartments: use male/female through bolts.
- .2 Use tamper proof screws/bolts for fasteners.
- .3 Fill units with necessary supplies shortly before final acceptance of building.

END OF SECTION

PART 1 - GENERAL

- 1.1 RELATED SECTIONS** .1 Section 00 10 00 - Submittal Procedures.
- 1.2 REFERENCES** .1 CAN/CGSB-44.40--2001, Steel Clothing Locker.
- 1.3 SHOP DRAWINGS** .1 Submit shop drawings in accordance with Section 00 10 00 - Submittal Procedures.
- .2 Indicate type and class of locker, thicknesses of metal, fabricating and assembly methods, assembled banks of lockers, hooks, shelves, bases, trim, numbering, filler panels, end/back panels, doors, handles, locking method, finishes.
- 1.4 SAMPLES** .1 Submit samples in accordance with Section 00 10 00 - Submittal Procedures.

PART 2 - PRODUCTS

- 2.1 MANUFACTURED UNITS** .1 Lockers: to CAN/CGSB-44.40, Type 2 - Single tier locker, freestanding.
- .1 Size: steel thickness No.18 MSG and 305 mm wide x 455 mm x 1829 mm high.
- .2 Assembly: pop-riveted construction.
- .3 Top: flat.
- .4 Doors: one-piece perforated double-wall envelope construction, steel thickness No.16 MSG, welded to No. 18 MSG inner panel.
- .5 Door Frames: Both vertical members shall be not less than 16 gauge and formed into a rigid channel 6 mm wide exposed frame and 62 mm side depth. The frame shall be completed by 76 mm high top and bottom cross members of not less than 18 gauge formed as an open box channel and welded to the verticals. The bottom frames' full width lintel extends back and down to form a rigid box to support the bottom shelf. Both vertical frame members shall be formed to offer a full length 11 mm wide continuous door strike. The latch vertical member shall include a welded 11 gauge padlock hasp together with 11 mm o.d. air-cushioned rubber bumper. No fasteners shall be exposed on fronts of locker doors and frames.
- .6 Door handle: recessed handle aluminum.
- .7 Colour: #500 White.

- .8 Acceptable Manufacturer:
 - .1 Emperor (Corridor) as manufactured by Hadrian Manufacturing Inc.

2.2 ACCESSORIES

- .1 Latching/Locking Device – Single Point
 - .1 An 11 gauge 51 mm x 19 mm padlock hasp shall be securely welded to the continuous strike midway up on the frame and centered at the handle location. The hasp shall be formed to protrude through an extruded aluminum recessed handle which is cliplocked and bonded to the door. The handle's inner surface shall be concave and grooved for finger-tip door control. To keep the door closed when not in use, 13 mm o.d. nylon friction catch shall be installed on the door to engage the frame in four (4) locations. Provide padlock.
- .2 Hinge Continuous
 - .1 A full length heavy-duty 16 gauge continuous steel piano hinge shall be securely welded to the frame and fastened to the door with screws or rivets. Hinge shall maximize security and enhance resistance to abuse and vandalism.
- .3 Ventilation
 - .1 Airflow is achieved through 4 sets of 5 unobstructed louvers ¾" wide x ¼" high in the vertical frame members. Provide 18 each 3/16" diameter perforations at outside perimeter of each top, shelf, and bottom to offer additional ventilation throughout the inside of each locker.
- .4 Number Plate
 - .1 Doors shall have a high strength black laminated plastic number plate 64 mm wide x 25 mm high with numbers not less than 11 mm high. Plates shall accommodate up to four digits, be nestled in a recess flush with door surface and shall be fastened to the door with two rivets. Lockers will be numbered by Departmental Representative.
- .5 Interior Equipment
 - .1 In the single tier locker shall be one hat shelf and three single prong coat hooks. All hooks zinc plated steel with ball point heads and are attached with two fasteners.

PART 3 - EXECUTION

3.1 INSTALLATION

- .1 Assemble and install lockers in accordance with manufacturer's written instructions.
- .2 Securely fasten lockers to grounds and nailing strips.
- .3 Install finished end panels to exposed ends of locker banks.

.4 Install locker numbers.

1.2

1.3 GENERAL

- .1 Coordinate location & installation of all equipment with all trades to ensure the equipment is serviceable and requirements at all other Divisions are not compromised...
- .2 The word "provide" shall mean "supply and install".

1.4 MINIMUM STANDARDS

- .1 Conform to or exceed minimum acceptable standards of the various applicable federal, provincial and municipal codes such as The National Building Code, The National Fire Code, Canadian Plumbing Code, Canadian Electrical Code, Canadian Code for Construction Safety and the Provincial Construction Safety Act.
- .2 Work to conform to referenced standards and codes as reaffirmed or revised to date of specification.

1.5 EQUIPMENT

- .1 General:
 - .1 Mechanical equipment that is not regulated by the Green Energy Act, shall carry a permanent label installed by the manufacturers stating the equipment complies with the requirement of ASHRAE 90.1.
 - .2 The minimum equipment efficiency, standard rating and operating conditions shall be as per ASHRAE 90.1, superseded by Ontario Building Code (OBC) Supplementary Standard SB -10, unless indicated otherwise on contract documents. The higher of the energy efficiencies of the listed equipment shall prevail.
 - .3 Provide new materials and equipment of proven design, quality and of current models with published ratings for which replacement parts are readily available.

- .4 Uniformity: Use product of one manufacturer unless otherwise specified, for equipment or material of the same type of classification.
- .2 Installation:
 - .1 Unions, flanges and/or couplings: provide for ease of maintenance and disassembly.
 - .2 Space for servicing, disassembly and removal of equipment and components: provide as recommended by manufacturer, Code or as indicated; whichever is the more stringent.
 - .3 Equipment drains: pipe to floor drains in a manner which is non-obstructing.
 - .4 Install equipment, rectangular cleanouts and similar items parallel to or perpendicular to building lines.
 - .5 Unless otherwise specified, follow manufacturer's recommendations for safety, adequate access for inspection, maintenance and repairs.
 - .6 Permit equipment maintenance and disassembly with minimum disturbance to connecting piping and duct systems without interference with building structure or other equipment.
 - .7 Lubrication: Provide accessible lubricating means for bearings, including permanent lubrication "Lifetime" bearings. Extended grease nipples to be supplied.

1.5 ANCHOR BOLTS AND TEMPLATES

- .1 Supply anchor bolts and templates for installation by other divisions.

1.6 TRIAL USAGE

- .1 Departmental Representative may use equipment and systems for test purposes or for continuity of operation prior to acceptance. Supply labour, material, and instruments required for testing & operation.

1.7 PROTECTION OF OPENINGS

- .1 Protect equipment and systems openings from dirt, dust, and other foreign materials with materials appropriate to system.

1.8 ELECTRICAL

- .1 Electrical work to be coordinated with Division 26.
- .2 Any costs associated with deviation of mechanical equipment rating affecting electrical Division 26 shall be carried by the mechanical contractor.

1.9 PAINTING

- .1 Apply at least one coat of corrosion resistant primer paint to ferrous supports and site fabricated work.
- .2 Prime and touch up marred finished paintwork to match original. Use primer or enamel to match original. Do not paint over nameplates.

- .3 Restore to new condition, finishes which have been damaged too extensively to be merely primed and touched up.
- .4 Hangers, supports and equipment fabricated from ferrous metals shall be given at least one coat of corrosion resistant primer paint before shipment to job site.
- .5 Touch-up damaged surfaces of all mechanical equipment and materials, to the satisfaction of Departmental Representative. Use primer or enamel to match original. Do not paint over nameplates.

1.10 WASTE MANAGEMENT AND DISPOSAL

- .1 Waste Reduction Workplan (WRW):
 - .1 Perform work in accordance with project's WRW. If one does not exist, provide the following:
 - .1 Identify opportunities for reduction, re-use and/or recycling of materials.
 - .2 Post workplan or summary where workers on site are able to review its content.
 - .2 Materials Source Separation Program (MSSP):
 - .1 Perform all work in accordance with project's MSSP. If one does not exist, provide the following:
 - .1 Provide containers for collection of re-usable and/or recyclable materials.
 - .2 Transport off-site salvaged materials to authorized recycling facility or to users of material for re-use.
 - .3 Disposal of Waste:
 - .1 Disposal of waste, volatile materials, mineral spirits, oil, paint thinner, etc. into wastewater waterways, storm or sanitary sewers is prohibited.
 - .4 Storage, Handling and Protection:
 - .1 Store materials for re-use in a secure area as directed by project manager, where they will not be damaged. Provide protection of materials as necessary.
 - .2 Unless otherwise specified, removed materials become the Contractor's property. Contractor shall be responsible for transport & delivery of non-salvageable items to a licensed disposal facility.

1.11 DEMONSTRATION AND OPERATING AND MAINTENANCE INSTRUCTIONS

- .1 Supply tools, equipment and personnel to demonstrate and instruct operating and maintenance personnel in operating, controlling, adjusting, trouble-shooting and servicing of all systems and equipment during regular work hours, prior to acceptance.
- .2 Where specified elsewhere in Divisions 20, 21, 22, 23 & 25, manufacturers to provide demonstrations and instructions.
- .3 Use operation and maintenance manual, as-built drawings, audio visual aids, etc. as part of instruction materials.
- .4 Instruction duration time requirements as specified in appropriate sections and as needed to cover instruction material related to specific system or equipment.

- .5 Where deemed necessary, Departmental Representative may record these demonstrations on video tape for future reference.
- .6 Furnish trained instructors to instruct Departmental Representative's operating staff in the operation, maintenance and adjustment of all mechanical equipment; and, instruct personnel on any changes to or modifications of any equipment made under terms of the guarantee.
- .7 The instructions shall take place during regular working hours before systems are accepted and turned over to Departmental Representative's staff.
- .8 Ensure that the Departmental Representative's operating personnel have received and been given opportunity to review the Operating and Maintenance Manuals prior to commencing instruction. Allow two full days on site for review of these manuals with Departmental Representative's personnel and for their instruction in operation and maintenance of all mechanical equipment.

1.12 CLOSEOUT SUBMITTALS

- .1 Submit operation and maintenance data for incorporation into manual.
- .2 Operation and maintenance manual (O&M) to be approved by, and final copies deposited with, Departmental Representative before final inspection.
- .3 For all equipment listed in O&M manuals provide a schedule detailing the supplied component, name, address & phone no. of equipment vendor, parts supplier and warranty agent.
- .4 Operation data to include:
 - .1 Control schematics for each system including environmental controls.
 - .2 Description of each system and its controls.
 - .3 Description of operation of each system at various loads together with reset schedules and seasonal variances.
 - .4 Operation instruction for each system and each component.
 - .5 Description of actions to be taken in event of equipment failure.
 - .6 Valves schedule and flow diagram.
- .5 Maintenance data shall include:
 - .1 Servicing, maintenance, operation and trouble-shooting instructions for each item of equipment.
 - .2 Data to include schedules of tasks, frequency, tools required and task time.
- .6 Performance data to include:
 - .1 Equipment manufacturer's performance data sheets with point of operation as left after commissioning is complete.
 - .2 Equipment performance verification test results.
 - .3 Special performance data as specified elsewhere.
- .7 Approvals:
 - .1 Submit electronic format (pdf) copy of draft Operation and Maintenance Manual to Departmental Representative for approval. Submission of individual data will not be

accepted unless so directed by Departmental Representative. PDF file to include tabs to allow navigation to each section of the manual.

- .2 Make changes as required and re-submit as directed by Departmental Representative.
- .3 Upon acceptance by Departmental Representative submit one (1) electronic format(pdf) and three (3) hardcopies of O&M manuals to Departmental Representative.

.8 Additional data:

- .1 Prepare and insert additional data into operation and maintenance manual when the need becomes apparent during demonstrations and instructions specified above.

1.13 SPECIFIED ACCEPTABLE & ALTERNATIVE EQUIPMENT & MATERIALS

- .1 Materials and equipment scheduled and/or specified on the drawings or in the specifications have been selected to establish a performance and quality standard. In most cases, acceptable manufacturers are stated for any material or equipment specified by manufacturer's name and model number. Contractors may base their tender price on materials and equipment supplied by any of the manufacturers' names as acceptable for the particular material or equipment.
- .2 In addition to the manufacturers specified or named as acceptable, you may propose alternative manufacturers of materials or equipment to the Departmental Representative for acceptance. For a product to be considered as an alternative product substitute, make a written application to the Departmental Representative during the tender period, not later than ten (10) working days before tender closing.
- .3 Certify in writing that the alternative meets all requirements of the specified material or equipment. In addition, it shall be understood that all costs required by or as a result of acceptance or proposed alternatives, will be borne by the contractor.
- .4 Approval of alternatives will be signified by issue of an Addendum to the Tender Documents.
- .5 Any alternative manufacturers or materials submitted which are incomplete and cannot be evaluated, or are later than ten (10) working days before tender closing date or after the tender period, will not be considered.

1.14 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit single electronic (pdf) copy of shop drawings and product data along with transmittal, in accordance with project requirements. Hard copy shop drawings shall not be accepted.
- .2 Shop drawings and product data shall show:
 - .1 Mounting arrangements.
 - .2 Operating and maintenance clearances. e.g. access door swing spaces.
- .3 Shop drawings and product data shall be accompanied by:
 - .1 Detailed drawings of bases, supports, and anchor bolts.
 - .2 Acoustical sound power data, where applicable.
 - .3 Points of operation on full equipment performance curves.
 - .4 Manufacturer to certify as to current model production.

- .5 Certification of compliance to applicable codes.
- .4 The information to be indicated on manufacturers' shop drawings submitted for review shall include the following:
 - .1 General arrangement drawings showing component parts. Where the equipment proposed, or a component part thereof, includes modifications to a manufacturers' standard to meet the requirements of a specification, a complete assembly drawing must be submitted.
 - .2 Overall dimensions, roughing-in dimensions and clearance dimensions of all major components.
 - .3 Mounting details and dimensions.
 - .4 Complete certified performance data for the specified application with particular reference to rate of flow, operating pressure and temperatures, entering and leaving conditions of air or fluid, operating weights, operating limitation, electrical characteristics and BHP requirements.
 - .5 Gauge of fabricated material and finish specification.
 - .6 Vibration isolators and resilient hangers stating locations and weight distribution.
 - .7 Electrical wiring diagrams, control panel boards, motor test data, motor starters and controls for electrically-operated equipment furnished by mechanical trades.
- .5 Review of shop drawings or detail drawings will not relieve the obligation of ensuring that the equipment, materials, or layouts meet the functional requirements of the specifications, and that all necessary mounting space and clearance requirements are met. Thus, the Departmental Representative's review is for assistance only.
- .6 No equipment will be accepted on the job site without shop drawings having been reviewed by the Departmental Representative.

1.15 AS-BUILT DRAWINGS

- .1 Site records:
 - .1 Mechanical sub-contractor shall mark all changes as work progresses and as changes occur.
 - .2 On a weekly basis, transfer information to record set of documents, revising to show all work as actually installed.
 - .3 Use different colour waterproof ink for each service.
 - .4 Make available for reference purposes and inspection at all times.
- .2 As-built drawings:
 - .1 Identify each drawing in lower right hand corner in letters at least 12 mm high as follows:
- AS-BUILT DRAWINGS: THIS DRAWING HAS BEEN REVISED TO SHOW MECHANICAL SYSTEMS AS INSTALLED" (Signature of Contractor) (date).
 - .2 Submit hard copy to Departmental Representative for approval.
 - .3 Following approval, submit completed hard copy as-built drawings and scanned soft copy with Operating and Maintenance Manuals.
- .3 Submit copies of as-built drawings for inclusion in final O&M manual.

1.16 CONFLICT/CO-ORDINATION DRAWINGS

- .1 For congested areas, prior to installation the contractor shall prepare interference drawings indicating proposed location of all systems & equipment including ductwork, piping, fans, diffusers, VAV boxes, conduits, lighting fixtures, etc. Prior to installation the contractor shall submit the drawings to the Departmental Representative for review.
- .2 Architectural, structural and electrical outlines may be shown to assist in coordination of work; confirm final arrangements before layout of mechanical work.
- .3 Do not scale.
- .4 Except where dimensioned, drawings indicate general mechanical layouts only.
- .5 Provide field drawings to show relative positions of various services. Obtain approval before beginning work. As a minimum provide layout/coordination drawings for mechanical rooms & corridor ceilings. Drawings must show coordination between all equipment and systems within the given space. All sub-trades to coordinate their work in conjunction with others.
- .6 Within two (2) weeks of Letter of Intent, contractor to verify that proposed rooms, shafts, chases, reflected ceiling elevations, etc. provide adequate space for the installation of systems. This is to identify if there are any spatial shortcomings and to give adequate time for construction manager, consultants and trades to make any dimensional changes and to make clear to all trades where items are to be installed. Installation and layout will not be on a first come first layout basis.
- .7 If this procedure is not followed the contractor shall be responsible for all modifications required to integrate the systems & equipment.

1.17 FEES AND PERMITS

- .1 Pay all fees and obtain all permits, taxes relating to the mechanical scope of work.

1.18 WARRANTY

- .1 Unless indicated otherwise provide one (1) year warranty starting at substantial completion for all new systems including materials, equipment & labour.

1.19 LOCATION OF MECHANICAL EQUIPMENT

- .1 Allow for 1500 mm of adjustment for exact location of air handling units, pumps, ducts, piping, etc. at no extra cost or credit.

1.20 ELECTRONIC DRAWINGS

- .1 Departmental Representative will agree to supply the mechanical drawings in the form of electronic documents for the project to the User for the convenience of the User in carrying out its work. The User shall sign a License Agreement before drawings will be released.

1.21 INSPECTION OF BURIED OR CONCEALED SERVICES

- .1 Prior to concealing any services that are installed, ensure that all inspection bodies concerned, including NRC, have inspected the work and have witnessed all tests. Failure to do so may result in exposing the services again at the contractor's expense.

1.22 CUTTING, PATCHING & CORING

- .1 Provide cutting, patching and coring of all walls, ceiling & concrete slabs and other surfaces as required for mechanical work. Check with Departmental Representative prior to core drilling and cutting of structure regarding building requirements and policies. Provide notification, clearance & protection.
- .2 The following procedure shall be followed for cutting & core drilling:
 - .1 Contractor to coordinate and summarize all new cores and openings in building structure. Contractor to investigate on site and locate any existing available hole which may be re-used for new systems.
 - .2 Contractor to prepare a layout sketch showing all existing openings & holes and required new openings & holes, with size and locations to the closest grid line in both directions, and submit for review and approval by the Departmental Representative.
 - .3 Structural Departmental Representative to provide written report outlining acceptance of the openings, as well as specific requirements for reinforcing at each location.
 - .4 Contractor to proceed with reinforcing tracing as per report and scanning for electrical conduit. Scanning to be completed using ground penetrating Radar (GPR) technology.
 - .5 Contractor shall identify at each location prior to coring and cutting the location, direction and layer of each reinforcing bar and conduit.
 - .6 Any core or opening where reinforcing steel was cut during the cutting & coring process must be retained on site, and the Contractor must inform the Departmental Representative with the following information: size of the reinforcing bar, reinforcing layer location (top steel or bottom slab steel) and direction of the bar (east - west or north - south).
- .3 Patch and make good surfaces cut, damaged or disturbed, to Departmental Representative's approval. Match existing material, colour, finish and texture or as indicated otherwise.
- .4 Provide dust tight screens or partitions to localize dust generating activities and for protection of finished areas of work, workers and public.

1.23 MECHANICAL COST BREAKDOWN

- .1 Upon award of contract, provide cost breakdown for Departmental Representative's review and for progress billing purposes.
- .2 Costs such as site trailers, mobilization, shop drawings, engineering, etc. to be included as part of material and labour for each piece of equipment.
- .3 Controls programming and commissioning to be billed upon completion of commissioning.
- .4 Fire protection engineering costs to be included as part of material and labour costs.

- .5 Closeout documents including O&M manuals, as-built drawings, approved air & hydronic TAB reports, seismic letters, NFPA letters, etc. shall constitute 5% of the total mechanical construction cost and shall be approved as a single lump sum line item after submission to and final acceptance by Departmental Representative. Contractor to indicate cost as a separate line item in Progress Billing.
- .6 Proposed billings to be submitted a minimum of fourteen (14) calendar days prior to submission of first billing, for review and approval by Departmental Representative.
- .7 Equipment costs are to be broken down into specific equipment grouping and submitted with proposed billing submittal.

1.24 FINAL INSPECTION

- .1 Do not request final inspection until:
 - .1 Deficiencies are less than 5 items.
 - .2 All systems have been tested and are ready for operation.
 - .3 All air & water balancing has been completed as applicable.
 - .4 The Departmental Representative's operating personnel have been instructed in the operation of all systems and equipment.
 - .5 All inspection certificates have been furnished including but not limited to seismic certification, NFPA (Fire) 13 certification, City's final plumbing inspection.
 - .6 All record drawings have been completed and approved.
 - .7 All fire extinguishers have been installed.
 - .8 The cleaning up is finished in all respects.
 - .9 Upon completion of above, contractor to request in writing for final site review with a minimal 72 hour notification.
- .2 Final installation shall be subject to the approval of the Departmental Representative.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 RELATED DOCUMENTS

- .1 Drawings and general provisions of Contract, including General and Supplementary Conditions and Division-1 Specification Section, apply to work specified in this section.

1.3 DEFINITIONS

- .1 Firestopping: Material or combination of materials used to retain integrity of fire-rated construction by maintaining an effective barrier against the spread of flame, smoke, water and hot gases through penetrations in fire rated wall and floor assemblies.

1.4 GENERAL DESCRIPTION OF THE WORK OF THIS SECTION

- .1 Only tested firestop systems shall be used in specific locations as follows:
 - .1 Penetrations for the passage of duct, piping, and other mechanical equipment through fire-rated vertical barriers (walls and partitions), horizontal barriers (floor/ceiling assemblies), and vertical service shaft walls and partitions
 - .2 Repetitive plumbing penetrations in fire-rated floor assemblies. Penetrations exist for the installation of tubs, showers, aerators and other plumbing fixtures.
- .2 All penetrations through walls as a result of this work shall be assumed to be 1 hour rated unless otherwise indicated.

1.5 RELATED WORK OF OTHER SECTIONS

- .1 Coordinate work of this section with work of other sections as required to properly execute the work and as necessary to maintain satisfactory progress of the work of other sections, including:
 - .1 Section 04 04 99 - Masonry for minor Works
 - .2 Section 07 84 00 - Firestopping
 - .3 Section 09 21 16 - Gypsum Board Assemblies

1.6 REFERENCES

- .1 Test Requirements: ULC-S115-M or CAN4-S115-M, "Standard Method of Fire Tests of Through Penetration Fire Stops".
- .2 International Firestop Council Guidelines for Evaluating Firestop Systems Engineering Judgments.
- .3 Inspection Requirements: ASTM E2174-18, "Standard Practice for On-site Inspection of Installed Fire Stops.
- .4 CAN/ULC-S102-M, Standard Test Method for Surface Burning Characteristics of Building Materials.
- .5 All major building codes: NBC, OBC.
- .6 NFPA (Fire) 101 - Life Safety Code, 2018 Edition
- .7 ASTM G21-15, Standard Practice for Determining Resistance of Synthetic Polymeric

1.7 QUALITY ASSURANCE

- .1 Proposed firestop materials and methods shall conform to applicable governing codes having local jurisdiction.
- .2 Firestop Systems do not reestablish the structural integrity of load bearing partitions/assemblies, or support live loads and traffic. Installer shall consult the structural engineer prior to penetrating any load bearing assembly.
- .3 For those firestop applications that exist for which no ULC or cUL tested system is available through a manufacturer, a manufacturer's engineering judgement derived from similar ULC or cUL system designs or other tests will be submitted to local authorities having jurisdiction for their review and approval prior to installation. Engineer judgement drawings must follow requirements set forth by the International Firestop Council.

1.8 SUBMITTALS

- .1 Submit Product Data: Manufacturer's specifications and technical data for each material including the composition and limitations, documentation of ULC or cUL firestop systems to be used and manufacturer's installation instructions to comply with Division 01.
- .2 Manufacturer's engineering judgement identification number and drawing details when no ULC or cUL system is available for an application. Engineer judgement must include both project name and contractor's name who will install firestop system as described in drawing.

- .3 Submit material safety data sheets provided with product delivered to job-site.
- .4 Submit a complete firestopping and smoke seal schedule. Schedule is to include complete details, cut sheets, system descriptions and location of each proposed firestopping & smoke seal application.

1.9 INSTALLER QUALIFICATIONS

- .1 Engage an experienced Installer who is certified, licensed, or otherwise qualified by the firestopping manufacturer as having been provided the necessary training to install manufacturer's products per specified requirements. A manufacturer's willingness to sell its firestopping products to the Contractor or to an Installer engaged by the Contractor does not in itself confer qualification on the buyer.

1.10 DELIVERY, STORAGE, AND HANDLING

- .1 Deliver materials undamaged in manufacturer's clearly labelled, unopened containers, identified with brand, type, and ULC or cUL label where applicable.
- .2 Coordinate delivery of materials with scheduled installation date to allow minimum storage time at job-site.
- .3 Store materials under cover and protect from weather and damage in compliance with manufacturer's requirements.
- .4 Comply with recommended procedures, precautions or remedies described in material safety data sheets as applicable.
- .5 Do not use damaged or expired materials.

1.11 PROJECT CONDITIONS

- .1 Do not use materials that contain flammable solvents.
- .2 Scheduling:
 - .1 Schedule installation of CAST IN PLACE firestop devices after completion of floor formwork, metal form deck, or composite deck but before placement of concrete.
 - .2 Schedule installation of Drop-In firestop devices after placement of concrete but before installation of the pipe penetration. Diameter of sleeved or cored hole to match the listed system for the device.
 - .3 Schedule installation of other firestopping materials after completion of penetrating item installation but prior to covering or concealing of openings.

- .3 Verify existing conditions and substrates before starting work. Correct unsatisfactory conditions before proceeding.
- .4 Weather conditions: Do not proceed with installation of firestop materials when temperatures exceed the manufacturer's recommended limitations for installation printed on product label and product data sheet.
- .5 During installation, provide masking and drop cloths to prevent firestopping materials from contaminating any adjacent surfaces.

PART 2 PRODUCTS

2.1 FIRESTOPPING, GENERAL

- .1 Provide firestopping composed of components that are compatible with each other, the substrates forming openings, and the items, if any, penetrating the firestopping under conditions of service and application, as demonstrated by the firestopping manufacturer based on testing and field experience.
- .2 Provide components for each firestopping system that are needed to install fill material. Use only components specified by the firestopping manufacturer and approved by the qualified testing agency for the designated fire-resistance-rated systems.
- .3 Firestopping Materials are either "cast-in-place" (integral with concrete placement) or "post installed." Provide cast-in-place firestop devices prior to concrete placement.
- .4 Penetrations in Smoke Barriers: Provide firestopping with ratings determined in accordance with ULC S-115.
 - .1 L-Rating: Not exceeding 25.4 L/s/sq.m (5.0 cfm/sq.ft.) of penetration opening at both ambient and elevated temperatures.
- .5 Mold Resistance: Provide penetration firestopping with mold and mildew resistance rating of 0 as determined by ASTM G21.

2.2 ACCEPTABLE MATERIALS

- .1 Hilti (Canada) Corporation (1-800-363-4458), 3M (1-800-328-1687), or as alternative materials approved by addendum in accordance with Instructions to Tenderers.

2.3 MATERIALS

- .1 Use only firestop products that have been ULC or cUL tested for specific fire-rated construction conditions conforming to construction assembly type, penetrating item type, annular space requirements, and fire-rating involved for each separate instance.
- .2 Pre-Installed firestop devices for use with non-combustible and combustible pipes (closed and open systems) penetrating concrete floors and/or gypsum walls.
- .3 Sealants or caulking materials for use with non-combustible items including steel pipe, copper pipe, rigid steel conduit and electrical metallic tubing (EMT).
- .4 Sealants or caulking materials for use with sheet metal ducts.
- .5 Intumescent sealants or caulking materials for use with combustible items (penetrates consumed by high heat and flame) including insulated metal pipe, PVC jacketed, flexible cable or cable bundles and plastic pipe.
- .6 Firestop collar or wrap devices attached to assembly around combustible plastic pipe (closed and open piping systems) tested to 50 Pa. differential.
- .7 Materials used for large size/complex penetrations made to accommodate cable trays, multiple steel and copper pipes, electrical busways in raceways.
- .8 Non curing, re-penetrable materials used for large size/complex penetrations made to accommodate cable trays, multiple steel and copper pipes, electrical busways in raceways.
- .9 For blank openings made in fire-rated wall or floor assemblies, where future penetration of pipes, conduits, or cables is expected.
- .10 For penetrations through a Fire Separation wall provide a firestop system with a "F" Rating as determined by ULC or cUL as indicated below:

Fire Resistance Rating Firestopping Assembly	Required ULC or cUL "F" Rating of Separation	of
30 minutes	20 minutes	
45 minutes	45 minutes	
1 hour	45 minutes	
1.5 hours	1 hour	
2 hours	1.5 hours	
3 hours	2 hours	
4 hours	3 hours	

For combustible pipe penetrations through a Fire Separation provide a firestop system with a "F" Rating as determined by ULC or cUL which is equal to the fire resistance rating of the construction being penetrated.

- .11 For penetrations through a Fire Wall or horizontal Fire Separation provide a firestop system with a "FT" Rating as determined by ULC or cUL which is equal to the fire resistance rating of the construction being penetrated.

PART 3 EXECUTION

3.1 PREPARATION

- .1 Verification of Conditions: Examine areas and conditions under which work is to be performed and identify conditions detrimental to proper or timely completion.
 - .1 Verify penetrations are properly sized and in suitable condition for application of materials.
 - .2 Surfaces to which firestop materials will be applied shall be free of dirt, grease, oil, rust, laitance, release agents, water repellents, and any other substances that may affect proper adhesion.
 - .3 Ensure all service lines are in place, tested and acceptable to the authority having jurisdiction, prior to application of fire stopping and smoke seal.
 - .4 Provide masking and temporary covering to prevent soiling of adjacent surfaces by firestopping materials.
 - .5 Comply with manufacturer's recommendations for temperature and humidity conditions before, during and after installation of firestopping.
 - .6 Do not proceed until unsatisfactory conditions have been corrected.

3.2 COORDINATION

- .1 Coordinate construction of openings and penetrations to ensure that the fire stop systems are installed according to specified requirements.
- .2 Coordinate sizing of sleeves, openings, core-drilled holes, or cut openings to accommodate through-penetration fire stop systems.
- .3 Coordinate fire stopping with other trades so that obstructions are not placed in the way prior to the installation of the fire stop systems.

3.3 INSTALLATION

- .1 Regulatory Requirements: Install firestop materials in accordance with ULC Fire Resistance Directory or UL Products Certified for Canada (cUL) Directory or Omega Point Laboratories Directory.

- .2 Manufacturer's Instructions: Comply with manufacturer's instructions for installation of through-penetration and construction joint materials.
 - .1 Seal all holes or voids made by penetrations to ensure an air and water resistant seal.
 - .2 Consult with mechanical engineer, project manager, and damper manufacturer prior to installation of ULC or cUL firestop systems that might hamper the performance of fire dampers as it pertains to duct work.
 - .3 Protect materials from damage on surfaces subjected to traffic.

3.4 FIELD QUALITY CONTROL

- .1 Examine sealed penetration areas to ensure proper installation before concealing or enclosing areas.
- .2 Keep areas of work accessible until inspection by applicable code authorities.
- .3 Inspection of through-penetration firestopping shall be performed in accordance with ASTM E2174, "Standard Practice for On-Site Inspection of Installed Fire Stops" or other recognized standard.
- .4 Perform under this section patching and repairing of firestopping caused by cutting or penetrating of existing firestop systems already installed by other trades.

3.5 IDENTIFICATION & DOCUMENTATION

- .1 The firestop contractor is to supply documentation for each single application addressed. This documentation shall identify each penetration and joint location on the entire project.
- .2 The Documentation Form for through penetrations is to include:
 - .1 A Sequential Location Number
 - .2 The Project Name
 - .3 Date of Installation
 - .4 Detailed description of the penetrations location
 - .5 Tested System or Engineered Judgement Number
 - .6 Type of assembly penetrated
 - .7 A detailed description of the size and type of penetrating item
 - .8 Size of opening
 - .9 Number of sides of assemblies addressed
 - .10 Hourly rating to be achieved
 - .11 Installers Name
- .3 Submit the record document to the Engineer at the completion of the project.

- .4 Identify through-penetration firestop systems with pressure-sensitive, self-adhesive, preprinted vinyl labels. Attach labels permanently to surfaces of penetrated construction on both sides of each firestop system installation where labels will be visible to anyone seeking to remove penetrating items or firestop systems. Include the following information on labels:
 - .1 The words: "Warning -Through Penetration Firestop System-Do Not Disturb. Notify Building Management of Any Damage."
 - .2 Contractor's Name, address, and phone number.
 - .3 Through-Penetration firestop system designation of applicable testing and inspecting agency.
 - .4 Date of Installation.
 - .5 Through-Penetration firestop system manufacturer's name.
 - .6 Installer's Name.

3.6 ADJUSTING AND CLEANING

- .1 Remove equipment, materials and debris, leaving area in undamaged, clean condition.
- .2 Clean all surfaces adjacent to sealed holes and joints to be free of excess firestop materials and soiling as work progresses.

3.7 WASTE MANAGEMENT

- .1 Separate and recycle waste materials in accordance with Waste Management Plan as specified in Section 01 74 19, and place in designated areas for recycling.
- .2 Place materials defined as hazardous or toxic waste in designated containers. Before disposing of containers, relieve containers of any remaining foam and pressure. Allow foam to fully cure before disposing. Never dispose of foam in a liquid state.
- .3 Collect and separate plastic, paper packaging and corrugated cardboard in accordance with Waste Management Plan.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections in Divisions 20, 21, 22, 23 & 25.

1.2 REFERENCES

- .1 National Fire Protection Association (NFPA)
 - .1 NFPA (Fire) 13, Standard for the Installation of Sprinkler Systems, 2016 Edition.
 - .2 NFPA (Fire) 14, Standard for the Installation of Standpipe and Hose Systems, 2016 Edition
 - .3 NFPA (Fire) 20, Standard for the Installation of Stationary Pumps for Fire Protection, 2016 Edition.
- .2 National Research Council Canada
 - .1 NRCC NBCC-2015, National Building Code of Canada.

1.3 DEFINITIONS

- .1 SRS: acronym for Seismic Restraint System.

1.4 QUALIFICATIONS

- .1 Prime mechanical contractor shall engage a Seismic Engineer who shall be responsible for all mechanical sections to ensure all mechanical sections listed in Item 1.1.1 are covered. Prime mechanical contractor shall ensure the Seismic Engineer is a Professional Engineer holding a Certificate of Authorization in the Province of Ontario with a minimum of 5 years experience in seismic design, and is covered with a minimum of \$2 million Professional Liability Insurance.
- .2 The Manufacturer shall be a member of VISCMA (Vibration Isolation and Seismic Control Manufacturers Association). They shall have a letter issued to their Supplier confirming that they have reviewed and accepted the engineering practices used by the Seismic Engineer. The letter shall also state that the manufacturer accepts the Supplier to act as their representative for the product.
- .3 Acceptable Suppliers: HTS Engineering, Master Group, Walmar, E.H. Price. Alternate to be approved by Addendum (only).

1.5 GENERAL DESCRIPTION

- .1 This section covers design, supply and installation of complete SRS for all systems, equipment specified for installation on this project. This includes fire protection piping & mechanical equipment and systems, both vibration isolated and statically supported.
- .2 SRS to be fully integrated into & compatible with:
 - .1 Noise and vibration controls specified elsewhere in this project specification.
 - .2 Structural, mechanical, electrical design of project.
- .3 During a seismic event, SRS to prevent systems and equipment from causing personal injury and from moving from normal position unless noted otherwise. Specified critical systems as noted below must remain operational during and after an seismic event:
 - .1 All systems for buildings as listed in OBC Table 4.1.8.18 - non-structural components.
 - .2 Life safety systems.

1.6 SUBMITTALS

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Seismic Engineer shall be a Professional Engineer specializing in design of SRS and registered in Province of Ontario. The following submittals shall bear the SRS Design Engineer's seal and signature:
 - .1 A complete list of documents reviewed & list of exclusion.
 - .2 Full details of design criteria, calculations for all equipment & associated systems.
 - .3 A spreadsheet identifying all equipment requiring or not requiring seismic restraints and include all calculations.
 - .4 Copy of shop drawings and product data sent to Structural Engineer for review of connection points to building structure.

1.7 FINAL CERTIFICATION SUBMITTAL

- .1 Seismic Engineer shall be a Professional Engineer specializing in design of SRS and registered in Province of Ontario. The following shall bear the SRS Design Engineer's seal and signature:
 - .1 SRS installation inspections.
 - .2 SRS final certification letter for the project.
- .2 The Fire Protection Contractors shall be responsible for their respective discipline as it relates to Seismic restraints system. The contractor shall adhere to Section 20 05 49.01 and/or more stringent code (i.e. NFPA (Fire) 13, 14 & 20). Prime mechanical contractor to compile all of the above, review and submit for the record.

- .3 The final certification letter shall be formatted to identify the following within the body of the letter:
 - .1 The date of the final inspection.
 - .2 A statement that lists ALL contract documents which were reviewed including but not limited to the mechanical drawings, project change orders, site instructions, etc.
 - .3 A statement which clearly identifies any exclusions of scope of service.
 - .4 A statement that certifies the complete mechanical seismic installation meets the latest version of OBC & applicable codes & standards.

1.8 MAINTENANCE DATA

- .1 Provide maintenance data including monitoring requirements for incorporation into manuals specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Definitions
 - .1 Seismic System: isolation and seismic restraint products supplied by one supplier.
 - .2 Manufacturer: manufacturer of the isolation and seismic restraint system.
 - .3 Supplier: manufacturers' and seismic engineer's representative
- .2 Each contractor shall use one Supplier to provide seismic design, isolation, and seismic restraint.
- .3 Seismic restraints are to be provided for all operational and functional components of building services in accordance with the current National Building Code, and NFPA (Fire) 13, 14 & 20.
- .4 The contractor shall utilize a Supplier familiar with the design of seismic systems to provide a comprehensive package of isolation and seismic restraint for the project. Provide detailed shop drawings showing the proposed restraint system for all required equipment, piping, and ductwork on the project. The shop drawings submittals shall include all items listed in Item 1.6.
 - .1 Acceptable Manufacturers: Kinetics / Vibron, Tecoustics, Mason, Gripple Seismic, Vibroaxoustics.
 - .2 Alternates to be approved by Addendum only.
- .5 Cable restraint systems, rod stiffener clamps and seismic isolator capacities to be verified by an independent test laboratory. Connection materials and site specific designs to be by the Seismic Engineer. The Seismic Engineer may specify material and anchors provided by the contractor where this is appropriate. It is the contractors' responsibility to ensure that the Seismic Engineers' requirements and specification have been met.
- .6 At the completion of the project, the Supplier and the Seismic Engineer shall review the installations on site, and shall prepare a written report, with a sealed letter from the Seismic

Engineer, certifying that the installations have been completed in accordance with their design and shop drawings. Refer to item 1.1.

2.2 SEISMIC FORCE

- .1 The Importance Factor for this project is:
 - .1 $I = 1.0$ - All other buildings i.e.: Office & General Buildings. Note: As per NBC.
- .2 The site classification for seismic site response and shear wave velocity parameters shall be as indicated on structural documents and as recorded in the geotechnical report.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install Seismic Restraint Systems in accordance with Seismic Engineer's and manufacturer's recommendations.
- .2 Install SRS at least 25 mm from all other equipment, systems, services.
- .3 Co-ordinate connections with all disciplines.

3.2 INSPECTION AND CERTIFICATION

- .1 SRS to be inspected and certified by Manufacturer upon completion of installation.
- .2 Seismic Design Engineer shall provide written report to Engineer certifying that SRS has been installed in accordance with the SRS drawings. The report shall bear the seal and signature of the SRS Design Engineer.

3.3 COMMISSIONING DOCUMENTATION

- .1 Upon completion and acceptance of certification, hand over to Engineer complete set of construction documents, revised to show "as-built" conditions.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit catalogue details for each type of door illustrating profiles, dimensions and methods of assembly.

PART 2 PRODUCTS

2.1 ACCESS DOORS

- .1 Supply and install as necessary to gain access to all concealed mechanical equipment for operating, inspecting, adjusting, servicing.
- .2 Sizes: Except as indicated otherwise, to be minimum sizes as follows:
 - .1 For body entry: 600 x 600 mm (24" x 24").
 - .2 For hand entry: 300 x 300 mm (12" x 12").
- .3 Construction: Rounded safety corners, concealed hinges, screwdriver latch, anchor straps, able to open 180°.
- .4 Materials
 - .1 Tiled or marble surfaces and other special areas: Stainless steel with brushed satin or polished finish as directed by Consultant.
 - .2 All other areas: Prime coated steel.
- .5 Fire Rating
 - .1 Access doors fire rating to match that of wall, ceiling or floor the access door is installed in. Coordinate with architectural drawings.

2.2 EXCLUSIONS

- .1 Lay-in tile ceilings. In this instance, use unobtrusive identification locators.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Installation in accordance with Manufacturer's installation instructions for particular surface.

3.2 LOCATION

- .1 Location: Ensure that equipment is clearly within view and accessible for operating, inspecting, adjusting, servicing without the need for special tools.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 001000 - General Instructions and Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .2 National Fire Protection Association
 - .1 NFPA (Fire) 13, Standard for the Installation of Sprinkler Systems, 2016 Edition.
- .3 National Research Council Canada
 - .1 NRCC NBCC-2015, National Building Code of Canada.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 001000 - General Instructions and Section 20 05 01 - Mechanical General Requirements and in accordance with NFPA (Fire) 13, working plans and design requirements.
- .2 Pipe layout shall be the Contractors responsibility and fully coordinated with other trades.

1.4 ENGINEERING DESIGN CRITERIA

- .1 Design system in accordance with NFPA (Fire) 13 using following parameters:
 - .1 System shall be wet pipe systems as indicated.
 - .2 All areas shall be designed for hazard coverage indicated with design area and associated densities.
 - .3 Pipe size and layout:
 - .1 Hydraulic design.
 - .2 Sprinkler layout to NFPA (Fire) 13 and with sprinkler centred in short direction of ceiling tile and no less than 300 mm from the tile's edge unless approved otherwise. Sprinkler contractor shall be responsible to provide sprinkler and piping layout fully coordinated with other systems.
 - .3 The hydraulic design shall be sized to accommodate the highest and most remote zones and where indicated to accommodate future building addition.
 - .4 Allow for additional sprinklers and pipe distribution to suit electrical, architectural and structural coordination.
 - .5 Sprinklers shown are for architectural coordination, coverage to suit NFPA (Fire) 13 requirements. Provide additional sprinklers as required.
 - .4 Water supply:
 - .1 Base design on NFPA (Fire) 13 and obtain water supply data from nearest fire hydrant (most recent test data indicate 60 psi static and 40 psi @ 716 gpm at nearest hydrant (Hydrant #56)). Hydraulic calculations shall commence at water main connection at street. Provide as part of hydraulic calculation submission, fire hydrant flow test data (to be performed by contractor) and deduct 10% as safety factor based on available pressure value. Note: Bid price must allow for

- appropriate pipe sizing, head selection and additional hangars to accommodate the design densities indicated with respect to the low water pressure available.
- .5 Drawings and calculations shall be certified by a Professional Engineer licensed in the Province of Ontario.
 - .6 Sprinkler system to be seismically restrained to National Building Code and NFPA (Fire) 13 requirements.
 - .7 Final installations to be reviewed by Professional Engineer licensed in the Province of Ontario. NFPA (Fire) 13 compliance letter to be stamped by Hydraulic Design Engineer and submitted at end of contract.

1.5 DRAWING PREPARATION

- .1 Review architectural, structural, mechanical and electrical drawings to determine interferences affecting the distribution layout prior to shop drawing submission.

1.6 MAINTENANCE DATA

- .1 PROVIDE MAINTENANCE DATA FOR INCORPORATION INTO MANUAL SPECIFIED IN SECTION 001000 - GENERAL INSTRUCTIONS AND SECTION 20 05 01 - MECHANICAL GENERAL REQUIREMENTS.

1.7 MAINTENANCE MATERIALS

- .1 Provide spare sprinklers and tools within cabinet as required by NFPA (Fire) 13.

1.8 ACCEPTABLE SPRINKLER CONTRACTORS

- .1 Contractors shall be members of Canadian Automatic Sprinkler Association (CASA), and must submit proof of good standing at time of bidding.

PART 2 PRODUCTS

2.1 PIPE, FITTINGS AND VALVES

- .1 Pipe:
 - .1 Ferrous: to NFPA (Fire) 13. Painted red.
 - .2 Ferrous hot dipped galvanized: to NFPA (Fire) 13 in corrosive or damp environments.
- .2 Fittings and joints to NFPA (Fire) 13:
 - .1 Ferrous: screwed, welded, flanged or roll grooved.
 - .2 All exposed piping shall be rigid piping.
- .3 Flexible sprinkler drops:
 - .1 Braided flexible stainless steel sprinkler drops, cULus and FM listed for fire protection service for installation on suspended ceiling grids, wood or metal stud/joist or furring channels.
 - .2 25 mm (1") nominal ID braid hose and fitting made of 304 stainless steel, 1206 kPa (175 psi) maximum working pressure, 178 mm (7") minimum bending radius within length of

- 750 mm to 1800 mm as per cULus. The maximum amount of allowable bends as per cULus are as follows: 750 mm (36") (5 bends); 1200 mm (48") (8 bends); 1500 mm (60") (10 bends); 1800 mm (72") (12 bends).
- .3 Inlet nipple 25 mm (1") NPT with straight or 90° reducer for 13 mm (1/2") or 20 mm (3/4") NPT sprinkler.
 - .4 A steel bracket with square bar, adjustable centre bracket and adjustable end brackets suitable for ceiling types. End bracket shall have permanent securement to ceiling system.
 - .5 Acceptable material: Victaulic Model VicFlex AH2; Viking model VKFD28B.
- .4 Valves:
- .1 ULC listed for fire protection service.
 - .2 Up to NPS 2: bronze, screwed ends, OS&Y rising stem gate or ball valve.
 - .3 NPS 2-1/2 and over: cast iron, flanged or roll grooved ends, OS&Y rising stem gate or butterfly type.
 - .4 Check valves: swing type as above.
 - .5 Ball drip check valve.
- .5 Pipe hangers:
- .1 ULC listed for fire protection services.
- .6 Sprinkler system shall be rated at 1380 kPa (200 psi).
- .7 **Piping in exposed areas to be primed and painted red.**

2.2 BACKFLOW PREVENTER

- .1 ULC and FM listed, double check valve assembly, vertical upflow arrangement if required, tri-link check modules, 304 stainless steel slave housing, grooved ends, supervised gate valves. Rated working pressure 1207 kPa (175 psi) hydrostatic test pressure 2068 kPa (300 psi).
 - .1 Acceptable material: Watts Model 757N-BFG.

2.3 SPRINKLERS

- .1 General: to NFPA (Fire) 13 and ULC listed for fire services.
- .2 Provide wire guards in all mechanical rooms, storage areas, electrical rooms and in flexible cabin lab.
- .3 All sprinklers shall have low zinc content (less than 10%) brass alloy and metal to metal sealing mechanism in the water ways.
- .4 Acceptable materials: Viking, Grinnell, Victaulic and Tyco.

2.4 CONCEALED SPRINKLER

- .1 Fully concealed pendent, quick response for hazard coverage as indicated, 5.6 K factor, enclosed escutcheon, separate two-piece design of mounting cup and coverplate, internal threaded closure, 68°C (155°F) rated, 13 mm (½") adjustment, FM approved, white enamel or chrome finish, as directed by Departmental Representative.

2.5 SEMI-RECESSED SPRINKLER

- .1 Semi-recessed pendent, quick response for hazard coverage as indicated, 5.6 K factor, extended adjustable escutcheon, chrome finish, FM approved, glass bulb type; 68°C (155°F) rated, 13 mm (½") orifice.

2.6 UPRIGHT SPRINKLER

- .1 Upright bronze, quick response for hazard coverage as indicated, 5.6 K factor minimum, FM approved, chrome finish (white finish within Rooms 108 and 115), glass bulb type c/w wire guard; 68°C (155°F) rated, 13 mm (½") orifice (20 mm orifice to meet coverage with available pressure).

2.7 PENDANT SPRINKLER

- .1 Pendant, quick response for hazard coverage as indicated, 5.6 K factor, adjustable chrome escutcheon, FM approved, chrome finish, glass bulb type; 68°C (155°F) rated, 13 mm (½") orifice.

2.8 SIDEWALL SPRINKLER

- .1 Sidewall quick response for hazard occupancy as indicated, FM approved, 5.6 K factor, chrome finish glass bulb with adjustable escutcheon plate, 68°C (155°F) rated, 13 mm (½") orifice.

2.9 SUPERVISORY SWITCHES

- .1 General: to NFPA (Fire) 13 and ULC listed for fire service.
- .2 Die-cast enclosure over, die-cast base, all part corrosion resistant finish, paint finish.
- .3 Valves:
 - .1 Mechanically attached to valve body, with normally open and normally closed contacts and supervisory capability.
 - .2 Cover tamper activated by cover removal.
 - .3 Two sets of SPDT contacts, 15.0 Amps @ 125/250 VAC, 2.5 Amps @ 30 VDC resistive.
- .4 Flow switch type:
 - .1 With normally open and normally closed contacts and supervisory capability.
 - .2 0.63 l/s (10 GPM) Minimum flow rate.
 - .3 Cover taper activated by cover removal.
 - .4 Two sets of SPDT contacts, 15.0 Amps @ 125/250 VAC, 2.0 Amps @ 30 VDC resistive.
 - .5 Mechanical retard, adjustable from 10-90 seconds.

- .5 Pressure alarm switch:
 - .1 With normally open and normally closed contacts and supervisory capability.
 - .2 On-off differential 6.9 kPa (1 psi) minimum.
 - .3 Visible pressure indication: 206-1338 kPa (30-165 psi).
 - .4 Adjustable range: 172-1207 kPa (25-175 psi).
 - .5 Maximum operating pressure: 1207 kPa (175 psi).
 - .6 SPDT for use with normally open or normally closed circuits, 250 VAC 15 A ¼HP, 125 VAC 15 A 1/8 HP, 250 VDC 0.2 A, 125 VAC 0.4 A, 30 VDC 2.0 A.
 - .7 Die-cast aluminum cover with enamel red paint finish, zinc plated steel base.

2.10 FIRE DEPARTMENT CONNECTION

- .1 Fully recessed type, 100 mm x 65 mm x 65 mm with "SPRINKLER" identification, polished chrome finish c/w caps and chains.

2.11 PRESSURE GAUGES

- .1 ULC listed.
- .2 Shall have maximum limit of not less than twice normal working pressure at point where installed.

2.12 INSPECTOR TEST STATION

- .1 One piece design test and drain assembly, FM/ULC listed, 1034 kPa rated.
- .2 Approved materials: Victaulic, A.G.F. Manufacturing Inc., National Fire Equipment Ltd. test and drain assembly.

2.13 SIGNS

- .1 Signs for control drain and test valves: to NFPA (Fire) 13.

2.14 SPARE PARTS CABINET

- .1 For storage of maintenance materials, spare sprinklers and special tools.
- .2 Construct to sprinkler manufacturers standard.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install, inspect and test to acceptance in accordance with NFPA (Fire) 13.
- .2 Testing to be witnessed by Authority having jurisdiction.
- .3 Test station to be piped to test drain riser.

- .4 Install and test equipment to manufacturers' standards.
- .5 Provide adequate pipe supports and bracing as per NFPA (Fire) 13 requirements and as follows:
 - .1 Fire protection contractor shall carry a structural engineer to design and certify the support system for any piping distribution system exceeding 100 mm (4") or where piping is grouped such that the distributed weight exceeds the building structure limits. (Note: In steel building structure the piping supports shall never be supported by a single joist or off the bottom chord of the joist or truss.
 - .2 Fire protection tree to be supported off pipes to ends from floor.

3.2 TESTING

- .1 Pressure test all piping systems as required by NFPA and provide pressure test verification documents.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 National Fire Protection Association NFPA
 - .1 NFPA (Fire) 10, Portable Fire Extinguishers, 2018 Edition.
- .2 Ontario Fire Code.
- .3 Underwriters Laboratories of Canada
 - .1 CAN/ULC S508-02 (R2013), Standard for the Rating and Fire Testing of Fire Extinguishers.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.

1.4 MAINTENANCE DATA

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 MULTI-PURPOSE DRY CHEMICAL EXTINGUISHER

- .1 (FE1) Stored pressure dry chemical type with heavy duty steel cylinder, positive on/off operation, waterproof stainless steel gauge, shut-off nozzle, ULC labelled for A, B and C class protection c/w wall mounting bracket and signage. Size 2.25 kg, 3A-40BC rating.
- .2 (FE2) Stored pressure carbon dioxide type with heavy duty steel cylinder, positive ON/OFF operation, waterproof stainless steel gauge. ULC labelled for B and C class protection. Size: 5 kg, 10-BC rating c/w wall mounting bracket.

2.2 SEMI-RECESSED CABINET

- .1 Semi-recessed type cabinet with 22 gauge primed & painted tub, white baked enamel finish, semi-recessed piano hinged door and turned back to suit wall depth. Flush stainless steel door hatch.
- .2 Acceptable material: National Fire CE-950-3-2 series, Canadian Fire Equipment.

2.3 RECESSED CABINET

- .1 Recessed type cabinet with 22 gauge primed & painted tub, 16 gauge front white baked enamel finish, semi-recessed piano hinged door and clear glass front. Flush stainless steel door hatch.
- .2 Acceptable material: National Fire CE-950-3 series, Canadian Fire Equipment.

2.4 IDENTIFICATION

- .1 Identify extinguishers in accordance with recommendations of NFPA (Fire) 10, CAN/ULC S508 and Ontario Fire Code.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install extinguishers where indicated and at a height in accordance with NFPA (Fire) 10 and Ontario Fire Code.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate:
 - .1 Equipment, including connections, fittings, control assemblies and ancillaries. Identify whether factory or field assembled.
 - .2 Wiring and schematic diagrams.
 - .3 Dimensions and recommended installation.
 - .4 Pump performance and efficiency curves.

1.3 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.
- .2 Data to include:
 - .1 Manufacturers name, type, model year, capacity and serial number.
 - .2 Details of operation, servicing and maintenance.
 - .3 Recommended spare parts list with names and addresses.

PART 2 PRODUCTS

2.1 STORM AND SANITARY PUMPS

- .1 NRC supplied pumps. Refer to Appendix A for details.
- .2 Provide piping and accessories to install pumps and accessories within existing storm and sanitary pits on site.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Make piping and electrical connections to pump and motor assembly and controls as indicated.
- .2 Ensure pump and motor assembly do not support piping.

3.2 FIELD QUALITY CONTROL

- .1 Check power supply.
- .2 Check starter protective devices.
- .3 Start-up, check for proper and safe operation.
- .4 Check settings and operation of all hand-off-auto selector switch, operating, safety and limit controls, audible and visual alarms, over-temperature and other protective devices.

END OF SECTION

- .3 American Water Works Association (AWWA)
 - .1 AWWA C111/A21.11-17, Rubber-Gasket Joints for Ductile-Iron Pressure Pipe and Fittings.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 PIPING

- .1 Domestic hot, cold and recirculation systems, within building.
 - .1 Above ground: copper tube, hard drawn, type L: to ASTM B88M.
 - .2 Buried or embedded: copper tube, soft annealed, type K: to ASTM B88M, in long lengths and with no buried joints.
- .2 Piping to be of all North American manufacturer.

2.2 FITTINGS

- .1 Bronze pipe flanges and flanged fittings, Class 150 and 300: to ASME B16.24.
- .2 Cast bronze threaded fittings, Class 125 and 250: to ASME B16.15.
- .3 Cast copper, solder type: to ASME B16.18.
- .4 Wrought copper and copper alloy, solder type: to ASME B16.22.
- .5 Fittings to be of all North American manufacturer.

2.3 JOINTS

- .1 Rubber gaskets, 1.6 mm thick: to AWWA C111/A21.11.
- .2 Bolts, nuts, hex head and washers: to ASTM A307, heavy series.
- .3 Solder: 95/5 lead free solder. No lead content in excess of 0.2%.
- .4 Teflon tape: for threaded joints.
- .5 Dielectric connections between dissimilar metals: dielectric fitting to ASTM F492, complete with thermoplastic liner. Bronze or brass ball valves are an acceptable dielectric fitting where applicable.

2.4 VALVES

- .1 Refer to Section 23 05 23 - Valves.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with Canadian Plumbing Code, Provincial Plumbing Code and local authority having jurisdiction.
- .2 Cut square, ream and clean tubing and tube ends, clean recesses of fittings and assemble without binding.
- .3 Install pipe work in accordance with Section 23 05 05 - Installation of Pipe Work, supplemented as specified herein.

- .4 Assemble piping using fittings manufactured to ANSI standards.
- .5 Install DCW piping below and away from DHW and DHWR and other hot piping so as to maintain temperature of cold water as low as possible.
- .6 Connect to fixtures and equipment in accordance with manufacturer's written instructions unless otherwise indicated.
- .7 Buried tubing:
 - .1 Lay in well compacted washed sand in accordance with AWWA Class B bedding.
 - .2 Bend tubing without crimping or constriction. No fittings permitted below grade.
- .8 Install isolation valves at all branch take-offs and to isolate each piece of equipment, and as indicated.

3.2 PRESSURE TESTS

- .1 Refer to Section 23 05 05 - Installation of Pipework.
- .2 Test pressure: greater of 1½ times maximum system operating pressure or 860 kPa.

3.3 FLUSHING AND CLEANING

- .1 Flush entire system for 8 h. Ensure outlets flushed for 2 h. Let stand for 24 h, then draw one sample off longest run. Submit to testing laboratory to verify that system is clean. Let system flush for additional 2 h, then draw off another sample for testing. Submit test results to Engineer.

3.4 PRE-START-UP INSPECTIONS

- .1 Systems to be complete, prior to flushing, testing and start-up.
- .2 Verify that system can be completely drained.
- .3 Ensure that pressure booster systems are operating properly.
- .4 Ensure that air chambers, expansion compensators are installed properly.

3.5 DISINFECTION

- .1 Flush out, disinfect and rinse system to requirements of authority having jurisdiction and to the approval of Engineer.
- .2 Upon completion, provide laboratory test reports on water quality for Engineer approval.

3.6 START-UP

- .1 Timing: Start up after:
 - .1 Pressure tests have been completed.
 - .2 Disinfection procedures have been completed.
 - .3 Certificate of static completion has been issued.
- .2 Provide continuous supervision during start-up.
- .3 Start-up procedures:
 - .1 Establish circulation and ensure that air is eliminated.
 - .2 Check pressurization to ensure proper operation and to prevent water hammer, flashing and/or cavitation.
- .4 Rectify start-up deficiencies.

3.7 PERFORMANCE VERIFICATION

- .1 Timing:
 - .1 After pressure and leakage tests and disinfection completed, and certificate of completion has been issued by authority having jurisdiction.
- .2 Procedures:
 - .1 Verify that flow rate and pressure meet Design Criteria.
 - .2 TAB DHWR in accordance with Section 23 05 93 - Testing Adjusting and Balancing (TAB) of Mechanical Systems.
 - .3 Adjust pressure regulating valves while withdrawal is maximum and inlet pressure is minimum.
 - .4 Verify performance of temperature controls.
 - .5 Verify compliance with safety and health requirements.
 - .6 Check for proper operation of water hammer arrestors. Run 10% of outlets for 10 seconds, then shut off water immediately. If water hammer occurs, replace water hammer arrestor or re-charge air chambers. Repeat for outlets and flush valves.
 - .7 Confirm water quality consistent with supply standards, verifying that no residuals remain as a result of flushing and/or cleaning.
- .3 Reports:
 - .1 In accordance with Section 20 05 01 - Mechanical General Requirements: Reports, using report forms as specified in Section 20 05 01 - Mechanical General Requirements: Report Forms and Schematics.
 - .2 Include certificate of water flow and pressure tests conducted on incoming water service, demonstrating adequacy of flow and pressure.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society for Testing and Materials (ASTM)
 - .1 ASTM B32-08 (R2014), Specification for Solder Metal.
 - .2 ASTM B306-13, Specification for Copper Drainage Tube (DWV).
 - .3 ASTM C564-14, Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings.
 - .4 ASTM C1540-18, Standard Specification for Heavy Duty Shielded Couplings Joining Hubless Cast Iron Soil Pipe and Fittings.
- .2 Canadian Standards Association (CSA)
 - .1 CSA B70-12 (R2016), Cast Iron Soil Pipe, Fittings and Means of Joining.
 - .2 CSA B125-01, Plumbing Fittings.
- .3 Cast Iron Soil Pipe Institute (CISPI)
 - .1 CISPI 310-04, Specification for coupling for use in connection with hubless cast iron soil pipe and fittings for sanitary and storm drain, waste, and vent piping applications.

PART 2 PRODUCTS

2.1 COPPER TUBE AND FITTINGS

- .1 Above ground sanitary, storm and vent Type DWV to: ASTM B306.
 - .1 Fittings.
 - .1 Cast brass: to CSA B125.
 - .2 Wrought copper: to CSA B125.
 - .2 Solder: 95/5, lead free, to ASTM B32, type 50A.

2.2 CAST IRON PIPING AND FITTINGS

- .1 Above ground sanitary, storm and vent: to CSA B70.
 - .1 Mechanical joints.
 - .1 Provide hubless soil pipe couplings designated as Heavyweight, constructed of extra wide 4 to 6 band corrugated type 304 stainless steel bands, with heavy duty worm drive clamps.
 - .2 Flanged gasket to be made of neoprene rubber, meeting ASTM C564 and unit to meet CISPI 310 and ASTM C1540 standards.
 - .3 Tightened to 80 in. lbs. torque.

- .4 Acceptable materials: Mission Rubber Company.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with Canadian Plumbing Code, Provincial Plumbing Code and local authority having jurisdiction.
- .2 Allow for locating of existing buried sanitary piping prior to excavating for connection of new services.
- .3 Bedding and backfilling should be in accordance with City of Ottawa standards and specifications. Install buried pipe on 150 mm (6") bed of compacted clean Granular A bedding compacted to 95% (min.) dry proctor density, shaped to accommodate hubs and fittings, to line and grade as indicated. The material should be placed in maximum 300 mm thick lifts. (If trench bottom is unstable, bring to Engineers attention before bedding is laid). Limit vertical deflection and increase pipe support by compacting soil in both directions away from the pipe toward trench walls. Initial backfill to begin at springline of pipe to 300 mm (12") above pipe using compacted clean Granular A bedding compacted to 95% (min.) dry proctor density. Final backfill shall be in accordance with Geotechnical Report and as minimum utilize clean Granular A compacted to 95% dry proctor density in 300 mm thick lifts. Bedding and backfill shall be provided by this division and in accordance with Div. 02
- Site Work.
- .4 Install above ground piping parallel and close to walls and ceilings to conserve headroom and space, and to grade as indicated.
- .5 Urinal waste pipe & fittings shall be DWV PVC equivalent to IPEX System 15 in accordance with specification Section 22 13 18 - Drainage Waste and Vent - Plastic. Extend plastic piping up to combined waste from adjacent lavatory or other plumbing fixtures allowing dilution of waste.
- .6 On pumped discharge, cast iron with mechanical joint shall not be allowed. (Use Type L copper with DWV fittings.)

3.2 TESTING

- .1 Test in accordance with OBC Part 7 requirements.
- .2 Hydraulically test to verify grades and freedom from obstructions.

3.3 PERFORMANCE VERIFICATION

- .1 Cleanouts:
 - .1 Ensure accessible and that access doors are correctly located.
 - .2 Open, cover with linseed oil and re-seal.
 - .3 Verify that cleanout rods can probe as far as the next cleanout, at least.
- .2 Test to ensure traps are fully and permanently primed.
- .3 Storm water drainage:
 - .1 Verify domes are secure.
 - .2 Ensure weirs are correctly sized and installed correctly.
 - .3 Verify provisions for movement of roof system.
- .4 Ensure that fixtures are properly anchored, connected to system and effectively vented.
- .5 Affix applicable label (storm, sanitary, vent, pump discharge etc.) c/w directional arrows every floor or 4.5 m (whichever is less).

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society for Testing and Materials (ASTM)
 - .1 ASTM D2564-12(2018), Specification for Solvent Cements for Poly(Vinyl-Chloride) (PVC) Plastic Piping Systems.

 - .2 CAN/ULC S115-11, Standard Method of Fire Tests of Firestop Systems.

PART 2 PRODUCTS

2.1 PIPING AND FITTINGS

- .1 DWV PVC (Polyvinyl Chloride):
 - .1 Application: below grade sanitary, storm & vent piping & fittings and above grade where combustible piping is permitted **excluding** OBC 3.2.6 (High-rise) applications and ceiling plenums.
 - .2 Pipe and Fittings: Drain, waste and vent pipe and fittings shall be certified to CSA B181.2. When combustible pipe and fittings are used in buildings required to be of noncombustible construction, they shall be listed by ULC to the Standard CAN/ULC S102.2 and clearly marked with the certification logo indicating a flame-spread rating not exceeding 25.
 - .3 Acceptable material: IPEX System 15 DWV.
- .2 Fire & smoke resistant coated DWV PVC (Polyvinyl Chloride) piping & fittings:
 - .1 Application: Above grade sanitary, storm & vent piping & fittings where combustible piping is permitted including OBC 3.2.6 High-rise applications and within ceiling plenums.
 - .2 Pipe and Fittings: Drain, waste and vent pipe and fittings shall be certified to CSA B181.2 and when used in noncombustible construction, high-rise buildings and air plenums, they shall be tested and listed in accordance with CAN/ULC S102.2 and clearly marked with the

- certification logo indicating a flame-spread rating not exceeding 25 and a smoke-developed classification not exceeding 50.
- .3 Acceptable material: IPEX System XFR 15/50 PVC-DWV.
 - .3 Firestopping Devices:
 - .1 All combustible pipe penetrations shall comply with the requirements described in the O.B.C. 3.1.9.4.(1) through (8) and provide a firestop system that has been Tested and Listed to the test Standard CAN/ULC S115 with a pressure differential of 50 Pa. In addition, the manufacturer shall provide a documentation confirming compliance with the Listed system.
 - .4 Solvent Welding:
 - .1 Solvent cements shall be CSA certified and meet the requirements of ASTM D2564. One-step cement may be used for sizes from NPS 40 to 150. Two-step cement must be used in conjunction with primer on larger pipe sizes. Proper solvent cementing procedures must be followed at all times.
 - .2 The manufacturer, shall be consulted prior to installation for proper solvent welding procedures and proper solvent cement requirements.
 - .5 Expansion/Contraction:
 - .1 Compensation shall be made to accommodate expansion/contraction on the drainage system. It is recommended that there be compensation on every second floor for the vertical piping system. Consult pipe system manufacturer for specific details regarding approved compensation methods.
 - .6 Compatibility:
 - .1 To ensure compatibility, performance and material quality, all pipe and fitting drainage system shall be produced by the same manufacturer.
 - .7 Quality Control:
 - .1 The manufacturer of the pipe and fitting system shall be contacted prior to the installation to obtain precise installation instructions. Site meetings shall be arranged and include, the Contractor, Manufacturer and Building Inspector.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with Canadian Plumbing Code, Provincial Plumbing Code and local authority having jurisdiction.
- .2 Allow for locating of existing buried sanitary piping prior to excavating for connection of new services.

- .3 Bedding and backfilling should be in accordance with City of Ottawa standards and specifications. Install buried pipe on 150 mm (6") bed of compacted clean Granular A bedding compacted to 95% (min.) dry proctor density, shaped to accommodate hubs and fittings, to line and grade as indicated. The material should be placed in maximum 300 mm thick lifts. (If trench bottom is unstable, bring to Engineers attention before bedding is laid). Limit vertical deflection and increase pipe support by compacting soil in both directions away from the pipe toward trench walls. Initial backfill to begin at springline of pipe to 300 mm (12") above pipe using compacted clean Granular A bedding compacted to 95% (min.) dry proctor density. Final backfill shall be in accordance with Geotechnical Report (if available) and as minimum utilize clean Granular A compacted to 95% dry proctor density in 300 mm thick lifts. Bedding and backfill shall be provided by this division.
- .4 Plastic pipe shall not be used on pumped sanitary & storm discharge. Copper only.

3.2 TESTING

- .1 Test in accordance with OBC Part 7 requirements.
- .2 Pressure test buried systems before backfilling.
- .3 Hydraulically test to verify grades and freedom from obstructions.
- .4 Video Testing:
 - .1 Provide video scanning of underground sanitary and storm piping for contractor's review and approval prior to pouring of concrete. Repair deficiencies and re-scan as required. Submit final video to Engineer for record.
 - .2 Flush & video scan sanitary and storm piping for contractor's review and approval prior to building turnover. Repair deficiencies and re-scan as required. Submit final video to Engineer for record.

3.3 PERFORMANCE VERIFICATION

- .1 Cleanouts:
 - .1 Ensure accessible and that access doors are correctly located.
 - .2 Open, cover with linseed oil and re-seal.
 - .3 Verify cleanout rods can probe as far as the next cleanout, at least.
- .2 Test to ensure traps are fully and permanently primed.
- .3 Storm water drainage:
 - .1 Verify domes are secure.
 - .2 Ensure weirs are correctly sized and installed correctly.
 - .3 Verify provisions for movement of roof system.
- .4 Ensure that fixtures are properly anchored, connected to system and effectively vented.

- .5 Affix applicable label (storm, sanitary, vent, pump discharge etc.) c/w directional arrows every floor or 4.5 m (whichever is less).

END OF SECTION

PART 1 GENERAL

1.3 SUBMITTALS

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 For shop drawings, indicate dimensions, construction details and materials.
- .3 For product data, indicate dimensions, construction details and materials for items specified herein.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

- .2 Data to include:
 - .1 Description of plumbing specialties and accessories, giving manufacturers name, type, model, year and capacity.
 - .2 Details of operation, servicing and maintenance.
 - .3 Recommended spare parts list.

PART 2 PRODUCTS

2.1 FLOOR DRAINS

Existing to remain.

2.2 CLEANOUTS

- .1 Cleanout plugs: heavy cast iron male ferrule with brass screws and threaded brass or bronze plug. Sealing-caulked lead seat or neoprene gasket.
 - .1 Acceptable material: Watts, J.R. Smith & Zurn Z-1449.
- .2 Access covers:
 - .1 Wall access: face or wall type, stainless steel square or round cover with flush head securing screws, bevelled edge frame complete with anchoring lugs. Acceptable material: Watts, Zurn ZANB-1463 (wall) ZANB-1460 (floor).

2.3 NON FREEZE WALL HYDRANTS

- .1 Recessed with integral vacuum breaker, 20 mm (NPS 3/4) hose outlet, locking cover with removable operating key. Polished bronze finish.
- .2 Acceptable material: Watts, J.R. Smith & Zurn Z-1320 (recessed).

2.4 TRAP SEAL PRIMERS

- .1 Type 2: for use on lavatory cold water line.
 - .1 Brass trap seal primer with removable poppet, integral vacuum breaker, access gasketed cover 13 NPT (1/2") threaded inlet and outlet connections, complete with 13 NPT (1/2") sweat connection adapters and 13 NPT (1/2") drip line connection.
 - .2 Trap seal primers are listed with I.A.P.M.O. and CSA and are tested and certified to the ASSE 1018.
 - .3 Trap seal primers shall be installed minimum 305 mm (12") above the grid of a floor drain or flood level rim of equipment served.
 - .4 Operating range for trap seal primers is 138 kPA (20 psi) to 861 kPA (125 psi). Operates on pressure drop of Minimum 14 kPA (2 psi).

- .5 Acceptable material: PPP Prime-pro, Mifab MI-TSP-3, Watts, Zurn.
- .3 Type 3: Electronic Trap Primer - Timer Type
 - .1 Electronic activated type, all brass construction with "O" ring seals, 12 mm (NPT ½) female inlet & 12 mm (NPT ½) female outlet drip line connection with air female inlet & 12 mm (NPT ½) female outlet drip line connection with air gap, viewing holes, and removable filter screen. Trap primer shall have no flow adjustment. Operating range shall be 138 kPa (20 psi) to 861 kPa (125 psi).
Operates on pre-set 24 h clock with manual override switch/test button. Unit shall have 120 V solenoid valve and calibrated manifold for equal water distribution.
One (1) to ten (10) drain taps per unit.
 - .2 Identify on as-built drawings the location of each trap seal primer.
 - .3 Ensure all trap seal primers are accessible for maintenance purposes and are connected to cold water line. Trap line shall be from top of cold water line and include a service valve. All to be installed in steel cabinet and serviceable from access door.
 - .4 Acceptable material: Zurn Z-1020 (1 to 5) for 10 - 2 distribution units will be required.

2.5 WATER HAMMER ARRESTORS

- .1 Copper construction, bellows or piston type: to PDI-WH201.
- .2 Acceptable material: Watts, J.R. Smith & Zurn Z-1700.

2.6 BACK FLOW PREVENTORS

- .1 To CSA B64.10.1.
- .2 Application: as indicated to meet NBC requirements.
- .3 Reduced pressure principle type c/w quarter turn ball valves.
 - .1 Acceptable material: Watts Model 009QT or approved equal.
- .4 Double check valve assembly.
 - .1 Acceptable material: Watts Series LF009 or approved equal.
- .5 Back flow preventer with intermediate atmospheric vent or vacuum breaker.

2.7 VACUUM BREAKERS

- .1 To CSA B64.
- .2 Atmospheric vacuum breaker:
 - .1 Acceptable material: Zurn Model 35VCH (chrome finish), Watts.

- .3 Hose connection vacuum breaker:
 - .1 Acceptable material: Zurn Model BFP-9, Watts.
- .4 Laboratory faucet intermediate vacuum breaker:
 - .1 Acceptable material: Zurn Model 730 to be installed at end of spout, Watts.

2.8 PRESSURE REGULATORS

- .1 Performance:
 - .1 Inlet pressure: 1034 kPa (150 psi).
 - .2 Outlet pressure: 413 kPa (60 psi).
 - .3 Capacity: as indicated.
- .2 NPS 1/2 to NPS 2 bronze body Z3 sealed spring cage, stainless steel adjusting and cage screws, integral stainless steel strainer, Teflon diaphragm, EPDM & Buna-n material not be accepted, replaceable seat, bypass feature, threaded or soldered: certified to CSA B356.
 - .1 Acceptable material: Watts LFU5B-Z3, Wilkins NR3.

2.9 BACKWATER VALVES

- .1 Coated extra heavy cast iron body with bronze seat, revolving bronze flapper and threaded cover.
 - .1 Acceptable material: Watts.
- .2 Access:
 - .1 Surface access.
 - .2 Access pipe with cover: maximum 300 mm (12") depth.
 - .3 Steel housing with gasketed steel cover.
 - .4 Concrete access pit with cover, as indicated.

2.10 HOSE BIBBS AND SEDIMENT FAUCET

- .1 Bronze construction complete with integral back flow preventer, hose thread spout, cap chain, replaceable composition disc, and chrome plated in finished areas.
- .2 Acceptable material: Watts.

2.11 MAKE-UP WATER ASSEMBLY

- .1 20 mm dia. assembly complete with backflow preventer (38BFD03), pressure gauge on inlet and outlet, pressure reducing valve to CSA B356 set to 20 psi (adjustable) (38PRV01), pressure relief valve on low pressure side and ball valves on inlet and outlet.

- .2 Acceptable material: Watts.

2.12 STRAINERS

- .1 860 kPa (125 psi), Y type with 20 mesh, monel, bronze or stainless steel removable screen.
- .2 NPS 2 and under, bronze body, screwed ends, with brass cap.
.1 Acceptable material: Watts, Wilkins S-XL.
- .3 NPS 2½ and over, cast iron body, flanged ends, with bolted cap.
.1 Acceptable material: Watts, Wilkins FS.

2.13 UNDER SINK THERMOSTATIC MIXING VALVE

- .1 Thermostatic Mixing Valve:
- The valve shall be ASSE 1070 and IAPMO CUPC listed and control the temperature of the hot water. It shall have a lead free brass 4-port, "H" pattern body. Lead free* under counter thermostatic valves shall comply with codes and standards, where applicable, requiring reduced lead content. The valve shall include integral check valves, integral screens and an adjustment nut with locking feature. The valve shall be provided with 10 mm (3/8"), male compression or quick-connect fittings.
 - Acceptable material: Watts series LFUSG-B.

2.14 EXPANSION TANKS

- .1 Horizontal or vertical steel pressurized removable bladder and/or diaphragm type expansion tank as per schedule.
- .2 ASME construction, steel shell construction.
- .3 Diaphragm sealed in heavy duty butyl material.
- .4 Polypropylene liner material.
- .5 Working pressure: 862 kPa (150 psi) with ASME stamp and certification including Canadian Registration Number (CRN).
- .6 Working temperature: 93°C (200°F).
- .7 Stainless steel system connections.
- .8 Air precharged to initial fill pressure of system as per schedule.

- .9 Saddles for horizontal installation; base mount for vertical installation.
- .10 Supports: Provide supports with hold down bolts and installation templates incorporating seismic restraint systems.
- .11 Basis of Design: 38EXT01 - Thermextrol ST-5 or approved equal.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with Canadian Plumbing Code, and local authority having jurisdiction.
- .2 Install in accordance with manufacturer's instructions and as specified.

3.2 FLOOR DRAINS

- .1 Floor drains to be installed at lowest point in floor and placed to ensure floor finishing is flush/slightly higher than strainer. Contractor to chip concrete around drains, lower assembly, patch concrete and provide floor finish should the installed elevation be unacceptable to Engineer.
- .2 Contractor to provide suitable means of protecting floor drains and cleanouts from damage during construction. Contractor to be responsible for turning over facility to Owner with floor drains and strainers in new condition. Damaged material shall be replaced with new at contractor's expense.

3.3 CLEANOUTS

- .2 In addition to those required by code, and as indicated, install at base of soil and waste stacks, and rainwater leaders.
- .3 Bring cleanouts to wall or finished floor unless serviceable from below floor.
- .4 Building drain cleanout and stack base cleanouts: line size to maximum NPS4.

3.4 NON FREEZE WALL HYDRANTS

- .1 Install 600 mm (24") above finished grade unless otherwise indicated.

3.5 BACK FLOW PREVENTORS

- .1 Pipe discharges to terminate over nearest drain and or service sink.

- .2 Test and certify each backflow preventor and provide report for inclusion in the commissioning report.
- .3 Acceptable testing contractor shall be Pennex.

3.6 BACKWATER VALVES

- .1 Install in access pit as indicated.

3.7 HOSE BIBBS AND SEDIMENT FAUCETS

- .1 Install at bottom of risers, at low points to drain systems, and as indicated.

3.8 TRAP SEAL PRIMERS

- .1 Install for floor drains and elsewhere, as indicated.
- .2 Install on cold water supply to nearest frequently used plumbing fixture, in concealed space, to approval of Consultant.
- .3 Install plastic tubing to floor drain.
- .4 Identify on as-built drawings the location of each trap seal primer.
- .5 Ensure all trap seal primers are accessible for maintenance purposes. Install access doors if required.

3.9 STRAINERS

- .1 Install with sufficient room to remove basket.

3.10 WATER MAKE-UP ASSEMBLY

- .1 Pipe discharge from relief valve to nearest floor drain.

3.11 MASTER THERMOSTATIC MIXING VALVE

- .1 Install in accordance with manufacturer's instructions.

3.12 START-UP

- .1 General:
 - .1 In accordance with Section 01 91 13 - Commissioning: General Requirements, supplemented as specified herein.
- .2 Timing: Start-up only after:
 - .1 Pressure tests have been completed.
 - .2 Disinfection procedures have been completed.
 - .3 Certificate of static completion has been issued.
 - .4 Water treatment systems operational.
- .3 Provide continuous supervision during start-up.

3.13 TESTING AND ADJUSTING

- .1 General:
 - .1 In accordance with Section 01 91 13 - Commissioning: General Requirements, supplemented as specified herein.
- .2 Timing:
 - .1 After start-up deficiencies rectified.
 - .2 After certificate of completion has been issued by authority having jurisdiction.
- .3 Application tolerances:
 - .1 Pressure at fixtures: +/- 70 kPa.
 - .2 Flow rate at fixtures: +/- 20%.
- .4 Adjustments:
 - .1 Verify that flow rate and pressure meet design criteria.
 - .2 Make adjustments while flow rate or withdrawal is (1) maximum and (2) 25% of maximum and while pressure is (1) maximum and (2) minimum.
- .5 Floor drains:
 - .1 Verify operation of trap seal primer.
 - .2 Prime, using trap primer. Adjust flow rate to suit site conditions.
 - .3 Check operations of flushing features.
 - .4 Check security, accessibility, removability of strainer.
 - .5 Clean out baskets.
- .6 Vacuum breakers, backflow preventers, backwater valves:
 - .1 Test tightness, accessibility for O&M of cover and of valve.
 - .2 Simulate reverse flow and back-pressure conditions to test operation of vacuum breakers, backflow preventers.
 - .3 Verify visibility of discharge from open ports.

- .7 Roof drains:
 - .1 Check location at low points in roof.
 - .2 Check security, removability of dome.
 - .3 Adjust weirs to suit actual roof slopes, meet requirements of design.
 - .4 Clean out sumps.
 - .5 Verify provisions for movement of roof systems.

- .8 Access doors:
 - .1 Verify size and location relative to items to be accessed.

- .9 Cleanouts:
 - .1 Verify covers are gas-tight, secure, yet readily removable.

- .10 Water hammer arrestors:
 - .1 Verify proper installation of correct type of water hammer arrester.

- .11 Wall hydrants:
 - .1 Verify complete drainage, freeze protection.
 - .2 Verify operation of vacuum breakers.

- .12 Pressure regulators, PRV assemblies:
 - .1 Adjust settings to suit locations, flow rates, pressure conditions.

- .13 Strainers:
 - .1 Clean out repeatedly until clear.
 - .2 Verify accessibility of cleanout plug and basket.
 - .3 Verify that cleanout plug does not leak.

- .14 Hydronic system water Make-up Assembly:
 - .1 Verify pressure setting to suit system operating parameters.

- .15 Water meters:
 - .1 Verify proper signal is being received by controls.

- .16 Commissioning Reports:
 - .1 In accordance with Section 01 91 13 - Commissioning: Reports, supplemented as specified herein.

- .17 Training:
 - .1 In accordance with Section 01 91 13 - Commissioning: Training of O&M Personnel, supplemented as specified herein.
 - .2 Demonstrate full compliance with Design Criteria.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 Canadian Standards Association (CSA)
 - .1 CAN/CSA B45 Series-02 (R2013), Plumbing Fixtures.
 - .2 CSA B125-01, Plumbing Fittings.
 - .3 CSA B651-12 (R2017), Accessible Design for the Built Environment.

 - .1 NRCC NBCC-2015, National Building Code of Canada.

1.3 SHOP DRAWINGS

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate, for all fixtures and trim:
 - .1 Dimensions, construction details, roughing-in dimensions.
 - .2 Factory-set water consumption per flush at recommended pressure.
 - .3 (For water closets, urinals): minimum pressure required for flushing.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data including monitoring requirements for incorporation into manuals specified in Section 20 05 01 - Mechanical General Requirements.
- .2 Include:
 - .1 Description of fixtures and trim, giving manufacturer's name, type, model, year, capacity.
 - .2 Details of operation, servicing, maintenance.
 - .3 List of recommended spare parts.

PART 2 PRODUCTS

2.1 MANUFACTURED UNITS

- .1 Fixture piping.
 - .1 Hot and cold water supplies to each fixture:
 - .1 Stops supplies shall be all brass with full turn brass seams and washer replaceable attachment shall be IPS inlet x compression OD outlet to fixture. All fixture stop valves shall be screw driver type.
 - .2 Chrome plated in all exposed places.
 - .2 Waste:
 - .1 Cast brass adjustable style P-trap with cleanout on each fixture not having integral trap.
 - .2 Chrome plated in all exposed places.
 - .3 Sink and lavatory heavy gauge P-traps shall be cast brass adjustable style with 17 ga. seamless brass wall bend. Attachment nuts shall be brass, no zinc allowed. P-traps to be removable/union type or to include cleanout.
 - .4 Lavatory strainers shall be chrome plated cast brass with 17 ga. seamless brass tailpiece.
 - .5 All barrier-free lavatories and sinks shall have chrome plated offset tail piece in addition to P-trap with cleanout. Insulate P-trap and hot & cold water pipes with pre-formed & finished surface insulation. Armaflex insulation and tape not acceptable.
- .2 Fixtures:
 - .1 Manufacture in accordance with CSA B45.
 - .2 All products, where applicable, shall be marked with manufacturer's name or product #.
- .3 Trim, fittings: manufacture in accordance with CSA B125.
- .4 Number, locations: Architectural drawings to govern.
- .5 Fixtures in any one location to be product of one manufacturer and of same type.
- .6 Trim in any one location to be product of one manufacturer and of same type unless otherwise indicated.
- .7 Reference drawing schedule for configuration and type.

2.2 CARRIERS

- .1 Provide for all wall mounted plumbing fixtures.

2.3 ROUGHING-IN OF FIXTURES

- .1 Rough-in for equipment supplied by other to be complete with valved supplies, wastes and vents, capped and associated fitting piping & reducers.

2.4 PLUMBING FIXTURES

- .1 Reference fixture schedule on Drawings.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Mounting heights:
 - .1 Standard: to comply with manufacturer's recommendations unless otherwise indicated or specified.
 - .2 Wall-hung fixtures: as indicated on architectural elevations.
 - .3 Physically handicapped: to comply with most stringent of either NBCC, or CAN/CSA B651.

3.2 ADJUSTING

- .1 Conform to water conservation requirements specified in this section.
- .2 Adjustments:
 - .1 Adjust water flow rate to design flow rates and sensors.
 - .2 Adjust pressure to fixtures to ensure no splashing at maximum pressures.
 - .3 Adjust flush valves to suit actual site conditions.
- .3 Checks:
 - .1 Water closets: flushing action.
 - .2 Aerators: operation, cleanliness.
 - .3 Vacuum breakers, backflow preventers: operation under all conditions.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 USE OF SYSTEMS

- .1 Use of new and/or existing permanent heating and ventilating systems for supplying temporary heat and ventilation is permitted only under the following conditions:
 - .1 Entire system is complete, pressure tested, cleaned, flushed out.
 - .2 Specified water treatment system has been commissioned, water treatment is being continuously monitored.
 - .3 Building has been closed in. Areas to be heated/ventilated are clean and will not thereafter be subjected to dust-producing processes.
 - .4 There is no possibility of damage from any cause.
 - .5 Supply ventilation systems are protected by 60% filters, which shall be inspected daily, changed every 2 weeks or more frequently as required.
 - .6 Return systems have approved filters over all openings, inlets, outlets.
 - .7 All systems will be:
 - .1 operated as per manufacturer's recommendations or instructions.
 - .2 operated by Contractor.
 - .3 monitored continuously by Contractor.
 - .8 Warranties and guarantees do not commence until equipment is turned over to owner.
 - .9 Regular preventive and all other manufacturers recommended maintenance routines are performed by Contractor at his own expense and under supervision of Engineer.
 - .10 Before turn-over to owner, entire system to be refurbished, cleaned internally and externally and restored to "as- new" condition. Filters in air and water systems are to be replaced.
- .2 Filters referred to herein are over and above those specified elsewhere in this specification.
- .3 Exhaust systems are not included in any approvals for temporary heating ventilation.

PART 2 PRODUCTS

2.1 NOT USED

- .1 Not used.

PART 3 EXECUTION

3.1 NOT USED

.1 Not used.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 Canadian General Standards Board (CGSB)
 - .1 CAN/CGSB-1.181-99, Ready-Mixed Organic Zinc-Rich Coating.

PART 2 PRODUCTS

2.1 NOT USED

- .1 Not Used.

PART 3 EXECUTION

3.1 CONNECTIONS TO EQUIPMENT

- .1 In accordance with manufacturer's instructions unless otherwise indicated.
- .2 Use valves and either unions or flanges for isolation and ease of maintenance and assembly.
- .3 Use double swing joints when equipment mounted on vibration isolation and when piping subject to movement.

3.2 CLEARANCES

- .1 Provide clearance around systems, equipment and components for observation of operation, inspection, servicing, maintenance and as recommended by manufacturer.
- .2 Provide space for disassembly, removal of equipment and components as recommended by manufacturer or as indicated (whichever is greater) without interrupting operation of other system, equipment, and components.

3.3 DRAINS

- .1 Install piping with grade in direction of flow except as indicated or specified otherwise.

- .2 Install drain valve at low points in piping systems, at equipment at section isolating valves and at base of all risers.
- .3 Pipe each drain valve discharge separately to above floor drain. Discharge to be visible.
- .4 Drain valves: NPS 3/4 full port ball valves unless indicated otherwise, with hose end male thread, cap and chain.

3.4 AUTOMATIC AIR VENTS

- .1 Install automatic air vents at high points of piping systems.
- .2 Install full port ball at each automatic air vent.
- .3 Air vents must have minimum connection of 13 mm (1/2").

3.5 DIELECTRIC COUPLINGS

- .1 General: Compatible with system, to suit pressure rating of system.
- .2 Locations: Where dissimilar metals are joined.
- .3 NPS 2 and under: isolating unions or bronze valves.
- .4 Over NPS 2: Isolating flanges.

3.6 PIPEWORK INSTALLATION

- .1 Screwed fittings to be jointed with Teflon tape.
- .2 Protect openings against entry of foreign material.
- .3 Install so that equipment can be isolated and removed without interruption to operation of any other equipment or systems.
- .4 Assemble piping using fittings manufactured to ANSI standards.
- .5 Weldolets sockolets Saddle type branch fittings may be used on mains if branch line is no larger than half the size of the main. Hole saw (or drill) and ream main so as to maintain full inside diameter of branch line prior to welding saddle. Provide isolation valves at each branch connection.
- .6 Install exposed piping, equipment, rectangular cleanouts and similar items parallel or perpendicular to building lines.

- .7 Install concealed pipework so as to minimize furring space, maximize headroom, and conserve space.
- .8 Except where indicated otherwise, slope piping in direction of flow for positive drainage and venting.
- .9 Except where indicated, install so as to permit separate thermal insulation of each pipe.
- .10 Group piping wherever possible and as indicated.
- .11 Ream pipes, remove scale and other foreign material before assembly.
- .12 Use eccentric reducers at pipe size changes to ensure positive drainage and venting.
- .13 Provide for thermal expansion as indicated and specified.
- .14 Contractor shall carry a structural engineer to design and certify the support system for any piping distribution system exceeding 100 mm (4") or where piping is grouped such that the distributed weight exceeds the building structure limits. (Note: In steel building structure the piping supports shall never be supported by a single joist or off the bottom chord of the joist or truss.

3.7 SLEEVES

- .1 General: Install where pipes pass through masonry, concrete structures, fire rated assemblies, and elsewhere as indicated.
- .2 Material: Schedule 40 black steel pipe.
- .3 Construction: Foundation walls and where sleeves extend above finished floors - to have annular fins continuously welded on at mid-point.
- .4 Sizes: 6 mm minimum clearance all round between sleeve and uninsulated pipe or between sleeve and insulation.
- .5 Installation:
 - .1 Concrete, masonry walls, and concrete floors on grade: Terminate flush with finished surface.
 - .2 Other floors: Terminate 25 mm above finished floor.
 - .3 Before installation, paint exposed exterior surfaces with heavy application of zinc-rich paint to CAN/CGSB-1.181.
- .6 Sealing:
 - .1 Foundation walls and below grade floors: Fire retardant, waterproof non-hardening mastic.
 - .2 Elsewhere: Provide space for firestopping. Maintain fire rating integrity.
 - .3 Sleeves installed for future use: Fill with lime plaster or other easily removable filler.
 - .4 Ensure no contact between copper pipe or tube and sleeve.

3.8 ESCUTCHEONS

- .1 Install on pipes passing through walls, partitions, floors, and ceilings in finished areas.
- .2 Construction: One piece type with set screws. Chrome or nickel plated brass or type 302 stainless steel.
- .3 Sizes: Outside diameter to cover opening or sleeve. Inside diameter to fit around pipe or outside of insulation if so provided.

3.9 FLUSHING OUT OF PIPING SYSTEMS

- .1 In accordance with Section 23 08 02 - Cleaning and Start-up of Mechanical Piping Systems.
- .2 Preparatory to acceptance, clean and refurbish equipment and leave in operating condition, including replacement of filters in piping systems.
- .3 Provide test results upon completion and retain written report on status after complete.

3.10 PRESSURE TESTING OF EQUIPMENT AND PIPEWORK

- .1 Advise Engineer 48 hours minimum prior to performance of pressure tests.
- .2 Pipework: Test to 1½ times normal operating pressure to a maximum of the piping systems working pressure including devices (i.e.: valves, fittings, accessories). Minimum test pressure to be 862 kPa (125 psi).
- .3 Maintain specified test pressure without loss for four 4 hours minimum. Temperature of system to remain constant during of test.
- .4 Prior to tests, isolate equipment and other parts which are not designed to withstand test pressure or media.
- .5 Conduct tests in presence of Engineer.
- .6 Bear costs for repairs or replacement, retesting, and making good. Engineer to determine whether repair or replacement is appropriate.
- .7 Insulate or conceal work only after approval and certification of tests by Engineer.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society of Heating, Refrigeration and Air-Conditioning Engineers.

1.3 ELECTRICAL

- .1 Electrical work to conform to Division 26 including the following:
 - .1 Control wiring and conduit is specified in Division 26 except for conduit, wiring and connections below 50 V which are related to control systems specified in Divisions 20, 21, 22, 23 & 25. Refer to Division 26 for quality of materials and workmanship.

1.4 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.

1.5 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for motors, drives and guards for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Motors to be premium efficiency, in accordance with NEMA 1 premium motor standards and the requirements of ASHRAE 90.1 unless superceded by Ontario Building Code (OBC) Supplementary Standard SB-10.

2.2 MOTORS

- .1 Provide premium efficiency motors for mechanical equipment to NEMA MG 1 Part 31.
- .2 Motors efficiency must exceed the following:

Open Drip-Prrof (ODP) Type

Motor Size	1200	1800	3600
HP	NEMA Premium Nominal Efficiency		
1 & below	82.5%	85.5%	77.0%

- .3 Motors under 373 W (½ HP): speed as indicated, continuous duty, built-in overload protection, resilient mount, single phase, 120 V, unless otherwise specified or indicated.
- .4 Motors 373 W (½ HP) to 14.92 kW (20 HP): EEMAC Class B/F, squirrel cage induction, speed as indicated, continuous duty, drip proof, ball bearing, maximum temperature rise 45°C/60°C over ambient of 30°C, 3 phase, 600 V, unless otherwise specified or indicated.
- .5 Motors 18.65 kW (25 HP) and larger: EEMAC Class B/F, squirrel cage induction, speed as indicated, continuous duty, drip proof, ball bearing, maximum temperature rise 45°C/60°C over ambient of 30°C, 3 phase, 600 V, c/w integral thermistor protection, unless otherwise specified or indicated. Thermistors shall be factory installed, copper RTD type, one on each phase, wired to identified terminals in motor terminal box and wired to starter/VFD (wiring, conduit & connections by Div. 26).
- .6 Two speed motors shall be double winding type.
- .7 Motors coupled with VFD shall be premium efficiency, inverter duty type to NEMA MG 1 Part 31 and shall have as a minimum EEMAC Class F insulation. Inverter ready motors shall not be acceptable.
- .8 Motors coupled with VFD's shall include a shaft grounding ring.

- .9 Motors located outside to be TEFC type, unless located in insulated weatherproof enclosure.

2.3 TEMPORARY MOTORS

- .1 If delivery of specified motor will delay completion or commissioning work, install motor approved by Consultant for temporary use. Work will only be accepted when specified motor is installed.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Fasten securely in place.
- .2 Ensure motor installation is easily removable for servicing.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society of Mechanical Engineers (ASME).
 - .1 ASME B40.100-2013, Pressure Gauges and Gauge Attachments.
- .2 Canadian General Standards Board (CGSB)
 - .1 CAN/CGSB-14.4-M88, Thermometers, Liquid-in-Glass, Self Indicating, Commercial/Industrial Type.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate on manufacturers catalogue literature the following:
 - .1 Thermometers.
 - .2 Pressure gauges.
 - .3 Ball valve.
 - .4 Syphons.
 - .5 Wells.

1.4 MAINTENANCE DATA

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Thermometers and pressure gauges to operate at mid point of scale or range.

2.2 DIRECT READING THERMOMETERS

- .1 Industrial, variable angle type, liquid filled, 125 mm scale length: to CAN/CGSB-14.4.
 - .1 Acceptable Materials: Ashcroft, Taylor, Winters, Weiss, H.O. Terrice.

2.3 THERMOMETER WELLS

- .1 For copper pipe use copper or bronze. For steel pipe use brass.

2.4 PRESSURE GAUGES

- .1 Liquid filled, 112 mm, dial type: ASME B40.100, Grade 2A, having ½ of 1% accuracy over entire range, stem mounting.
 - .1 Acceptable Materials: Ashcroft, Taylor, Winters, Weiss, H.O. Terrice.
- .2 Provide ball valve and snubber for pulsating operation (pumps).

2.5 PRESSURE & TEMPERATURE TEST STATIONS

- .1 Pressure and temperature test stations:
 - .1 Provide where indicated "Pete's Plug II" a 6 mm (1/4") fitting to receive either a temperature or pressure probe 3 mm (1/8") OD. Fitting shall be solid brass with two valve cores of Neoprene (max. 93°C (200°F) at 3447 kPa (500 psi), fitted with a colour coded cap strap with gasket, and shall be rated at 6,895 kPa (1,000 psi) at 60°C (140°F).
 - .2 In addition, the contractor shall supply the owner with three (3) pressure and temperature test kits consisting of a 0-100 psi, 0-230 ft. of water pressure gauge with a Number 500 gauge adapter, one 25-125°F and one 0-220°F pocket testing thermometer, an extra number 500 gauge adapter, and a protective carrying case.
 - .3 Acceptable material: Peterson Equipment Company Inc., Pete's Plug II.

PART 3 EXECUTION

3.1 GENERAL

- .1 Install so they can be easily read from floor or platform. If this cannot be accomplished, install remote reading units.
- .2 Install between equipment and first fitting or valve.

3.2 THERMOMETERS

- .1 Install in wells on all piping. Provide heat conductive material for inside of well.
- .2 Install in locations as indicated and on inlet and outlet of:
 - .1 Boilers.
- .3 Use extensions where thermometers are installed through insulation.

3.3 PRESSURE GAUGES

- .1 Install in following locations:
 - .1 Suction and discharge of pumps.
 - .2 Heat exchangers.
 - .3 In other locations as indicated.
- .2 Pressure gauges are to be manifolded between inlet and outlet of device (pump, strainer, etc.) unless otherwise indicated. Provide ball type isolation valve between pressure gauge and device.

3.4 PRESSURE & TEMPERATURE TEST STATIONS

- .1 Install in locations as indicated and on inlet and outlet of:
 - .1 Hydronic hot water radiation.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit data for all valves specified in this section.

1.4 CLOSEOUT SUBMITTALS

- .1 Submit maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

1.5 ACCEPTABLE MANUFACTURERS

- .1 Refer to Acceptable Products Table in Part 3 of this section.

PART 2 PRODUCTS

2.1 GENERAL

- .1 All valves of the same type to be from one manufacturer.
- .2 All valves to have CRN registration numbers.

2.2 GATE VALVES

- .1 NPS 2 and under, bronze, solid wedge disc:
 - .1 Standard specification: MSS SP-80.
 - .2 Bonnet: with hex. shoulders.
 - .3 Connections: with hex. shoulders.
 - .4 Inspection and pressure testing: to MSS SP-80. Tests to be hydrostatic.
 - .5 Packing: high grade non-asbestos packing.
 - .6 Handwheel: non-ferrous. Nut: bronze to ASTM B62.
 - .7 Body: with long disc guides, screwed bonnet with stem retaining nut.
- .2 NPS 2½ - 8, cast iron, bronze iron trim, solid wedge disc:
 - .1 Body and multiple-bolted bonnet: with bosses in body and bonnet for taps and full drains, length disc guides designed to ensure correct re-assembly.
 - .2 Disc: solid offset taper wedge, bronze to ASTM B62 up to and including NPS 3, bronze rings rolled into cast iron disc on other sizes, secured to bronze stem to ASTM B62.
 - .3 Seat rings: renewable bronze to ASTM B62, screwed into body.
 - .4 Stem: bronze to ASTM B62.
- .3 NPS 10 - 24, cast iron, bronze trim, solid wedge disc:
 - .1 Body and multiple-bolted bonnet: cast iron to ASTM A126 Class B for sizes up to NPS 14, Class C for sizes NPS 16 and over, with bosses in body and bonnet for taps and drains, full length disc guides designed to ensure correct re-assembly, body tie ribs between bonnet and end flanges.
 - .2 Disc: solid offset taper wedge, with bronze rings to ASTM B62 rolled into cast iron disc, secured to stem.

- .3 Seat rings: renewable bronze to ASTM B62 screwed into body.
- .4 Stem: bronze to ASTM B62.

- .4 NPS 2½ - 12, cast steel rising stem, OS&Y, solid wedge disc:
 - .1 Body and multiple-bolted integral yoke and bonnet: cast steel to ASTM A216/A216M WCB, with full length disc guides designed to ensure correct re-assembly.
 - .2 Bonnet studs: to ASTM A193/A193M Type B7.
 - .3 Bonnet nuts: to ASTM A194/A194M Type 2H.
 - .4 Stuffing box: including non-galling two-piece ball jointed packing gland, with swing-type eye bolts and nuts.
 - .5 Gland packing: containing corrosion inhibitor to prevent stem pitting.
 - .6 Yoke sleeve: Ni-Resist, minimum melting point above 954°C.
 - .7 Hydraulic grease fitting: for lubrication of yoke sleeve bearing surfaces.
 - .8 Disc: with disc stem ring to connect to stem, guided throughout its travel.
 - .1 NPS 2½ - 6: Solid corrosion and heat resistant 13% chromium steel with minimum hardness of 350 HB.
 - .2 NPS 8 and larger: Carbon steel faced with corrosion and heat resistant 13 chromium steel with minimum hardness of 350 HB.
 - .9 Seat ring: seamless carbon steel with hard-faced cobalt-chromium-tungsten alloy seating surface, slipped in, seal welded, ground to match disc.
 - .10 Stem: heat treated corrosion and heat resistant 13% chromium steel with accurately-cut precision-machined Acme or 60° V threads, top screwed for handwheel nut, T-head disc-stem connection.

2.3 CHECK VALVES

- .1 NPS 2 and under, bronze swing type, bronze disc:
 - .1 Standard specification: MSS SP-80.
 - .2 Connections: with hex. shoulders.
 - .3 Body: Y-pattern with integral seat at 45°, screw-in cap with hex head.
 - .4 Disc and seat: renewable rotating disc, two-piece hinge disc construction; seat: regrindable.

- .2 NPS 2½ and over, cast iron:
 - .1 Body and bolted cover: with tapped and plugged opening on each side for hinge pin.
 - .1 Up to NPS 16: cast iron to ASTM A126 Class B.
 - .2 NPS 18 and over: cast iron to ASTM A126 Class C.
 - .2 Disc: Rotating for extended life.
 - .1 Up to NPS 6: bronze to ASTM B62.
 - .2 NPS 8 and over: bronze-faced cast iron.
 - .3 Seat rings: renewable bronze to ASTM B62 screwed into body.
 - .4 Hinge pin, bushings: renewable bronze to ASTM B62.

- .3 NPS 2½ and over, cast steel:
 - .1 Body and multiple-bolted cap: cast steel to ASTM A216/A216M WCB.
 - .2 Cap studs: to ASTM A193/A193M Type B7.
 - .3 Cap nuts: to ASTM A194/A194M Type 2H.

- .4 Body/cap joint: male-female face with corrugated metallic gasket.
- .5 Disc: heat treated corrosion and heat resistant 13% chromium steel.
- .6 Seat rings: heat treated corrosion and heat resistant 13% chromium steel, slipped in, seal welded, ground to match disc.

2.4 SEWAGE CHECK VALVES

- .1 NPS 1¼ to 3 full flow no restriction cast iron type:
 - .1 Application: Vertical or horizontal sewage installation.
 - .2 Neoprene polyester reinforced flapper with cast iron & non-corrosive metal backing plates and stainless steel hardware.
 - .3 Corrosion resistant powder coated epoxy finish.
 - .4 Rated at 345 kPa (50 psi) at 54°C (130°F).

2.5 BALL VALVES

- .1 NPS 4 and under:
 - .1 Body and cap: cast high tensile bronze to ASTM B62 or brass to ASTM B16/B16M C36000.
 - .2 Stem: tamperproof ball drive.
 - .3 Stem packing nut: external to body.
 - .4 Ball and seat: replaceable chrome plated brass solid full port ball and Teflon seats.
 - .5 Stem seal: TFE with external packing nut.
 - .6 Operator: removable lever handle.
 - .7 Extended handle on chilled water service.

2.6 BUTTERFLY VALVES

- .1 NPS 2½ and over, lug body, dead end type:
 - .1 To MSS SP-67, Class 150, 1.4 Mpa WOG, cast iron or semi-steel body, ductile iron or bronze disc, stainless steel stem, replaceable EPDM liner and nylon coated ductile iron seat, locking handle.
 - .2 Operators:
 - .1 NPS 2½ to 5: locking type lever handle.
 - .2 NPS 6 and over: gear operator.
 - .3 Extended handle on chilled water service.

2.7 Circuit Balancing Valves (CBV)

- .1 General:
 - .1 Y style globe valve, designed to provide precise flow measurement and control, with valved ports for connection to differential pressure meter.

- .2 Accuracy:
 - .1 Readout to be within plus or minus 2% of actual flow at design flow rate.
- .3 Pressure die-cast dezincification resistant copper alloy construction, Teflon disc, screw-in bonnet.
 - .1 Flow control: At least four 4 full turns of handwheel with digital handwheel and tamperproof concealed mechanical memory.
- .4 Insulation:
 - .1 Use prefabricated shipping packaging of 5.4 R polyurethane as insulation.
- .5 Drain connection:
 - .1 NPS 3/4 valved and capped, suitable for hose socket.
 - .2 Incorporated into valve body or provided as separate item.
- .6 Size:
 - .1 Valve to be sized for a minimum pressure drop of 6 kPa (2 ft.) at design flow at mid range. Ppipe reducers as required.
- .7 Acceptable material: Armstrong CBV, or Bell & Gossett, Tour & Anderson.

2.8 LUBRICATED PLUG VALVES

- .1 Valve:
 - .1 Body: cast iron to ASTM A126 Class B semi-steel.
 - .2 Plug: cylindrical or tapered, with regular Venturi or round pattern port - 90° from full open to fully closed.
 - .3 Number of ports: 2.
 - .4 Ends: with hexagon shoulders, ends screwed to ASME B1.20.1 up to NPS 3; Flanged to ASME B16.1 NPS 4 and over.
 - .5 Lubrication system, nickel-plated.
 - .6 Lubricant: to suit type, temperature and pressure of contained fluid.
 - .7 Feeding system: lubricant forced into lubrication grooves between seating surfaces of plug and body to form positive seal, leakproof operation, and corrosion preventing film. Lubricant receptacle to hold additional lubricant. Lubricant screw for lubrication. Check valve to prevent reverse flow of lubricant. O-rings between body and plug.
- .2 Operator: manual - lever.
- .3 Accessories: lubricant gun.
- .4 Testing: to ASME B16.34.

PART 3 EXECUTION

3.1 ACCEPTABLE PRODUCTS TABLE

- .1 Refer to Acceptable Products Table in Part 3 of this section.

3.2 Installation

- .1 Install rising stem valves in upright position with stem above horizontal.
- .2 Handwheel with chain operators are to be installed on all valves more than 3 metres above floor.
- .3 Remove internal parts before soldering or brazing.
- .4 Install all valves such that adequate clearance is provided to allow for obstruction free operation.
- .5 Install valves at all branch take-offs and to isolate each piece of equipment, and as indicated.
- .6 For all threaded valves provide one screwed union beside each valve to allow easy replacement of valve.
- .7 Install all valves as per manufacturer's recommendation.

 - .1 MSS SP-58-2009, Pipe Hangers and Supports - Materials, Design, Selection, Manufacture, Application, and Installation.
- .5 Underwriter's Laboratories of Canada (ULC).

1.3 DESIGN REQUIREMENTS

- .1 Construct pipe hanger and support to manufacturer's recommendations utilizing manufacturer's regular production components, parts and assemblies.
- .2 Base maximum load ratings on allowable stresses prescribed by ASME B31.1 or MSS SP-58.
- .3 Ensure that supports, guides, anchors do not transmit excessive quantities of heat to building structure.

- .4 Design hangers and supports to support systems under all conditions of operation, allow free expansion and contraction, prevent excessive stresses from being introduced into pipework or connected equipment.
- .5 Provide for vertical adjustments after erection and during commissioning. Amount of adjustment to be in accordance with MSS SP-58.

1.4 DESIGN FOR SEISMIC EVENTS

- .1 Design supports, platforms, hangers, racks to withstand seismic events as specified Section 20 05 49.01 - Seismic Restraint Systems (SRS).

1.5 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit shop drawings and product data for following items:
 - .1 All bases, hangers and supports.
 - .2 Connections to equipment & structure.
 - .3 Structural assemblies.

1.6 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 sPRODUCTS

2.1 GENERAL

- .1 Fabricate hangers, supports and sway braces in accordance with ANSI B31.1 and MSS SP-58.
- .2 Use components for intended design purpose only. Do not use for rigging or erection purposes.

2.2 PIPE HANGERS

- .1 Finishes:
 - .1 Pipe hangers and supports: galvanized after manufacture.
 - .2 Use electro-plating galvanizing process or hot dipped galvanizing process.

- .3 Ensure steel hangers in contact with copper piping are copper plated or epoxy coated.
- .2 Upper attachment structural: Suspension from lower flange of I-Beam.
 - .1 Cold piping NPS 2 maximum: Malleable iron C-clamp with hardened steel cup point setscrew, locknut and carbon steel retaining clip.
 - .1 Rod: 9 mm UL listed.
 - .2 Cold piping NPS 2½ or greater, all hot piping: Malleable iron beam clamp, eye rod, jaws and extension with carbon steel retaining clip, tie rod, nuts and washers, UL listed to MSS SP-58.
- .3 Upper attachment structural: Suspension from upper flange of I-Beam.
 - .1 Cold piping NPS 2 maximum: Ductile iron top-of-beam C-clamp with hardened steel cup point setscrew, locknut and carbon steel retaining clip, UL listed to MSS SP-58.
 - .2 Cold piping NPS 2½ or greater, all hot piping: Malleable iron top-of-beam jaw-clamp with hooked rod, spring washer, plain washer and nut UL listed.
- .4 Upper attachment to concrete.
 - .1 Ceiling: Carbon steel welded rod, clevis plate, clevis pin and cotters with forged weldless steel nut.
 - .2 Concrete wedge anchor with knockout protector plate UL listed to MSS SP-58. Anchor installation to be via concrete pre-drilling. Impact insert type anchor not allowed.
- .5 Manufacturer assemblies:
 - .1 Sway braces for seismic restraint systems: to Section 20 05 49.01 - Seismic Restraint Systems (SRS).
- .6 Hanger rods: threaded rod material to MSS SP-58.
 - .1 Ensure that hanger rods are subject to tensile loading only.
 - .2 Provide linkages where lateral or axial movement of pipework is anticipated.
 - .3 Do not use 22 mm or 28 mm rod.
- .7 Pipe attachments: material to MSS SP-58.
 - .1 Attachments for steel piping: carbon steel black.
 - .2 Attachments for copper piping: copper plated black steel.
 - .3 Use insulation shields for hot pipework.
 - .4 Oversize pipe hangers and supports.
- .8 Adjustable clevis: material to MSS SP-58 UL listed, clevis bolt with nipple spacer and vertical adjustment nuts above and below clevis. Ensure "U" has hole in bottom for riveting to insulation shields.
- .9 Yoke style pipe roll: carbon steel yoke, rod and nuts with cast iron roll, to MSS SP-58.
- .10 U-bolts: carbon steel to MSS SP-58 with 2 nuts at each end to ASTM A563.
 - .1 Finishes for steel pipework: black.

- .2 Finishes for copper, glass, brass or aluminum pipework: black, with formed portion epoxy coated.
- .11 Pipe rollers: cast iron roll and roll stand with carbon steel rod to MSS SP-58, Type 43.
 - .1 Finish: Hot dipped galvanized steel.
 - .2 Acceptable material: Tolco or approved equal.

2.3 RISER CLAMPS

- .1 Steel or cast iron pipe: black carbon steel to MSS SP-58, type 42, UL listed.
- .2 Copper pipe: carbon steel copper plated to MSS SP-58, type 42.
- .3 Bolts: to ASTM A307.
- .4 Nuts: to ASTM A563.

2.4 INSULATION PROTECTION SHIELDS

- .1 Insulated cold piping: 64 kg/m³ density insulation plus insulation protection shield to: MSS SP-58, galvanized sheet carbon steel. Length designed for maximum 3 m span.
- .2 Insulated hot piping: Curved plate 300 mm long, with edges turned up, welded-in centre plate for pipe sizes NPS 12 and over, carbon steel to comply with MSS SP-58.

2.5 CONSTANT SUPPORT SPRING HANGERS

- .1 Springs: alloy steel to ASTM A125, shot peened, magnetic particle inspected, with +/-5% spring rate tolerance, tested for free height, spring rate, loaded height and provided with CMTR.
- .2 Load adjustability: 10% minimum adjustability each side of calibrated load. Adjustment without special tools. Adjustments not to affect travel capabilities.
- .3 Provide upper and lower factory set travel stops.
- .4 Provide load adjustment scale for field adjustments.
- .5 Total travel to be actual travel + 20%. Difference between total travel and actual travel 25 mm minimum.
- .6 Individually calibrated scales on each side of support calibrated prior to shipment, complete with calibration record.

2.6 VARIABLE SUPPORT SPRING HANGERS

- .1 Vertical movement: 13 mm minimum, 50 mm maximum, use single spring pre-compressed variable spring hangers.
- .2 Vertical movement greater than 50 mm: use double spring pre-compressed variable spring hanger with 2 springs in series in single casing.
- .3 Variable spring hanger to be complete with factory calibrated travel stops.
- .4 Steel alloy springs: to ASTM A125, shot peened, magnetic particle inspected, with +/-5% spring rate tolerance, tested for free height, spring rate, loaded height and provided with CMTR.

2.7 EQUIPMENT SUPPORTS

- .1 Fabricate equipment supports not provided by equipment manufacturer from structural grade steel meeting requirements of Section 05 12 23 - Structural Steel. Submit calculations with shop drawings.

2.8 Equipment Anchor Bolts and Templates

- .1 Provide templates to ensure accurate location of anchor bolts.
- .2 For attachment to concrete, provide concrete wedge anchors with knockout protection plate UL listed. Anchor installation to be via concrete pre-drilling. Impact insert type anchor not allowed.

2.9 HOUSE-KEEPING PADS

- .1 For base-mounted equipment: Concrete, at least 100 mm high, 50 mm larger than equipment all around, with chamfered edges and anchored to the structural slab.
- .2 Concrete: to Section 03 30 00 - Cast-in-place Concrete.

2.10 PIPE, DUCT, CONDUIT PENETRATIONS THROUGH SLABS

- .1 Where piping or conduits penetrate through the floor of mechanical room, a 100 mm high housekeeping pad shall be installed with minimum 150 mm between conduit/pipe and the edge of the pad. This pad shall be bonded to the existing slab through which the pipes, ducts or conduit shall pass.

2.11 ROOF MOUNTED SUPPORTS

- .1 Pressure treated lumber supports are only acceptable when roofed in/covered by general trades. Exposed applications are not acceptable.
- .2 Portable Support System: Engineered, portable system specifically designed for installation without the need for roof penetrations or flashings, and without damage to the roofing membrane.
 - .1 Design system using high density polypropylene bases and structural steel framing.
 - .2 Custom design system to fit piping, conduits, equipment, or walkways to be installed and actual conditions of service and loading.
 - .3 Piping Supports: Provide suitable hangers and supports.
 - .4 Pipe support system shall have seismic ratings and meet Section 20 05 49.01 - Seismic Restraint Systems (SRS).
- .3 Bases: Injection molded high density polypropylene with UV-inhibitors or recycled rubber conforming to the following:
 - .1 Moisture content: Negligible.
 - .2 Shrinkage/swelling due to moisture: Negligible.
 - .3 Density: 894 kg/m³ (55.8 lbs./ft.³).
 - .4 Insect resistance: No known insect damage potential.
 - .5 Chemical resistance (oil, brake fluid, gasoline, diesel, antifreeze, battery acid, sulfuric acid: no visual or physical change apparent.
 - .6 Flammability: No ignition after 10 minutes, 25 kW/m, when tested in accordance with ASTM D1929.
 - .7 Sized as required by loading conditions and as indicated on the drawings.
 - .8 Shop fabricated with inserts for square tubing or threaded rods as required.
 - .9 Colour: Integral black colour as molded.
- .4 Steel Framing:
 - .1 Strut Types: 1-5/8 in. (41.3 mm) B22TH or 1-7/8 in. (47.6 mm) BTS22H, as required for loading conditions.
 - .2 Thickness: 12 gauge (2.7 mm).
 - .3 Form: Roll-formed 3-sided or tubular shape, perforated with 9/16 in. (14.3 mm) holes at 1-7/8 in. (47.6 mm) centres on three (3) sides.
 - .4 Finish: Hot dip galvanize in accordance with ASTM A123/A123M after fabrication, free of roughness, whiskers, unsightly spangles, icicles, runs, barbs, sags, droplets, and other surface blemishes.
- .5 Pipe Supports and Hangers: Conform to MSS SP-58 and as follows:
 - .1 Fabricate of carbon steel where framing is carbon steel; fabricate of stainless steel where framing is stainless steel; finished same as framing.
 - .2 Sizes 2-1/2 in. (63 mm) and smaller: Single roller supports for piping subject to expansion and contraction; 3-sided channels and pipe clamps.
 - .3 Sizes 3 in. (76 mm) and larger: Rollers, clevis hangers, or band hangers, to allow for expansion and contraction without movement of the bases or framing.

- .6 Accessories: Clamps, bolts, nuts, washers, and other devices as required for a complete system:
 - .1 Carbon steel: Hot-dip galvanized in accordance with ASTM A153/A153M.
 - .2 Stainless steel: mill finish.
- .7 Acceptable material: Portable Pipe Hangar Model PPH-D, Miro Industries Model 8-DS, Mifab CPORT-2015, Big Foot Systems, or approved equal.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with: manufacturer's instructions and recommendations.
- .2 Vibration Control Devices:
 - .1 Install on piping systems at pumps and elsewhere as indicated.
- .3 Clamps on riser piping:
 - .1 Support independent of connected horizontal pipework using riser clamps and riser clamp lugs welded to riser.
 - .2 Bolt-tightening torques to be to industry standards.
 - .3 Steel pipes: Install below coupling or shear lugs welded to pipe.
 - .4 Cast iron pipes: Install below joint.
- .4 Clevis plates:
 - .1 Attach to concrete with 4 minimum concrete inserts, one at each corner.
- .5 Provide supplementary structural steelwork where structural bearings do not exist or where concrete inserts are not in correct locations.
- .6 Use approved constant support type hangers where:
 - .1 vertical movement of pipework is 13 mm or more,
 - .2 transfer of load to adjacent hangers or connected equipment is not permitted.
- .7 Use variable support spring hangers where:
 - .1 transfer of load to adjacent piping or to connected equipment is not critical.
 - .2 variation in supporting effect does not exceed 25% of total load.
- .8 When attaching to open web steel joists provide additional hangers for pipes with diameters of 75 mm or greater in order to reduce the magnitude of the concentrated load and spread the load to the joists equally. In these cases the allowable spacing of hangers for pipes permitted under ASME / MSS SP-58 will be reduced and additional hangers will be required as directed by steel fabricator and/or structural engineer.

- .9 Locate hangers at the top of open web steel joists where the horizontal and diagonal members meet at a joint.
- .10 All installations must be in conjunction with Section 20 05 49.01 - Seismic Restraint System.

3.2 HANGER SPACING

- .1 Plumbing piping: most stringent requirements of Manufacturer's recommendations, Canadian Plumbing Code, Provincial Code, or authority having jurisdiction.
- .2 Fire protection: to applicable fire code.
- .3 Gas & fuel piping: to applicable code.
- .4 Copper piping: up to NPS ½: every 1.5 m.
- .5 Flexible joint roll groove pipe: in accordance with table below, but not less than one hanger at joints.
- .6 Within 300 mm of each elbow.

Maximum Pipe Size: NPS	Maximum Spacing Steel	Maximum Spacing Copper	Maximum Spacing XFR
up to 1¼	2.1 m	1.8 m	1.6 m
1½	2.7 m	2.4 m	1.6 m
2	3.0 m	2.7 m	1.8 m
2½	3.6 m	3.0 m	1.8 m
3	3.6 m	3.0 m	2.2 m
4	4.2 m	3.6 m	2.6 m
6	5.1 m		3.1 m
8	5.7 m		3.6 m
10	6.6 m		4.0 m
12	6.9 m		4.4 m

- .7 Pipework greater than NPS 12: to MSS SP-58.

3.3 HANGER INSTALLATION

- .1 Install hanger so that rod is vertical under operating conditions.
- .2 Adjust hangers to equalize load.
- .3 Support from structural members. Where structural bearing does not exist or inserts are not in suitable locations, provide supplementary structural steel members.

3.4 HORIZONTAL MOVEMENT

- .1 Angularity of rod hanger resulting from horizontal movement of pipework from cold to hot position not to exceed 4° from vertical.
- .2 Where horizontal pipe movement is less than 13 mm, offset pipe hanger and support so that rod hanger is vertical in the hot position.

3.5 FINAL ADJUSTMENT

- .1 Adjust hangers and supports:
 - .1 Ensure that rod is vertical under operating conditions.
 - .2 Equalize loads.
- .2 Adjustable clevis:
 - .1 Tighten hanger load nut securely to ensure proper hanger performance.
 - .2 Tighten upper nut after adjustment.
- .3 C-clamps: Follow manufacturer's recommended written instructions and torque values when tightening C-clamps to bottom flange of beam.
- .4 Beam clamps: Hammer jaw firmly against underside of beam.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 Canadian General Standards Board (CGSB).
 - .1 CAN/CGSB-24.3-92, Identification of Piping Systems.
- .2 Canadian Standards Association (CSA).
 - .1 CSA B149.1-15, Natural Gas and Propane Installation Code.
 - .2 CSA Z7396.1-1. Medical gas pipeline systems - Part 1: Pipelines for medical gases, medical vacuum, medical support gases, and anaesthetic gas scavenging systems.
- .3 National Fire Protection Association
 - .1 NFPA (Fire) 13, Installation of Sprinkler Systems, 2016 Edition.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Product data to include paint colour chips, all other products specified in this section.

1.4 SAMPLES

- .1 Submit samples in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Samples to include nameplates, labels, tags, lists of proposed legends.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Identification systems to be in accordance with existing building NRC standard. If there is

2.2 MANUFACTURER'S EQUIPMENT NAMEPLATES

- .1 Plastic laminate nameplate mechanically fastened to each piece of equipment by manufacturer.
- .2 Lettering and numbers to be raised or recessed.
- .3 Information to include, as appropriate:
 - .1 Equipment: Manufacturer's name, model, size, serial number, capacity.
 - .2 Motor: voltage, Hz, phase, power factor, duty, frame size.

2.3 SYSTEM NAMEPLATES

- .1 Colours:
 - .1 Hazardous: red letters, white background.
 - .2 Elsewhere: black letters, white background.
- .2 Construction:
 - .1 1/8" thick laminated plastic , matte finish, with square corners, letters accurately aligned and machine engraved into core.
- .3 Sizes:
 - .1 Conform to following table:

Size #	Height Sizes (mm)	No. of Lines	Height of Letters(mm)
1	40	1	20
2	75	1	50
 - .2 Use maximum of 25 letters/numbers per line.
- .4 Locations:
 - .1 Terminal cabinets, control panels: Use size #1.
 - .2 Equipment in Mechanical Rooms: Use size #2.

2.4 PIPING SYSTEMS GOVERNED BY CODES

- .1 Identification:
 - .1 Natural gas: To CSA B149.1.
 - .2 Sprinklers: To NFPA (Fire) 13.
 - .3 Medical Gas: To CSA Z7396.1.

2.5 IDENTIFICATION OF PIPING SYSTEMS

- .1 Identify contents by background colour marking, legend; direction of flow by arrows. To CAN/CGSB-24.3 except where specified otherwise.
- .2 Legend:
 - .1 Block capitals to sizes and colours listed in CAN/CGSB-24.3.
- .3 Arrows showing direction of flow:
 - .1 Continuous wrap full diameter of pipe at each end of pipe identification markers.
- .4 Extent of background colour marking:
 - .1 To full circumference of pipe or insulation.
 - .2 Length to accommodate full length of legend and arrows.
- .5 Materials for background colour marking, legend, arrows:
 - .1 Pipes and tubing 3/4" and smaller: Waterproof and heat-resistant pressure sensitive plastic marker tags.
 - .2 All other pipes: Pressure sensitive plastic-coated cloth or vinyl with protective overcoating, waterproof contact adhesive undercoating, suitable for ambient of 100% RH and continuous operating temperature of 300°F and intermittent temperature of 400°F.
- .6 Colours and Legends:
 - .1 Where not listed, obtain direction from Engineer.
 - .2 Colours for legends, arrows: To following table:

Background colour:	Yellow	Legend, arrows:	BLACK
	Green		WHITE
	Red		WHITE

- .3 Background colour marking and legends for piping systems:

	Background colour marking	Legend
Contents		
Chilled water supply	Green	CH. WTR. SUPPLY
Chilled water return	Green	CH. WTR. RETURN
Hot water heating supply	Yellow	HEATING SUPPLY
Hot water heating return	Yellow	HEATING RETURN
Safety valve vent	Yellow	STEAM VENT
Domestic hot water supply	Green	DOM. HW SUPPLY
Dom. HWS recirculation	Green	DOM. HW CIRC
Domestic cold water supply	Green	DOM. CWS (add source)
Storm water	Green	STORM
Sanitary	Green	SAN.
Plumbing vent	Green	SAN. VENT
Refrigeration suction	Yellow	REF. SUCTION
Refrigeration liquid	Yellow	REF. LIQUID
Refrigeration hot gas	Yellow	REF. HOT GAS

Contents	Background colour marking to codes	Legend
Natural gas	Green	COMP. AIR kPa
Compressed air (<700 kPa)	Green	VACUUM SAN
Vacuum Sanitary	Green	

2.6 IDENTIFICATION DUCTWORK SYSTEMS

- .1 150 mm (6") high stencilled letters and directional arrows 150 mm (6") long x 50 mm (2") high.
- .2 Colours: Black, or co-ordinated with base colour to ensure strong contrast.

2.7 MECHANICAL EQUIPMENT, VALVES CONTROLLERS, PUMPS, BOILERS, FAN COIL, ETC.

- .1 Lamicoid tag with 13 mm (½") stamped identification data filled with black paint.
- .2 Include flow diagrams for each system, of approved size, showing charts and schedules with identification of each tagged item, valve type, service, function, normal position, location of tagged item.
- .3 Brass tags with 13 mm (½") stamped identification data filled with black paint.
- .4 Brass tags to be stamped with system identification and valve number system as outlined below:

SYSTEM	BRASS TAG STAMP
Domestic Cold Water	DC-1,2, ...
Domestic Hot Water	DH-1,2, ...
Storm	ST-1,2, ...
Sanitary	SA-1,2, ...
Heating Water	HW-1,2, ...
Chilled Water	CH-1,2, ...
Compressed Air	CA-1,2, ...
Natural gas	NG-1,2, ...
Refrigerant	Re-1,2, ...

2.8 CONTROLS COMPONENTS IDENTIFICATION

- .1 Identify all systems, equipment, components, controls, sensors with system nameplates specified in this section.
- .2 Inscriptions to include function and (where appropriate) fail-safe position.

2.9 LANGUAGE

- .1 Identification to be in English.

PART 3 EXECUTION

3.1 TIMING

- .1 Provide identification only after all painting specified in Architectural section is complete re: Interior Painting has been completed.

3.2 INSTALLATION

- .1 Perform work in accordance with CAN/CGSB-24.3 except as specified otherwise.
- .2 Provide ULC and CSA registration plates as required by respective agency.

3.3 Nameplates

- .1 Locations:
 - .1 In conspicuous location to facilitate easy reading and identification from operating floor.
- .2 Standoffs:
 - .1 Provide for nameplates on hot and/or insulated surfaces.
- .3 Protection
 - .1 Do not paint, insulate or cover in any way.

3.4 LOCATION OF IDENTIFICATION ON PIPING AND DUCTWORK SYSTEMS

- .1 On long straight runs in open areas in boiler rooms, equipment rooms, galleries, tunnels: At not more than 17 m (55 ft.) intervals and more frequently if required to ensure that at least one is visible from any one viewpoint in operating areas and walking aisles.
- .2 Adjacent to each change in direction.
- .3 At least once in each small room through which piping or ductwork passes.
- .4 On both sides of visual obstruction or where run is difficult to follow.
- .5 On both sides of separations such as walls, floors, partitions.

- .6 Where system is installed in pipe chases, ceiling spaces, galleries, other confined spaces, at entry and exit points, and at each access opening.
- .7 At beginning and end points of each run and at each piece of equipment in run.
- .8 At point immediately upstream of major manually operated or automatically controlled valves, dampers, etc. Where this is not possible, place identification as close as possible, preferably on upstream side.
- .9 Identification to be easily and accurately readable from usual operating areas and from access points.
- .10 Position of identification to be approximately at right angles to most convenient line of sight, considering operating positions, lighting conditions, risk of physical damage or injury and reduced visibility over time due to dust and dirt.
- .11 At branch take-offs on both main and branch.

3.5 MECHANICAL EQUIPMENT, VALVES, CONTROLLERS

- .1 Valves and operating controllers, except at plumbing fixtures, radiation, or where in plain sight of equipment they serve: Secure tags with non-ferrous chains or closed "S" hooks.
- .2 Install one copy of flow diagrams, valve schedules mounted in frame behind non-glare glass where directed by Engineer. Provide one copy (reduced in size if required) in each operating and maintenance manual.
- .3 Number valves in each system consecutively.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE).

1.3 GENERAL

- .1 TAB means to test, adjust and balance to perform in accordance with requirements of Contract Documents and to do all other work as specified in this section.

1.4 QUALIFICATIONS OF TAB PERSONNEL

- .1 Names of all personnel it is proposed to perform TAB to be submitted to and approved by Engineer within 90 days of award of contract.
- .2 Provide documentation confirming qualifications, successful experience.
- .3 The following are acceptable TAB contractors:
 - .1 TAB Inspecting
 - .2 Aerodynamics & Associates Testing Services Ltd. (N.B.C.T.A., ASHRAE)
 - .3 Maxima Technical Services Inc.
 - .4 Kanata Air Balancing & Engineering (C.A.A.B.C.)
 - .5 Brassard Adjustments & Calibrations Inc.
 - .6 Evenflow Balancing Co.

1.5 PURPOSE OF TAB

- .1 Test to verify proper and safe operation, determine actual point of performance, evaluate qualitative and quantitative performance of equipment, systems and controls at design, average and low loads using actual or simulated loads
- .2 Adjust and regulate equipment and systems so as to meet specified performance requirements and to achieve specified interaction with all other related systems under all normal and emergency loads and operating conditions.

- .3 Balance systems and equipment to regulate flow rates to match load requirements over full operating ranges.

1.6 EXCEPTIONS

- .1 TAB of systems and equipment regulated by codes, standards to be to satisfaction of authority having jurisdiction.

1.7 CO-ORDINATION

- .1 Schedule time required for TAB (including repairs, re-testing) into project construction and completion schedule so as to ensure completion before acceptance of project.
- .2 Do TAB of each system independently and subsequently, where interlocked with other systems, in unison with those systems.
- .3 Coordinate TAB with controls, mechanical and electrical contractors.

1.8 PRE-TAB REVIEW

- .1 Review contract documents before project construction is started and confirm in writing to Engineer adequacy of provisions for TAB and all other aspects of design and installation pertinent to success of TAB.
- .2 Review specified standards and report to Engineer in writing all proposed procedures which vary from standard.
- .3 During construction, co-ordinate location and installation of all TAB devices, equipment, accessories, measurement ports and fittings.

1.9 START-UP

- .1 Follow start-up procedures as recommended by equipment manufacturer unless specified otherwise.
- .2 Follow special start-up procedures specified elsewhere in Divisions 20, 21, 22, 23 & 25.

1.10 OPERATION OF SYSTEMS DURING TAB

- .1 Operate systems for length of time required for TAB and as required by Engineer for verification of TAB reports.

1.11 START OF TAB

- .1 Notify Engineer 7 days prior to start of TAB.
- .2 Start TAB only when building is essentially completed, including:
 - .1 Installation of ceilings, doors, windows, other construction affecting TAB.
 - .2 Application of weatherstripping, sealing, caulking.
 - .3 All pressure, leakage, other tests specified elsewhere in Divisions 20, 21, 22, 23 & 25.
 - .4 All provisions for TAB installed and operational.
- .3 Start-up, verification for proper, normal and safe operation of all mechanical and associated electrical and control systems affecting TAB including but not limited to:
 - .1 Proper thermal overload protection in place for electrical equipment.
 - .2 Air systems:
 - .1 Filters in place, clean.
 - .2 Duct systems clean.
 - .3 Ducts, air shafts, ceiling plenums are airtight to within specified tolerances.
 - .4 Correct fan rotation.
 - .5 Fire, smoke, volume control dampers installed and open.
 - .6 Coil fins combed, clean.
 - .7 Access doors, installed, closed.
 - .8 All outlets installed, volume control dampers open.
 - .3 Liquid systems:
 - .1 Flushed, filled, vented.
 - .2 Correct pump rotation.
 - .3 Strainers in place, baskets clean.
 - .4 Isolating and balancing valves installed, open.
 - .5 Calibrated balancing valves installed, at factory settings.
 - .6 Chemical treatment systems complete, operational.
 - .4 Combustion air:
 - .1 With all heating appliances, within the boiler room, operating on high fire, measure:
 - .1 Combustion air volume entering boiler room from outside.
 - .2 Differential pressure to:
 - .1 Outside
 - .2 Adjacent areas of the building.
 - .3 With all heating appliances on high fire, check each natural draft appliance diverter for any back draft.

1.12 APPLICATION TOLERANCES

- .1 Do TAB to following tolerances of design values:
 - .1 Laboratory HVAC systems: plus 10%, minus 0%.
 - .2 All other HVAC systems: plus 5%, minus 5%.
 - .3 Hydronic systems: plus or minus 10%.

1.13 ACCURACY TOLERANCES

- .1 Measured values to be accurate to within plus or minus 2% of actual values.

1.14 INSTRUMENTS

- .1 Prior to TAB, submit to Engineer list of instruments to be used together with serial numbers.
- .2 Calibrate in accordance with requirements of most stringent of referenced standard for either applicable system or HVAC system.
- .3 Calibrate within 3 months of TAB. Provide certificate of calibration to Engineer.

1.15 SUBMITTALS

- .1 Submit, prior to commencement of TAB:
- .2 Proposed methodology and procedures for performing TAB if different from referenced standard.

1.16 PRELIMINARY TAB REPORT

- .1 Submit for checking and approval of Engineer, prior to submission of formal TAB report, sample of rough TAB sheets. Include:
 - .1 Details of instruments used.
 - .2 Details of TAB procedures employed.
 - .3 Calculations procedures.
 - .4 Summaries.

1.17 TAB REPORT

- .1 Format to be in accordance with Associated Air Balancing Council (AABC/CAABC).
- .2 TAB report to show all results in SI units or Imperial (IP), to match drawings and specifications, and to include:
 - .1 Project record drawings.
 - .2 System schematics.
- .3 Submit pdf electronic copy of TAB Report to Engineer for verification and approval.

1.18 VERIFICATION

- .1 All reported results subject to verification by Engineer.

- .2 Provide manpower and instrumentation to verify up to 30% of all reported results.
- .3 Number and location of verified results to be at discretion of Engineer.
- .4 Bear costs to repeat TAB as required to satisfaction of Engineer.
- .5 At request of commissioning agent, provide manpower and instrumentation to verify an additional 30% of all reported results.

1.19 SETTINGS

- .1 After TAB is completed to satisfaction of Engineer, replace drive guards, close all access doors, lock all devices in set positions, ensure sensors are at required settings.
- .2 Permanently mark all settings to allow restoration at any time during life of facility. Markings not to be eradicated or covered in any way.

1.20 COMPLETION OF TAB

- .1 TAB to be considered complete only when final TAB Report received and approved by Engineer.

1.21 SYSTEMS

- .1 Quality assurance: Perform TAB under direction of supervisor qualified by AABC.
- .2 Air Systems: Include both specified and measured data.
 - .1 Air Handling Equipment:
 - .1 Maximum air flow volume.
 - .2 Fan total pressure.
 - .3 Motor volts, amps and power.
 - .4 Minimum outside air volume.
 - .5 Fan rotational speed.
 - .6 Fan Power, calculate fan efficiency.
 - .7 Inlet and outlet dry bulb, wet bulb and dewpoint temperatures.
 - .8 Equipment static pressure profile.
 - .9 Noise.
 - .10 Vibration.
 - .2 Duct Air Quantities - Mains and Branches:
 - .1 Duct size.
 - .2 Number of pressure/velocity readings per traverse.
 - .3 Sum of velocity measurements.
 - .4 Average velocity.
 - .5 Duct air flow volume.
 - .6 Barometric pressure and duct air temperature.

- .3 Air Outlets:
 - .1 Outlet location and designation.
 - .2 Manufacturers catalogue identification and type.
 - .3 Air outlet flow factors. Use 1.0 when flow hood is used.
 - .4 Air flow volumes.
 - .5 Deflector vane or diffuser cone settings.

- .3 Hydronic Systems: Include both specified and measured data.
 - .1 Pumps:
 - .1 Discharge and suction pressures, at design flow and no flow.
 - .2 Fluid flow rate. Calculate from pump curves if metering not provided.
 - .3 Motor volts, amps, power.
 - .4 RPM.
 - .5 Noise.
 - .6 Vibration.
 - .2 Piping Systems:
 - .1 Supply and return of each primary loop.
 - .2 Supply and return of each secondary loop.
 - .3 Heating Equipment:
 - .1 Equipment type, location and designation.
 - .2 Fluid used. Identify fluid used; water, % water/ethylene glycol mixes, steam, etc.
 - .3 Fluid flow rate.
 - .4 Fluid Specific Heat, at mean temperature.
 - .5 Fluid Specific Gravity, at mean temperature.
 - .6 Fluid entering and leaving temperatures and pressures.
 - .7 Heat transfer rate.

1.22 PLUMBING SYSTEMS

- .1 Inlet and outlet temperature of each heater or tank.
- .2 Main supply piping main branch piping.
- .3 Flush valves adjusted to suit project pressure conditions.

1.23 OTHER SYSTEMS

- .1 Plumbing systems:
 - .1 Controlled flow roof drain systems: adjust weirs to suit actual roof conditions, slopes, areas drained.
 - .2 Pumped sanitary and storm water systems: test for proper operation at all possible flow rates.

- .2 Building pressure conditions:
 - .1 Adjust HVAC systems, equipment, controls to ensure specified pressure conditions at all times.
- .3 Zone pressure differences:
 - .1 Adjust HVAC systems, equipment, controls to establish specified air pressure differentials, with all systems in all possible combinations of normal operating modes.

1.24 POST- OCCUPANCY TAB

- .1 Participate in systems checks twice during Warranty Period - #1 approximately 3 months after acceptance and #2 within 1 month of termination of Warranty Period.

1.25 SOUND PRESSURE LEVEL DATA

- .1 Overall A-weighted Sound Pressure Level readings.
- .2 Plot octave-band frequency, 63 to 8000 Hz, sound pressure readings on Noise Criteria graph paper to show relationship between measured level and specified NC level.
- .3 For outdoor equipment or community noise measurements provide a diagram or description of relationship of sound source to measuring instrument.
- .4 HVAC Noise Inside Building:
 - .1 The objective is to measure Sound Pressure Level within each occupied room created by entire HVAC system and to evaluate these in terms of the recommended maximum background noise levels for each type or area. Investigate areas found to be in excess of recommended maximum levels and take corrective action.
 - .2 Follow testing procedures specified under "Acoustic Measurement Procedure".
 - .3 Measure overall, A-weighted Sound Pressure Level in most cases. In more critical areas determine RC - Room Criteria level.
 - .4 Take minimum of one reading per 30 m² of floor area, but no less than one reading in any one enclosed room or open area which will be occupied.
 - .5 Take measurements with system operating in its loudest normal condition which is typically the summer mode.
 - .6 Take measurements in rooms equipped with exhaust fans or unit heaters or cabinet heaters with fan "on" and fan "off" conditions.
 - .7 Measure sound pressure levels in rooms directly beneath roof top towers, condensers, furnaces, etc. with units running at maximum speed or capacity.
 - .8 Compare results with following maximum noise criteria:
 - .1 Private Office, Library, Open Plan Office : 42 dB(A)
 - .2 Cafeteria, Washrooms, Circulation/Waiting Areas: 47 dB(A)
 - .3 Computer Equipment Room, Kitchen, Laboratory: 52 dB(A)
 - .4 Light Maintenance Shops: 57 dB(A)
 - .9 Determine RC levels for any areas found to be in excess of recommended maximum A-weighted noise level or where any unusually loud or distinct noises, rumble, hiss, tone,

ballast hum, etc., are heard. In these areas measure unweighted octave band sound pressure levels from 31.5 Hz to 8000 Hz. Plot this data on RC curve charts.

PART 2 PRODUCTS

2.1 NOT USED

- .1 Not used.

PART 3 EXECUTION

3.1 BALANCING AND ADJUSTING PREPARATION

- .1 Perform testing, adjusting and balancing work after equipment and systems starting procedures have been properly completed.
- .2 Perform balancing during heating and cooling season of first year of operation, and at times when directed by Engineer, to ensure proper settings of controls under both summer and winter peak load conditions.
- .3 Vary load to verify operation of system under partial load conditions. Test start-up, shut-down, emergency conditions, safety controls operation and automatic and manual resets and interlocks.
- .4 Cap all instrument test ports. Obtain caps from sheet metal contractor and install.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project. Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society for Testing and Materials (ASTM).
 - .1 ASTM B209-14, Specification for Aluminum and Aluminum Alloy Sheet and Plate.
 - .2 ASTM C335/C335M-17, Test Method for Steady State Heat Transfer Properties of Horizontal Pipe Insulation.
 - .3 ASTM C449-07(2013), Standard Specification for Mineral Fiber-Hydraulic-Setting Thermal Insulating and Finishing Cement.
 - .4 ASTM C921-10(2015), Standard Practice for Determining the Properties of Jacketing Materials for Thermal Insulation.
- .2 Canadian General Standards Board (CGSB)
 - .1 CAN/CGSB-51.10-92, Mineral Fibre Board Thermal Insulation.
 - .2 CAN/CGSB-51.11-92, Mineral Fibre Thermal Insulation Blanket.
 - .3 CGSB 51-GP-52Ma, Vapour Barrier, Jacket and Facing Material for Pipe, Duct and Equipment Thermal Insulation.
- .3 Manufacturer's Trade Associations: Thermal Insulation Association of Canada (TIAC): National Insulation Standards.
- .4 Underwriters Laboratories (UL)
 - .1 UL 723, Tests for Surface Burning Characteristics of Building Materials.
- .5 Underwriters Laboratories of Canada (ULC)
 - .1 CAN/ULC S102-10, Surface Burning Characteristics of Building Materials and Assemblies.

1.3 DEFINITIONS

- .1 For purposes of this section:
 - .1 "CONCEALED" - insulated mechanical services and equipment in suspended ceilings and non-accessible chases and furred-in spaces.
 - .2 "EXPOSED" - will mean "not concealed" as defined herein.
 - .3 Insulation systems - insulation material, fasteners, jackets, and other accessories.
- .2 TIAC Codes:
 - .1 CRD: Code Round Ductwork,
 - .2 CRF: Code Rectangular Finish.

1.4 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit for approval manufacturer's catalogue literature related to installation, fabrication for duct jointing recommendations.

1.5 SAMPLES

- .1 Submit samples in accordance with Section 20 05 01 - Mechanical General Requirements, if requested by Consultant.
- .2 Submit for approval: complete assembly of each type of insulation system, insulation, coating, and adhesive proposed. Mount sample on ½" plywood board. Affix typewritten label beneath sample indicating service.

1.6 Manufacturer's Instructions

- .1 Submit manufacturer's installation instructions in accordance with Section 20 05 01 - Mechanical General Requirements, if requested by Engineer.
- .2 Installation instructions to include procedures to be used, installation standards to be achieved.

1.7 Qualifications

- .1 Installer to be specialist in performing work of this section, and have at least 5 years successful experience in this size and type of project, qualified to standards.

1.8 Delivery, Storage and Handling

- .1 Deliver materials to site in original factory packaging, labelled with manufacturer's name, address.
- .2 Protect from weather and construction traffic.
- .3 Protect against damage from any source.
- .4 Store at temperatures and conditions required by manufacturer.

PART 2 PRODUCTS

2.1 FIRE AND SMOKE RATING

- .1 In accordance with CAN/ULC S102:
 - .1 Maximum flame spread rating: 25.
 - .2 Maximum smoke developed rating: 50.

2.2 INSULATION

- .1 Mineral fibre as specified herein includes glass fibre, rock wool, slag wool.
- .2 Thermal conductivity ("k" factor) not to exceed specified values at 24°C mean temperature when tested in accordance with ASTM C335/C335M.
- .3 TIAC Code C-1: Rigid mineral fibre board to CAN/CGSB-51.10, with factory applied vapour retarder jacket to CGSB 51-GP-52Ma (as scheduled in PART 3 of this Section).
- .4 TIAC Code C-2: Mineral fibre blanket to CAN/CGSB-51.11 faced with factory applied vapour retarder jacket to CGSB 51-GP-52Ma (as scheduled in PART 3 of this section).
 - .1 Mineral fibre: to CAN/CGSB-51.11.
 - .2 Jacket: to CGSB 51-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.11.
 - .4 Density: 24 kg/m³.

2.3 JACKETS

- .1 Canvas: 220 gm/m² cotton, plain weave, treated with dilute fire retardant lagging adhesive to ASTM C921.
- .2 Lagging adhesive: Compatible with insulation.
- .3 Aluminum:
 - .1 To ASTM B209 with moisture barrier as scheduled in PART 3 of this section.
 - .2 Thickness: 0.50 mm sheet.
 - .3 Finish: Stucco embossed.
 - .4 Jacket banding and mechanical seals: 19 mm (3/4") wide, 0.5 mm thick stainless steel.
- .4 Acrylic Adhesive (Indoor Applications only):
 - .1 Thickness: 0.18 mm.
 - .2 Finish: Stucco embossed.
 - .3 Peel Adhesion: 18N/25 mm (65 oz./in.)
 - .4 Puncture: 130N (30 lbs.).
 - .5 UL 723 listed (10/20 flame/smoke rating).
 - .6 Acceptable material: VentureClad 1577CW.

2.4 ACCESSORIES

- .1 Vapour retarder lap adhesive: Water based, fire retardant type, compatible with insulation.
- .2 Indoor Vapour Retarder Finish: Vinyl emulsion type acrylic, compatible with insulation.
- .3 Insulating Cement: hydraulic setting on mineral wool, to ASTM C449.
- .4 Outdoor Vapour Retarder Mastic:
 - .1 Vinyl emulsion type acrylic, compatible with insulation.
 - .2 Reinforcing fabric: Fibrous glass, untreated 305 g/m².
- .5 Tape: self-adhesive, aluminum, reinforced, 75 mm (3") wide minimum.
- .6 Contact adhesive: quick-setting
- .7 Canvas adhesive: washable.
- .8 Tie wire: 1.5 mm stainless steel.
- .9 Banding: 19 mm (3/4") wide, 0.5 mm thick stainless steel.
- .10 Facing: 25 mm (1") galvanized steel hexagonal wire mesh stitched on one face of insulation.
- .11 Fasteners: 2 mm diameter pins with 38 mm (1½") diameter clips, length to suit thickness of insulation.

PART 3 EXECUTION

3.1 PRE- INSTALLATION REQUIREMENTS

- .1 Pressure testing of ductwork systems to be complete, witnessed and certified.
- .2 Surfaces to be clean, dry, free from foreign material.

3.2 INSTALLATION

- .1 Install in accordance with TIAC National Standards.
- .2 Apply materials in accordance with manufacturers instructions and this specification.
- .3 Use two layers with staggered joints when required nominal thickness exceeds 75 mm (3").

- .4 Maintain uninterrupted continuity and integrity of vapour retarder jacket and finishes.
 - .1 Hangers, supports to be outside vapour retarder jacket.
- .5 Supports, Hangers in accordance with Section 23 05 29 - Bases, Hangers and Supports
 - .1 Apply high compressive strength insulation where insulation may be compressed by weight of ductwork.
- .6 Fasteners: At 300 mm (12") oc in horizontal and vertical directions, minimum two rows each side.

3.3 DUCTWORK INSULATION SCHEDULE

- .1 Insulation types and thicknesses: Conform to following table:

Thickness	TIAC	Vapour Code	Retarder mm (in.)
Rectangular cold and dual temperature supply & return air ducts in exposed areas including silencers (mechanical room, open ceiling, etc.)	C-1	yes	25 (1")
Cold and dual temperature supply air ducts in concealed ceiling space and all round cold ducts including silencers	C-2	yes	25 (1")
Outside air ducts to mixing plenum	C-1	yes	50 (2")
Supply and return ducts exposed in space being served	none		
Exhaust ducts within 3 m from roof/ exterior wall penetration	C-1	yes	50 (2")
Supply & exhaust rectangular ducts outside	C-1	yes	50 (2")
Acoustically lined ductwork inside building	none		

- .2 Exposed round ducts 600 mm and larger, smaller sizes where subject to abuse:
 - .1 Use TIAC code C-1 insulation, scored to suit diameter of duct.

.3 Finishes: Conform to following table:

	Rectangular	Round	TIAC Code
Indoor, concealed	none	none	
Indoor, exposed within mechanical room	CRF/1	CRD/2	
Indoor, exposed elsewhere	CRF/1	CRD/2	
Outdoor, exposed to precipitation	CRF/3	CRD/4	
Outdoor, elsewhere	CRF/4	CRD/5

1.3 PRODUCT DATA

- .1 Submit Product Data in accordance with Section 20 05 01 - Mechanical General Requirements.

1.4 SAMPLES

- .1 Submit samples in accordance with Section 20 05 01 - Mechanical General Requirements.

- .2 Submit for approval: complete assembly of each type of insulation system, insulation, coating, and adhesive proposed. Mount sample on 12 mm plywood board. Affix typewritten label beneath sample indicating service.

1.5 MANUFACTURER'S INSTRUCTIONS

- .1 Submit manufacturer's installation instructions in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Installation instructions to include procedures to be used, installation standards to be achieved.

1.6 QUALIFICATIONS

- .1 Installer to be specialist in performing work of this section, and have at least 5 years successful experience in this size and type of project, qualified to standards of TIAC.

1.7 DELIVERY, STORAGE AND HANDLING

- .1 Deliver materials to site in original factory packaging, labelled with manufacturer's name, address.
- .2 Protect from weather and construction traffic.
- .3 Protect against damage from any source.
- .4 Store at temperatures and conditions required by manufacturer.

PART 2 - PRODUCTS

2.1 FIRE AND SMOKE RATING

- .1 In accordance with CAN/ULC S102:
 - .1 Maximum flame spread rating: 25.
 - .2 Maximum smoke developed rating: 50.

2.2 INSULATION

- .1 Mineral fibre as specified herein includes glass fibre, rock wool, slag wool.
- .2 Thermal conductivity ("k" factor) not to exceed specified values at 24°C mean temperature when tested in accordance with ASTM C335.

- .3 TIAC Code A-1: Rigid moulded mineral fibre without factory applied vapour retarder jacket.
 - .1 Mineral fibre: to CAN/CGSB-51.9.
 - .2 Maximum "k" factor: to CAN/CGSB-51.9.
- .4 TIAC Code A-3: Rigid moulded mineral fibre with factory applied vapour retarder jacket.
 - .1 Mineral fibre: to CAN/CGSB-51.9.
 - .2 Jacket: to CGSB 1-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.9.
- .5 TIAC Code C-1: Rigid mineral fibre board, unfaced.
 - .1 Mineral fibre: to CAN/CGSB-51.10.
 - .2 Maximum "k" factor: to CAN/CGSB-51.10.
- .6 TIAC Code C-4: Rigid mineral fibre board faced with factory applied vapour retarder jacket.
 - .1 Mineral fibre: to CAN/CGSB-51.10.
 - .2 Jacket: to CGSB 51-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.10.
- .7 TIAC Code C-2: Mineral fibre blanket unfaced or faced with factory applied vapour retarder jacket (as scheduled in PART 3 of this section).
 - .1 Mineral fibre: to CAN/CGSB-51.11.
 - .2 Jacket: to CGSB 51-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.11.
- .8 TIAC Code A-2: Rigid moulded calcium silicate in sections and blocks, and with special shapes to suit project requirements.
 - .1 Insulation: to CAN/CGSB-51.2.
 - .2 Maximum "k" factor: to CAN/CGSB-51.2.
 - .3 Design to permit periodic removal and re-installation.

2.3 CEMENT

- .1 Thermal insulating and finish
 - .1 To CAN/CGSB-51.12.
 - .2 Hydraulic setting or Air drying on mineral wool, to ASTM C449/C449M.

2.4 JACKETS

- .1 Canvas:
 - .1 220 gm/m² cotton, plain weave, treated with dilute fire retardant lagging adhesive to ASTM C921.
 - .2 Lagging adhesive: Compatible with insulation.
- .2 Aluminum:
 - .1 To ASTM B209.
 - .2 Thickness: 0.50 mm sheet.

- .3 Finish: embossed.
- .4 Joining: Longitudinal and circumferential slip joints with 50 mm laps.
- .5 Fittings: 0.5 mm thick die-shaped fitting covers with factory-attached protective liner.
- .6 Metal jacket banding and mechanical seals: stainless steel, 19 mm wide, 0.5 mm thick at 300mm

2.5 INSULATION SECUREMENTS

- .1 Tape: Self-adhesive, aluminum, reinforced, 50 mm wide minimum.
- .2 Contact adhesive: Quick setting.
- .3 Canvas adhesive: Washable.
- .4 Tie wire: 1.5 mm diameter stainless steel.
- .5 Bands: Stainless steel, 19 mm wide, 0.5 mm thick.
- .6 Facing: 25 mm galvanized steel hexagonal wire mesh on one face.
- .7 Fasteners: 4 mm diameter pins with 35 mm diameter clips. Length of pin to suit thickness of insulation.

2.6 VAPOUR RETARDER LAP ADHESIVE

- .1 Water based, fire retardant type, compatible with insulation.

2.7 INDOOR VAPOUR RETARDER FINISH

- .1 Vinyl emulsion type acrylic, compatible with insulation.

2.8 OUTDOOR VAPOUR RETARDER MASTIC

- .1 Vinyl emulsion type acrylic, compatible with insulation.
- .2 Reinforcing fabric: Fibrous glass, untreated 305 g/m².

PART 3 EXECUTION

3.1 PRE- INSTALLATION REQUIREMENTS

- .1 Pressure testing of equipment and adjacent piping systems to be complete, witnessed and certified.
- .2 Surfaces to be clean, dry, free from foreign material.

3.2 INSTALLATION

- .1 Install in accordance with TIAC National Standards:
 - .1 Hot equipment: To TIAC code 1503-H.
 - .2 Cold equipment: to TIAC code 1503-C.
- .2 Elastomeric Insulation: to remain dry at all times. Overlaps to be to manufacturer's instructions. Joints to be tight and sealed properly.
- .3 Provide vapour retarder as recommended by manufacturer.
- .4 Apply materials in accordance with insulation and equipment manufacturers instructions and this specification.
- .5 Use two layers with staggered joints when required nominal wall thickness exceeds 75 mm.
- .6 Maintain uninterrupted continuity and integrity of vapour retarder jacket and finishes.
 - .1 Hangers, supports to be outside vapour retarder jacket.
- .7 Supports, Hangers:
 - .1 Apply high compressive strength insulation, suitable for service, at oversized saddles and shoes where insulation saddles have not been provided.

3.3 REMOVABLE, PRE-FABRICATED, INSULATION AND ENCLOSURES

- .1 Application: At expansion joints, chilled water and heating valves in mechanical rooms, primary flow measuring elements.
- .2 Installation to permit movement of expansion joint and to permit periodic removal and replacement without damage to adjacent insulation.

3.4 EQUIPMENT INSULATION SCHEDULES

- .1 Includes valves, valve bonnets, strainers, flanges and fittings unless otherwise specified.

- .2 Hot Equipment:
 - .1 TIAC code A-1 or C-1 with mechanical fastenings and 13 mm (½") cement reinforced with one layer of reinforcing mesh.
 - .2 TIAC code C-2 unfaced with wire and 13 mm cement precede by one layer of reinforcing mesh.
 - .3 Thicknesses: 50 mm (2").
 - .4 Application: pumps, expansion tanks, heat exchangers, filters & pot feeder, air/dirt separators and all associated accessories in heating piping system.

- .3 Cold equipment:
 - .1 TIAC A-3 or C-4 with mechanical fastenings and 13 mm cement reinforced with one layer of reinforcing mesh.
 - .2 TIAC C-2 faced with vapour retardant jacket and with wire and 13 mm cement preceded by one layer of reinforcing mesh.
 - .3 Thicknesses: 50 mm (2").
 - .4 Application: Pumps, expansion tanks, heat exchangers, filters & pot feeders, air/dirt separators and all associated accessories in chiller water piping system including pipe anchors and ridged supports.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.3 DEFINITIONS

- .1 For purposes of this section:
 - .1 "CONCEALED" - insulated mechanical services in suspended ceilings and non-accessible chases and furred-in spaces.
 - .2 "EXPOSED" - will mean "not concealed" as defined herein.
- .2 TIAC ss:
 - .1 CRF: Code Rectangular Finish.
 - .2 CPF: Code Piping Finish.

1.4 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit for approval manufacturer's catalogue literature related to installation, fabrication for pipe, fittings, valves and jointing recommendations.

1.5 SAMPLES

- .1 Submit samples in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit for approval: complete assembly of each type of insulation system, insulation, coating, and adhesive proposed. Mount sample on 12 mm (½") plywood board. Affix typewritten label beneath sample indicating service.

1.6 MANUFACTURER'S INSTRUCTIONS

- .1 Submit manufacturer's installation instructions in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Installation instructions to include procedures to be used, installation standards to be achieved.

1.7 QUALIFICATIONS

- .1 Installer to be specialist in performing work of this section, and have at least 5 years successful experience in this size and type of project, qualified to standards.

1.8 DELIVERY, STORAGE AND HANDLING

- .1 Deliver materials to site in original factory packaging, labelled with manufacturer's name, address.
- .2 Protect from weather, construction traffic.
- .3 Protect against damage from any source.
- .4 Store at temperatures and conditions required by manufacturer.

PART 2 PRODUCTS

2.1 FIRE AND SMOKE RATING

- .1 In accordance with CAN/ULC S102:
 - .1 Maximum flame spread rating: 25.
 - .2 Maximum smoke developed rating: 50.

2.2 INSULATION

- .1 Mineral fibre as specified herein includes glass fibre, rock wool, slag wool.
- .2 Thermal conductivity ("k" factor) not to exceed specified values at 24°C mean temperature when tested in accordance with ASTM C335/C335M.
- .3 TIAC Code A-1: Rigid moulded mineral fibre without factory applied vapour retarder jacket (as scheduled in PART 3 of this section).
 - .1 Mineral fibre: to CAN/CGSB-51.9.
 - .2 Maximum "k" factor: to CAN/CGSB-51.9.
- .4 TIAC Code A-3: Rigid moulded mineral fibre with factory applied vapour retarder jacket (as scheduled in PART 3 of this section).
 - .1 Mineral fibre: to CAN/CGSB-51.9.
 - .2 Jacket: to CGSB 51-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.9.
- .5 TIAC Code C-2: Mineral fibre blanket faced with factory applied vapour retarder jacket (as scheduled in PART 3 of this section).
 - .1 Mineral fibre: to CAN/CGSB-51.11.
 - .2 Jacket: to CGSB 51-GP-52Ma.
 - .3 Maximum "k" factor: to CAN/CGSB-51.11.
 - .4 Density: 24 kg/m³.

2.3 INSULATION SECUREMENT

- .1 Tape: Self-adhesive, aluminum, reinforced, 50 mm wide minimum.
- .2 Contact adhesive: Quick setting.
- .3 Canvas adhesive: Washable.
- .4 Tie wire: 1.5 mm diameter stainless steel.

- .5 Bands: Stainless steel, 19 mm wide, 0.5 mm thick.

2.4 CEMENT

- .1 Thermal insulating and finishing cement:
 - .1 To CAN/CGSB-51.12.
 - .2 Hydraulic setting or Air drying on mineral wool, to ASTM C449.

2.5 VAPOUR RETARDER LAP ADHESIVE

- .1 Water based, fire retardant type, compatible with insulation.

2.6 INDOOR VAPOUR RETARDER FINISH

- .1 Vinyl emulsion type acrylic, compatible with insulation.

2.7 JACKETS

- .1 Canvas:
 - .1 220 gm/m² cotton, plain weave, treated with dilute fire retardant lagging adhesive to ASTM C921.
 - .2 Lagging adhesive: Compatible with insulation.
 - .3 Random samples to be taken during installation c/w date & time on sample.
- .2 Aluminum:
 - .1 To ASTM B209.
 - .2 Thickness: 0.50 mm sheet.
 - .3 Finish: embossed.
 - .4 Joining: Longitudinal and circumferential slip joints with 50 mm laps.
 - .5 Fittings: 0.5 mm thick die-shaped fitting covers with factory-attached protective liner.
 - .6 Metal jacket banding and mechanical seals: stainless steel, 19 mm wide, 0.5 mm thick at 300 mm spacing.
- .3 PVC:
 - .1 Ontario Building Code compliant for 25/50 flame spread and smoke developed.
 - .2 Minimum thickness 0.015 mil.
 - .3 Colour white unless otherwise specified.
 - .4 Non yellowing UV stabilized.
 - .5 Minimum service temperatures: -20°C.
 - .6 Maximum service temperature: 65°C.
 - .7 Moisture vapour transmission: 0.02 perm.
 - .8 Fastenings:
 - .1 Use solvent weld adhesive compatible with insulation to seal laps and joints.

- .2 Tacks.
- .3 Pressure sensitive vinyl tape of matching colour.

PART 3 EXECUTION

3.1 PRE- INSTALLATION REQUIREMENT

- .1 Pressure testing of piping systems and adjacent equipment to be complete, witnessed and certified.
- .2 Surfaces to be clean, dry, free from foreign material.

3.2 INSTALLATION

- .1 Install in accordance with TIAC National Standards and NAIMA Guides..
- .2 Apply materials in accordance with manufacturers instructions and this specification.
- .3 Use two layers with staggered joints when required nominal wall thickness exceeds 75 mm.
- .4 All roof drain bodies shall be thermally insulated with 50 mm thick mineral fibre blanket faced with factory applied vapour retarder jacket.
- .5 Maintain uninterrupted continuity and integrity of vapour retarder jacket and finishes.
 - .1 Hangers, supports to be outside vapour retarder jacket.
 - .2 Saddles to have ridges to limit movement while in hanger.
 - .3 To be edge flared to prevent cutting/damage to insulation coverage.
 - .4 Provide mastic with minimum 0.02 perm rating on all exposed edges of fittings supports & valves.
- .6 Supports, Hangers:
 - .1 Apply high compressive strength insulation, suitable for service, at oversized saddles and shoes where insulation saddles have not been provided.

3.3 Removable, Pre-fabricated, Insul and Enclosures

- .1 Application: At expansion joints, valves, primary flow measuring elements flanges and ationunions at equipment.
- .2 Design: To permit movement of expansion joint and to permit periodic removal and replacement without damage to adjacent insulation.
- .3 Insulation:
 - .1 Insulation, fastenings and finishes: same as system.

- .2 Jacket: PVC.

3.4 INSTALLATION OF ELASTOMERIC INSULATION

- .1 Insulation to remain dry at all times. Overlaps to manufacturers instructions. Ensure n tight joints.
- .2 Provide vapour retarder as recommended by manufacturer.

3.5 PIPING INSULATION SCHEDULES

- .1 Includes valves, valve bonnets, strainers, flanges and fittings unless otherwise specified.
- .2 TIAC Code: A-1.
 - .1 Securements: Tape at 300 mm oc.
 - .2 Seals: lap seal adhesive, lagging adhesive.
 - .3 Installation: TIAC Code 1501-H.
- .3 TIAC Code: A-3.
 - .1 Securements: Tape at 300 mm oc.
 - .2 Seals: VR lap seal adhesive, VR lagging adhesive.
 - .3 Installation: TIAC Code: 1501-C.
- .4 TIAC Code: C-2.
 - .1 Insulation securements: combination of wire and bands.
 - .2 Seals: lap seal adhesive, lagging adhesive.
 - .3 Installation: TIAC Code: 1501-C.
- .5 Thickness of insulation to be as listed in following table:

Application	Temp °C	TIAC code	Pipe sizes (NPS) and insulation thickness (mm)			
			½ to 1¼	1½ to 3	4 to 6	8 & over
Hot Water Heating	61 - 93	A-1	38	50	50	50
Hot Water Heating	up to 60	A-1	25	38	38	38
Glycol Heating 38	61 - 93	A-1	38	50	50	50
Glycol Heating	up to 60	A-1	25	38	38	38
Domestic Hot Water		A-1	25	38	38	38

Domestic Hot Water Recirc r)		A-1	25	38	38	38
Chilled Water with Vapour Barrier (Interior)	5 - 13	A-3	25	25	25	38
Chilled Water with Vapour Barrier (Exterior)	5 - 13	A-3	38	38	50	50
Heating/Cooling with Vapour Barrier		A-3	25	38	38	38
Domestic Cold Water		A-3	25	25	25	25
Storm Piping		A-3	25	25	25	25
Storm Roof Drains		C-2	50	50	50	50
Steam (105 kPa, 15 psi)		A-1	65	65	75	75
On top of Radiant Panels		C-2	----	---	- 50	-----
Steam Condensate		A-1	385	505	50	50

- .6 Finishes:
- .1 Exposed indoors: PVC.
 - .2 Exposed piping & fittings in mechanical rooms: PVC.
 - .3 Exposed exterior: Aluminum.
 - .4 Concealed, indoors: PVC on valves and fittings only. No further finish.
 - .5 Use vapour retarder jacket on TIAC code A-3 insulation compatible with insulation.
 - .6 Finish attachments: Stainless steel bands at 150 mm oc. Seals: wing or closed.
 - .7 Installation: To appropriate TIAC code CRF/1 through CPF/5.
- .7 Storm piping & fittings to be insulated from all roof drain bodies to storm piping at grade level.
- .8 Domestic hot & cold and recirc piping shall be completely thermally insulated to fixtures, except exposed supply assembly at fixtures.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

PART 2 PRODUCTS

2.1 CLEANING SOLUTIONS

- .1 Tri-sodium phosphate: 0.40 kg per 100 L water in system.
- .2 Sodium carbonate: 0.40 kg per 100 L water in system.
- .3 Low-foaming detergent: 0.01 kg per 100 L water in system.

PART 3 EXECUTION

3.1 GENERAL

- .1 Provide all material & labour associated with flushing and cleaning of system including full size bypass and associated accessories.

3.2 CLEANING HYDRONIC AND STEAM SYSTEMS

- .1 Timing: Systems to be operational, hydrostatically tested and with safety devices functional, before cleaning is carried out.
- .2 Cleaning Agency: Retain qualified water treatment specialist to perform system cleaning.
- .3 Install instrumentation such as flow meters, orifice plates, pitot tubes, flow metering valves only after cleaning is certified as complete by water treatment specialist.
- .4 Cleaning procedures:
 - .1 Provide detailed report outlining proposed cleaning procedures at least 4 weeks prior to proposed starting date. Report to include:
 - .1 Cleaning procedures, flow rates, elapsed time.
 - .2 Chemicals and concentrations to be used.
 - .3 Inhibitors and concentrations.
 - .4 Specific requirements for completion of work.

- .5 Special precautions for protecting piping system materials and components.
- .6 Complete analysis of water to be used to ensure water will not damage systems or equipment.
- .5 Conditions at time of cleaning of systems
 - .1 Systems to be free from construction debris, dirt and other foreign material.
 - .2 Control valves to be operational, fully open to ensure that terminal units can be cleaned properly.
 - .3 Strainers to be clean prior to initial fill.
 - .4 Install temporary filters on pumps not equipped with permanent filters.
 - .5 Install pressure gauges on strainers to detect plugging.
- .6 Report on Completion of Cleaning. When cleaning is completed, submit report, complete with certificate of compliance with specifications of cleaning component supplier.
- .7 Hydronic Systems:
 - .1 Fill system with water, ensure air is vented from system.
 - .2 Fill expansion tanks 1/3 to 1/2 full, charge system with compressed air to at least 35 kPa (does not apply to diaphragm type expansion tanks).
 - .3 Use water meter to record volume of water in system to +/- 0.5%.
 - .4 Add chemicals under direct supervision of chemical treatment supplier.
 - .5 Closed loop systems: circulate system cleaner at 60°C for at least 36 h. Drain as quickly as possible. Refill with water plus inhibitors. Test concentrations and adjust to recommended levels.
 - .6 Flush velocity in system mains and branches to be adequate so as to ensure removal of debris. System pumps may be used for circulating cleaning solution provided that velocities are adequate.
 - .7 Add chemical solution to system.
 - .8 Establish circulation, raise temperature slowly to maximum design or 82°C minimum. Circulate for 12 h, ensuring flow in all circuits. Remove heat, continue to circulate until temperature is below 38°C. Drain as quickly as possible. Refill with clean water. Circulate for 6 h at design temperature. Drain and repeat procedures specified above. Flush through low point drains in system. Refill with clean water adding to sodium sulphite (test for residual sulphite).

3.3 START-UP OF HYDRONIC SYSTEMS

- .1 After cleaning is completed and system is filled:
 - .1 Establish circulation and expansion tank level, set pressure controls.
 - .2 Ensure all air is removed.
 - .3 Check pumps to be free from air, debris, possibility of cavitation when system is at design temperature.
 - .4 Dismantle system pumps used for cleaning, inspect, replace worn parts, install new gaskets and new set of seals.
 - .5 Clean out strainers repeatedly until system is clean.

- .6 Check pressurization to ensure proper operation and to prevent water hammer, flashing, cavitation. Eliminate water hammer and all other noises.
- .7 Bring system up to design temperature and pressure slowly over a 24 hour period.
- .8 Perform TAB as specified Section 23 05 93 - Testing, Adjusting and Balancing (TAB).
- .9 Adjust pipe supports, hangers, springs as necessary.
- .10 Monitor pipe movement, performance of expansion joints, loops, guides, anchors.
- .11 If sliding type expansion joints bind or if bellows type expansion joints flex incorrectly, shut down system, re-align, repeat start-up procedures.
- .12 Re-tighten all bolts, etc. using torque wrench, to compensate for heat-caused relaxation. Repeat several times during commissioning.
- .13 Check operation of drain valves.
- .14 Adjust valve stem packings as systems settle down.
- .15 Fully open all balancing valves (except those that are factory-set).
- .16 Check operation of over-temperature protection devices on circulating pumps.
- .17 Adjust alignment of piping at pumps to ensure flexibility, adequacy of pipe movement, absence of noise or vibration transmission.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate on manufacturers catalogue literature following: - valves.

1.4 MAINTENANCE DATA

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 PIPE

- .1 Above ground steel pipe: to ASME A120.1 or ASTM A53/A53M, Schedule 40, seamless as follows:
 - .1 NPS ½ to 2, screwed outside, with socket welded fittings inside building.
 - .2 NPS 2½ and over, welded.

2.2 JOINTING MATERIAL

- .1 Screwed fittings: pulverized lead paste.
- .2 Welded fittings: to CSA W47.1.
- .3 Flange gaskets: to ASME B16.21 or ASME B16.20.

2.3 FITTINGS

- .1 Steel pipe fittings, screwed, flanged or welded:
 - .1 Malleable iron: screwed, banded, Class 150.
 - .2 Steel pipe flanges and flanged fittings: to ASME B16.5.
 - .3 Steel butt-welding fittings.
 - .4 Unions: malleable iron, brass to iron, ground seat, to ASTM A47/A47M.
 - .5 Bolts and nuts: to ASME B18.2.1.
 - .6 Nipples: Schedule 40, to ASTM A53/A53M.

2.4 VALVES

- .1 Provincial Code approved, lubricated plug or ball type as per specification Section 23 05 23 - Valves.

2.5 PRESSURE REDUCING VALVE

- .1 (PRV): Provide gas service regulator self-contained to reduce pressure to design capacity.
- .2 Spring loaded self-operated regulator, molded diaphragm, 6:1 lever ratio, c/w internal or remote relief valve.
- .3 Extend remote safety relief valve to atmosphere; terminate in safe location.

- .4 Reference equipment schedules for performance & capacities.
- .5 Relief valve shall be sized to protect the downstream equipment in accordance with the equipment manufacturer's recommendations.
- .6 Acceptable material: Norgas/Itron, Sensus, Maxitrol, Fisher.

2.6 ROOF PIPE SUPPORTS

- .1 Non seismic, surface mounted 300 x 300 x 65 mm high wide body 100% recycled rubber base, UV resistant, pipe supports with 14 gauge galvanized steel strut & strut pipe clamp, two (2) 13 mm dia. electro zinc plated all threaded rod risers (200-400 mm high rods).
Maximum load: 364 kg (800 lbs.). Provide tape between pipe & strut clamps. Acceptable material: Mifab C-Port #CEW.

2.7 METER REGULATOR ASSEMBLY

- .1 Coordinate Enbridge Gas for provision of new meter/regulator assembly.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with ASME Boiler and Pressure Vessels Code Section IV, regulations of Province having jurisdiction, except where specified otherwise, and manufacturers recommendations.
- .2 Make required piping connections recommended by equipment manufacturer.
- .3 Maintain clearances as indicated or if not indicated, as recommended by manufacturer installation instruction for operation, servicing and maintenance without disruption of operation of any other equipment/system.
- .4 All equipment, venting and gas assembly work shall be installed & certified by a provincially certified gas fitter I Level mechanic.

3.2 PIPING

- .1 Install in accordance with applicable Provincial/Territorial Codes.

- .2 Install in accordance with CSA B149.1 and CSA B149.2.
- .3 Assemble piping using fittings manufactured to ASME standards.
- .4 Connect to equipment in accordance with manufacturer's instruction unless otherwise indicated.
- .5 Slope piping down in direction of flow to low points as per Gas Utilization Code.
- .6 Install drip points:
 - .1 At all low points in piping system.
 - .2 At each connection to equipment.
- .7 Use eccentric reducers at pipe size change installed to provide positive drainage.
- .8 Provide clearance for access and for maintenance.
- .9 Ream pipes, clean scale and dirt, inside and out.
- .10 Install piping to minimize pipe dismantling for equipment removal.
- .11 Install buried piping within sand backfilled compacted trench with tracer wire (minimum AWG 14, and coated) extend up above grade at both ends of run. Allow for 3rd party inspection prior to backfill.
- .12 Relief valve piping shall terminate outdoors with clearances to openings, intakes, etc. in accordance with CSA B149.1

3.3 VALVES

- .1 Install valves with stems upright or horizontal unless otherwise approved by Engineer.
- .2 Install valves at all branch take-offs to isolate each piece of equipment, and as indicated.
- .3 Vent reliefs at pressure regulating valves to outdoors and minimum 3 metres for intakes.
- .4 All valves on exterior of building or where prone to vandalism, install lubricated plug type valve, regardless of size.

3.4 TESTING

- .1 Test system in accordance with CSA B149.1 and CSA B149.2.

- .2 On new natural gas service, Enbridge gas or authority having jurisdiction shall conduct a field review of all new equipment appliance venting & piping systems and submit a certificate of acceptance from a Certified G-1 Gas Fitter.

3.5 PURGING

- .1 Purge after pressure test in accordance with CSA B149.1 and CSA B149.2.

3.6 PRE-START-UP INSPECTIONS

- .1 Check vents from regulators, control valves, terminate outside building in approved location, protected against blockage, damage.
- .2 Check gas trains, entire installation is approved by authority having jurisdiction.

3.7 CLEANING AND START-UP

- .1 In accordance with requirements of CSA B149.1 & CSA B149.2.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.3 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.

1.4 MAINTENANCE DATA

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 PIPING

- .1 Type L hard drawn copper: to ASTM B88M of North American manufacturer.

2.2 FITTINGS

- .1 Cast bronze threaded fittings: to ASME B16.15.
- .2 Wrought copper and copper alloy solder joints pressure fittings: to ASME B16.22.
- .3 Cast copper alloy solder joint pressure fittings: to ASME B16.18.
- .4 Of North American manufacturer.

2.3 DI-ELECTRIC COUPLINGS

- .1 Provide wherever pipes of dissimilar metals are jointed.
- .2 For pipe sizes 2 NPS and under, provide di-electric unions or couplings.

2.4 JOINTS

- .1 Solder, tin-antimony, 95:5: to ASTM B32.
- .2 Silver solder BCUP: to AWS A5.8.
- .3 Brazing: as indicated.
- .4 Application: All closed loop hydronic systems except steam & condensate systems; refer to Section 23 21 13.02 - Steel Piping and Fittings - Hydronic Systems.

2.5 VALVES

- .1 Refer to Section 23 05 23 - Valves.

PART 3 EXECUTION

3.1 PIPING INSTALLATION

- .1 Connect to equipment in accordance with manufacturer's instruction unless otherwise indicated.
- .2 Install concealed pipes close to building structure to keep furring space to minimum. Install to conserve headroom and space. Run exposed piping parallel to walls. Group piping wherever practical.

- .3 Slope piping in direction of drainage and for positive venting.
- .4 Use eccentric reducers at pipe size change installed to provide positive drainage or positive venting.
- .5 Provide clearance for installation of insulation and access for maintenance of equipment, valves and fittings.
- .6 Ream pipes, clean scale and dirt, inside and outside, before and after assembly.
- .7 Assemble piping using fittings manufactured to ASME standards.
- .8 Saddle type branch fittings may be used on mains if branch line is no larger than half the size of main. Hole saw or drill and ream main to maintain full inside diameter of branch line prior to welding saddle.
- .9 Install all pipe wells or other devices supplied by Controls Contractor.

3.2 FLUSHING AND CLEANING

- .1 As per Section 23 08 02 - Cleaning and Start-up of Mechanical Piping Systems.

3.3 FILLING OF SYSTEM

- .1 Refill system with clean water adding water treatment as specified and/or glycol as per Section 23 25 00 - HVAC Water Treatment Systems where indicated.

3.4 TESTING

- .1 Test system in accordance with Section 23 05 05 - Installation of Pipework.
- .2 For glycol systems, retest with specified quality of glycol after cleaning. Repair any leaking joints, fittings or valves.

3.5 BALANCING

- .1 Install flow measuring stations and flow balancing valves as indicated.
- .2 Refer to Section 23 05 93 - Testing Adjusting and Balancing of Systems for applicable procedures.

3.6 GLYCOL CHARGING

- .1 Provide mixing tank and positive displacement pump for glycol charging.
- .2 Retest for concentration to ASTM E202 after cleaning.
- .3 Provide report to Engineer.

1.3 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 PIPE

- .1 Steel pipe: to ASTM A53/A53M, Grade B, as follows:
 - .1 NPS 2½ to 10, Schedule 40.
 - .2 NPS 12 and over, standard schedule.

2.2 PIPE JOINTS

- .1 Application: Hydronic water & glycol systems: NPS 2½ and over.
 - .1 NPS 2 and under: shall be copper - refer to Section 23 21 13.01 - Copper Piping and Fittings - Hydronic Systems.
 - .2 Cooling systems NPS 2½ and over: welded, flanged or grooved mechanical couplings. No grooved coupling on glycol systems.
 - .3 Heating and glycol systems NPS 2½ and over: welded or flanged. Grooved joints are not accepted.
 - .4 Welding fittings and flanges to CSA W47.1. Reference Section 23 05 17 - Pipe Welding.
 - .5 Flanges: raised face, weld neck.
 - .6 Flange gaskets: to AWWA C111/A21.11.
 - .7 Pipe thread: taper.
 - .8 Bolts and nuts: to ASME B18.2.1 and ASME B18.2.2.

2.3 FITTINGS

- .1 Screwed fittings: malleable iron, to ASME B16.3, Class 150.
- .2 Pipe flanges and flanged fittings:
 - .1 Cast iron: to ASME B16.1, Class 125.
 - .2 Steel: to ASME B16.5.
- .3 Butt-welding fittings: steel, to ASME B16.9.
- .4 Unions: malleable iron, to ASTM A47/A47M and ASME B16.3.
- .5 Fittings for roll grooved piping: malleable iron to ASTM A47/A47M, ductile iron to ASTM A536, manufactured by Victaulic are acceptable as listed.

2.4 VALVES

- .1 Refer to Section 23 05 23 - Valves.

PART 3 EXECUTION

3.1 APPLICATIONS

- .1 For hydronic closed loop water & glycol systems, reference Section 23 05 17 - Pipe Welding.

3.2 PIPING INSTALLATION

- .1 In accordance with Section 23 05 05 - Installation of Pipework.

3.3 FLUSHING AND CLEANING

- .1 As per Section 23 08 02 - Cleaning and Start-up of Mechanical Piping Systems.

3.4 FILLING OF SYSTEM

- .1 Refill system with clean water adding water treatment or ethylene glycol as per Section 23 25 00 - HVAC Water Treatment Systems.

3.5 TESTING

- .1 Test system in accordance with Section 23 05 05 - Installation of Pipework.

3.6 BALANCING

- .1 Refer to Section 23 05 93 - Testing Adjusting and Balancing for applicable procedures.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

 - .2 ASTM B62-17, Specification for Composition Bronze or Ounce Metal Castings.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.

1.4 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.

1.5 CLOSEOUT SUBMITTALS

- .1 Submit maintenance data in accordance with Section 20 05 01 - Mechanical General Requirements.

PART 2 - PRODUCTS

2.1 EXPANSION TANKS

- .1 Horizontal or vertical steel pressurized removable bladder and/or diaphragm type expansion tank.
- .2 Bladder in EPDM suitable for 115°C (240°F) operating temperature (water and glycol).
- .3 Diaphragm sealed in EPDM suitable for 115°C operating temperature.

- .4 Working pressure: 862 kPa (125 psi) with ASME stamp and certification including Canadian Registration Number (CRN).
- .5 Air precharged to initial fill pressure of system.
- .6 Saddles for horizontal installation, base mount for vertical installation.
- .7 Supports: Provide supports with hold down bolts and installation templates incorporating seismic restraint systems.
- .8 Schedule.
 - .1 38EXT02 - Hot Water Heating System - Extrol AX-60V
 - .2 38EXT03 - Glycol System - Extrol AX-15C
 - .3 38EXT04 - Chilled Water System - Extrol AX-40V
- .9 Acceptable materials: Amtrol, Expanflex, Bell & Gossett.

2.2 AUTOMATIC AIR VENT

- .1 System vents (hot water, glycol & chilled water):
 - .1 Industrial float vent: cast iron body and NPS 3/4 connection and rated at 1034 kPa working pressure.
 - .2 Float: solid material suitable for 115°C working temperature.
 - .3 Acceptable materials: Spirax/Sarco Model 13WS.
- .2 Coil Vents (all equipment headers & high points in system):
 - .1 Industrial float vent: brass alloy body and NPS 1/2 connection and rated at 1034 kPa working pressure.
 - .2 Float: stainless steel with viton rubber valve seal suitable for 115°C working temperature.
 - .3 Acceptable materials: Spirax/Sarco Model AE30.

2.3 WATER MAKE-UP COMBINATION LOW PRESSURE RELIEF AND REDUCING VALVE

- .1 Adjustable pressure setting.
- .2 Low inlet pressure check valve.
- .3 Removable strainer.
- .4 Working pressure: 1034 kPa.

2.4 IN-LINE AIR & DIRT SEPARATOR

- .1 Full flow air eliminator for removal of air and microbubbles and separates dirt simultaneously, c/w manual bleed valve. Mild steel construction, with centre line inlet and outlet ports, copper wire woven mesh & copper tubes inside housing, integrated or separate venting mechanism on top, side valve for floating liquids and debris, and bottom flange c/w threaded blow-down. Maximum working pressure 860 kPa (125 psi), maximum working temperature 175°C (350°F), maximum pressure drop 3 kPa (1 ft.) of water. Provide pipe reducers as required.
- .2 Schedule:
 - .1 38ADS01 - Heating loop - Spirovent **VDT250** or approved equal 65 mm.
 - .2 38ADS02 - Chilled water loop - Spirovent VDT300 or approved equal 75 mm.
 - .3 **38ADS03 – Glycol heat rejection loop – VDT400 or approved equal.**
- .4 Acceptable material: Spirotherm Spirovent Dirt, Bell & Gossett CRS Series.

2.5 PIPE LINE STRAINER

- .1 NPS ½ to 2: bronze body to ASTM B62, Class 250 screwed connections.
- .2 NPS 2½ to 12: cast steel body to ASTM A278M, Class 250, flanged connections.
- .3 Blowdown connection: NPS 1.
- .4 Screen: stainless steel with perforations between 5 mm and 6 mm.
- .5 Working pressure: 1034 kPa (150 psi).
- .6 Acceptable material: Crane, Watts, Victaulic, Kitz, Jenkins, Toyo, Conbraco.

PART 3 EXECUTION

3.1 GENERAL

- .1 Install as indicated and to manufacturer's recommendations.
- .2 Run drain lines and blow off connections to terminate above nearest drain.
- .3 Maintain proper clearance to permit service and maintenance.
- .4 Should deviations beyond allowable clearances arise, request and follow Engineer's directive.

- .5 Check shop drawings for conformance of all tappings for ancillaries and for equipment operating weights.
- .6 During filling of hydronic systems or equipment, vent systems & equipment properly to remove air prior to opening equipment piping to overall system. Air propagating to system, will be the responsibility of contractor to remove.

3.2 STRAINERS

- .1 Install in horizontal or down flow lines.
- .2 Ensure clearance for removal of basket.
- .3 Install ahead of each pump.
- .4 Install ahead of each automatic control valve larger than NPS 1 and radiation and as indicated.

3.3 AUTOMATIC AIR VENTS

- .1 Install automatic air vents at high points of piping systems.
- .2 Install full port ball at each automatic air vent.
- .3 Air vents must have minimum connection of 13 mm ($\frac{1}{2}$ ").

3.4 EXPANSION TANKS

- .1 Adjust expansion tank pressure to suit design criteria.
- .2 Provide isolation valve on water inlet and drain valve between isolation valve and tank.
- .3 Install tee connection at air inlet to tank c/w pressure gauge and isolation valves for pressure gauge and fill connection.
- .4 Charge tank with nitrogen to required minimum operating pressure.

3.5 PRESSURE SAFETY RELIEF VALVES

- .1 Water run discharge pipe to terminate above nearest drain.
- .2 Glycol run discharge pipe to terminate at glycol tank.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 CSA Group (CSA)
- .2 Hydraulic Institute Standards.
- .3 National Electrical Manufacturers Association (NEMA)
 - .1 NEMA MG 1-2016, Motors and Generators.
- .4 Underwriters Laboratories (UL)
 - .1 UL 778, Motor Operated Water Pumps.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Submit manufacturer's detailed composite wiring diagrams for control systems showing factory installed wiring and equipment on packaged equipment or required for controlling devices or ancillaries, accessories and controllers.
- .3 Submit product data of pump curves for review showing points of operation.
- .4 Indicate piping, valves and fittings shipped loose by packaged equipment supplier, showing their final location in field assembly.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

1.5 FACILITY COMMISSIONING

- .1 Refer and comply to Section 25 01 11 – Commissioning – Mechanical General Requirements.

1.6 MOTORS

- .1 Provide motors in accordance with Section 20 05 01 - Mechanical General Requirements, and hereafter.

1.7 VARIABLE SPEED DRIVE

- .1 All pump motors served by variable speed drives shall be Inverter duty class motors to NEMA MG 1 Part 31.

1.8 INERTIA BASES

- .1 All base mounted pumps shall be mounted on inertia bases unless noted otherwise. Reference Vibration Isolation specification section.

PART 2 PRODUCTS

2.1 VARIABLE SPEED INLINE PUMP

- .1 Circulating pumps shall be rated to a minimum 1000 kPa (145 psi) and 110°C (230° F) and where applicable, bear the approval symbol of the required regulatory body.
- .2 Electrical assemblies (circuitry, wiring terminals and internal connections) of the circulating pumps shall be certified and registered to bear the emblem of UL, CSA or ETL as required. Electrical assembly shall meet codes and standards established by national bodies.
- .3 Terminal Boxes:
 - .1 The circulating pumps shall have a high quality composite terminal box with NPT electrical connections and a secure, gasketed cover, Class 2 protection level. Included on the face of the terminal box cover is the single adjustment button, front readable graphical pump display, field adjustable for horizontal or vertical positioning of the terminal box .
 - .2 The display shall indicate:
 - .1 Operation status
 - .2 Control mode
 - .3 Differential pressure or speed/setpoint Fault and warning signals

- .4 Electrical Connections:
 - .1 Circulating pump shall have a coded terminal strip indicating common/neutral/ ground within the minimal box for field connections for 120 V, single phase 60 Hz power.

- .5 Electrical General
 - .1 All low voltage interface (IF) wiring shall be of 18 gauge or larger, UL/CSA approved, 104°C (220°F) maximum 75°C (167°F) minimum temperature.
 - .2 All 208 V main power wiring shall be of 14 gauge or larger, UL/CSA approved, 104°C maximum 75°C (167°F) minimum temperature.
 - .3 The motor shall be a minimum of class H winding insulation as defined by UL 778 and shall be to Section 23 05 13 - Motors, Drives and Guards for Mechanical Systems.
 - .4 Voltage variances shall be less than +/-10% from rated voltage with pump under load conditions. Maximum amperage not to be exceeded is indicated on the pump nameplate. Electrical power to the pump is confirmed when the face of the graphic display is lit.

- .6 Control, Operation and Diagnostics:
 - .1 Wet rotor, glandless inline circulating pumps shall include electronic variable speed control to operate at constant variable differential pressure control without external sensors. Automatic night setback control available as standard using "self taught, FUZZ!" technology.
 - .2 Pumps to include integrated synchronous motors using ECM technology with permanent magnetic rotors, special sensorless control electronics and single phase electronic converters.
 - .3 Pumps to include IR (Infra-red) interface for wireless communication with the optional infra-red monitor.
 - .4 Integrated overload motor protection shall protect the pump against over/under voltage, over temperature of motor and/or electronics, over current, locked rotor and dry run (no load condition).
 - .5 Fault contact "FC" terminals shall be included in the terminal box and are to be potentially free, normally closed contacts that open on the event of a failure.

- .7 Materials and Construction:
 - .1 Circulating pumps shall be constructed with Cast-Iron bodies with factory applied Catephoresic coating.
 - .2 Shafts shall be constructed of high quality stainless steel. Motor bearings shall be metal impregnated carbon sleeve bearing type. Impellers will be constructed of a high strength, glass filled polypropylene engineered composite.

- .8 Capacity: Refer to Schedule on drawing.

- .9 Acceptable material: Wilo Stratos, Armstrong, Zylem, Grundfos, Plad.

2.2 WET ROTOR CIRCULATING PUMP

- .1 Wet rotor:
 - .1 Integrated pump and motor assembly without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.
 - .1 Motor with three speeds,
 - .2 Ceramic radial bearings,
 - .3 Carbon thrust bearing,
 - .4 Stainless steel rotor can, bearing plate and rotor cladding,
 - .5 Stator housing in aluminium alloy,
 - .6 Cast iron or bronze housing,
 - .7 Stator with built-in thermal overload switch.
 - .2 In-line cast iron and bronze spiral pump housing:
 - .1 Flange dimensions for USA are according to individual submittal data the flanges have ¼ NPT pressure gauge tapings. Tapped holes are provided on the underside of the pumps. These holes can be used for fitting the pump to a base plate or bracket by means of hexagon screws. The pump housing is provided with a receptacle stainless steel/Teflon neck ring. The ring reduces to a minimum amount of liquid running from the discharge side of the impeller to the suction side.
 - .3 Impeller:
 - .1 The impeller is made of stainless steel, AISI 304 SS.
 - .4 Motors: High efficiency to Section 23 05 13 - Motors, Drives and Guards for Mechanical Systems.
 - .5 Design maximum pressure: 860 kPa (125 psi).
 - .6 Design maximum temperature: 110°C (230°F).
 - .7 Capacity: as per drawing schedule.
 - .8 Acceptable material: Wilo, ITT Bell & Gossett, Armstrong Astro, Grundfos, Plad ,Flo Fab.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 In line circulators: install as indicated by flow arrows. Support at inlet and outlet flanges or unions. Install with bearing lubrication points accessible. Install motor in orientation as recommended by manufacturer.

- .2 Base mounted type: supply templates for anchor bolt placement. Furnish anchor bolts with sleeves. Place level, shim unit and grout. Align coupling in accordance with manufacturer's recommended tolerance. Check oil level and lubricate. After run-in, tighten glands.
- .3 Ensure that pump body does not support piping or equipment. Provide stanchions or hangers for this purpose. Refer to manufacturer's installation instructions for details.
- .4 Pipe drain tapping to nearest floor drain c/w full port ball valve.
- .5 Install volute venting pet cock in accessible location.
- .6 Check rotation prior to start-up.
- .7 Install ball valves on pump suction & discharge tap-ins for pressure gauge.
- .8 All pumps to be installed in accordance with Hydraulic Institute Standards.
- .9 Provide flexible connectors on suction and discharge of all pumps with exception of **wet/dry rotor** circulators.
- .10 On vertical in-line pumps, where specified, replace flush line filter following commissioning & start-up.

3.2 START-UP

- .1 General
 - .1 In accordance with Section 25 01 11 - Commissioning - Mechanical Systems; supplemented as specified herein.
 - .2 In accordance with manufacturer's recommendations & Hydraulic Institute Standards.
- .2 Procedures:
 - .1 Before starting pump, check that cooling water system, over-temperature and other protective devices are installed and operative.
 - .2 After starting pump, check for proper, safe operation.
 - .3 Check installation, operation of mechanical seals. Adjust as necessary.
 - .4 Check base for free-floating, no obstructions under base.
 - .5 Run-in pumps for 12 continuous hours.
 - .6 Verify operation of over-temperature and other protective devices under low- and no-flow condition.
 - .7 Eliminate air from scroll casing.
 - .8 Adjust water flow rate through water-cooled bearings.
 - .9 Adjust flow rate from pump shaft stuffing boxes to manufacturer's recommendation.
 - .10 Adjust alignment of piping and conduit to ensure true flexibility at all times.
 - .11 Eliminate cavitation, flashing and air entrainment.
 - .12 Adjust pump shaft seals, stuffing boxes, glands.
 - .13 Measure pressure drop across strainer when clean and with flow rates as finally set.

- .14 Replace seals if pump used to degrease system or if pump used for temporary heat.
- .15 Verify lubricating oil levels.
- .16 Remove end suction diffuser start-up strainers after one week of pump operation.

3.3 PERFORMANCE VERIFICATION (PV)

- .1 General
 - .1 In accordance with manufacturer's recommendations.
- .2 Exclusions:
 - .1 Performance verification does not apply to small in-line circulators.
- .3 Assumptions: These PV procedures assume that:
 - .1 Manufacturer's performance curves are accurate.
 - .2 Valves on pump suction and discharge provide tight shut-off.
- .4 Net Positive Suction Head (NPSH):
 - .1 Application: Measure NPSH for pumps which operate on open systems and with water at elevated temperatures.
 - .2 Measure using procedures prescribed in the Standard.
 - .3 Where procedures do not exist, discontinue PV, report to Engineer and await instructions.
- .5 Multiple Pump Installations - Series and Parallel:
 - .1 Repeat PV procedures specified above for pump performance and pump BHP for combinations of pump operations.
- .6 Mark points of design and actual performance at design conditions as finally set upon completion of TAB.
- .7 Commissioning Reports: In accordance with Section 25 01 11 - Commissioning - Mechanical Systems, supplemented as specified herein. Reports to include:
 - .1 Record of point(s) of actual performance at maximum and minimum conditions and for single and parallel operation as finally set at completion of commissioning on pump curves.
 - .2 Report forms as specified Section 25 01 11 - Commissioning - Mechanical Systems.
 - .3 Pump performance curves (family of curves).

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.

1.3 CLOSEOUT SUBMITTALS

- .1 Submit operation and maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.
- .2 Include following:
 - .1 Log sheets as required by manufacturer.

PART 2 PRODUCTS

2.1 MANUFACTURER

- .1 Equipment, chemicals & service by one supplier:
 - .1 Ashland Canada Corp.
 - .2 Magnus.
 - .3 Klenzoid.
 - .4 Water Management Consultant (WMC).

2.2 CONDUCTIVITY PROBES

- .1 Dual carbon elements in PVC holder, quick disconnect, self-locking connection.

2.3 WATER TREATMENT FOR CLOSED HYDRONIC SYSTEMS

- .1 Application: Hot water heating system and chilled water system: **pot feeder and micron filter across system pumps.**

- .2 Micron filter:
 - .1 Capacity 5% of pump recirculating rate at operating pressure.
 - .2 Six (6) sets of filter cartridges for each type, size of micron filter.
 - .3 Betz Dearborn LMO, or approved equal
- .3 Pot Feeder:
 - .1 Welded steel, pressure rating of 1200 kPa, and temperature rating of 90°C.
 - .2 Size: 20 L.

2.4 CHEMICALS

- .1 Chilled water, heating water: CorrShield OR4407, **unless otherwise approved by NRC.**
- .2 Provide 1 year supply.

2.5 TEST EQUIPMENT

- .1 Provide one set of test equipment for each system to verify performance.
- .2 Complete with carrying case, reagents for chemicals, all specialized or supplementary equipment.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install HVAC water treatment systems in accordance with ASME Boiler Code Section VII, and requirements and standards of authorities having jurisdiction, except where specified otherwise.
- .2 Ensure adequate clearances to permit performance of servicing and maintenance of equipment.

3.2 CHEMICAL FEED PIPING

- .1 Install crosses at all changes in direction. Install plugs in all unused connections.

3.3 CLEANING OF MECHANICAL SYSTEM

- .1 Provide copy of recommended cleaning procedures and chemicals for approval by Engineer.
- .2 Thoroughly flush all mechanical systems and equipment with approved cleaning chemicals designed to remove deposition from construction such as pipe dope, oils, loose mill scale and other

extraneous materials. Chemicals to inhibit corrosion of various system materials and be safe to handle and use.

- .3 During circulation of cleaning solution, periodically examine and clean filters and screens and monitor changes in pressure drop across equipment.
- .4 Drain and flush systems until alkalinity of rinse water is equal to make-up water. Refill with clean water treated to prevent scale and corrosion during system operation.
- .5 Disposal of cleaning solutions to be approved by authority having jurisdiction.

3.4 START-UP

- .1 Start up water treatment systems in accordance with manufacturer's instructions.
- .2 Coordinate start-up within schedule for all mechanical systems.

3.5 COMMISSIONING

- .1 Timing:
 - .1 After start-up deficiencies rectified.
 - .2 After start-up and before TAB of connected systems.
- .2 Pre-commissioning Inspections:
 - .1 Verify:
 - .1 Presence of test equipment, reagents, chemicals, details of specific tests to be performed, operating instructions.
 - .2 Suitability of log book.
 - .3 Currency and accuracy of initial water analysis.
 - .4 Required quality of treated water.
- .3 Commissioning procedures - applicable to all Water Treatment Systems:
 - .1 Establish, adjust as necessary and record all automatic controls and chemical feed rates.
 - .2 Monitor performance continuously during commissioning of all connected and systems until acceptance of project.
 - .3 Establish test intervals, regeneration intervals.
 - .4 Record on approved report forms all commissioning procedures, test procedures, dates, times, quantities of chemicals added, raw water analysis, treated water analysis, test results, instrument readings, adjustments made, results obtained.
 - .5 Establish, monitor and adjust automatic controls and chemical feed rates as necessary.
 - .6 Visit project at specified intervals after commissioning is satisfactorily completed to verify that performance remains as set during commissioning (more often as required until system stabilizes at required level of performance).
 - .7 Advise Engineer in writing on all matters regarding installed water treatment systems.

- .4 Commissioning procedures - Closed Circuit Hydronic Systems:
 - .1 Analyse water in system.
 - .2 Based upon an assumed rate of loss approved by Engineer, establish rate of chemical feed.
 - .3 Record types, quantities of chemicals applied.
- .5 Training:
 - .1 Commission systems, perform tests in presence of, and using assistance of, assigned O&M personnel.
- .6 Certificates:
 - .1 Upon completion, furnish certificates confirming satisfactory installation and performance.
- .7 Commissioning Reports:
 - .1 To include system schematics, test results, test certificates, raw and treated water analyses, design criteria, all other data required by Engineer.
- .8 Demonstrations: Co-ordinate as part of schedule for all mechanical systems.
- .9 Commissioning activities during Warranty Period:
 - .1 Check out water treatment systems on regular basis and submit written report to Engineer.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate following:
 - .1 Sealants
 - .2 Tape
 - .3 Proprietary Joints

1.4 CERTIFICATION OF RATINGS

- .1 Catalogue or published ratings shall be those obtained from tests carried out by manufacturer or independent testing agency signifying adherence to codes and standards.

PART 2 PRODUCTS

2.1 SEAL CLASSIFICATION

- .1 Classification as follows:

Maximum System Total Pressure Pa	SMACNA Seal Class
500	A
250	A
125	A

- .2 Seal classification:
 - .1 Class A: longitudinal seams, transverse joints, duct wall penetrations and connections made airtight with sealant.
- .3 Application:
 - .1 All new & existing supply ductwork.
 - .2 All new return & exhaust ductwork.

2.2 SEALANT

- .1 Sealant: oil resistant, polymer type flame resistant duct sealant. Temperature range of minus 22°F to plus 200°F.
 - .1 Acceptable material: Duro Dyne S-2.

2.3 DUCT LEAKAGE

- .1 In accordance with SMACNA 016.

2.4 FITTINGS

- .1 Fabrication: to SMACNA.

- .2 Radiused elbows:
 - .1 Rectangular: standard radius: 1.5 times width of duct.
 - .2 Round: 1.5 times diameter.
- .3 Mitred elbows, rectangular:
 - .1 To 400 mm (16"): with single thickness turning vanes.
 - .2 Over 400 mm (16"): with double thickness turning vanes.
- .4 Branches:
 - .1 Rectangular main and branch: with 45° entry on branch.
 - .2 Round main and branch: enter main duct at 45° with conical connection.
 - .3 Provide volume control damper in branch duct near connection to main duct.
- .5 Transitions:
 - .1 Diverging: 20° maximum included angle.
 - .2 Converging: 30° maximum included angle.
- .6 Offsets:
 - .1 Full radiused elbows.
- .7 Obstruction deflectors: maintain full cross-sectional area. Maximum included angles: as for transitions.

2.5 FIRESTOPPING

- .1 Retaining angles all around duct, on both sides of fire separation.
- .2 Firestopping material and installation must not distort duct.

2.6 GALVANIZED STEEL

- .1 Lock forming quality: to ASTM A924/A924M, Z90 zinc coating.
- .2 Thickness, fabrication and reinforcement: to SMACNA.
- .3 Joints: to SMACNA.

2.7 ESCUTCHEON ANGLES

- .1 40 mm x 40 mm angle iron frame on both sides of exposed rectangular or round ducts, on both sides of non-rated partitions. Escutcheon angles material & gauge shall be equal to base material.

2.8 KITCHEN EXHAUST DUCTWORK

- .1 Black steel all welded, construct in accordance with NFPA (Fire) 96.

2.9 DISHWASHER & STEAMER EXHAUST

- .1 Material: Aluminum type: 3003-H-14. Thickness, fabrication and reinforcement : to ASHRAE & SMACNA. Joints: to ASHRAE & SMACNA.

2.10 STAINLESS STEEL (FUME HOOD & AUTOCLAV EXHAUST

- .1 Material: To ASTM A480/A480M, type 316 L stainless steel sheets with longitudinal joints. Passivate and anneal stainless steel sheets before welding. For round ducts, roll sheets circular and weld flush. Provide integral 1.6 mm (1/16") flanges on abutting ends of manufactured ducts.
- .2 Continuously weld all joints using Inert Gas Metal Arc process without burning parent metal, using filler rods type ER 316 L to CSA W48.2. Grind smooth and polish all joints.
- .3 Construction:
 - .1 Construct ductwork from following thickness of stainless steel sheet.
 - .1 Rectangular ducts: 18 gauge.
 - .2 Round ducts up to 500 mm (20") diameter: 22 gauge.
 - .3 Round ducts over 500 mm (20") diameter: 20 gauge.
 - .2 Reinforce rectangular ducts with galvanized angle frames at 1,200 (48") on centres, 25 mm x 25 mm x 3 mm (1" x 1" x 1/8") up to 900 mm (36") maximum dimensions and 50 mm x 50 mm x 6 mm (2" x 2" x 4") for larger ducts.
- .4 Flexible connectors: neoprene coated glass fibre, coated both sides, minimum mass 39 oz/yd², secured to ducts and fans with 50 mm x 50 mm x 6 mm (1" x 1" x 1/8") stainless steel type 316 L flat bars and bands using type 316 L stainless steel screws or bolts at 100 mm (4") intervals.

2.11 HANGERS AND SUPPORTS

- .1 Strap hangers: of same material as duct but next sheet metal thickness heavier than duct. Maximum size duct supported by strap hanger: 500 mm (20").
- .2 Hanger configuration: to SMACNA.

- .3 Hangers: black steel angle with black steel rods to SMACNA and following table:

Duct Size (in.)	Angle Size (in.)	Rod Size (in.)
up to 30	1 x 1 x 1/8	1/4
31 to 42	1½ x 1½ x 1/8	1/4
43 to 60	1½ x 1½ x 1/8	2/5
61 to 84	2 x 2 x 1/8	2/5
85 to 96	2 x 2 x 1/5	2/5
97 and over	2 x 2 x 1/4	2/5

- .4 Upper hanger attachments:
- .1 For concrete: manufactured concrete inserts.
 - .2 For steel joist: manufactured joist clamp or steel plate washer.
 - .3 For steel beams: manufactured beam clamps.

PART 3 EXECUTION

3.1 GENERAL

- .1 Do work in accordance with NFPA (Fire) 90A, NFPA (Fire) 90B, CSA B228.1 and SMACNA.
- .2 Do not break continuity of insulation vapour barrier with hangers or rods. Insulate strap hangers 100 mm (4") beyond insulated duct.
- .3 Support risers in accordance with ASHRAE and SMACNA.
- .4 Install breakaway joints in ductwork on each side of fire separation.
- .5 Install proprietary manufactured flanged duct joints in accordance with manufacturer's instructions.
- .6 Manufacture duct in lengths to accommodate installation of acoustic duct lining.
- .7 Install escutcheon sheet metal angles on both sides of exposed rectangular or round ducts on both sides of non-rated partitions. Seal void with acoustic sealant.

3.2 HANGERS

- .1 Strap hangers: install in accordance with SMACNA.
- .2 Angle hangers: complete with locking nuts and washers.

- .3 Hanger spacing: in accordance with SMACNA as follows:

Duct Size	Spacing
mm (in.)	m (ft.)
to 1500 (60)	3 (10)
1525 (61) and over	2.5 (8)

3.3 WATERTIGHT DUCT

- .1 Provide watertight duct for:
- .1 All exterior ductwork.
 - .2 Fresh air intake/exhaust plenums.
 - .3 Minimum 3000 mm from duct mounted humidifier in all directions.
- .2 All joints to be fully welded and pressure tested to 8" wc, on exterior ductwork from desiccant dehumidifier.
- .3 Fit base of riser with 150 mm deep drain sump and 32 mm drain connected, with deep seal trap and valve and discharging to open funnel drain.

3.4 SEALING

- .1 Apply sealant to outside of joint to manufacturer's recommendations.

3.5 LEAKAGE TESTS

- .1 In accordance with SMACNA 016 & mandatory pressure test on exterior ductwork from desiccant dehumidifier.
- .2 Do leakage tests for supply duct; maximum leakage rate 1% at 1½ times operating static pressure.
- .3 Make trial leakage tests as instructed to demonstrate workmanship.
- .4 Install no additional ductwork until trial test has been passed.
- .5 Test section minimum of 100 ft. long with not less than 3 branch takeoffs and two 90° elbows.
- .6 Complete test before insulation or concealment.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 Canadian Standards Association (CSA)
 - .1 CSA B228.1-1968, Pipes, Ducts and Fittings for Residential Type Air Conditioning.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate the following:
 - .1 Flexible connections.
 - .2 Duct access doors.
 - .3 Instrument test ports.

1.4 CERTIFICATION OF RATINGS

- .1 Catalogue or published ratings shall be those obtained from tests carried out by manufacturer or independent testing agency signifying adherence to codes and standards.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Manufacture in accordance with CSA B228.1.

2.2 FLEXIBLE CONNECTIONS

- .1 Frame: galvanized sheet metal frame 0.6 mm thick with fabric clenched by means of double locked seams.

- .2 Material:
 - .1 Fire resistant, self extinguishing, neoprene coated glass fabric, temperature rated at minus 40°C to plus 90°C, density of 1.3 kg/m².

2.3 ACCESS DOORS IN DUCTS

- .1 Non-insulated ducts: sandwich construction of same material as duct, one sheet metal thickness heavier, minimum 0.6 mm thick complete with sheet metal angle frame.
- .2 Insulated ducts: sandwich construction of same material as duct, one sheet metal thickness heavier, minimum 0.6 mm thick complete with sheet metal angle frame and 25 mm thick rigid glass fibre insulation.
- .3 Gaskets: neoprene.
- .4 Hardware:
 - .1 Up to 300 x 300 mm: 2 sash locks complete with safety chain.
 - .2 301 to 450 mm: 4 sash locks complete with safety chain.
 - .3 451 to 1000 mm: piano hinge and minimum 2 sash locks.
 - .4 Doors over 1000 mm: piano hinge and 2 handles operable from both sides.
 - .5 Hold open devices.

2.4 INSTRUMENT TEST PORTS

- .1 1.6 mm thick steel zinc plated after manufacture.
- .2 Cam lock handles with neoprene expansion plug and handle chain.
- .3 28 mm minimum inside diameter. Length to suit insulation thickness.
- .4 Neoprene mounting gasket.
- .5 Acceptable material: Duro Dyne IP1 or IP2.

2.5 SPIN-IN COLLARS

- .1 Conical galvanized sheet metal spin-in collars with lockable butterfly damper.
- .2 Sheet metal thickness to co-responding round duct standards.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Flexible connections:
 - .1 Install in following locations:
 - .1 Inlets and outlets to supply air units and fans.
 - .2 Inlets and outlets of exhaust and return air fans.
 - .3 Penetrations of all acoustic chambers.
 - .2 Length of connection: 100 mm.
 - .3 Minimum distance between metal parts when system in operation: 75 mm.
 - .4 Install in accordance with recommendations of SMACNA.
 - .5 When fan is running:
 - .1 Ducting on each side of flexible connection to be in alignment.
 - .2 Ensure slack material in flexible connection.
- .2 Access doors and viewing panels:
 - .1 Size:
 - .1 450 x 450 mm for person size entry.
 - .2 450 x 450 mm for servicing entry.
 - .3 300 x 300 mm for viewing.
 - .4 As indicated.
 - .2 Location:
 - .1 At fire and smoke dampers.
 - .2 At control dampers.
 - .3 At devices requiring maintenance.
 - .4 At locations required by code.
 - .5 At reheat coils.
 - .6 Elsewhere as indicated.
- .3 Instrument test ports.
 - .1 General:
 - .1 Install in accordance with recommendations of SMACNA and in accordance with manufacturer's instructions.
 - .2 Locate to permit easy manipulation of instruments.
 - .3 Install insulation port extensions as required.
 - .4 Locations.
 - .1 For traverse readings:
 - .1 At ducted inlets to roof and wall exhausters.
 - .2 At inlets and outlets of other fan systems.
 - .3 At main and sub-main ducts.
 - .4 And as indicated.
 - .2 For temperature readings:
 - .1 At outside air intakes.
 - .2 In mixed air applications in locations as approved by Engineer.
 - .3 At inlet and outlet of coils.

- .4 Downstream of junctions of two converging air streams of different temperatures.
- .5 And as indicated.

PART 2 PRODUCTS

2.1 GENERAL

- .1 Manufacture to SMACNA standards.

2.2 SINGLE BLADE DAMPERS

- .1 Of same material as duct, but one sheet metal thickness heavier. V-groove stiffened.
- .2 Size and configuration to recommendations of SMACNA, except maximum height 100 mm (4").
- .3 For rectangular ducts adjustable lever with shaft extension to accommodate insulation thickness.
- .4 For round branch ducts adjustable lever with shaft extension to accommodate insulation thickness.
- .5 Inside and outside nylon end bearings.
- .6 Channel frame of same material as adjacent duct, complete with angle stop.

2.3 MULTI-BLADED DAMPERS

- .1 Factory manufactured of material compatible with duct.

- .2 Opposed blade: configuration, metal thickness and construction to recommendations of SMACNA.
- .3 Maximum blade height: 100 mm (4").
- .4 Bearings: self-lubricating nylon.
- .5 Linkage: shaft extension with locking quadrant.
- .6 Channel frame of same material as adjacent duct, complete with angle stop.
- .7 Maximum leakage: 0.07% at 750 Pa.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install where indicated.
- .2 Install in accordance with recommendations of SMACNA and in accordance with manufacturer's instructions.
- .3 For supply, return and exhaust systems, locate balancing dampers in each branch duct.
- .4 Runouts to registers and diffusers: install single blade damper located as close as possible to main ducts.
- .5 All dampers to be vibration free.
- .6 Ensure damper operators are observable and accessible.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate the following:
 - .1 Performance data.

1.3 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

1.4 CERTIFICATION OF RATINGS

- .1 Catalogue or published ratings shall be those obtained from tests carried out by manufacturer or those ordered by him from independent testing agency.

PART 2 PRODUCTS

2.1 ACCEPTABLE MANUFACTURER

- .1 Tamco.
- .2 Nailor.
- .3 Ruskin.
- .4 Ventex/Alumavent.
- .5 Greenheck.
- .6 E.H. Price.

2.2 MULTI-LEAF DAMPERS

- .1 Opposed or Parallel blade type as indicated.
- .2 Extruded aluminum, interlocking blades, complete with extruded vinyl seals, spring stainless steel side seals, extruded aluminum frame.
- .3 Pressure fit self-lubricated bronze bearings.
- .4 Linkage: plated steel tie rods, brass pivots and plated steel brackets, complete with plated steel control rod.
- .5 Control Damper Operators:
 - .1 Electronic:
 - .1 Push-pull proportional type as indicated.
 - .2 Spring return for "fail-safe" in Normally Open or Normally Closed position as indicated.
 - .3 Operator: size so as to control dampers against maximum pressure or dynamic closing pressure (whichever is greater).
 - .4 Power requirements: as required for application.
 - .5 Operating range: 0 - 20 V DC.
 - .6 Acceptable material: Belimo.
 - .6 Performance:
 - .1 Leakage Class: 1A.
 - .2 Pressure drop: at full open position to be less than 4 Pa differential across damper at 5 m/s.
- .7 Insulated aluminum dampers:
 - .1 Frames: insulated with extruded polystyrene foam with R factor of 2.3.
 - .2 Blades: constructed from aluminum extrusions with internal hollows insulated with polyurethane or polystyrene foam, R factor of 2.3.
- .8 Acceptable material:
 - .1 Exhaust & Intake: Tamco 9000, Ventex, Ruskin.
 - .2 Return: Tamco 1000, Ventex, Ruskin.

2.3 BACK DRAFT DAMPERS

- .1 Automatic gravity operated, multi leaf, aluminum construction with nylon bearings, spring assisted or counterweighted.

2.4 RELIEF DAMPERS

- .1 Automatic multi-leaf aluminum dampers with ball bearing centre pivoted and counter-weights set to open at static pressure, as indicated.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install where indicated, and when supplied by others.
- .2 Install in accordance with recommendations of SMACNA and manufacturer's instructions.
- .3 Seal multiple damper modules with silicon sealant.
- .4 Install access door adjacent to each damper. See Section 23 33 00 - Duct Accessories.
- .5 Ensure dampers are observable and accessible.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.

PART 2 PRODUCTS

2.1 DUCT LINER

- .1 General:
 - .1 Fibrous glass or "textile" fibrous glass duct liner: air stream side faced with mat facing.
 - .2 Flame spread rating shall not exceed 25. Smoke development rating shall not exceed 50 when tested in accordance with CAN/ULC-S102.
- .2 Rigid:
 - .1 Use on flat surfaces where indicated.
 - .2 25 mm (1") thick, to CAN/CGSB-51.10, fibrous glass rigid board duct liner.
 - .3 Density: 36 kg/m³ minimum.

- .4 Thermal resistance to be minimum $0.76 \text{ m}^2 \cdot ^\circ\text{C}/\text{W}$ for 25 mm thickness when tested in accordance with ASTM C177, at 24°C mean temperature.

2.2 FASTENERS

- .1 Weld pins 2.0 mm diameter, length to suit thickness of insulation. Metal retaining clips, 32 mm square.

2.3 JOINT TAPE

- .1 Poly-Vinyl treated open weave fibreglass membrane 50 mm wide.

2.4 SEALER

- .1 Meet requirements of NFPA (Fire) 90A and NFPA (Fire) 90B.
- .2 Flame spread rating shall not exceed 25. Smoke development rating shall not exceed 50. Temperature range minus 68°C to plus 93°C .

PART 3 EXECUTION

3.1 GENERAL

- .1 Do work in accordance with recommendations of SMACNA duct liner standards as indicated in SMACNA HVAC Duct Construction Standards, Metal and Flexible, except as specified otherwise.
- .2 Line inside of ducts where indicated.
- .3 Duct dimensions, as indicated, are clear inside duct lining.

3.2 DUCT LINER

- .1 Install in accordance with manufacturer's recommendations, and as follows:
 - .1 Fasten to interior sheet metal surface with 100% coverage of adhesive.
 - .2 In addition to adhesive, install weld pins not less than 2 rows per surface and not more than 425 mm on centres.

3.3 JOINTS

- .1 Seal all butt joints, exposed edges, weld pin and clip penetrations and all damaged areas of liner with joint tape and sealer. Install joint tape in accordance with manufacturer's recommendations, and as follows:
 - .1 Bed tape in sealer.
 - .2 Apply 2 coats of sealer over tape.
- .2 Replace badly damaged areas of liner at discretion of Engineer.
- .3 Protect leading and trailing edges of each duct section with sheet metal nosing having 25 mm overlap and fastened to duct.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Provide:
 - .1 Fan performance curves showing point of operation, kW (BHP) and efficiency.
 - .2 Sound rating data at point of operation.

1.4 OPERATION AND MAINTENANCE DATA

- .1 Provide operation and maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.

- .2 Furnish list of individual manufacturer's recommended spare parts for equipment such as bearings and seals, and addresses of suppliers, together with list of specialized tools necessary for adjusting, repairing or replacing, for placement into operating manual.

1.5 MAINTENANCE MATERIALS

- .1 Provide maintenance materials in accordance with Section 20 05 01 - Mechanical General Requirements.

1.6 CERTIFICATION OF RATINGS

- .1 Catalogued or published ratings shall be those obtained from tests carried out by manufacturer or those ordered from independent testing agency signifying adherence to codes and standards in force.
- .2 Provide confirmation of testing.

PART 2 PRODUCTS

2.1 FANS GENERAL

- .1 Capacity: flow rate, total static pressure, bhp, efficiency, revolutions per minute, power, model, size, sound power data and as indicated on schedule.
- .2 Statically and dynamically balanced. Constructed in conformity with AMCA 99.
- .3 Sound ratings: comply with AMCA 301, tested to AMCA 300. Unit shall bear AMCA certified sound rating seal.
- .4 Performance ratings: based on tests performed in accordance with AMCA 210, and ASHRAE 51, unit to bear AMCA certified rating seal.
- .5 Performance ratings: based on tests performed in accordance with AMCA 210, and ASHRAE 51. Unit shall bear AMCA certified rating seal, except for propeller fans smaller than 300 mm diameter.
- .6 Bearings: sealed lifetime oilite ball bearings heavy duty grease lubricated ball or roller bearings of self aligning type with oil retaining, dust excluding seals and a certified minimum rated life of 200,000 h in accordance with ABMA L50 life standard. Bearings to be rated and selected in accordance with ABMA 9 and ABMA 11.

- .7 Motors:
 - .1 In accordance with Section 23 05 13 - Motors, Drives and Guards supplemented as specified herein.
 - .2 For use with variable speed controllers where applicable.
 - .3 Sizes as indicated.
 - .4 Two speed with two windings and speeds where applicable.
 - .5 Two speed with split winding, where applicable.
- .8 Accessories and hardware: matched sets of V-belt drives, adjustable slide rail motor bases, belt guards, coupling guards fan inlet and/or outlet safety screens as indicated and as specified in Section 23 05 13 - Motors, Drives and Guards.
- .9 Factory primed before assembly in colour standard to manufacturer.
- .10 Scroll casing drains: as indicated.
- .11 Bearing lubrication systems plus extension lubrication tubes where bearings are not easily accessible.
- .12 Flexible connections: to Section 23 33 00 - Duct Accessories.

2.2 IN-LINE CABINET EXHAUST

- .1 Fan housing construction of corrosion resistant galvanized steel c/w sound absorbing lined insulation.
- .2 Removable bottom housing panel allows easy access to the power assembly for inspection or service.
- .3 Outlet duct connection with integral backdraft damper can be converted from horizontal to vertical discharge.
- .4 Fan scroll is constructed of galvanized steel.
- .5 Fan wheels are double width forward curved centrifugal type. All wheels are dynamically balanced for vibration free operation.
- .6 Motors 115/60/1. All motors are sized to match fan loads, have thermal overload protection and are mounted on vibration isolators. Power assemblies can be easily unplugged and removed for inspection or service.
- .7 Angle mounting brackets can be adjusted to any typical ceiling material thickness.
- .8 Acceptable material: PennBarry, Greenheck, Loren Cook, Twin City, Soler & Palau.

2.3 CEILING HUNG PROPELLER FANS

- .1 38CAF01 High performance, 1500 mm (60"), reversible motor, industrial, ceiling mounted propeller fan & 900 mm down rod. Performance: 21,700 L/s at 992 RPM, 120 V/1Ø/ 60 Hz, 97 Watts.
- .2 Provide speed controller suitable for controlling three (3) fans with one (1) controller. Turn over to Division 26 for installation and wiring where indicated. Canarm FRMC5.
- .3 Acceptable material: Canarm Model CP60HPWP or approved equal.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with manufacturer's instructions.
- .2 Fans shall be supported with spring isolation minimum 1.5" deflection.

3.2 ANCHOR BOLTS AND TEMPLATES

- .1 Size anchor bolts to withstand seismic acceleration and velocity forces as specified in Section 20 05 49.01 - Seismic Restraint System.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate the following:
 - .1 Capacity.
 - .2 Throw and terminal velocity.
 - .3 Noise criteria.
 - .4 Pressure drop.
 - .5 Neck velocity.

1.3 MAINTENANCE MATERIALS

- .1 Provide maintenance materials in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Include:
 - .1 Keys for volume control adjustment.
 - .2 Keys for air flow pattern adjustment.

1.4 MANUFACTURED ITEMS

- .1 Grilles, registers and diffusers of same generic type to be product of one manufacturer.

1.5 CERTIFICATION OF RATINGS

- .1 Catalogued or published ratings shall be those obtained from tests carried out by manufacturer or those ordered by him from independent testing agency signifying adherence to codes and standards.

PART 2 PRODUCTS

2.1 GENERAL

- .1 To meet capacity, pressure drop, terminal velocity, throw, noise level, neck velocity as indicated.
- .2 Frames:
 - .1 Full perimeter gaskets.
 - .2 Plaster frames where set into plaster or gypsum board and as specified.
 - .3 Concealed fasteners.
- .3 Concealed operators.
- .4 Acceptable material: E.H Price Ltd., Nailor, Titus, Krueger, Metal-aire or approved equal.

2.2 SUPPLY DIFFUSERS

- .1 Type SG1: high capacity drum louvres composed heavy gauge aluminum adjustable inner drum section and a outer frame, manually adjustable without the use of tools allowing the discharge jet to be directed a full 70 degrees, constructed using a felt gasket seal providing smooth adjustment without leakage, outer frame to be c/w closed cell neoprene gasket to prevent leakage between the outlet and mounting surface, integral damper, c/w adjustment knob constructed from aluminum, spiral duct frame. Finish shall be clear anodized finish. Equivalent to E.H. Price AHCD2.

2.3 RETURN AND EXHAUST GRILLES AND REGISTER

- .1 Type RG1: aluminum construction, 45° deflection, fixed louvres, 20 mm ($\frac{3}{4}$ ") spacing, off-white baked enamel finish. Size as indicated. Equivalent to E.H. Price Model 630.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install in accordance with manufacturers instructions.
- .2 Install with flat head cadmium plated screws in countersunk holes where fastenings are visible.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate the following: schedule of sizes indicating free area, airflow and pressure drops, finish, curb & construction.

1.4 CERTIFICATION OF RATINGS

- .1 Catalogued or published ratings shall be those obtained from tests carried out by manufacturer or those ordered by him from independent testing agency signifying adherence to codes and standards.

1.5 TEST REPORTS

- .1 Submit certified data from independent laboratory substantiating acoustic and aerodynamic performance to ASTM E90.

PART 2 PRODUCTS

2.1 STATIONARY LOUVRES (L)

- .1 Construction: welded with exposed joints ground flush and smooth.
- .2 Material: extruded aluminum alloy 6063-T5.
- .3 Blade: stormproof pattern with centre watershed in blade, reinforcing bosses and maximum blade length of 1500 mm for all louvres.
- .4 Frame, head, sill and jamb: 100 mm (4") deep. One piece extruded aluminum, minimum 3 mm thick with approved caulking slot, integral to unit.
- .5 Mullions: at 1500 mm maximum centres.
- .6 Fastenings: stainless steel SAE-194-8F with SAE-194-SFB nuts and resilient neoprene washers between aluminum and head of bolt, or between nut, ss washer and aluminum body.
- .7 Screen: 19 mm mesh, 2 mm diam wire aluminum birdscreen on inside face of louvres in formed U-frame.
- .8 Finish:
 - .1 Finish exposed surfaces of exterior aluminum components with factory applied polyvinylidene fluoride (PVF2) coating meeting performance requirements of AAMA 2605, dry film thickness of 0.025 mm.
 - .1 Colours to match PPG Duranar colour as approved by Architect.
 - .2 Gloss: Medium.
 - .3 Appearance: visibly free of flow.
- .9 Performance: as per drawing schedule.
- .10 Acceptable Materials: Reversomatic.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 In accordance with manufacturers and SMACNA recommendations.
- .2 Reinforce and brace air vents, intakes and to withstand local wind speeds as indicated.
- .3 Anchor securely into opening.

- .4 Seal with caulking around to ensure weather tight

PART 2 PRODUCTS

2.1 GENERAL

- .1 Packaged Modulating Condensing Boiler:
 - .1 Complete with burner and necessary accessories and controls.
 - .2 Factory tested at rated capacity to, and bearing seal or nameplate certifying compliance with, CSA 3.1, witnessed and certified by Departmental Representative.
 - .3 Ready for attachment to piping, electrical power, controls, flue gases exhaust.
 - .4 Designed and constructed to ASME Boiler and Pressure vessel Code.
 - .5 CRN (Canadian Registration Number), to CSA B51.
 - .6 Boiler/burner package to bear CSA label.
- .2 Performance:
 - .1 In accordance with or CSA 4.9/ANSI Z21.13 testing procedures.
 - .2 Capacity: Refer to schedule on drawings.
 - .3 Gas pressure at meter outlet: 1743 Pa (7" wc).
 - .4 Flue gas temperature leaving boiler:
 - .1 Not to exceed 260°C.
- .3 Electrical:
 - .1 Power: 120 V, 1 phase, 60 Hz.
- .4 Controls: 24 V, 1 phase, 60 Hz.
 - .1 Electrical components: CSA approved.
- .5 Controls: factory wired. Enclosed in Electrical and Electronic Manufacturers' Association of Canada (EEMAC) steel cabinet.
- .6 Thermal insulation:
 - .1 25 mm thick mineral fibre. Seal insulation at all handholes, piping connections with insulating cement or asphaltic paint. Finish with heat resisting paint.
- .7 Jackets: heavy gauge metal, finished with heat resisting paint.
- .8 Mounting:
 - .1 Structural steel base.
- .9 Anchor bolts and templates:
 - .1 Supply for installation by other Divisions.
- .10 Start-up, instruction, on-site performance tests: 1 day.
- .11 Trial usage:
 - .1 Engineer may use boilers for test purposes prior to acceptance and commencement of warranty period.
 - .2 Supply labour, materials and instruments required for tests.

- .12 Temporary use by contractor:
 - .1 Contractor may use boilers only after written approval from Departmental Representative.
 - .2 Monitor and record performance continuously. Keep log of maintenance activities carried out.
 - .3 Refurbish to as-new condition before final inspection and acceptance.

2.2 BOILER

- .1 The boiler shall have a modulating input rating as per schedule on drawing and shall be operated on (Natural Gas). The boiler shall be capable of full modulation firing down to 10% of rated input with a turndown ratio of 10:1.
- .2 The boiler shall be designed with a vertical combustion chamber and a down firing burner to allow free gravity drainage of condensate from the heat exchanger. Its heat exchanger is to be manufactured with 439 stainless steel. Heat exchanger performance shall be maximized through a multi-tube, counter-flow fire-tube design.
- .3 The boiler shall be constructed in accord with CSA 4.9-2014/ANSI Z21.13 and the ASME Boiler and Pressure Vessel Code, Section IV and bear the H stamp as per ASME code. The boiler shall carry a CRN# for the Province of installation.
- .4 The boiler enclosure panel shall be of stainless steel with black powder coat base. Enclosure panels shall be designed for installation after all piping, insulation, and venting has been completed, provided all recommended clearances are respected.
- .5 The burner shall be of metal fiber knit burner c/w direct spark ignition, brushless dc fan, and fully referenced zero governor 24V gas valve.
- .6 The boiler control shall be built in complete with full outdoor reset, multiple load control with relays for five pumps, variable speed signal for system pump or air handler, clear constantly bright LCD display providing plain English information, and USB port for software upgrades. Altitude compensation shall be automatic, for maintenance of operation to 12,000 ft. The boiler shall offer internal multiple boiler staging and rotation control, for management of up to 24 boilers.
- .7 The boiler control shall be able to accept an external 0-10 VDC or 4-20 mA input signal, as well as being fully capable of a BACnet interface.
- .8 The boiler shall offer venting up to 340 feet (170' each side for combustion air and exhaust) using approved 3 inch PVC, CPVC, PP or stainless steel venting material. Both sealed combustion and indoor combustion air options shall be permissible.
- .9 Required clearances as per manufactures recommendation: top 12 inches, left side 1 inch, right side 1 inch, back 0 inches, and bottom 12 inches.

2.3 AUXILIARIES

- .1 Additional standard equipment shall include the following items:
 - .1 SIM (Safety Ignition Module) Certified to CSA C22.2 No. 60730-2-5 and Conforming to UL 60730-2-5 & CSA ANSI Z21.20 providing ignition, flame proving and safety monitoring including:
 - .1 Electronic flue gas temperature sensor
 - .2 Electronic, probe-type Low Water Cut-Off
 - .3 Internal, Manual Reset Electronic High limit switch – testable and resettable on Touchscreen
 - .2 Electronic water pressure sensing, for digital display of system pressure.
 - .3 Mechanical water pressure and temperature sensing (built-in Tridicator).

2.4 DOMESTIC HOT WATER STORAGE TANK (INDIRECT)

- .1 Airlock resistant wall coils.
- .2 Welded stainless steel dip tube.
- .3 2" of insulation for low standby heat loss.
- .4 Non-corrosive thermoplastic jacket.
- .5 10K Ω temperature sensor supplied with indirect water heaters for use with condensing boilers.
- .6 Brass ball valve style drain and T+P.
- .7 Conforms to UL 174, Certified to CAN/CSA C22.2 No. 110.

PART 3 EXECUTION

3.1 MANUFACTURER'S INSTRUCTIONS

- .1 Compliance: comply with manufacturer's written recommendations or specifications, including product technical bulletins, handling, storage and installation instructions, and datasheet.

3.2 INSTALLATION

- .1 Install in accordance with ASME Boiler and Pressure Vessels Code Section IV, regulations of Province having jurisdiction, except where specified otherwise, and manufacturers recommendations.
- .2 Make required piping connections to inlets and outlets recommended by boiler manufacturer.
- .3 Maintain clearances as indicated or if not indicated, as recommended by manufacturer for operation, servicing and maintenance without disruption of operation of any other equipment/system.
- .4 Mount unit level.
- .5 Pipe hot water relief valves full size to drain.
- .6 Natural gas fired installations - in accordance with CAN/CSA-B149.1.

3.3 MOUNTINGS AND ACCESSORIES

- .1 Safety valves and relief valves:
 - .1 Run separate discharge from each valve.
 - .2 Terminate discharge pipe as indicated.

3.4 FIELD QUALITY CONTROL

- .1 Commissioning:
 - .1 Manufacturer to:
 - .1 Certify installation.
 - .2 Start up and commission installation.
 - .3 Carry out on-site performance verification tests.
 - .4 Demonstrate operation and maintenance.
 - .2 Provide Departmental Representative at least 48 hours notice prior to inspections, tests, and demonstrations. Submit written report of inspections and test results.

END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.3 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate:
 - .1 Equipment, piping, and connections, together with valves, strainers, control assemblies, thermostatic controls, auxiliaries and hardware, and recommended ancillaries which are mounted, wired and piped ready for final connection to building system, its size and recommended bypass connections.
 - .2 Piping, valves, fitting shipped loose showing final location in assembly.
 - .3 Control equipment shipped loose, showing final location in assembly.
 - .4 Dimensions, internal and external construction details, recommended method of installation with proposed structural steel support, mounting curb details, sizes and location of mounting bolt holes; include mass distribution drawings showing point loads.
 - .5 Detailed composite wiring diagrams for control systems showing factory installed wiring and equipment on packaged equipment or required for controlling devices or ancillaries, accessories, controllers.
 - .6 Fan performance curves.
 - .7 Details of seismic vibration isolation.
 - .8 Estimate of sound levels to be expected across each individual octave band in dB referred to A rating.

- .9 Type of refrigerant used.

1.4 CLOSEOUT SUBMITTALS

- .1 Provide maintenance data for incorporation into manual specified in Section 20 05 01 - Mechanical General Requirements.
- .2 Indicate:
- .1 Brief description of unit, indexed, with details of function, operation, control, and service for each component.
- .3 Manufacturer's installation instructions shall govern and unless otherwise noted, operation, maintenance and service of items. Include names and addresses of spare part suppliers.
- .4 Include following:
- .1 Provide for each unit, manufacturer's name, type, year, number of units, and capacity.

1.5 WARRANTY

- .1 For refrigeration compressors, the 12 months warranty period prescribed in subsection GC32.1 of General Conditions "C" is extended to 24 months.

PART 2 PRODUCTS

2.1 GENERAL DESCRIPTION

- .1 Unit(s) furnished and installed shall be combination heating/cooling packaged rooftops as specified on the contract documents and within these specifications. Cooling capacity ratings shall be based upon ARI 340/360. Unit(s) shall consist of insulated weathertight casing with compressors, air cooled condenser coil, condenser fans, evaporator coil, filters, economizer, dampers, supply and return fan motors and drives, unit controls, natural gas heating section, and humidifier distributor section.
- .2 Unit(s) shall be factory run tested to include the operation of all fans, compressors, heat exchangers, and control sequences.
- .3 Unit shall conform to ASHRAE 90.1 and cannot exceed 265W per L/s.
- .4 Unit capacity & performance: as per mechanical schedule.
- .5 Acceptable materials: Engineered Air.

2.2 UNIT CASING

- .1 Cabinet: Double wall galvanized steel, phosphatized, and finished with an air-dry paint coating durable enough to withstand 670 consecutive-hour salt spray application in accordance with standard ASTM B117. Structural members shall be 14 gauge with access doors and removable panels of minimum 18 gauge steel. Roof panels shall be sloped to provide positive drainage of rain water/melting snow away from the cabinet.
- .2 Access Doors: Fully gasketed hinged doors with fluted knob fasteners and chained "tie-backs" to provide access to filters, heating section, return/exhaust air fan section, supply air fan section and evaporator coil section. The unit control panel section shall be compartmented to separate high and low voltage components. The control panels shall also be fully gasketed, hinged and provided with quick release latches for easy access.
- .3 Insulation: Provide 50 mm thick fibreglass insulation with internal sheet metal liners on all exterior panels except the condensing section. Sheet metal liners shall be solid except in fan sections which shall be perforated.
- .4 Cabinet Colour: Unit shall be factory painted to standard colour selected by Architect.

2.3 AIR FILTERS

- .1 Air Filters: Draw through filters shall mount integral within unit casing and be accessible via hinged access panels. Filters shall be 50 mm thick 30% efficient pleated pre-filters and 300 mm deep 85% efficient cartridge filters.

2.4 FANS - SUPPLY AND RETURN

- .1 Provide an airfoil supply and return fan with fixed-pitch sheave drive assemblies. Dynamically balance all fans and the unit's running fan assembly fan mounted on actual shaft, bearings and in scroll housing to assure smooth operation of the fan and it's associated assembly. Balancing of the fan only shall not be acceptable.
- .2 Mount fan motor(s) and fan on a common base assembly. Provide thrust restraint isolation on the fan housing/fan board to assure smooth fan startup transitioning and operation.
- .3 Fan shaft shall be mounted on grease lubricated ball bearings with extended grease lines to allow lubrication of bearings from filter housing area.
- .4 Motor shall have a standard T-frame and a minimum service factor of 1.15. All drive components shall be accessible without the use of scaffolds or ladders, to facilitate periodic maintenance checks and for operator safety.

2.5 GAS FIRED HEATING SECTION

- .1 Completely assembled and factory installed heating system integral to unit. UL or CSA approved specifically for outdoor applications for use downstream from refrigerant cooling coils. Provide capability for threaded gas piping connection through side or bottom of unit.
- .2 Heating section shall be factory tested prior to shipment.
- .3 Gas Burner: Forced draft type burner with adjustable combustion air supply, gas valve, manual shut-off, direct spark or pilot ignition, and flame sensing monitoring electrode. Provide air proving switch to prevent burner operation when burner is open for maintenance or inspection. Burner efficiency shall be a minimum of 80%.
- .4 Gas Burner Safety Controls: Provide electronic flame controls for the proving of combustion air prior to ignition sequence with prepurge cycle, and continuous electronic flame supervision.
- .5 Combustion Blower: Provide centrifugal type fan with thermal overload protection on fan motor.
- .6 Heat Exchanger: Provide factory pressure and leak tested tubular two pass heat exchanger of free floating design manufactured of 16-gauge stainless steel primary surface and 18-gauge stainless steel secondary surface.

2.6 EVAPORATOR COIL SECTION

- .1 Provide heavy duty aluminum fins mechanically bonded to seamless copper tubes. Evaporator coil shall be inter-circuited to maintain active coil face area at part load conditions. Coil shall also utilize internally enhanced tubing for maximum efficiency.
- .2 Provide a thermostatic expansion valve (TXV) for each refrigerant circuit. Factory pressure and leak test coil at 2.07 MPa.
- .3 Provide 3-way pitched drain pan to assure positive drainage of condensate from the unit casing.
- .4 Provide P-traps at each condensate outlet, sized for fan static pressure.

2.7 CONDENSER SECTION

- .1 Provide heavy duty aluminum fins mechanically bonded to seamless copper tubes. Factory leak test coil under 3.10 MPa pressure.
- .2 Provide subcooling circuit(s) integral with condense to maximize efficiency and prevent premature flashing of liquid refrigerant, to a gaseous state, ahead of the expansion valve.

- .3 Provide vertical discharge, direct drive fans with s blades, and three phase motors. Fans shall be statically and dynamically balanced. Motors shall be permanently lubricated, with built-in current and thermal overload protection in a weathertight casing.
- .4 Provide factory installed louvred steel coil guards perimeter of condensing section to protect the condenser coils, refrigerant piping and control components. Louvred panels shall be fabricated from minimum 1.01 mm thick galvanized steel and be rigid enough to provide permanent protection for shipping and pre-/post-installation. Course wire mesh is not an acceptable material for coil guards.
- .5 Condenser coils shall be V-banked for cleaning ease. Coils shall not exceed 14 fins per inch density in order to permit routine cleaning, and prevent excessive air pressure drop across the condenser coil.

2.8 REFRIGERATION SYSTEM

- .1 Compressor: Hermetic compliant 2-step unloading 3-D scroll operating rpm with vibration isolation mounting, centrifugal reversible oil pump, oil sight glass and discharge valves.
- .2 Provide with thermostatic motor winding temperature to protect against excessive motor temperatures resulting from over-/under- voltage or loss of charge. Provide high and low pressure cutouts, and reset relay. Provide factory installed compressor lockout thermostat to prevent compressor operation at low ambient conditions.
- .3 On specific units, as noted in equipment schedule, lead refrigeration circuit shall be provided with hot gas reheat coil, modulating valves, electronic controller, supply air temperature sensor and a control signal terminal which allow the unit to have a dehumidification mode of operation, which includes supply air temperature control to prevent supply air temperature swings and overcooling of the space.

2.9 MIXING BOX SECTION

- .1 Provide 100% modulating enthalpy-based economizer system fully integrated with unit outdoor air, return and exhaust air dampers. Unit operation is through primary temperature and space pressure controls that automatically modulate dampers to maintain desired space conditions.
- .2 Outdoor air and exhaust air openings shall be sized for 100% design airflow.
- .3 Equip with automatic outdoor enthalpy lockout sensor.
- .4 Provide adjustable minimum position control through BAS control system.
- .5 Provide spring return motor for outside air damper closure during unit shutdown or power interruption.
- .6 Provide airflow measuring stations integrated to economizer capable of measuring 5 to 100% of total airflow. Controller shall modulate airflow station's damper(s) to maintain minimum outside air rate with accuracy within 5%. During unoccupied periods, outside air shall be fully closed.

- .7 Section shall be complete with outdoor air intake multiple hoods c/w bird screen max. face velocity 2.54 m/s.

2.10 DAMPERS

- .1 Construction: blades, 152 mm wide, 1219 mm long, maximum. Modular maximum size, 1219 mm wide x 2438 mm high. Multiple sections to have stiffening mullions and jack shafts.
- .2 Materials:
- .1 Frame: 2.03 mm minimum thickness extruded aluminum.
 - .2 Blades: extruded aluminum with two sheets 0.5 mm thick or otherwise reinforced to ensure specified low leakage when fully closed.
 - .3 Bearings: oil impregnated sintered bronze. Provide thrust bearings for vertical blades.
 - .4 Linkage and shafts: zinc plated steel.
 - .5 Seals: blade gaskets shall be extruded EPDM secured in an integral slot within aluminum blade extrusions. Frame seals shall be extruded TFE.
- .3 Performance:
- .1 Capacity: refer to drawings.
 - .2 Maximum 2% of rated airflow allowable leakage against 1000 Pa static pressure.
 - .3 Temperature range: minus 50°C to plus 100°C.
- .4 Arrangements:
- .1 Mixing dampers to be opposed blade arrangement.
 - .2 Outdoor air dampers to be parallel blade arrangement.
- .5 Outdoor Air & Exhaust Dampers:
- .1 Frames: insulated with extruded polystyrene foam with R factor of 2.3.
 - .2 Blades: constructed from aluminum extrusions with internal hollows insulated with polyurethane or polystyrene foam, R factor of 2.3.

2.11 ROOF CURBS

- .1 Existing curb on site.
- .2 The frame must provide continuous support for the equipment and must resist wind and seismic forces.
- .3 All hardware must be plated with a rust resistant finish.
- .4 Curb waterproofing shall consist of a continuous galvanized counter flashing nailed over the curbs waterproofing.
- .5 Curbs shall have provision for 50 mm of insulation.
- .6 The rooftop unit must be solidly fastened to the curb, and the curb anchored to the roof structure.

- .7 Roof curb construction to conform to requirements of National Roofing Contractors Association (NRCA).
- .8 Provide seismic restraint calculations from P.Eng. For all equipment connections to the structure.

2.12 OPERATING CONTROLS

- .1 Provide standalone microprocessor unit mounted control.
- .2 Provide factory installed indoor evaporator defrost control to prevent compressor slugging by interrupting compressor operation.
- .3 Provide the following factory installed and wired operating controls:
 - .1 Provide a minimum three minute off timer to prevent compressor from short cycling.
- .4 Provide wall mounted 7-day programmable thermostat with touch screen digital display.

2.13 MISCELLANEOUS FEATURES

- .1 Provide unit mounted 115 volt convenience outlet.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Install as per manufacturer's instructions on roof curbs provided by manufacturer.
- .2 Manufacturer to certify installation. Provide start-up and commissioning of unit c/w manufacturer's start-up report.

- END OF SECTION

PART 1 GENERAL

1.1 RELATED SECTIONS

- .1 This section shall be read in conjunction with specification Section 20 05 01 - Mechanical General Requirements, all mechanical sections, and all other disciplines related to the project.

1.2 REFERENCES

- .1 American Society for Testing and Materials (ASTM).
 - .1 ASTM F876-17, Standard Specification for Crosslinked Polyethylene (PEX) Tubing.
 - .2 ASTM F877-18, Standard Specification for Crosslinked Polyethylene (PEX) Plastic Hot- and Cold-Water Distribution Systems.
- .2 Canadian Standards Association (CSA).
 - .1 CAN/CSA B137 Series-17, Thermoplastic pressure piping compendium.

1.3 GENERAL

- .1 Provide all labour, materials, products, equipment and services to supply and install underfloor heating systems for perimeter heating indicated on the drawings and specified in this Section of the Specification.
- .2 Manufacturer to provide heating system loop lay-out.
- .3 Acceptable materials: Wirsbo, Rehau, IPEX.

1.4 SHOP DRAWINGS

- .1 Submit shop drawings in accordance with Section 20 05 01 - Shop Drawings.
- .2 Indicate:
 - .1 Connections, piping and fittings, valves, strainers, control assemblies and ancillaries, identifying factory and field assembled.
 - .2 Wiring as assembled and schematically.
 - .3 Dimensions, construction details, recommended installation and support, mounting bolt hole sizes and locations and point loads.
 - .4 Vibration control measures.
 - .5 Manufacturers recommended clearances.

1.5 OPERATION AND MAINTENANCE DATA

- .1 Provide operation and maintenance data for incorporation into manual specified in Section 20 05 01 - Shop Drawings.
- .2 Include:
 - .1 Description of equipment giving manufacturers name, type, model year and capacity.
 - .2 Start-up and commissioning procedures.
 - .3 Details of operation, servicing and maintenance.
 - .4 Recommended spare parts list.

1.6 WARRANTY

- .1 The manufacturer shall furnish, at the completion of installation as described herein, a Certificate of Inspection signed by his authorized representative. Manufacturers 25 years piping warranty.

PART 2 PRODUCTS

2.1 SLAB FLOOR HEATING EQUIPMENT

- .1 **Radiant in floor tubing is to be designed and installed in slab c/w manifolds, pumps, three-way valve, controls (including slab temperature sensor) and cabinets to meet loads indicated on drawings. Tubing layout to be coordinated to avoid future NRC installations and to approval of NRC.**
- .2 Provide underground tubing rated for 82°C (180°F) maximum working temperature and 690 kPa (100 psi) working pressure in accordance with ASTM F876 and ASTM F877 and CAN/CSA B137.5 with an oxygen diffusion barrier. Provide tubing with 13 mm (½") inside diameter. The pipe shall be manufactured by the "Engel Method". The pipe shall have a 2 layer oxygen diffusion barrier capable of limiting oxygen diffusion through the pipe to no greater than 0.005 g/m day at 4°C (40°F).

Pipe shall have 100% thermal memory when heated to 130°C (266°F).

The minimum bend radius for cold bending of the pipe shall not be less than 8 times the outside diameter. Bends with a radius less than stated will require the use of a bend support by the pipe manufacturer.

- .3 Tubing fittings shall be manufactured of dezincification resistant brass. These fittings must be supplied by the pipe manufacturer. The pipe fitting consists of a barbed insert, a serrated compression ring, and a nut capable of connecting to the manifold.

- .4 Manifolds shall be of cast bronze construction and shall have integral loop balancing, and loop control valves. Supply and return manifolds shall be able to vent air from the system and shall be provided with support brackets. Manifolds shall be isolated from supply and return piping with valves that are suitable for isolation and balancing.
- .5 Manifold & pump cabinet c/w locking door. Reference drawing for layout. Stainless steel checker plate front.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Tubing embedded in concrete shall be secured to a welded wire fabric or approved alternate fabric (provided by others) with wire ties provided by the pipe manufacturer.
- .2 Contractor to supply field coordination and supervision of the pressure testing of the field tubing. The system shall be pressure tested at 413 kPa (60 psi) for minimum of 24 hours prior to and during the concrete application. Test equipment to be supplied by and installed by the contractor. Test shall be witnessed by Engineer.
- .3 The system shall be thoroughly checked for possible tubing punctures by the authorized supervisor and shall be repaired by the contractor prior to and during the concrete application.
- .4 Assemble to provide smooth air flow through all components. Limit air leakage to 1% of rated air flow at 2.5 kPa suction pressure.
- .5 Paint inside casing surfaces with zinc coating to CAN/CGSB-1.181, 0.075 mm minimum thickness when dry.
- .6 **Piping joints or splices are not permitted in underground services.**

END OF SECTION

1 REFERENCES

- .1 Perform all work to meet or exceed the requirements of the Canadian Electrical Code, CSA Standard C22.1 - (latest edition).
- .2 Consider CSA Electrical Bulletins in force at time of tender submission, while not identified and specified by number in this Division, to be forming part of related CSA Part II standard.
- .3 Do overhead and underground systems in accordance with CSA C22.3 except where specified otherwise.
- .4 Where requirements of this specification exceed those of above mentioned standards, this specification shall govern.
- .5 Notify the NRC Departmental Representative as soon as possible when requested to connect equipment supplied by NRC which is not CSA approved.
- .6 Refer to Sections 00 10 00 & 0015 45.

2 PERMITS AND FEES

- .1 Submit to Electrical Inspection Department and Supply Authority necessary number of drawings and specifications for examination and approval prior to commencement of work.
- .2 Pay all fees required for the performance of the work.

3 START-UP

- .1 Instruct the NRC Departmental Representative and operating personnel in the operation, care and maintenance of equipment supplied under this contract.

4 INSPECTION AND FEES

- .1 Furnish a Certificate of Acceptance from the Authorized Electrical Inspection Department on completion of work.
- .2 Request and obtain Special Inspection approval from the Authorized Electrical Inspection Department for any non-CSA approved control panels or other equipment fabricated by the contractor as part of this contract.
- .3 Pay all fees required for inspections.

5 FINISHES

- .1 Shop finish metal enclosure surfaces by removal of rust and scale, cleaning, application of rust resistant primer inside and outside, and at least two coats of finish enamel.
 - .1 Outdoor electrical equipment "equipment green" finish to EEMAC Y1-1-1955.
 - .2 Indoor switchgear and distribution enclosures light grey to EEMAC 2Y-1-1958.

- .2 Clean and touch up surfaces of shop-painted equipment scratched or marred during shipment or installation, to match original paint.

6 ACOUSTICAL PERFORMANCE

- .1 In general provide equipment producing minimal sound levels in accordance with the best and latest practices established by the electrical industry.
- .2 Do not install any device or equipment containing a magnetic flux path metallic core, such as gas discharge lamp ballasts, dimmers, solenoids, etc., which are found to produce a noise level exceeding that of comparable available equipment.

7 EQUIPMENT IDENTIFICATION

- .1 Identify with 3mm (1/8") Brother, P-Touch non-smearing tape, or an alternate approved by the NRC Departmental Representative, all electrical outlets shown on drawings and/or mentioned in the specifications. These are the lighting switches, recessed and surface mounted receptacles such as those in offices and service rooms and used to plug in office equipment, telecommunication equipment or small portable tools. Indicate only the source of power (Ex. for a receptacle fed from panel L32 circuit #1: "L32-1").
- .2 Light fixtures are the only exceptions for electrical equipment identification (except as noted in 7.13 below). They are not to be identified.
- .3 Identify with lamicoïd nameplates all electrical equipment shown on the drawings and/or mentioned in the specification such as motor control centers, switchgear, splitters, fused switches, isolation switches, motor starting switches, starters, panelboards, transformers, high voltage cables, industrial type receptacles, junction boxes, control panels, etc., regardless of whether or not the electrical equipment was furnished under this section of the specification.
- .4 Coordinate names of equipment and systems with other Divisions to ensure that names and numbers match.
- .5 Wording on lamicoïd nameplates to be approved by the NRC Departmental Representative prior to fabrication.
- .6 Provide two sets of lamicoïd nameplates for each piece of equipment; one in English and one in French.
- .7 Lamicoïd nameplates shall identify the equipment, the voltage characteristics and the power source for the equipment. Example: A new 120/240 volt single phase circuit breaker panelboard, L16, is fed from panelboard LD1 circuit 10.

"PANEL L16
120/240 V
FED FROM LD1-10"

PANNEAU L16
120/240 V
ALIMENTE PAR LD1-10

- .8 Provide warning labels for equipment fed from two or more sources - "DANGER MULTIPLE POWER FEED" black letters on a yellow background. These labels are available from NRC's Facilities Maintenance group in building M-19.
- .9 Lamicaid nameplates shall be rigid lamicaid, minimum 1.5 mm (1/16") thick with:
 - .1 Black letters engraved on a white background for normal power circuits.
 - .2 Black letters engraved on a yellow background for emergency power circuits.
 - .3 White letters engraved on a red background for fire alarm equipment.
- .10 For all interior lamicaid nameplates, mount nameplates using two-sided tape.
- .11 For all exterior lamicaid nameplates, mount nameplates using self-tapping 2.3 mm (3/32") dia. slot head screws - two per nameplate for nameplates under 75 mm (3") in height and a minimum of 4 for larger nameplates. Holes in lamicaid nameplates to be 3.7 mm (3/16") diameter to allow for expansion of lamicaid due to exterior conditions.
 - .1 No drilling is to be done on live equipment.
 - .2 Metal filings from drilling are to be vacuumed from the enclosure interiors.
- .12 All lamicaid nameplates shall have a minimum border of 3 mm (1/8"). Characters shall be 9 mm (3/8") in size unless otherwise specified.
- .13 Identify lighting fixtures which are connected to emergency power with a label "EMERGENCY LIGHTING/ÉCLAIRAGE D'URGENCE", black letters on a yellow background. These labels are available from NRC's Facilities Maintenance group in building M-19.
- .14 Provide neatly typed updated circuit directories in a plastic holder on the inside door of new panelboards.
- .15 Carefully update panelboard circuit directories whenever adding, deleting, or modifying existing circuitry.
- .16 Identify molded case breaker with lamicaid nameplate.

8 WIRING IDENTIFICATION

- .1 Unless otherwise specified, identify wiring with permanent indelible identifying markings, using either numbered or coloured plastic tapes on both ends of phase conductors of feeders and branch circuit wiring.
- .2 Maintain phase sequence and colour coding throughout.

9 CONDUIT AND CABLE IDENTIFICATION

- .1 All new conduits to be factory painted, colour-coded EMT, type as follows:
 - .1 Fire alarm – red conduit
 - .2 Emergency power circuits – yellow conduit
 - .3 Voice/data – blue conduit
 - .4 Gas detection system – purple conduit
 - .5 Building Automation system – orange conduit

- .6 Security system – green conduit
- .7 Control system – black conduit
- .2 All other systems need not be coloured.

10 MANUFACTURER'S & APPROVALS LABELS

- .1 Ensure that manufacturer's registration plates are properly affixed to all apparatus showing the size, name of equipment, serial number, and all information usually provided, including voltage, cycle, phase and the name and address of the manufacturer.
- .2 Do not paint over registration plates or approval labels. Leave openings through insulation for viewing the plates. Contractor's or sub-contractor's nameplate not acceptable.

11 WARNING SIGNS AND PROTECTION

- .1 Provide warning signs, as specified or to meet requirements of Authorized Electrical Inspection Department and NRC Departmental Representative.
- .2 Accept the responsibility to protect those working on the project from any physical danger due to exposed live equipment such as panel mains, outlet wiring, etc. Shield and mark all live parts with the appropriate voltage. Caution notices shall be worded in both English and French.

12 LOAD BALANCE

- .1 Measure phase current to new panelboards with normal loads operating at time of acceptance. Adjust branch circuit connections as required to obtain best balance of current between phases and record changes, and revise panelboard schedules.
- .2 Measure phase voltages at loads and adjust transformer taps to within 2% of rated voltage of equipment.

13 MOTOR ROTATION

- .1 For new motors, ensure that motor rotation matches the requirements of the driven equipment.
- .2 For existing motors, check rotation before making wiring changes in order to ensure correct rotation upon completion of the job.

14 GROUNDING

- .1 Thoroughly ground all electrical equipment, cabinets, metal supporting frames, ventilating ducts and other apparatus where grounding is required in accordance with the requirements of the latest edition of the Canadian Electrical Code Part 1, C.S.A. C22.1 and corresponding Provincial and Municipal regulations. Do not depend upon conduits to provide the ground circuits.
- .2 Run separate green insulated stranded copper grounding conductors in all electrical conduits including those feeding toggle switches and receptacles.

15 TESTS

- .1 Provide any materials, equipment and labour required and make such tests deemed necessary to show proper execution of this work, in the presence of the NRC Departmental Representative.
- .2 Correct any defects or deficiencies discovered in the work in an approved manner at no additional expense to the Owner.
- .3 Megger all branch circuits and feeders using a 600V tester for 240V circuits and a 1000V tester for 600V circuits. If the resistance to ground is less than permitted by Table 24 of the Code, consider such circuits defective and do not energize.
- .4 The final approval of insulation between conductors and ground, and the efficiency of the grounding system is left to the discretion of the local Electrical Inspection Department.

16 COORDINATION OF PROTECTIVE DEVICES

- .1 Ensure circuit protective devices such as overcurrent trips, fuses, are installed to values and settings as indicated on the Drawings.

17 WORK ON LIVE EQUIPMENT & PANELS

- .1 NRC requires that work be performed on non-energized equipment, installation, conductors and power panels. For purposes of quotation assume that all work is to be done after normal working hours and that equipment, installation, conductors and power panels are to be de-energized when worked upon.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

Part 2 Products

2.1 BUILDING WIRES AND GENERAL REQUIREMENTS

- .1 Conductor material for branch circuit wiring and grounding:
 - .1 Stranded copper.
 - .2 Neutral wire: continuous throughout its length without breaks.
 - .3 Separate insulated green grounding conductors in all electrical conduits.
 - .4 All wire and cable insulation shall meet the C.S.A. Standards for the types and services hereinafter specified. Colours as per section 4-036 of Electrical Code.
 - .5 Where otherwise specified, use wire and cable types as follows:
 - .1 Type R90 XLPE cross-link polyethylene stranded for applications using wires sized No. 8 and larger.
 - .2 Type T90 stranded for applications using wires sized No. 10 and smaller.
 - .3 For fire alarm wiring refer to Section 283100.
 - .4 Approved heat resistant wire for wiring through and at lighting and heating fixtures. Where insulation types are shown on the drawings other types shall not be used unless the specification is more restrictive.
 - .6 Use **stranded** BX cable only under the following conditions:
 - .1 Wiring from a junction box to a recessed lighting fixture in suspended ceilings. Cable length not to exceed 1.5 m (5'), or
 - .2 Wiring or switches or 15 amp receptacles in partitions having removable wall panels, or
 - .3 When specifically called for on drawings.
 - .7 Use stranded wire no smaller than No. 12 AWG for lighting and power and no smaller than No. 16 AWG for control wiring.
 - .8 Conductors shall be soft copper properly refined and tinned having a minimum conductivity of 98%.

Part 3 Execution

3.1 BUILDING WIRES

- .1 Install building wires as follows:
 - .1 Make joints, taps and splices in approved boxes with solderless connectors. Joints and/or splices are not acceptable inside a panelboard.
 - .2 Ensure the lugs accommodate all the strands of the conductor.
 - .3 Replace any wire or cable showing evidence of mechanical injury.
 - .4 Use No. 10 AWG for branch circuit wiring extending more than 30 m (100 ft.) to farthest outlet from panel.
 - .5 Circuit numbers indicated on the drawing are intended as a guide for the proper connection of multi-wire circuits at the panel.
 - .6 Take care to keep the conductors free from twisting.
 - .7 Use an approved lubricant for pulling in conduit.
 - .8 Leave sufficient slack on all runs to permit proper splicing and connection of electrical devices.
 - .9 Branch circuit wiring of 120 volt applications to be multi-wire utilizing common neutrals. Under no condition shall any switch break a neutral conductor.
 - .10 Provide and install an approved fire- retardant wrap or coating for PVC jacketed cables installed in a grouped configuration of two or more.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

Part 2 Products

2.1 WIRE AND BOX CONNECTORS

- .1 Pressure type wire connectors sized to fit conductors.

2.2 WIRING TERMINATIONS

- .1 Provide first grade wire and cable connectors suitable for the service on which they are used and install them in accordance with the latest trade practice.
- .2 Provide high quality extruded copper-free aluminium (0.4% or less) connectors for single and multi conductor cable. Steel and then zinc plated connectors for multi conductor cables.
- .3 When used in hazardous area, connectors should be certified for such location in Class, Division and Group.
- .4 For large conductor sizes, use bolted or compression solderless type connectors.
- .5 Use high temperature connectors and insulation on all connections of high temperature conductors.
- .6 Where connector types are called for on the drawings or in the specification, do not use other types.
- .7 Lugs, terminals, screws used for termination of wiring to be suitable for copper conductors.
- .8 For fire alarm wiring refer to Section 28 31 00.

Part 3 Execution

3.1 INSTALLATION

- .1 Install stress cones, terminations, and splices in accordance with manufacturer's instructions.

- .2 Bond and ground as required [to CSA C22.2No.41].

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

Part 2 Products

2.1 FITTINGS

- .1 Fittings: manufactured for use with conduit specified. Coating: same as conduit.
- .2 Steel coupling for EMT.
- .3 Fittings for liquid-tight flexible conduits shall be liquid-tight connectors.
- .4 Provide expansion couplings for all conduits running in slabs through expansion joints. These shall be the type approved for use in concrete with a bonding conductor.
- .5 Factory bends are not permitted to be modified. Ensure conduit bends other than factory bends are made with an approved bender. Making offsets and other bends by cutting and rejoining factory bends are not permitted.

2.2 OUTLET BOXES

- .1 Size boxes in accordance with CSA-C22.
- .2 Unless otherwise specified, provide galvanized steel outlet boxes at least 40mm (1-1/2") deep, single or ganged style, of proper size to accommodate devices used and shall be equipped with covers as necessary of the type designed for the specified fittings. Pull boxes shall be steel and shall be galvanized or painted to prevent rusting. For lighting fixture outlets, use 100mm (4") octagon boxes.
- .3 Equip with plaster rings for flush mounting devices in finished walls.
- .4 Blank cover plates for boxes without wiring devices.
- .5 Equip with centre fixture studs for light fixtures.
- .6 Use cast boxes where indicated and for surface mounted wiring. In areas above hung ceilings where appearance is not significant, pressed steel surface boxes may be used.

- .7 Supply all outlet boxes and pull boxes sized according to code requirements unless specified otherwise on the drawings.

2.3 SUPPORT HARDWARE

- .1 Use 10mm (3/8") threaded rod for suspended unistrut and conduit.
- .2 Unless otherwise specified, use 41mm x 41mm (1-5/8" x 1-5/8") galvanized steel unistrut for conduit support systems.

Part 3 Execution

3.1 INSTALLATION

- .1 Install outlet boxes as follows:
 - .1 Support boxes independently of connecting conduits.
 - .2 Make necessary mounting adjustments to the outlet to match interior finish.
 - .3 Fill boxes with paper, sponges or foam or similar approved material to prevent entry of construction material.
 - .4 Where more than one conduit enters a switch or receptacle box on the same side, provide a 100mm (4") minimum square box with a suitable plaster ring.
 - .5 Location and appearance to be to the NRC Departmental Representative's approval.

- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

Part 2 Products

2.1 RACEWAYS

- .1 Conduit:
 - .1 Each length of conduit to be new and bear the CSA Stamp of Approval.
 - .2 Conduit, unless otherwise noted, to be EMT, no smaller than 16mm (1/2").
 - .3 Conduit to be coloured as required for systems described in section 260500.9.
- .2 Bushings and Connectors:
 - .1 Insulated type, with the insulation an integral part of the fitting.
- .3 Conduit Fastening:
 - .1 One hole malleable iron straps to secure surface conduits. Two hole straps for conduits larger than 50mm (2").
 - .2 Beam clamps to secure conduits to exposed steel work.
 - .3 Channel type supports for two or more conduits.
- .4 Pull Cord:
 - .1 Polypropylene cord in empty conduit.
- .5 Unless specifically called for on the drawings, do not use flexible conduits but it is recognized that there may be applications where this material will be useful, such as equipment connections, etc. In such cases, obtain permission for its use from the NRC Departmental Representative. For tender purposes, assume that flexible conduits will not be permitted unless specifically called for on the drawings or equipment specifications. All flexible conduits for vapour-tight applications shall be liquid-tight flexible conduits (seal-tight).
- .6 Provide expansion couplings for all conduits running in slabs through expansion joints. These shall be the type approved for use in concrete with a bonding conductor.

2.2 SUPPORT HARDWARE

- .1 Use 10mm (3/8") threaded rod for suspended unistrut and conduit.
- .2 Unless otherwise specified, use 41mm x 41mm (1-5/8" x 1-5/8") galvanized steel unistrut for conduit support systems.

Part 3 Execution

3.1 RACEWAYS

- .1 Install raceways as follows:
 - .1 Rigidly supported.
 - .2 Workmanlike manner.
 - .3 Maintain maximum headroom.
 - .4 Concealed in finished area.
 - .5 Surface-mounted in open area.
 - .6 Do not pass conduits through structural members except as indicated.
 - .7 Parallel to or at right angles to the building lines.
 - .8 Thoroughly ream all conduits at ends and terminate with appropriate locknuts and bushings.
 - .9 Cause minimum interference in spaces through which they pass.
 - .10 Plug or cap conduit during construction to protect from dust, dirt or water.
 - .11 Unless specifically indicated on drawings or with the permission of the NRC Departmental Representative, do not cast conduits in concrete.
 - .12 Dry conduits out before installing wire.
 - .13 Mechanically bend conduit of any size. Bend conduit cold.
 - .14 Do not cut or modify prefabricated bends.
 - .15 PVC conduit as indicated.
 - .16 Function and appearance to be to the NRC Departmental Representative's approval.
 - .17 Seal conduit and cable openings in fire- rated walls and floors with an approved fire stop material.
 - .18 Seal conduit and cable openings in exterior walls with a weatherproof silicone sealant.
 - .19 Paint exposed conduits and boxes to match existing wall / ceiling except the colored EMT specified in 260500.

END OF SECTION

Part 1 General

1.1 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.
- .2 Submit stamped engineered drawings for structures supporting transformers on walls or other structures other than the floor.
- .3 Prior to any installation of circuit breakers in either a new or existing installation, Contractor must submit three (3) copies of a certificate of origin, from the manufacturer, duly signed by the factory and the local manufacturer's representative, certifying that all circuit breakers come from this manufacturer, they are new and they meet standards and regulations. These certificates must be submitted to the Departmental Representative for approval.
 - .1 The above applies to all breakers rated above 240V.
 - .2 The above applies to all breakers rated up to 240V and 100A or more.
- .4 A delay in the production of the certificate of origin won't justify any extension of the contract and additional compensation.
- .5 Any work of manufacturing, assembly or installation should begin only after acceptance of the certificate of origin by Departmental Representative. Unless complying with this requirement, Departmental Representative reserves the right to mandate the manufacturer listed on circuit breakers to authenticate all new circuit breakers under the contract at the Contractor's expense.
- .6 In general, the certificate of origin must contain:
 - .1 The name and address of the manufacturer and the person responsible for authentication. The responsible person must sign and date the certificate;
 - .2 The name and address of the licensed dealer and the person of the distributor responsible for the Contractor's account.
 - .3 The name and address of the Contractor and the person responsible for the project.
 - .4 The name and address of the local manufacturer's representative. The local representative must sign and date the certificate.
 - .5 The name and address of the building where circuit breakers will be installed:
 - .1 Project title.
 - .2 End user's reference number.
 - .3 The list of circuit breakers.

1.2 IDENTIFICATION

- .1 Identification as per Section 26 05 00.

Part 2 Products

2.1 DISCONNECT SWITCHES, FUSED AND NON-FUSED

- .1 Fusible and non-fusible disconnect switches in EEMAC Enclosure as indicated.
- .2 Provision for padlocking in "OFF" switch position.
- .3 Mechanical voidable door interlock in "ON" position.
- .4 Fuses: size and type as indicated.
- .5 Fuseholders in each switch to be suitable without adaptors, for type and size of fuse indicated.
- .6 Quick-make, quick-break action.
- .7 "ON-OFF" switch position indication on switch enclosure cover.
- .8 Standard of acceptance: Square D, or approved equal.

2.2 GROUNDING

- .1 Insulated grounding conductors in accordance with Section 26 05 00.
- .2 Compression connectors for grounding to equipment provided with lugs.

2.3 DRY TYPE TRANSFORMER

- .1 Type ANN, C802.2.
- .2 Single or three phase, KVA rating, input and output voltage as indicated.
- .3 Class 200, 130°C temperature rise insulation rating for 15kva and 30kva transformer.
Class 220, 150°C temperature rise insulation system for other sizes.
- .4 Copper windings.
- .5 Four 2.5% taps, 2-FCAN and 2-FCBN.
- .6 EEMAC 1 enclosure with lifting lugs, removable metal front and side panels.
- .7 Drip shield.
- .8 Standard of acceptance: Hammond or approved equal.

2.4 PANELBOARDS

- .1 600 volt rated power panelboards: bus and breakers rated for 25,000 amp r.m.s. symmetrical interrupting capacity at 600V or as indicated.
- .2 250 volt lighting panelboards to have minimum interrupting capacity of 10,000 amp r.m.s. symmetrical.

- .3 Panelboards that have a main breaker indicated in plan shall be service entranced approved (i.e. barrier to separate main breaker from remainder of panels).
- .4 Sequence phase bussing with odd numbered breakers on left and even on right, with each breaker identified by permanent number identification as to circuit number and phase.
- .5 Panelboards: mains, number of circuits, number and size of branch circuit breakers as indicated.
- .6 Two keys for each panelboard and all panelboards to be keyed alike.
- .7 Copper bus, neutral and ground bar with neutral of same ampere rating as mains.
- .8 Suitable for: plug-in breaker for molded case circuit breaker, bolt-on breakers for miniature circuit breaker
- .9 Hinged door, trim finish: baked grey enamel.
- .10 Drip shield.
- .11 Surface mount with hinge door, unless otherwise indicated on drawing.
- .12 Complete circuit directory with typewritten legend showing description of each circuit.
- .13 Manufacturer: Square D or approved equal.

2.5 MOLDED CASE CIRCUIT BREAKER

- .1 Thermal-magnetic moulded case circuit breakers, quick-make, quick-break type, for manual and automatic operation with temperature compensation for 40°C ambient.
- .2 Common-trip breakers with single handle for multiple applications.
- .3 All new 120V to 600V circuit breakers installed on this project are to include the handle accessory, "Handle Padlock Attachment", which locks breakers on or off.
- .4 Magnetic instantaneous trip elements in circuit breakers, to operate only when the value of current reaches 10 times their setting.
- .5 Circuit breaker and panel to be of same manufacturer.

Circuit breakers minimum interrupt rating: 25KA for 600/347V or greater if indicated.
- .6 Electronic trip unit as indicated by drawing.

LI: long time and instantaneous

LSI: long time, short time and instantaneous

LSIG: long time, short time , instantaneous and grounding

A: with Ammeter

E: with energy meter

- .7 On board control power for trip unit
- .8 Standard of acceptance: Square D or approved equal.

2.6 FUSES

- .1 250V and 600V time delay, rejection style, HRC-I, Class RK5.
- .2 Standard of acceptance: Gould-Shawmut or approved equal.

Part 3 Execution

3.1 DISCONNECT SWITCHES

- .1 Install disconnect switches complete with fuses as indicated.

3.2 GROUNDING

- .1 Install complete permanent, continuous, system and circuit, equipment, grounding systems including, conductors, compression connectors, accessories, as indicated, to conform to requirements of Engineer, and local authority having jurisdiction over installation. Where EMT is used, run ground wire in conduit.
- .2 Install connectors in accordance with manufacturer's instructions.
- .3 Protect exposed grounding conductors from mechanical injury.
- .4 Soldered joints not permitted.

3.3 DRY TYPE TRANSFORMER

- .1 Transformers above 75 kVA mount on floor.
- .2 Provide adequate clearance around transformer for ventilation.
- .3 Install transformers in level upright position.
- .4 Remove shipping supports only after transformer is installed and just before putting into service.
- .5 Loosen isolation pad bolts until no compression is visible.
- .6 Make primary and secondary connections shown on wiring diagram.
- .7 Energize transformers immediately after installation is completed, where practicable.
- .8 Provide equipment identification in accordance with Section 26 05 00.
- .9 Connect transformer through side of housing.

3.4 PANELBOARDS

- .1 Locate panelboards as indicated and mount securely, plumb, and square, to adjoining surfaces.
- .2 Mount panels to height specified in section 26 27 26 or as indicated.
- .3 Connect loads to circuits as indicated.
- .4 Connect neutral conductors to common neutral bus.

3.5 MOLDED CASE CIRCUIT BREAKERS

- .1 Install circuit breakers as indicated.

3.6 FUSES

- .1 Install fuses in mounting devices immediately before energizing circuit.
- .2 Install fuses correctly sized to assigned electrical circuits.
- .3 Provide 3 spare fuses for each rating supplied.

END OF SECTION

Part 1 General

1.1 RELATED WORK

- .1 Motors and controls to Sections 26 22 19, 26 29 03 & 26 29 10.

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.

1.4 IDENTIFICATION

- .1 Identification as per Section 26 05 00.

Part 2 Products

2.1 WIRING DEVICES

- .1 Switches:
 - .1 Specification grade, shallow body, designed to withstand high inductive fluorescent loads CSA C22.2 No. 55.
 - .2 Number of poles as indicated.
 - .3 Captive mounting screws, quiet safe mechanical action with rust-proofed mounting strap and silver alloy contact points.
 - .4 Toggle actuated, colour white unless otherwise indicated.
 - .5 Brass screw terminals rated 20 AMP at 125 volt.
 - .6 Standard of acceptance: Hubbell, Leviton.
- .2 LED Dimming Switches:
 - .1 0-10VDC, electronic, suitable for use with installed light fixture.
 - .2 Rated for 1200W.
 - .3 Suitable for use in "3-way" configuration where indicated.
 - .4 Standard of acceptance:
 - .1 Philips SR1200ZTUNV or equivalent approved by NRC Departmental Representative.
 - .2 3-way style to be Philips SR3W or equivalent approved by NRC Departmental Representative.

- .3 LED occupancy sensor (wall mounted):
 - .1 120V, suitable for use with installed light fixture.
 - .2 Rated for 600W LED.
 - .3 Can be set to Manual-ON/Automatic-OFF or Auto-ON/Auto-OFF.
 - .4 Adjustable delayed-OFF time.
 - .5 Suitable for use in “3-way” configuration where indicated.
 - .6 Fire year warranty.
 - .7 Standard of acceptance: Hubbell, Leviton, Philips or equivalent approved by NRC Departmental Representative.
- .4 LED occupancy sensor (ceiling mounted):
 - .1 120V, suitable for use with installed light fixture.
 - .2 360° coverage pattern.
 - .3 No minimum load requirements.
 - .4 Adjustable delayed-OFF time.
 - .5 No field calibration or sensitivity adjustments required.
 - .6 Fire year warranty.
 - .7 Standard of acceptance: Philips LRM2377 or equivalent approved by NRC Departmental Representative.
- .5 LED dimmable motion switches:
 - .1 Dimmer with passive infrared sensors to control LED fixtures.
 - .2 180° sensor field-of-view.
 - .3 Up to 30’x30’ major motion coverage and 20’x20’ minor motion coverage.
 - .4 Occupancy sensor can be set too auto-on/auto-off or manual-on/auto-off.
 - .5 Adjustable timeout and high/low sensitivity adjustment.
 - .6 Adjustable settings for auto-on light level: 100%, 50%, last light level, or locked pre-set light level.
 - .7 Off warning fades lights to off over a period of 10 seconds.
 - .8 120V.
 - .9 5 year warranty.
 - .10 Standard of acceptance: Lutron MSCL-OP153M-WH.
- .6 Receptacles:
 - .1 Duplex type, CSA type 5-15R, 125 volt, 15A, U ground, specification grade with the following features:
 - .1 Flush type with parallel blade slots.
 - .2 Double-wiping contacts.
 - .3 Double-grounding terminals.
 - .4 Break-off feature for separate feeds.
 - .5 One piece body, colour white unless otherwise indicated.
 - .2 Special receptacles with ampacity and voltage as indicated.
 - .3 Receptacles of one manufacturer throughout the project.

- .7 Rooftop maintenance receptacles:
 - .1 Class A type ground fault protection.
 - .2 CSA 5-20R configuration.
 - .3 Supplied by a dedicated circuit.
- .8 Outdoor GFCI Receptacles cover:
 - .1 Non-metallic In-Use cover.
 - .2 Single gang. Deep cover. Clear color.
 - .3 Horizontal or vertical mount.
 - .4 Includes attached gasket and mounting hardware.
 - .5 Standard of acceptance: Hubbell MM510C.
- .9 Cover Plates:
 - .1 Cover plates for wiring devices.
 - .2 Smooth white plastic for wiring devices mounted in flush-mounted outlet box.
 - .3 Sheet metal cover plates for wiring devices mounted in surface-mounted outlet box.
 - .4 Multi-outlet covers as indicated.
- .10 Splitters, Junction Boxes & Cabinets:
 - .1 Sheet metal enclosure, welded corners and formed cover, provided as required.

Part 3 Execution

3.1 LOCATION OF OUTLETS

- .1 The number and general location of outlets for lighting, power, telephones, etc., are to be as shown on the drawings. Install all outlets accurately and uniformly with respect to building details. When centering outlets, make allowance for overhead pipes, ducts, etc. and for variations in wall or ceiling finish, window trim, etc. Reinstall incorrectly installed outlets at no cost to the Owner. Make field power and control connections as indicated.
- .2 The location of all outlets as shown on the plans are approximate and are subject to change, up to 3m (10') without extra cost or credit provided the information is given prior to the installation of the outlet.
- .3 Unless otherwise specified, locate light switches on latch side of doors. Determine the direction of all door swings from the architectural drawings or on site, not from the electrical drawings.
- .4 Locate roof top maintenance receptacle within 7.5m of the rooftop electrical equipment.

3.2 MOUNTING HEIGHTS

- .1 Mounting height of equipment is from finished floor to centreline of equipment unless specified or indicated otherwise.

- .2 If mounting height of equipment is not indicated verify before proceeding with installation.
- .3 Generally, locate outlets as follows: (except those otherwise shown on the drawings):
 - .1 Local switches 1.2m (3'-11") to centreline.
 - .2 Wall receptacles 400mm (1'-4") to centreline.
 - .3 Clock receptacles 2.4m (8'-0") to centreline.
 - .4 Lighting panels 1.8m (6'-0") to top.
 - .5 Telephone and data communications outlet 400mm (1'-4") to centreline.
 - .6 Fan coil speed control switch 1.2m (3'-11") to centreline.
 - .7 Roof top maintenance receptacle: 750mm above the finished roof.

3.3 WIRING DEVICES

- .1 Install wiring devices as follows:
 - .1 Where more than one local device is shown at one location, they are to be set under one cover plate.
 - .2 Install single throw switches with handle in "up" position when switch closed.
 - .3 Devices in gang type outlet box when more than one device is required in one location.
 - .4 Protect stainless steel cover plate finish with paper or plastic film until painting and other work is finished.
 - .5 Do not use cover plates meant for flush outlet boxes on surface-mounted boxes.
 - .6 Install metal barriers where required.
 - .7 Remove insulation carefully from ends of conductors and connect wiring as required.
 - .8 Bond and ground as required.

3.4 SPLITTERS AND DEVICES

- .1 Installation of splitters, junction boxes, pull boxes & cabinets as follows:
 - .1 Mount plumb, true and square to the building lines.
 - .2 Install in inconspicuous but accessible locations.
 - .3 Install pull boxes so as not to exceed 30 m (100') of conduit run between boxes or as indicated.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.
- .2 Include schematic, wiring, interconnection diagrams.
- .3 Indicate:
 - .1 Mounting method and dimensions.
 - .2 Starter size and type.
 - .3 Layout of identified internal and front panel components.
 - .4 Enclosure types.
 - .5 Wiring diagram for each type of starter.
 - .6 Interconnection diagrams.
- .4 Motors specified and supplied with mechanical equipment. Refer to Division 23.

1.3 OPERATION AND MAINTENANCE DATA

- .1 Provide operation and maintenance data for motor starters for incorporation into manual specified in Section 00 10 00.
- .2 Include operation and maintenance data for each type and style of starter.

Part 2 Products

2.1 MATERIALS

- .1 Starters:
 - .1 IEC rated starters not acceptable.

2.2 MANUAL MOTOR STARTERS

- .1 Single and three phase manual motor starters of size, type, rating, and enclosure type as indicated, with components as follows:
 - .1 Switching mechanism, quick make and break.
 - .2 One and three overload heaters as indicated, manual reset, trip indicating handle.
- .2 Accessories:
 - .1 Toggle switch, key switch or pushbutton as specified.
 - .2 Indicating light: type and colour as indicated.
 - .3 Locking tab to permit padlocking in "ON" or "OFF" position.

- .3 Standard of acceptance: Square D, Class 2510 or approved equal.

2.3 FULL VOLTAGE MAGNETIC STARTERS

- .1 Magnetic and combination magnetic starters of size, type, rating and enclosure type as indicated with components as follows:
 - .1 Contactor solenoid operated, rapid action type.
 - .2 Motor overload protective device in each phase, manually reset from outside enclosure.
 - .3 Power and control terminals.
 - .4 Wiring and schematic diagram inside starter enclosure in visible location.
 - .5 Identify each wire and terminal for external connections, within starter, with permanent number marking identical to diagram.
- .2 Combination type starters to include motor circuit interrupter or circuit breaker with operating lever on outside of enclosure to control motor circuit interrupter or circuit breaker and provision for:
 - .1 Locking in "OFF" position with up to 3 padlocks.
 - .2 Locking in "ON" position.
 - .3 Independent locking of enclosure door.
 - .4 Provision for preventing switching to "ON" position while enclosure door open.
- .3 Accessories:
 - .1 Pushbuttons and selector switches: type and labelled as indicated.
 - .2 Indicating lights: type and color as indicated.
 - .3 1-N/O and 1-N/C spare auxiliary contacts unless otherwise indicated.
- .4 Standard of acceptance: Square D, Class 8539 or approved equal.

2.4 MULTI-SPEED STARTERS

- .1 2-Speed starters of size, type, rating, and enclosure type as indicated. Starter suitable for constant torque and variable torque type motor with components as follows:
 - .1 One-3 pole contactor for each winding for separate winding motors.
 - .2 Three overload relays with 3 heater elements and manual reset for each speed.
- .2 Accessories:
 - .1 Selector switches: standard labelled as indicated.
 - .2 Indicating lights: standard type and color as indicated.
 - .3 Auxiliary control devices as indicated.

2.5 FINISHES

- .1 Apply finishes to enclosure in accordance with Section 26 05 00.

2.6 EQUIPMENT IDENTIFICATION

- .1 Provide equipment identification in accordance with Section 260500.

Part 3 Execution

3.1 INSTALLATION

- .1 Install starters, connect power and control as indicated.
- .2 Install control devices and relay panels and interconnect as indicated.
- .3 Install correct fuses and overload device elements.
- .4 Megger all motors. Dry out motor if dampness is present in accordance with manufacturer's recommendations.
- .5 For installation of motor with mechanical equipment refer to Division 23.
- .6 Make connection to motor as indicated. Use liquid-tight PVC jacketed flexible conduit between rigid conduit and motor.
- .7 Make flexible conduit long enough to permit movement of motor.

3.2 TESTS

- .1 Perform tests in accordance with Section 26 05 00 and Manufacturer's instructions.
- .2 Operate switches, contactors to verify correct functioning.
- .3 Perform starting and stopping sequences of contactors and relays.
- .4 Check that sequence controls, interlocking with other separate related starters, equipment, control devices, operate as indicated.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00
- .2 Variable Frequency Drives – Mechanical Section 23 05 14

1.2 DESCRIPTION

- .1 This specification is to cover a complete Variable Frequency motor Drive (VFD) consisting of a pulse width modulated (PWM) inverter designed for use on a standard NEMA Design B induction motor.
- .2 The drive manufacturer shall supply the drive and all necessary controls as herein specified. The manufacturer shall have been engaged in the production of this type of equipment for a minimum of twenty years. All VFDs installed on this project shall be from the same manufacturer.

1.3 QUALITY ASSURANCE

- .1 Referenced Standards:
 - 1. Institute of Electrical and Electronic Engineers (IEEE)
 - .1 Standard 519-1992, IEEE Guide for Harmonic Content and Control.
 - .2 Underwriters laboratories
 - .1 UL508C
 - .3 National Electrical Manufacturer’s Association (NEMA)
 - .1 ICS 7.0, AC Adjustable Speed Drives
 - .4 IEC 16800 Parts 1 and 2
 - .5 CSA 22.2
- .2 Qualifications:
 - .1 VFDs and options shall be UL listed and CSA approved as a complete assembly. VFDs that require the customer to supply external fuses for the VFD to be UL listed are not acceptable. VFDs requiring additional branch circuit protection are not acceptable. The base VFD shall be UL listed for 100 KAIC without the need for input fusing.

1.4 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.
- .2 Include schematic, wiring, interconnection diagrams.
- .3 Indicate:
 - .1 Outline dimensions, conduit entry locations and weight.
 - .2 Customer connection and power wiring diagrams.

- .3 Complete technical product description include a complete list of options provided. **Any portions of the specifications not complied with must be clearly indicated or the supplier and contractor shall be liable to provide all components required to meet the specification.**
- .4 Compliance to IEEE 519 – harmonic analysis for particular jobsite including total harmonic voltage distortion and total harmonic current distortion (TDD).
 - .1 The VFD manufacturer shall provide calculations, where required on the drawing; specific to the installation, showing total harmonic voltage distortion is less than 5%.
 - .2 Input filters shall be sized and provided as required by the VFD manufacturer to ensure compliance with the IEEE electrical system standard 519. All VFDs shall include a minimum of 5% equivalent impedance reactors, **no exceptions.**
- .4 Motors specified and supplied with mechanical equipment. Refer to Division 23.

1.5 OPERATION AND MAINTENANCE DATA

- .1 Provide operation and maintenance data for motor starters for incorporation into manual specified in Section 00 10 00.
- .2 Include operation and maintenance data for each type and style of starter.
- .3 On completion of the installation, the supplier shall provide the following:
 - .1 Full commissioning report documenting all programmable settings, AC input voltage, DC Bus voltage, current draw at maximum speed, and a description of ambient conditions.
 - .2 One operator's manual for each VFD installed.
 - .3 One 8.5" x 11" wiring diagram for each VFD installed.

1.6 GENERAL DESIGN CHARACTERISTICS

- .1 The VFD shall be of the Pulse Width Modulated (PWM) type.
- .2 The VFD shall be rated for variable torque applications, with an overload rating of 110% for 60 seconds.
- .3 All VFD's shall be factory UL/cUL Listed.
- .4 All packaged drive systems shall be CSA Listed.
- .5 The VFD shall have the capability of operating multiple motors. The minimum VFD continuous current rating shall be the sum of the full load current ratings of the connected motors.
- .6 The VFD shall have a minimum displacement power factor of 0.96 or higher at all output frequencies.
- .7 The VFD manufacturer shall have a minimum of ten years experience in the Canadian Market.

Part 2 Products

2.1 VARIABLE FREQUENCY DRIVES

- .1 Variable Frequency Drives are supplied by Division 23 and installed by Division 26.
- .2 Coordinate all supply and installation requirements with Division 23 Contractor.
- .3 Refer to Mechanical drawings and specifications for more information.
- .4 Standard of acceptance: ABB ACH550-VDR (Vertical E-Clipse Bypass).

Part 3 Execution

3.1 INSTALLATION

- .1 Installation shall be the responsibility of the electrical contractor. The contractor shall install the drive in accordance with the requirements of the VFD manufacturer's installation manual.
- .2 The contractor is to verify that the jobsite conditions for installation meet the factory recommendations and code required conditions for the VFD installation prior to installation. These shall include as a minimum:
 - .1 Clearance spacing.
 - .2 Compliance with environmental ratings of the VFD system.
 - .3 Separate conduit installation of the input wiring, the motor wiring, and control wiring. At no time does any of this wiring run in parallel with each other.
 - .4 All power and control wiring is complete.
- .3 The VFD is to be covered and protected from installation dust and contamination until the environment is cleaned and ready for operation. The VFD system shall not be operated while the unit is covered.

3.2 ON-SITE STARTUP

- .1 The manufacturer shall provide start-up and commissioning of the variable frequency drive and its optional circuits by a factory certified service technician who is experienced in start-up and repair services. The commissioning personnel shall be the same personnel that will provide the factory service and warranty repairs at the customer site. Sales personnel and other agents who are not factory certified technicians for drive repair shall not be acceptable as commissioning agents.
- .2 Start-up services shall include checking for verification of proper operation and installation of the VFD, its options and its interface wiring to the building automation system. Included in this service shall be as a minimum:
 - .1 Verification of contractor wire terminations and conduit runs to and from the VFD.
 - .2 Up to four hours of customer operator training on the operation and service diagnostics at the time of commissioning. On-site training is to be provided by the same factory trained application engineering and service personnel to demonstrate

full programming and operating features and procedures. Date and time for this training is to be coordinated with the NRC Departmental Representative.

- .3 Measurement for verification of proper operation of the following:
 - .1 Motor voltage and frequency. Verification of proper motor operation.
 - .2 Control input for proper building automation system interface and control calibration.
 - .3 Calibration check for the following set-points:
 - .1 minimum speed
 - .2 maximum speed
 - .3 acceleration and deceleration rates.
- .3 Commissioning agent to verify the programming of the VFD and to provide a written copy of the settings to the engineer.
- .4 Commissioning agent to lock out critical frequencies throughout the operating curve of the equipment as identified and required by the engineer. The agent shall record amperages at six (minimum) different frequencies from minimum to maximum speed.

3.3 PRODUCT SUPPORT

- .1 Factory trained application engineering and service personnel that are thoroughly familiar with the VFD products offered shall be locally available at both the specifying and installation locations. A toll free 24/365 technical support line shall be available.
- .2 A computer based training CD or 8-hour professionally generated video (VCR format) shall be provided to the owner at the time of project closeout. The training shall include installation, programming and operation of the VFD, bypass and serial communication.

3.4 WARRANTY

- .1 Warranty shall be 24 months from the date of certified start-up. The warranty shall include all parts, labor, travel time and expenses

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 001000.
- .2 Submit complete photometric data prepared by independent testing laboratory for luminaires where specified, for review by NRC Departmental Representative.

Part 2 Products

2.1 FINISHES

- .1 Baked enamel finish.
 - .1 Metal surfaces of luminaire housing and reflectors finished with high gloss powder coated baked enamel applied after fabrication to give smooth uniform appearance, free from pinholes or defects.

2.2 METAL SURFACES

- .1 Metal surfaces to be minimum 20 gauge steel.

2.3 LIGHTING CONTROL RELAY PANEL

- .1 Lighting control relay panel rated at 347V.
- .2 16 gauge steel enclosure and doors coated with ANSI/ASA 61 grey baked enamel.
- .3 Operation:
 - .1 Fully programmable time clock, compatible with occupancy sensors.
 - .2 2 minute warning that lights will turn off unless overridden.
 - .3 Override "lights off" via local switch.
- .4 Includes the following features:
 - .1 BACnet protocol to interface with NRC BAS system.
 - .2 Heavy duty relays (16) rated at 20A and 120,000 operations.

- .5 Include all components necessary for a complete, fully functional system including low voltage switches and wiring for zones to be time controlled. Refer to drawings.
- .6 Standard of acceptance:
 - .1 Panel: Schneider Electric SERPB16HS series or approved equivalent.
 - .2 Push button switches: Schneider Electric SERPWSxGyB or approved equal.

2.4 LUMINAIRES

- .1 LED
 - .1 Type A:
 - .1 347V, 400mm x 1120mm, 209W, suitable for suspension mounting.
 - .2 Die formed aluminum chassis, natural convection cooling.
 - .3 Semi-diffuse acrylic lens.
 - .4 L70 at 100,000 hours, L85 at 52,000 hours.
 - .5 5-year warranty.
 - .6 4000k colour temperature, minimum 24,000 Lumen output.
 - .7 Medium light distribution.
 - .8 Standard of acceptance: Lithonia IBH24LHVOLT, Philips FBX24L40347M or equivalent approved by the NRC Departmental Representative.
 - .2 Type B:
 - .1 347V, 400mm x 1120mm, 209W, suitable for surface mounting.
 - .2 Die formed aluminum chassis, natural convection cooling.
 - .3 Semi-diffuse acrylic lens.
 - .4 L70 at 100,000 hours, L85 at 52,000 hours.
 - .5 5-year warranty.
 - .6 4000k colour temperature, minimum 24,000 Lumen output.
 - .7 Medium light distribution.
 - .8 Standard of acceptance: Lithonia IBH24LHVOLT, Philips FBX24L40347M with ALSTK surface mounting kit or equivalent approved by the NRC Departmental Representative.
 - .3 Type C:
 - .1 347V, 1140-1220mm long, LED linear strip, suitable for surface or suspended mounting.
 - .2 Surface mount unless otherwise noted on drawings.
 - .3 5-year warranty.
 - .4 Rated to deliver L70 performance for 100,000 hours.
 - .5 4000k colour temperature, minimum 4000 lumen output.
Standard of acceptance: Lithonia CLX L48 4000LM SEF RDL 347 GZ10 40K 80CRI WH, Philips Fluxstream FSS440L840-347-DIM or equivalent approved by the NRC Departmental Representative.
 - .4 Type D:
 - .1 347V, 305mm x 1219mm, LED troffer, suitable for recessed mounting in T-bar or drywall ceiling.

- .2 5-year warranty.
- .3 Suitable for dimming.
- .4 Include mounting kit for appropriate ceiling type.
- .5 Removable LED boards and driver for ease of service/replacement.
- .6 Rated to deliver L70 performance for 50,000 hours.
- .7 4000k colour temperature, 82 CRI, minimum 4000 lumen output minimum.
- .8 Standard of acceptance: Lithonia BLT4 40L ADP 347 EZ1 LP840, Philips T-Grid 1T42L840-4-FS-02F-347V-DIM or equivalent approved by the NRC Departmental Representative.
- .5 Type E:
 - .1 347V, 610mm x 610mm, LED troffer, suitable for recessed mounting in T-bar or drywall ceiling.
 - .2 5-year warranty.
 - .3 Suitable for dimming.
 - .4 Include mounting kit for appropriate ceiling type.
 - .5 Removable LED boards and driver for ease of service/replacement.
 - .6 Rated to deliver L70 performance for 50,000 hours.
 - .7 4000k colour temperature, 82 CRI, minimum 2000 lumen output minimum.
 - .8 Standard of acceptance: Lithonia 2BLT2 20L ADP 347 EZ1 LP840, Philips T-Grid 2TG20L-840-2-FS-02F-347-DIM or equivalent approved by the NRC Departmental Representative.
- .6 Type F:
 - .1 347V, 305mm x 1219mm, LED, suitable for recessed mounting in T-bar or drywall ceiling.
 - .2 5-year warranty.
 - .3 Suitable for damp location.**
 - .4 Include mounting kit for appropriate ceiling type.
 - .5 Removable LED boards and driver for ease of service/replacement.
 - .6 Rated to deliver L70 performance for 50,000 hours.
 - .7 4000k colour temperature, 82 CRI, minimum 4000 lumen output minimum.
 - .8 Standard of acceptance: Lithonia BLT4 40L ADP 347 EZ1 LP840, Philips 1T42L840-4-FS-02F-347-DIM or equivalent approved by the NRC Departmental Representative.
- .2 LED Pot light
 - .1 Type G:
 - .1 120V, 150mm LED downlight, suitable for recessed mounting in drywall ceiling.
 - .2 5-year warranty.
 - .3 4000k colour temperature, 82 CRI, minimum 1500 lumen output.
 - .4 Suitable for wet location.

- .5 Standard of acceptance: Lithonia LDN6 40/15 LO6AR LSS MVOLT EZ10 WL, Philips LyteProfile P6RD15NUVB-P6RD840-VB-P6RDCL or equivalent approved by the NRC Departmental Representative.
- .2 Type K:
 - .1
 - .2 120V, 175mm open LED downlight, suitable for surfaced mounting in drywall ceiling.
 - .3 Rated for wet location.
 - .4 5-year warranty.
 - .5 3500k colour temperature, 80 CRI, minimum 1000 lumen output.
 - .6 Standard of acceptance: Philips S-7-R-8-35K-10-AL, Juno Slimform JSF-7IN 10LM-35K-90CRI-120FRPC-WH+JSFTRIM 7IN-SN or equivalent approved by the NRC Departmental Representative.

2.5 EXTERIOR FLOOD LIGHTS

- .1 Outdoor weatherproof floodlight
 - .1 Type H:
 - .1 Wall-mounted 45W, 347V, LED wall pack.
 - .2 Die-cast aluminum housing, bronze in colour.
 - .3 18 LEDs, type 4 optics, full cut-off. 3311 lumen output.
 - .4 Built in photo control.
 - .5 Standard of Acceptance: Hubbell outdoor lighting Laredo Series LNC2-18LU-5K-4-1-PCI or equivalent approved by the NRC Departmental Representative.
 - .2 Type I:
 - .1 Wall-mounted 45W, 347V, LED wall pack.
 - .2 Die-cast aluminum housing, bronze in colour.
 - .3 18 LEDs, type 3 optics, full cut-off. 3311 lumen output.
 - .4 Built in photo control.
 - .5 Standard of Acceptance: Hubbell outdoor lighting Laredo Series LNC2-18LU-5K-3-1-PCI or equivalent approved by the NRC Departmental Representative.
 - .3 Type J:
 - .1 Wall-mounted 71W, 347V, LED wall pack.
 - .2 Die-cast aluminum housing, bronze in colour.
 - .3 18 LEDs, type 4 optics, full cut-off. 4673 lumen output.
 - .4 Built in photo control.
 - .5 Standard of Acceptance: Hubbell outdoor lighting Laredo Series LMC30LU-4-1-PCI or equivalent approved by the NRC Departmental Representative.

Part 3 Execution

3.1 INSTALLATION

- .1 Supply and install all lighting fixtures complete with lamps, switches, supports, etc., to provide a complete working lighting system.
- .2 Locate and install luminaires as indicated.

3.2 LUMINAIRE SUPPORTS

- .1 For suspended ceiling installations support each luminaire, including exit lights and pot lights, independently of the ceiling support system with separate chains at each end. No. 80 steel sash chain minimum.
- .2 Unless otherwise specified support fluorescent luminaires mounted in continuous rows once every 3.6 m (12').

3.3 WIRING

- .1 Connect luminaires to lighting circuits directly for exit fixtures and exterior floodlights.

3.4 LUMINAIRE ALIGNMENT

- .1 Align luminaires mounted in continuous rows to form a straight uninterrupted line.
- .2 Align luminaires mounted individually parallel or perpendicular to building grid lines as shown on drawing.

3.5 EXTERIOR FLOODLIGHTS

- .1 Install floodlights in accordance with manufacturer's instructions and as indicated.
- .2 Aim energized floodlights as indicated during darkness and in the presence of the NRC Departmental Representative.

3.6 PHOTOELECTRIC LIGHTING CONTROL

- .1 Install photoelectric controls in accordance with manufacturer's instructions.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.

Part 2 Products

2.1 EXIT LIGHTS

- .1 New
 - .1 Housing: Metal construction using Canadian cold-rolled steel. Frame and back plate shall each be of a one-piece construction.
 - .2 Faceplate(s) shall be constructed of robust clear poly-carbonate panels with an opaque border colored factory-white.
 - .3 Universal pictogram sign. Two pictogram films per face, for direction selection.
 - .4 Long-life white LED light source. Consumes less than 2.5W in AC mode and 1W in DC mode.
 - .5 Meets or exceeds CSA 22.2 No.141-10 standard for pictogram exit signs.
 - .6 Two-wire universal AC input: 120 to 347V. Two-wire standard DC input: 6 to 24Vdc.
 - .7 Universal mounting: end, wall or ceiling.
 - .8 Standard of acceptance: Thomas&Betts LS series. LS1WU for single face and LS2WU for double face.
- .2 Existing
 - .1 Housing: one piece extruded aluminum with aluminum grey baked epoxy finish.
 - .2 Face plates:
 - .1 Extruded 2.5 mm (0.1") thick aluminum complete with knock-out arrows.
 - .2 Single and double face (refer to drawings).
 - .3 Letters: 114 mm (6") high reading EXIT and SORTIE.
 - .4 Mounting: universal-surface-end and ceiling with canopy.
 - .5 Downlight: prismatic plastic.

- .6 Lamp: LED 120VAC
- .7 To meet CAN/CSA C860-01

Part 3 Execution

3.1 EXIT LUMINAIRES

- .1 Connect fixtures to emergency power circuits as indicated.
- .2 Ensure that the exit light circuit breaker is locked in the "ON" position.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 REFERENCES

- .1 Telecommunications Industry Association (TIA)
 - .1 ANSI/TIA/EIA 569-D, Commercial Building Standard for Telecommunications Pathways and Spaces.

1.3 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.

Part 2 Products

2.1 MATERIALS

- .1 Raceways: Minimum 19mm (3/4") EMT, larger sizes as indicated on drawing. Factory painted blue as per section 26 05 00.
- .2 Tele-Power poles/Jiffy poles: type as indicated on drawings.
- .3 Floor mounted outlets: type as indicated on drawings.

Part 3 Execution

3.1 CONDUIT SYSTEM

- .1 Conduit and cable pathways installation shall comply with ANSI/TIA/EIA 569-D.
- .2 Run conduit from wall outlets to 150mm (6") above false ceiling or to a point indicated on drawings.
- .3 Install a steel pull box after every two 90° bends, or equivalent; or where there is a (U-shaped) bend in the run.
- .4 Install additional steel pull boxes where necessary so that throughout the entire system, wires may be pulled in or withdrawn with reasonable ease. No section of conduit shall be longer than 30m (100ft) between pull points.
- .5 Pull boxes shall be placed in a straight section of conduit and shall not be used in lieu of a bend. The corresponding conduit ends shall be aligned with each other.

- .6 Where a pull box is required with conduits equal or smaller than 27mm (1"), an outlet box may be used as a pull box. For conduits above 27mm (1"), the pull box shall be size as per ANSI/TIA/EIA 569-D or as noted on the drawings.
- .7 Bending radius for conduits equal or less than 50mm (2") shall be no less than 6 times the internal diameter of the conduit. Bending radius for conduits more than 50mm (2") shall be no less 10 times the internal diameter.
- .8 No conduit body (Condulet), LB type or other, shall be used unless otherwise indicated on the drawings or pre-approved by the departmental representative.
- .9 Conduits shall be reamed to eliminate sharp edges and terminated with insulating nylon bushings.
- .10 Install nylon pull-cords in all empty conduits.
- .11 Clearly identify conduits at each end.
- .12 Conduit to be colored EMT. Refer to 260500 for conduit color coding.
- .13 Do not run communications cables in the same raceway as power and lighting conductors.
- .14 Grounding and bonding to the Canadian Electrical Code (CEC).

3.2 MOUNTING

- .1 Recess mount wall outlets unless otherwise indicated. Mount wall outlets to height specified in section 26 27 26 or as indicated.

3.3 WORK BY OTHERS

- .1 Cables and terminations.

END OF SECTION

Part 1 General

1.1 RELATED WORK SPECIFIED ELSEWHERE

- .1 Common Work Results - Electrical Section 26 05 00

1.2 MATERIALS

- .1 Provide only new equipment and materials, without blemish or defect, bearing Canadian Standards Association or Authorized Electrical Inspection Department labels, and subject to the approval of the NRC Departmental Representative.
- .2 After a contract is awarded, utilize alternative methods and/or materials only after receiving the NRC Departmental Representative's approval.

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 Submit shop drawings and product data in accordance with Section 00 10 00.

1.4 SCOPE OF WORK

- .1 Supply and install all required material, equipment and labour to provide the fire alarm changes and additions as shown on the drawings and indicated by this section of the specification.

1.5 CONTRACTOR QULIFICATION

- .1 The contractor must ensure the supervisor, site foreman and electrician working on site hold valid fire alarm certificate.

Part 2 Products

2.1 AUTOMATIC ALARM INITIATING DEVICES

- .1 Addressable system
 - .1 Intelligent heat detector. Rate-of-rise rated at 8.3°C (15°F)/min. Optional carbon monoxide sensor. Automatic device mapping, self-diagnostic. Stand-alone operation. Edwards model No. SIGA2-HRS.
 - .2 Intelligent photoelectric smoke detector. Self-diagnostics and history mapping. Automatic device mapping. Stand-alone operation. Edwards model No. SIGA2-PS.
 - .3 Intelligent duct smoke detector. Can be installed in ducts up to 10ft. remote LED and test station accessories. Edwards model No. SIGA-DH.

2.2 MANUAL ALARM STATIONS

- .1 Addressable system
 - .1 Pull lever, breakglass, wall mounted, red, bilingual and with electronic addressing. Edwards model No. SIGC-270B.

2.3 AUDIBLE, VISUAL DEVICES

- .1 Combination horn/strobe device:
 - .1 Fire alarm Horn/strobe combination device, red in colour.
 - .2 Adjustable cd output of 15, 20, 75 & 110. Selectable hi/low dB output.
 - .3 Red with red trim ring.
 - .4 Include Synchronization module to synchronize strobes.
 - .5 Standard of acceptance: Chubb Edwards G1R-HDVM.
- .2 Visual Device:
 - .1 Fire alarm strobe only, red in colour.
 - .2 Adjustable cd output of 15, 20, 75 & 110.

- .3 Red with red trim ring.
- .4 Include Synchronization module to synchronize strobes.
- .5 Standard of acceptance: Chubb Edwards G1R-VM.

2.4 CONDUIT AND WIRING

- .1 Raceway to be 21mm colored EMT unless indicated otherwise on the drawings. Wiring between junction box on underside of slab and heat detector junction box in T-bar ceiling to be 21mm flexible conduit.
- .2 All fire alarm initiating device circuits wiring to be class "A" using #18 minimum FAS-105 red jacketed twisted shielded pairs cable, and in accordance with manufacturer's requirements. Run each pair of wire in separate conduit to make it true class 'A'.
- .3 All fire alarm signal circuits wiring to be R90/ T90 #16 minimum, and in accordance with manufacturer's requirements.
- .4 Refer to 26 05 00 for fire alarm conduit color coding.

Part 3 Execution

3.1 MOUNTING OF EQUIPMENT

- .1 Recess mount equipment in all areas except where specified in unfinished areas.
- .2 Mounting heights from floor level to centerline of equipment are as follows:
 - .1 Fire alarm stations 1.2m (3'-11") to centreline.
 - .2 Fire alarm bells, horns, strobes 2.1m (7'-0") to centreline.

3.2 CONDUIT AND WIRING

- .1 All conduit to include a #16 TW stranded copper green ground wire.
- .2 Use only uninsulated ring-type STA-KON lugs on screw connections.
- .3 Run conduit tight along underside of ceiling slab or roof deck, unless noted otherwise on drawings.
- .4 In rooms having false ceilings, each fire detection device is to have one junction box secured to the underside of the ceiling slab or roof deck and another firmly supported to the false ceiling tile. The junction box connected to the fire alarm device is not to be used as a raceway for connection to other devices. All splices and routing to other fire alarm devices is to be from the junction box mounted on the underside of the ceiling slab or roof deck.
- .5 Use Tee bar electrical box hangers (Caddy #51224 for 610mm T-bar spacing) to mount heat detectors on T-bar ceiling tiles.
- .6 Install a maximum of 1.5 m (5'-0") 3/4" (21mm) flexible conduit where a heat detector is installed on T-bar ceiling tiles. This is to allow the ceiling tile, having the device, to be shifted two feet either direction for access above the ceiling.

- .7 Leave 6 inch loops of wire in all junction boxes.
- .8 For new installations, no splicing of wires is to be made.
- .9 Prior to installing raceways, submit to the NRC Departmental Representative a proposed method and layout of conduit for approval.

3.3 EQUIPMENT IDENTIFICATION

- .1 Label each manual alarm station and each audible signal device with its unique identification number as per drawings. Use lamicoid nameplates as per Section 26 05 00.
- .2 Label each initiating device use P-Touch type as per Section 26 05 00. Devices are to be numbered per the format shown below.

Example M-10 fire alarm #1 Heat detector 000001

10FAS-01-GND-HD-000001

- .3 Refer to 26 05 00 for fire alarm conduit color coding.
- .4 Label wires as per drawing and as per Section. 26 05 00.

3.4 SCHEDULING OF SHUTDOWNS

- .1 Make written shutdown request to the NRC Departmental Representative at least 48 hours in advance. Acceptance of shutdown request will be determined by the NRC

Departmental Representative based on building user needs. Fire alarm systems are to be shut down by NRC staff only. **Contractor is not to shutdown system on their own.**

3.5 INTEGRATION INTO SYSTEM MONITORING AT BUILDING M-1

Presently all NRC buildings in Ottawa report back their fire alarm status to the M1 building central monitoring station. The monitoring station consists of a computer graphics terminal showing building layouts of each building, and is linked on an internal NRC network. The new fire alarm system under this contract must communicate all addressable input points to the existing computer graphics monitoring station, Fireworks by Chubb Edwards. All required modifications to the existing Fireworks station are to be included in this tender.

- .1 Addressable devices:
 - .1 Integrate any new addressable devices installed as part of this project into the monitoring system at building M-1.
 - .2 Remove from the monitoring system at building M-1 any addressable devices removed as part of this project.
 - .3 Make appropriate changes to the monitoring system at building M-1 to reflect any relocated addressable devices.
 - .4 All work on the monitoring system at building M-1 is to be done by factory trained technician.

3.6 ACCEPTANCE TEST

- .1 Perform tests in accordance with the latest regulations and in the presence of the NRC Departmental Representative and the representative of the regulating authority.
- .2 Test each device and alarm circuit to ensure manual alarm stations, thermal and smoke detectors transmit alarms to control panel and actuate alarm.
- .3 Check annunciator panels to ensure that the correct zones are activated.
- .4 Simulate grounds and breaks on alarm and signalling circuits to ensure proper operation of trouble signals.
- .5 Record amperage drawn by audible signal device circuits if new audible signal devices have been added to the circuit.
- .6 Give the NRC Departmental Representative one set of marked in red prints labelled "As Built".
- .7 Provide the NRC Departmental Representative with a letter of verification from the manufacturer of the equipment stating that the equipment supplied under this contract has been installed as per the latest CAN/ULC S537 and CAN/ULC-S524 standards and as per the latest edition of the Ontario Building Code.
- .8 For new fire alarm systems provide the NRC Departmental Representative with a certificate of verification stating that the equipment has been installed as per the latest CAN/ULC-S537 and CAN/ULC-S524 standards and as per the latest edition of the National Building Code.

SUBMERSIBLE SUMP PUMPS & CONTROL PANEL PACKAGES

MYERS® SX50/SX50H

Myers SX50 series pumps are versatile performers designed for commercial, municipal and industrial applications. The SX50 (high flow) and the SX50H (high pressure) are designed to pump contaminated water containing a wide range of pollutants. Each pump is matched with a safety-proven Myers® control box (simplex or duplex, single- and three-phase models).

APPLICATIONS

Service stations, "quick-lube" stations, car/truck washes, truck docks

SPECIFICATIONS

- Capacities – Up to 95 GPM (360 LPM)
- Shut-off Head – Up to 34' (10 m)
- Operation: On/Off – Turns on/off with tethered switch hooked to control box
- Solids Handling – (SX50; SX50H) 2"/3/4" (50 mm / 19 mm)
- Liquids Handling – Domestic effluent and drain water
- Intermittent Liquid Temperature – Up to 140°F (60°C)
- Motor/Electrical Data – 1/2 HP, 1750 RPM, capacitor start, 60Hz; see Ordering Information chart for voltage and phase
- Acceptable pH Range – 6-9
- Winding Insulation Temperature (Class B) – 266°F (up to 120°C)
- Specific Gravity – .9-1.1
- Viscosity – 28-35 SSU
- Discharge, NPT – SX50: 2" (50 mm)
SX50H: 1-1/2" (38.1 mm)
- Min. Sump Diameter – Simplex: 24" (61.0 mm)
Duplex: 36" (91.4 mm)

FEATURES

PUMP

Tough, Safe Performance
Rugged and explosion-proof pump design commercial, industrial and municipal applications

Hazardous Duty
UL listed for use in Class 1, Division 1, Group D hazardous locations with contaminated water

Tough Against Corrosion
All cast iron construction resists the most extreme corrosive environments

Cool Running
Oil-filled motor for continuous bearing lubrication and maximum heat dissipation

Longer Bearing Life
Recessed impeller reduces radial bearing loads, increasing bearing life

Built-in Protection
Sensor and probe protect against overheating and seal leak

Easy Starting
High-torque capacitor start, single phase motor for assured starting under heavy load

CONTROL PANEL
NEMA 4X Enclosure with Inner Door
Separate Pump and Control Circuit Breaker

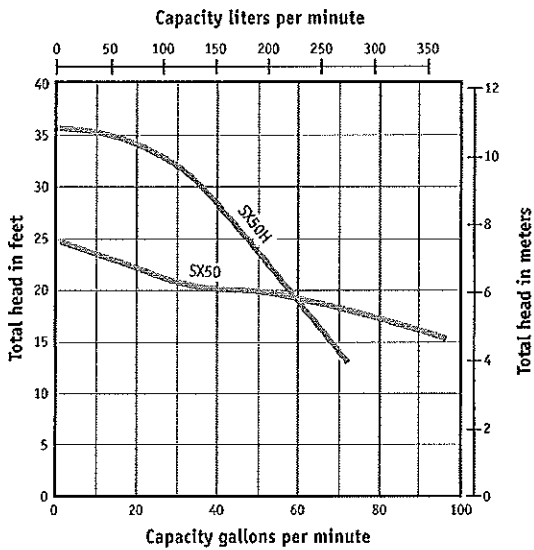

H-O-A Switch
Run, Seal, Leak Alarm Light

MYERS® SX50/SX50H ✓

DIMENSIONS

PUMP PERFORMANCE

MYERS® SX50/SX50H

SPECIFICATIONS

Pump Model – Pump shall be of the centrifugal type Myers model SX50/SX50H with an integrally built in submersible type motor. Discharge shall be 1-1/2" NPT OR 2" NPT . Pump shall be capable of passing a full 3/4" or 2" diameter solid. Motor shall be UL listed for Class 1, Div. 1, Group D.

Operating Conditions – Pump shall have a capacity of _____ GPM at a total head of _____ feet and shall use a 1/2 HP motor operating at 1750 RPM.

Motor – Pump motor shall be of the submersible type rated 1/2 horsepower at 1750 RPM. Motor shall be for single phase 208 volts , 230 volts or three phase 200 volts , 230 volts , 460 volts or 575 volts . Single phase motors shall be of P.S.C. type NEMA N type. Three phase motors shall be NEMA B type.

Stator winding shall be of the open type with Class B insulation good for 130°C (266°F) maximum operating temperature. Winding housing shall be filled with a clean high dielectric oil that lubricates bearings and seals and transfers heat from windings and rotor to outer shell. Air-filled motors which do not have the superior heat dissipating capabilities of oil-filled motors shall not be considered equal.

Motor shall have two heavy duty ball bearings to support pump shaft and take radial and thrust loads and a sleeve guide bushing directly above the lower seal to take radial load and act as flame path for seal chamber. Ball bearings shall be designed for 50,000 hours B-10 life. Stator shall be pressed into motor housing.

A heat sensor thermostat shall be attached to top end of motor winding and shall be connected in series with the magnetic contactor coil in control box to stop motor if motor winding temperature reaches 221°F. Thermostat to reset automatically when motor cools. Two heat sensors shall be used on 3 phase motors.

The motor pump shaft shall be of #416 stainless steel threaded to take pump impeller.

Seals – Motor shall be protected by two mechanical seals mounted in tandem with a seal chamber between the seals. Seal chamber shall be oil filled to lubricate seal face and to transmit heat from shaft to outer shell.

Seal face shall be carbon and ceramic and lapped to a flatness of one light band. Lower seal faces shall be _____ carbide (optional).

A double electrode shall be mounted in the seal chamber to detect any water entering the chamber through the lower seal. Water in the chamber shall cause a red light to turn on at the control box. This signal shall not stop motor but shall act as a warning only, indicating service is required.

Pump Impeller – The pump impeller shall be of the recessed Myers type to provide an open unobstructed passage through the volute for solids. Impeller shall be of cast iron and shall be threaded onto stainless steel shaft.

Pump Case – The pump case shall be designed for a recessed vortex impeller and have unobstructed passageways to handle full spherical solids. The pump volute shall be constructed of Class 30 gray cast iron.

Motor Castings – The motor housing castings shall be high tensile strength Class 30 gray cast iron.

Corrosion Protection – All iron castings shall be pretreated with phosphate and chromic rinse and to be painted before machining and all machined surfaces exposed to the sewage water to be repainted. All fasteners to be 302 stainless steel.

Bearing End Cap – Upper motor bearing cap shall be a separate casting for easy mounting and replacement.

Power Cables – Power cord and control cord shall be double sealed. The power and control conductor shall be single strand sealed with epoxy potting compound and then clamped in place with rubber seal bushing to seal outer jacket against leakage and to provide for strain pull. Cords shall withstand a pull of 300 pounds to meet UL requirements.

Insulation of power and control cords shall be type SOOW. Both control and power cords shall have a green carrier ground conductor that attaches to motor frame.

Pentair Sensor Level Control Switch

Mechanically-activated, narrow-angle float switch designed to activate pump control panels and alarms.

This narrow-angle sensing device is used to accurately monitor liquid levels in:

- potable water
- water
- sewage applications

The Sensor Level control switch is not sensitive to rotation.

Normally Open Model (high level).

The control switch turns on (closes) when the float tips slightly above horizontal signaling a high level, and turns off (opens) when the float drops slightly below horizontal.

Normally Closed Model (low level)

The control switch turns on (closes) when the float tips slightly below horizontal signaling a low level, and turns off (opens) when the float tips slightly above horizontal.

FEATURES

- Passed NSF Standard 61 protocol by an approved Water Quality Association laboratory.
- Mechanically-activated, snap action contacts.
- High impact, corrosion resistant, polypropylene float housing.
- Not sensitive to rotation.
- Control differential of 1.5 inches (4 cm) above or below horizontal.
- Yellow colored cap for easy identification of normally open control switch.
- White colored cap for easy identification of normally closed control switch.
- UL Listed for use in water and sewage.
- CSA Certified.
- Three-year limited warranty.

SPECIFICATIONS

- CABLE:** flexible 18 gauge, 2 conductor (UL, CSA) SJOW, water-resistant (CPE)
- FLOAT:** 2.74 inch diameter x 4.83 inch long (7.0 x 12.3 cm) high impact, corrosion resistant, polypropylene housing for use in sewage and water up to 140°F (60°C)
- MAXIMUM WATER DEPTH:** 30 feet (9 meters), 13 psi (90 kPa)
- ELECTRICAL:** 5 amp, 125/250 VAC, 50/60 Hz

NOTE: This switch is not recommended for controlling:

- electric loads less than 100 milliamps, 12 VAC
- non-arcing electric loads

OPTIONS

This switch is available:

- CE certified unit available upon request.
- for normally open (high level) applications or normally closed (low level) applications.
- in standard cable lengths of 10, 15, 20, or 30 feet and 3, 5, 6, or 10 meters (longer lengths available)
- with two mounting options that allow for flexibility in installation:

Mounting Clamp: for applications where the switch can be attached to a discharge pipe or similar mounting device.

Externally Weighted: for applications where the switch can be suspended from above.

MYERS® ME3 SERIES ✓

The Myers ME3 series submersible effluent pumps are constructed of the most durable combination of materials to withstand the harshest environments. The ME3 is available with a recessed impeller for high-head applications or an enclosed impeller for high-flow installations. Available in tethered automatic piggyback models or manual models for use with external controls.

APPLICATIONS

Effluent removal, sump drainage, water transfer, flood control

SPECIFICATIONS

Capacities – ME3H: 36 GPM (136 LPM); ME3F: 66 GPM (249 LPM)
Shut-off Head – ME3H: 35' (10.7 m); ME3F: 31' (9.5 m)
Maximum Spherical Solids – 3/4" (19 mm)
Liquids Handling – Domestic effluent and drain water
Intermittent Liquid Temperature – Up to 140°F (60°C)
Motor/Electrical Data – 1/3 HP, 1550 RPM, shaded pole, oil-filled; 115V, 12A, 1Ø, 60Hz; 230V, 6A, 1Ø, 60Hz
Acceptable pH Range – 6-9
Specific Gravity – .9-1.1
Viscosity – 28-35 SSU
Discharge, NPT – 1-1/2" (50.8 mm)
Housing – Heavy cast iron
Minimum Sump Diameter – Simplex: 24" (61 cm)
Duplex: 36" (91.4 cm)
Power Cord – 20', 16/3, SJTW

FEATURES

Two Powerful Pumps

High head (ME3H), High flow (ME3F)

Maximum Heat-handling

Durable, oil-filled motor for continuous bearing lubrication and maximum heat dissipation

Powerful Starts

High-torque, no starting switches or relays to wear out

Thermal Protection

Heat sensor overload protection with automatic reset when motor cools to a safe operating temperature

Longer-lasting Motor

Lower ball bearing eliminates sleeve bearing wear and reduces motor wear

Manual Operation

Tethered automatic models can be operated manually by unplugging piggyback switch and plugging pump directly into outlet

MYERS® ME3 SERIES

SPECIFICATIONS

Effluent Pumps – Pump(s) shall be F. E. Myers ME3F / ME3H series sump pumps selected in accordance with the following design criteria:

Number of Pumps:	<u>1</u>	Motor Horsepower:	1/3
Primary Design Flow:	<u>0.32 LIS</u>	Motor Speed:	1550 RPM
Primary Design Head:	<u>106.3 KPA</u>	Electrical:	115 Volts, 1Ø, 60 Hz or 230 Volts, 1Ø, 60 Hz

Minimum Shut-off Head: 36

Pump – The pump shall be designed to handle septic tank effluent and be capable of passing 3/4 inch spherical solids. The pump shall be capable of handling liquids with temperatures to 140°F intermittent.

Motor – The pump motor shall be of the submersible type rated 1/3 hp at 1550 RPM and shall be for ____ 115 volts or ____ 230 volts single phase, 60 cycles. Single phase motor shall be of the shaded pole type with no relays or starting switches. Stator winding shall be of the open type with Class A insulation rated for 105°C maximum operating temperature. The winding housing shall be filled with clean dielectric oil to lubricate bearings and seals, and transfer heat from the windings to the outer shell. The motor winding assembly shall be pressed into the stator housing for best alignment and heat transfer.

The motor shall be capable of operating over the full range of the performance curve without overloading the motor and causing any objectionable noise or vibration. The motor shall have two bearings to support the rotor; an upper sleeve bearing to accommodate radial loads and a lower sleeve bearing with thrust pad to take thrust and radial loads.

A heat sensor thermostat and overload shall be attached to the top end of the motor windings and shall be wired in series with the windings to stop the motor if the motor winding temperature reaches 221°F. The overload thermostat shall reset automatically when the motor cools to a safe operating temperature.

Power Cord – The motor power cord shall be 20 feet SJTW type. The cord shall have a molded compression grommet to insulate electrical connections. The grommet shall thread into the motor housing to provide a positive seal and to prevent leaking of liquid into the motor housing. The sealing grommet shall provide strain relief for the power cord assembly.

Optional Control Switch – The effluent pump shall be controlled by an optional piggyback float switch. The float switch shall be of a non-mercury type and be capable of directly controlling the pump motor without the need for an external control panel.

Shaft Seal – The motor shall be protected by a rotating mechanical shaft seal. The seals shall have carbon and ceramic seal faces lapped to a tolerance of one light band. Metal parts and springs for seals shall be 300 series stainless steel.

Pump Impeller (ME3F) – The pump impeller shall be of the two vane enclosed type. The impeller shall be constructed of engineered thermoplastic. A stainless steel wear ring shall be molded into the neck of the impeller to provide a sealing surface. A replaceable Buna-N sealing cup shall effect a seal between the volute and impeller in order to maintain high efficiency and prevent recirculation.

Pump Impeller (ME3H) – The pump impeller shall be of the recessed type. The impeller shall be constructed of engineered thermoplastic.

Motor Castings – The motor housing castings shall be of high tensile strength Class 30 gray cast iron. Castings shall be treated with phosphate and chromate rinse and painted with a high quality air dry alkyd enamel for corrosion protection.

Pump Case – The pump case shall be a high efficiency volute design capable of passing 3/4 inch spherical solids. The pump volute shall be constructed of Class 30 gray cast iron.

Fasteners – All exposed fasteners shall be of 300 series stainless steel.

Pentair Sensor Level Control Switch

Mechanically-activated, narrow-angle float switch designed to activate pump control panels and alarms.

This narrow-angle sensing device is used to accurately monitor liquid levels in:

- potable water
- water
- sewage applications

The Sensor Level control switch is not sensitive to rotation.

Normally Open Model (high level).

The control switch turns on (closes) when the float tips slightly **above** horizontal signaling a high level, and turns off (opens) when the float drops slightly below horizontal.

Normally Closed Model (low level)

The control switch turns on (closes) when the float tips slightly **below** horizontal signaling a low level, and turns off (opens) when the float tips slightly above horizontal.

FEATURES

- Passed NSF Standard 61 protocol by an approved Water Quality Association laboratory.
- Mechanically-activated, snap action contacts.
- High impact, corrosion resistant, polypropylene float housing.
- Not sensitive to rotation.
- Control differential of 1.5 inches (4 cm) above or below horizontal.
- Yellow colored cap for easy identification of normally open control switch.
- White colored cap for easy identification of normally closed control switch.
- UL Listed for use in water and sewage.
- CSA Certified.
- Three-year limited warranty.

SPECIFICATIONS

CABLE: flexible 18 gauge, 2 conductor (UL, CSA) SJOW, water-resistant (CPE)

FLOAT: 2.74 inch diameter x 4.83 inch long (7.0 x 12.3 cm) high impact, corrosion resistant, polypropylene housing for use in sewage and water up to 140°F (60°C)

MAXIMUM WATER DEPTH: 30 feet (9 meters), 13 psi (90 kPa)

ELECTRICAL: 5 amp, 125/250 VAC, 50/60 Hz

NOTE: This switch is not recommended for controlling:

- electric loads less than 100 milliamps, 12 VAC
- non-arcing electric loads

OPTIONS

This switch is available:

- CE certified unit available upon request.
- for normally open (high level) applications or normally closed (low level) applications.
- in standard cable lengths of 10, 15, 20, or 30 feet and 3, 5, 6, or 10 meters (longer lengths available)
- with two mounting options that allow for flexibility in installation:

Mounting Clamp: for applications where the switch can be attached to a discharge pipe or similar mounting device.

Externally Weighted: for applications where the switch can be suspended from above.

MP1 Montant à payer – Généralités

1.1 Sous réserve de toutes autres dispositions du Contrat, Sa Majesté paie à l'Entrepreneur, aux dates et de la manière énoncées ci-après, le montant par lequel:

1.1.1 l'ensemble des montants prévus à l'article MP2 excède,

1.1.2 l'ensemble des montants prévus à l'article MP3

et l'Entrepreneur accepte le paiement comme paiement final de tout ce qu'il a fourni et fait relativement aux travaux auxquels le paiement se rapporte.

MP2 Montants payables à l'Entrepreneur

2.1 Les montants mentionnés à l'alinéa MP1.1.1 sont l'ensemble :

2.1.1 des montants prévus dans les Articles de convention; et

2.1.2 le montant, s'il en est, payable à l'Entrepreneur conformément aux Conditions générales.

MP3 Montants payables à Sa Majesté

3.1 Les montants mentionnés à l'alinéa MP1.1.2 sont l'ensemble des montants, s'il en est, que l'Entrepreneur est tenu de payer à Sa Majesté en vertu du Contrat.

3.2 Dans tout paiement fait à l'Entrepreneur, le fait pour Sa Majesté d'omettre de déduire d'un montant mentionné à l'article MP2 un montant mentionné au paragraphe MP3.1 ne peut constituer un abandon de son droit de faire une telle déduction, ni une reconnaissance de l'absence d'un tel droit lors de tout paiement ultérieur à l'Entrepreneur.

MP4 Date de paiement

4.1 Dans les présentes modalités de paiement :

4.1.1 «période de paiement» signifie un intervalle de 30 jours consécutifs ou tout autre intervalle plus long convenu entre l'Entrepreneur et le représentant ministériel;

4.1.2 un montant est «dû et payable» lorsqu'il doit être versé à l'Entrepreneur par Sa Majesté selon les paragraphes MP4.4, MP4.7 ou MP4.10;

4.1.3 un montant est en souffrance lorsqu'il demeure impayé le premier jour suivant le jour où il est dû et payable;

4.1.4 «date de paiement» signifie la date du titre négociable d'un montant dû et payable par le Receveur général du Canada et émis aux fins de paiement;

4.1.5 «taux d'escompte» signifie le taux d'intérêt, fixé par la Banque du Canada, en vigueur à l'ouverture des bureaux à la date de paiement.

4.2 À l'expiration d'une période de paiement, l'Entrepreneur doit remettre au représentant ministériel

une demande d'acompte par écrit et y décrire toute partie achevée des travaux et tous les matériaux livrés aux lieux des travaux, mais non incorporés aux travaux, durant la période de paiement faisant l'objet de la demande d'acompte.

- 4.3 Le représentant ministériel, dans les dix jours suivant réception d'une demande d'acompte mentionnée au paragraphe MP4.2 :
- 4.3.1 fait l'inspection de la partie des travaux et des matériaux qui y sont décrits, et
 - 4.3.2 présente un rapport sur le progrès des travaux, dont le représentant ministériel envoie une copie à l'Entrepreneur, indiquant la valeur de la partie des travaux et des matériaux décrits dans la demande d'acompte que, selon le représentant ministériel :
 - 4.3.2.1 sont conformes aux dispositions du Contrat, et
 - 4.3.2.2 n'étaient visés par aucun autre rapport concernant des travaux du Contrat.
- 4.4 Sous réserve de l'article MP1 et du paragraphe MP4.5, Sa Majesté, au plus tard 30 heures après la réception par le représentant ministériel de la demande d'acompte mentionnée au paragraphe MP4.2, paie à l'Entrepreneur :
- 4.4.1 une somme égale à 95% de la valeur indiquée dans le rapport sur le progrès des travaux mentionné à l'alinéa MP4.3.2, si l'Entrepreneur a fourni un cautionnement pour le paiement de la main-d'œuvre et des matériaux, ou
 - 4.4.2 un montant égal à 90% de la valeur indiquée dans le rapport sur le progrès des travaux mentionné à l'alinéa 4.3.2, si l'Entrepreneur n'a pas fourni un cautionnement pour le paiement de la main-d'œuvre et des matériaux.
- 4.5 Il est essentiel, pour que Sa Majesté s'acquitte de son oblégation mentionnée au paragraphe MP4.4, que l'Entrepreneur fasse et remette au représentant ministériel,
- 4.5.1 une déclaration conforme à celle décrite au paragraphe MP4.6, pour les travaux et matériaux visés dans la demande d'acompte prévue au paragraphe MP4.2,
 - 4.5.2 dans le cas de la première demande d'acompte de l'Entrepreneur, un calendrier d'exécution conformément aux parties pertinentes des Devis, et
 - 4.5.3 si un calendrier est exigé, sa mise à jour aux moments précisés dans les parties pertinentes des Devis.
- 4.6 Dans la déclaration mentionnée au paragraphe MP4.5, l'Entrepreneur atteste :
- 4.6.1 qu'au jour de la demande d'acompte de l'Entrepreneur, l'Entrepreneur s'est acquitté de toutes ses obligations légales aux termes des Conditions de travail, et
 - 4.6.2 qu'au jour de la précédente demande d'acompte, l'Entrepreneur s'est acquitté de toutes ses obligations légales envers ses sous-entrepreneurs et ses fournisseurs de matériaux en ce qui concerne les travaux visés par le Contrat.

- 4.7 Sous réserve de l'article MP1 et du paragraphe MP4.8, Sa Majesté verse à l'Entrepreneur, dans les 30 jours suivant la date de délivrance du Certificat provisoire d'achèvement mentionné au paragraphe CG44.2, la somme mentionnée à l'article MP1, moins l'ensemble :
- 4.7.1 de tous les paiements effectués conformément au paragraphe MP4.4;
 - 4.7.2 du montant égal au coût pour Sa Majesté, estimé par le représentant ministériel de la correction de toutes déficiences dans les travaux et décrites dans le Certificat provisoire d'achèvement; et
 - 4.7.3 du montant égal au coût pour Sa Majesté, estimé par le représentant ministériel de l'achèvement de toute partie des travaux décrite dans le Certificat provisoire d'achèvement ne comportant pas la correction des déficiences visées par l'alinéa MP4.7.2.
- 4.8 Il est essentiel, pour que Sa Majesté s'acquitte de son obligation mentionnée au paragraphe MP4.7, que l'Entrepreneur fasse et remette au représentant ministériel,
- 4.8.1 une déclaration conforme à celle décrite au paragraphe MP4.9 relativement au Certificat provisoire d'achèvement mentionné au paragraphe CG44.2, et
 - 4.8.2 s'il est précisé dans les parties pertinentes des Devis, une mise à jour du calendrier d'exécution mentionné à l'alinéa MP4.5.2 qui, en plus des exigences énoncées, soit suffisamment détaillé concernant l'achèvement des travaux non-terminés et la correction de tous les défauts, le tout à la satisfaction du représentant ministériel.
- 4.9 Dans la déclaration mentionnée au paragraphe MP4.8, l'Entrepreneur atteste qu'au jour de l'émission du Certificat provisoire d'achèvement :
- 4.9.1 l'Entrepreneur s'est acquitté de toutes ses obligations légales aux termes des Conditions de travail;
 - 4.9.2 l'Entrepreneur s'est acquitté de toutes ses obligations légales envers ses sous-entrepreneurs et ses fournisseurs de matériaux en ce que concerne les travaux visés par le Contrat; et
 - 4.9.3 l'Entrepreneur s'est acquitté de toutes ses obligations mentionnées au paragraphe CG14.6.
- 4.10 Sous réserve de l'article MP1 et du paragraphe MP4.11, Sa Majesté verse à l'Entrepreneur, dans les 60 jours suivant la date de délivrance du Certificat définitif d'achèvement mentionné au paragraphe CG44.1, la somme mentionnée à l'article MP1, moins l'ensemble :
- 4.10.1 de tous les paiements effectués conformément au paragraphe MP4.4, et
 - 4.10.2 de tous les paiements effectués conformément au paragraphe MP4.7.
- 4.11 Il est essentiel, pour que Sa Majesté s'acquitte de son obligation mentionnée au paragraphe MP4.10, que l'Entrepreneur fasse et remette au représentant ministériel une déclaration conforme

à celle décrite au paragraphe MP4.12.

- 4.12 Dans la déclaration mentionnée au paragraphe MP4.11, l'Entrepreneur atteste, outre les mentions requises en vertu du paragraphe MP4.9, que l'Entrepreneur s'est acquitté de toutes ses obligations légales et qu'il a satisfait à toutes les réclamations légales formulées contre lui par suite de l'exécution des travaux.

MP5 Le rapport sur le progrès des travaux et le paiement y afférent ne lient pas Sa Majesté

- 5.1 Ni le rapport sur le progrès des travaux mentionné au paragraphe MP4.3, ni les paiements effectués par Sa Majesté en conformité des Modalités ne doivent être interprétés comme une admission que les travaux et les matériaux sont, en totalité ou en partie, complets, satisfaisants ou conformes au Contrat.

MP6 Retard du paiement

- 6.1 Nonobstant l'article CG7, le retard apporté par Sa Majesté à faire un paiement à sa date d'exigibilité en vertu du présent Contrat, ne constitue pas un bris du Contrat.
- 6.2 Sa Majesté versera, sans que l'Entrepreneur le demande, des intérêts simples au taux d'escompte plus 1 ¼ p. 100 sur les montants en souffrance en vertu de l'alinéa MP4.1.3, intérêts qui s'appliquent à compter du premier jour de retard jusqu'au jour précédant la date de paiement, sauf que
- 6.2.1 les intérêts se seront ni exigibles ni versés à moins que le montant dont il est question au paragraphe MP6.2 ait été en souffrance pendant plus de 15 jours suivant :
- 6.2.1.1 la date à laquelle ladite somme est devenue due et payable, ou
- 6.2.1.2 la date de réception par le représentant ministériel de la déclaration conforme à celle décrite aux paragraphes MP4.5, MP4.8 ou MP4.11;
- selon la plus avancée de ces deux dates, et
- 6.2.2 les intérêts ne seront ni exigibles ni versés sur les paiements anticipés en souffrance, le cas échéant.

MP7 Droit de compensation

- 7.1 Sans restreindre tout droit de compensation ou de retenue découlant explicitement ou implicitement de la loi ou d'une disposition quelconque du Contrat, Sa Majesté peut opérer compensation de toute somme due par l'Entrepreneur à Sa Majesté en vertu du Contrat ou de tout contrat en cours, à l'encontre des sommes dues par Sa Majesté à l'Entrepreneur en vertu du Contrat.
- 7.2 Pour les fins du paragraphe MP7.1, l'expression «contrat en cours» signifie un contrat entre Sa Majesté et l'Entrepreneur :
- 7.2.1 en vertu duquel l'Entrepreneur est légalement obligé d'exécuter ou de fournir du travail,

de la main-œuvre ou des matériaux; ou

- 7.2.2 à l'égard duquel Sa Majesté a, depuis la date à laquelle les présents Articles de convention sont intervenus, exercé le droit de retirer à l'Entrepreneur les travaux faisant l'objet du contrat.

MP8 Paiement en cas de résiliation

- 8.1 En cas de résiliation du Contrat conformément à l'article CG41, Sa Majesté paie à l'Entrepreneur le plus tôt possible eu égard aux circonstances, tout montant qui lui est légalement dû et payable.

MP9 Intérêts sur les réclamations réglées

- 9.1 Sa Majesté versera à l'Entrepreneur des intérêts simples sur le montant d'une réclamation réglée, au taux d'escompte moyen plus q $\frac{1}{4}$ p. 100 à compter du premier jour de retard jusqu'au jour précédant la date de paiement.
- 9.2 Aux fins du paragraphe MP9.1:
- 9.2.1 une réclamation est réputée être réglée lorsqu'une entente par écrit est signée par le représentant ministériel et l'Entrepreneur et fait état du montant de la réclamation à verser par Sa Majesté et des travaux pour lesquels ledit montant doit être versé;
- 9.2.2 le «taux d'escompte moyen» signifie le taux d'intérêt moyen, fixé par la Banque du Canada, en vigueur à la fin de chaque mois civil au cours de la période pendant laquelle la réclamation réglée était impayée;
- 9.2.3 une réclamation réglée est réputée être impayée à compter de la journée qui suit immédiatement la date à laquelle la réclamation était due et payable conformément au Contrat, s'il n'y avait pas eu contestation.
- 9.3 Aux fins de l'Article MP9, une réclamation signifie tout montant faisant l'objet d'un litige et assujéti à des négociations entre Sa Majesté et l'Entrepreneur en vertu du Contrat.

CG1 Interpretation

1.1 Dans le Contrat:

- 1.1.1 tout renvoi à une autre partie du Contrat désignée par des numéros précédés de lettres est censé renvoyer à la partie du Contrat qui est désignée par cette combinaison de lettres et de chiffres, de même qu'à toute autre partie du Contrat qui y est mentionnée ;
- 1.1.2 « Contrat » signifie les documents mentionnés dans les Articles de convention;
- 1.1.3 « garantie du contrat » signifie toute garantie fournie à Sa Majesté par l'Entrepreneur conformément au Contrat;
- 1.1.4 « le représentant ministériel » signifie l'officier ou l'employé de Sa Majesté désigné aux Articles de convention et toute personne autorisée spécialement par le représentant ministériel à accomplir, en son nom, n'importe laquelle des fonctions qui lui sont confiées en vertu du Contrat, et signalée comme tel par écrit à l'Entrepreneur;
- 1.1.5 « matériaux » comprend toutes les marchandises, articles et choses à être fournies par ou pour l'Entrepreneur en vertu du Contrat, pour être incorporés dans les travaux;
- 1.1.6 « Ministre » comprend une personne agissant pour ou, si la charge est sans titulaire, à la place du Ministre ou des personnes lui succédant, de même que son ou leurs adjoints ou représentants dûment nommés aux fins du Contrat;
- 1.1.7 « personne » comprend, sauf lorsque le contexte exige une interprétation différente, une société, une entreprise, une firme, une co-entreprise, un consortium et une corporation;
- 1.1.8 « outillage » comprend les animaux, outils, instruments, machines, véhicules, bâtiments, ouvrages, équipements et marchandises, articles et choses autres que les matériaux, qui sont nécessaires à l'exécution des travaux;
- 1.1.9 « sous-entrepreneur » signifie une personne à qui l'Entrepreneur a, conformément à l'article CG4, confié l'exécution des travaux en tout ou en partie;
- 1.1.10 « surintendant » signifie l'employé de l'Entrepreneur désigné par ce dernier pour remplir les fonctions décrites à l'article CG19;
- 1.1.11 « travaux » comprend, sous réserve de toute stipulation expressément contraire dans le Contrat, tout ce que l'Entrepreneur doit faire, fournir, livrer ou accomplir pour l'exécution du Contrat.

1.2 Sauf quant à ceux apparaissant aux Plans et devis, les en-têtes apparaissent dans le Contrat, ne font pas partie du Contrat, mais y sont uniquement pour fin d'utilité pratique.

1.3 Aux fins de l'interprétation du Contrat, en cas de contradiction ou de divergence entre les Plans et devis et les Conditions générales, les Conditions générales prévalent.

1.4 Dans l'interprétation des Plans et devis, en cas de contradiction ou de divergence entre :

- 1.4.1 les Plans et les devis, les devis prévalent;
- 1.4.2 les plans, les plans tracés à l'échelle la plus grande prévalent; et
- 1.4.3 les dimensions exprimées en chiffres et les dimensions à l'échelle, les dimensions exprimées en chiffres prévalent.

CG2 Successeurs et ayants droit

- 2.1 Le Contrat est au bénéfice des parties au Contrat, de même que de leurs héritiers légaux, exécuteurs, administrateurs, successeurs et ayants droit, qui sont tous par ailleurs liés par ses dispositions.

CG3 Cession du Contrat

- 3.1 L'Entrepreneur ne peut céder le Contrat, en tout ou en partie, sans le consentement écrit du Ministre.

CG4 Sous-traitance par l'Entrepreneur

- 4.1 Sous réserve des Conditions générales, l'Entrepreneur peut sous-traiter une partie quelconque des travaux.
- 4.2 L'Entrepreneur doit aviser le représentant ministériel par écrit de son intention de sous-traiter.
- 4.3 L'avis mentionné au paragraphe CG4.2 doit identifier le sous-entrepreneur de même que la partie des travaux qu'il entend lui confier.
- 4.4 Le représentant ministériel peut s'objecter à la sous-traitance projetée en avisant par écrit l'Entrepreneur dans les six jours suivant la réception par le représentant ministériel de l'avis mentionné au paragraphe CG4.2.
- 4.5 Si le représentant ministériel s'oppose à une sous-traitance en vertu du paragraphe CG4.4, l'Entrepreneur ne peut procéder à la sous-traitance envisagée.
- 4.6 L'Entrepreneur ne peut, sans la permission écrite du représentant ministériel, remplacer un sous-entrepreneur dont il a retenu les services conformément aux Conditions générales.
- 4.7 Tout contrat entre l'Entrepreneur et un sous-entrepreneur doit comporter tous les termes et conditions du Contrat qui sont d'application générale.
- 4.8 Nul contrat entre l'Entrepreneur et un sous-entrepreneur ou nul consentement de le représentant ministériel à tel contrat sera interprété comme relevant l'Entrepreneur de quelque obligation en vertu du Contrat ou comme imposant quelque responsabilité à Sa Majesté.

CG5 Modifications

- 5.1 Nulle modification ou changement à quelque disposition du Contrat aura d'effet avant que d'avoir été consignée par écrit.

CG6 Nulle obligation implicite

- 6.1 Il ne découlera du Contrat aucune disposition ou obligation implicite de la part de Sa Majesté; seules les dispositions expresses du Contrat, stipulées par Sa Majesté, doivent servir de fondement à tout droit contre Sa Majesté.
- 6.2 Le présent Contrat remplace toutes communications, négociations et ententes, écrites ou verbales, concernant les travaux et qui auraient en lieu avant la date du Contrat.

CG7 Caractère essentiel des délais et échéances

- 7.1 Le temps est l'essence même du Contrat.

CG8 Indemnisation par l'Entrepreneur

- 8.1 L'Entrepreneur doit tenir Sa Majesté indemne et à couvert de toutes réclamations, demandes, pertes, frais, dommages, actions, poursuites ou procédures de la part de quiconque, fondés, découlant, reliés, occasionnés ou attribuables aux activités de l'Entrepreneur, de ses employés, agents, sous-entrepreneurs et sous-entrepreneurs de ces derniers dans l'exécution des travaux faisant l'objet du Contrat, incluant toute contrefaçon ou prétendue contrefaçon d'un brevet d'invention ou de toute autre forme de propriété intellectuelle.
- 8.2 Aux fins du paragraphe CG8.1, le terme « activités » comprend tout acte ou omission, de même que tout retard à accomplir un acte.

CG9 Indemnisation par Sa Majesté

- 9.1 Sa Majesté, sous réserve des dispositions de la Loi sur la responsabilité de la Couronne, de la Loi sur les brevets et de toute autre loi affectant les droits, pouvoirs, privilèges ou obligations de Sa Majesté, doit tenir l'Entrepreneur indemne et à couvert de toutes réclamations, demandes, pertes, frais, dommages, actions, poursuites ou procédures découlant de ses activités en vertu du Contrat et directement attribuables à :
- 9.1.1 une absence ou un vice, actuel ou allégué, dans le titre de Sa Majesté concernant l'emplacement des travaux, ou
- 9.1.2 une contrefaçon ou prétendue contrefaçon par l'Entrepreneur de tout brevet d'invention ou de toute autre forme de propriété intellectuelle, dans l'exécution de tout acte aux fins de Contrat, comportant l'utilisation d'un modèle, d'un plan, d'un dessin ou de toute autre chose fournis par Sa Majesté à l'Entrepreneur aux fins des travaux.

CG10 Interdiction aux députés de la Chambre des communes de tirer profit d'un contrat

- 10.1 Conformément à la Loi sur le Parlement du Canada, il est expressément interdit à tout membre de la Chambre des communes de posséder quelque part ou intérêt dans le Contrat, ou d'en tirer quelque bénéfice ou profit.

CG11 Avis

- 11.1 Tout avis, consentement, ordre, décision, directive ou communication autre qu'un avis suivant le paragraphe CG11.4, qui peut être donné à l'Entrepreneur conformément au Contrat, peut être donné de quelque manière que ce soit.
- 11.2 Tout avis, consentement, ordre, décision, directive ou autre communication devant être donné par écrit à une partie ou une autre conformément au Contrat, sera, sous réserve du paragraphe CG11.4, réputé avoir été effectivement donné :
- 11.2.1 à l'Entrepreneur, s'il a été livré personnellement à l'Entrepreneur ou au surintendant de l'Entrepreneur, ou s'il a été envoyé par la poste, par télex ou par télécopieur à l'Entrepreneur, à l'adresse indiquée au paragraphe A4.1; ou
- 11.2.2 à Sa Majesté, s'il a été livré personnellement au représentant ministériel, ou s'il a été envoyé par la poste, par télex ou par télécopieur au représentant ministériel, à l'adresse indiquée à l'alinéa A1.2.1.
- 11.3 Tout avis, consentement, ordre, décision, directive ou autre communication donné conformément au paragraphe CG11.2 sera réputé avoir été reçu par l'une ou l'autre des parties :
- 11.3.1 le jour où il a été livré, s'il lui a été livré personnellement; ou
- 11.3.2 le jour de sa réception ou le sixième jour après son envoi par la poste, selon la première de ces deux dates, s'il lui a été envoyé par la poste, et
- 11.3.3 dans les 24 heures suivant sa transmission, s'il lui a été envoyé par télex ou par télécopieur.
- 11.4 S'il est livré personnellement, un avis donné en vertu de l'alinéa CG38.1.1 et des articles CG40 et CG41 sera remis à l'Entrepreneur ou, si l'Entrepreneur est une société, une firme, une co-entreprise ou une corporation, à un agent de l'administration ou à un cadre supérieur.

CG12 Matériaux, outillage et biens immobiliers fournis par Sa Majesté

- 12.1 Sous réserve du paragraphe CG12.2, l'Entrepreneur est responsable envers Sa Majesté de toute perte ou dommage, aux matériaux, à l'outillage ou aux biens immobiliers que Sa Majesté a fournis ou placés sous la garde et le contrôle de l'Entrepreneur aux fins du Contrat, que la perte ou le dommage soit attribuable ou non à des causes indépendantes de la volonté de l'Entrepreneur.
- 12.2 L'Entrepreneur n'est pas responsable envers Sa Majesté de toute perte ou dommage aux matériaux, à l'outillage ou aux biens immobiliers dont il est question au paragraphe CG12.1, si

cette perte ou ce dommage est imputable et directement attribuable à l'usure causée par un usage raisonnable.

- 12.3 L'Entrepreneur doit utiliser les matériaux, l'outillage ou les biens immobiliers dont il est question au paragraphe CG12.1, uniquement pour l'exécution du Contrat et pour aucune autre fin.
- 12.4 Lorsqu'après avoir été requis de le faire par le représentant ministériel, l'Entrepreneur n'a pas, dans un délai raisonnable, indemnisé Sa Majesté pour une perte ou un dommage dont il est responsable en vertu du paragraphe CG12.1, le représentant ministériel peut y pouvoir aux frais de l'Entrepreneur, et ce dernier est dès lors responsable envers Sa Majesté des frais en l'occurrence qu'il devra sur demande payer à Sa Majesté.
- 12.5 L'Entrepreneur doit tenir des registres que le représentant ministériel peut de temps à autre exiger des matériaux, de l'outillage et des biens immobiliers visés par le paragraphe CG12.1 et doit, lorsque le représentant ministériel le l'exige, établir à la satisfaction de ce dernier que les matériaux, l'outillage et les biens immobiliers sont à l'endroit et dans l'état dans lequel ils devraient être.

CG13 Matériaux, outillage et biens immobiliers devenus propriété de Sa Majesté

- 13.1 Sous réserve du paragraphe CG14.7, tous les matériaux et l'outillage, de même que tout droit de l'Entrepreneur sur tous les biens immobiliers, permis, pouvoirs et privilèges achetés, ou utilisés par l'Entrepreneur pour les travaux deviennent, à compter de l'époque où ils ont été achetés ou utilisés, la propriété de Sa Majesté aux fins des travaux et continuent de l'être :
- 13.1.1 dans le cas des matériaux, jusqu'à ce que le représentant ministériel déclare qu'ils ne sont plus requis pour les travaux; et
- 13.1.2 dans le cas de l'outillage, des biens immobiliers, des permis, des pouvoirs et des privilèges, jusqu'à ce que le représentant ministériel déclare que le droit dévolu à Sa Majesté en l'espèce n'est plus requis pour les travaux.
- 13.2 Les matériaux ou l'outillage appartenant à Sa Majesté en vertu du paragraphe CG13.1 ne doivent pas être enlevés des lieux des travaux, utilisés ou aliénés, sauf pour les travaux, sans le consentement écrit du représentant ministériel.
- 13.3 Sa Majesté n'est pas responsable de toute perte ou de tout dommage aux matériaux ou à l'outillage visés par le paragraphe CG13.1 quelle qu'en soit la cause et l'Entrepreneur est responsable de toute perte ou de tout dommage bien que ces matériaux ou outillage appartiennent à Sa Majesté.

CG14 Permis et taxes payables

- 14.1 L'Entrepreneur doit, dans les 30 jours de la date du Contrat, offrir à l'administration municipale, un montant égal à tous les droits et frais qui seraient payables à l'administration municipale pour les permis de construction, si les travaux étaient exécutés pour une personne autre que Sa Majesté.

- 14.2 Dans les dix jours qui suivent l'offre mentionnée au paragraphe CG14.1, l'Entrepreneur avise le représentant ministériel de sa démanche et du montant de cette offre et lui fait savoir si elle a été acceptée ou non par l'administration municipale.
- 14.3 Si l'administration municipale n'a pas accepté la somme offerte aux termes du paragraphe CG14.1, l'Entrepreneur remet ce montant à Sa Majesté dans les six jours suivant l'expiration du délai fixe au paragraphe CG14.2.
- 14.4 Aux fins des paragraphes CG14.1 et CG14.3, l'expression « administration municipale » signifie une administration qui aurait compétence pour autoriser la construction de l'ouvrage si le propriétaire n'en était pas Sa Majesté.
- 14.5 Nonobstant le lieu de résidence de l'Entrepreneur, l'Entrepreneur versera toute taxe applicable découlant de l'exécution des travaux visés par le Contrat.
- 14.6 Conformément à la déclaration mentionnée au paragraphe MP4.9, l'Entrepreneur dont ni le lieu de résidence ni la place d'affaires n'est dans la province où sont effectués les travaux visés par le Contrat, fournira à Sa Majesté une preuve d'enregistrement auprès des autorités provinciales responsables de la taxe de vente dans ladite province.
- 14.7 Aux fins du paiement de la taxe applicable ou de la fourniture d'une garantie de paiement de la taxe applicable découlant de l'exécution des travaux visés par le Contrat, l'Entrepreneur doit, malgré le fait que tous les matériaux et outillage, de même que des droits de l'Entrepreneur sur tous les biens immobiliers, permis, pouvoirs et privilèges, sont devenus la propriété de Sa Majesté après la date d'achat, payer, en tant qu'utilisateur ou consommateur, toute taxe applicable payable au moment de l'utilisation desdits matériaux, outillage ou droits de l'Entrepreneur à titre d'utilisateur, conformément aux lois pertinentes, ou fournir une garantie de paiement à cet égard.

CG15 Exécution des travaux sous la direction du représentant ministériel

- 15.1 L'Entrepreneur doit :
- 15.1.1 permettre au représentant ministériel d'avoir accès aux travaux et au chantier en tout temps au cours de l'exécution du Contrat;
 - 15.1.2 communiquer au représentant ministériel tous renseignements qu'il demande concernant l'exécution du Contrat; et
 - 15.1.3 fournir au représentant ministériel toute l'assistance possible dans l'accomplissement de son devoir de veiller à ce que les travaux soient exécutés conformément au Contrat, de même que dans l'accomplissement de tout autre devoir et dans l'exercice de tout pouvoir qui lui incombe ou qui lui est conféré par le Contrat.

CG16 Coopération avec d'autres Entrepreneurs

- 16.1 Lorsque, de l'avis du représentant ministériel, il est nécessaire d'affecter aux travaux ou au chantier d'autres entrepreneurs ou ouvriers, avec ou sans outillage et matériaux, l'Entrepreneur doit, à la satisfaction du représentant ministériel, leur donner accès aux travaux et coopérer avec

eux dans l'accomplissement de leurs fonctions et obligations.

16.2 Si :

16.2.1 l'affectation aux travaux d'autres entrepreneurs ou ouvriers en vertu du paragraphe CG16.1 ne pouvait être raisonnablement prévue par l'Entrepreneur au moment de la conclusion du Contrat; et

16.2.2 de l'avis du représentant ministériel, l'Entrepreneur a encouru des dépenses additionnelles afin de se conformer au paragraphe CG16.1; et

16.2.3 l'Entrepreneur a donné au représentant ministériel un avis écrit de sa réclamation avant l'expiration d'un délai de 30 jours à compter de l'affectation d'autres entrepreneurs ou ouvriers aux travaux ou au chantier;

Sa Majesté rembourse à l'Entrepreneur les frais encourus, calculés conformément aux articles CG48 à CG50, pour le travail, de l'outillage et des matériaux additionnels requis.

CG17 Vérification des travaux

17.1 Si, à un moment quelconque après le début des travaux mais avant l'expiration de la période de garantie, le représentant ministériel a des motifs de croire que les travaux en partie de ceux-ci n'ont pas été exécutés conformément au Contrat, il peut demander qu'une vérification de ces travaux soit effectuée par un expert qu'il désigne.

17.2 Si, par suite d'une vérification conformément au paragraphe CG17.1, il est établi que les travaux n'ont pas été exécutés suivant le Contrat, l'Entrepreneur doit, sur demande, payer à Sa Majesté tous les coûts et toutes les dépenses raisonnables que cette vérification lui aura occasionnés, en plus et sans préjudice aux droits et recours de Sa Majesté sous le Contrat, en droit ou en équité.

CG18 Déblaiement de l'emplacement

18.1 L'Entrepreneur garde les travaux et leur emplacement propres, sans rebus, ni débris, et respecte à cet égard toute directive du représentant ministériel.

18.2 Avant l'émission du Certificat provisoire mentionné au paragraphe CG44.2, l'Entrepreneur enlève tout l'outillage et tous les matériaux non requis à l'exécution du reste des travaux. Il enlève également tous rebus et débris et fait en sorte que les travaux et leur emplacement soient propres et convenables pour leur occupation par les employés de Sa Majesté, sauf indication contraire dans le Contrat.

18.3 Avant l'émission du Certificat définitif d'achèvement mentionné au paragraphe CG44.1, l'Entrepreneur retire des travaux et leur emplacement, l'excédant de l'outillage et des matériaux, de même que tous les rebus et débris.

18.4 Les obligations qu'imposent à l'Entrepreneur les paragraphes CG18.1 à CG18.3 ne s'appliquent pas aux rebus et aux débris laissés par les employés de Sa Majesté, ou par les autres entrepreneurs et leurs employés visés au paragraphe CG16.1.

CG19 Surintendant de l'Entrepreneur

- 19.1 L'Entrepreneur désigne sans délai un surintendant après l'adjudication du Contrat.
- 19.2 L'Entrepreneur communique sans délai au représentant ministériel le nom, l'adresse et le numéro de téléphone du surintendant désigné en vertu du paragraphe CG19.1.
- 19.3 Le surintendant désigné en vertu du paragraphe CG19.1 à l'entière responsabilité des opérations de l'Entrepreneur dans l'exécution des travaux et il est en outre autorisé à recevoir au nom de l'Entrepreneur, tous avis, consentement, ordre, directive, décision ou toute autre communication qui peut lui être donné en vertu du Contrat.
- 19.4 Pendant les heures de travail et jusqu'à l'achèvement des travaux, l'Entrepreneur doit garder sur les lieux des travaux un surintendant compétent.
- 19.5 À la demande du représentant ministériel, l'Entrepreneur retire tout surintendant qui, de l'avis du représentant ministériel, est incompetent ou s'est conduit de façon malséante, et il remplace sans délai le surintendant ainsi retiré par un autre surintendant que le représentant ministériel estime acceptable.
- 19.6 Sous réserve du paragraphe CG19.5, l'Entrepreneur ne peut remplacer le surintendant sans le consentement écrit du représentant ministériel.
- 19.7 En cas de contravention par l'Entrepreneur au paragraphe CG19.6, le représentant ministériel peut refuser l'émission de tout Certificat mentionné à l'article CG44 jusqu'à ce que le surintendant ait été réintégré dans ses fonctions ou qu'un autre surintendant acceptable au représentant ministériel l'ait remplacé.

CG20 Sécurité nationale

- 20.1 Si le Ministre estime que la sécurité nationale le requiert, il peut ordonner à l'Entrepreneur :
- 20.1.1 de lui fournir tout renseignement sur des personnes engagées ou devant l'être aux fins du Contrat, et
- 20.1.2 de retirer des travaux et de leur emplacement toute personne dont l'emploi peut en l'occurrence, de l'avis du Ministre, comporter un risque pour la sécurité nationale.
- 20.2 Les contrats que l'Entrepreneur pourra conclure avec les personnes qui seront affectées à l'exécution des travaux, doivent contenir des dispositions qui lui permettront de s'acquitter de toute obligation qui lui incombent en vertu des articles CG19, CG20 et CG21.
- 20.3 L'Entrepreneur doit obéir à tout ordre donné par le Ministre suivant le paragraphe CG20.1.

CG21 Ouvriers inaptes

- 21.1 À la demande du représentant ministériel, l'Entrepreneur retire des travaux toute personne engagée par l'Entrepreneur aux fins des travaux qui, de l'avis du représentant ministériel, est incompétente ou s'est conduite de façon malséante et l'Entrepreneur refuse l'accès à l'emplacement des travaux à une personne ainsi retirée.

CG22 Augmentation ou diminution des coûts

- 22.1 Le montant établi dans les Articles de convention doit être ni augmenté, ni diminué en raison d'une augmentation ou d'une diminution du coût des travaux résultant d'une augmentation ou d'une diminution du coût du travail, de l'outillage, des matériaux ou des rajustements salariaux énoncés ou prescrits dans les Conditions de travail.
- 22.2 Nonobstant le paragraphe CG22.1 et l'article CG35, le montant énoncé dans les Articles de convention doit faire l'objet d'un redressement de la manière prévue au paragraphe CG22.3, en cas de modification à une taxe imposée en vertu de la Loi sur l'accise, de la Loi sur la taxe d'accise, de la Loi sur la sécurité de la vieillesse, de la Loi sur les douanes, du Tarif des douanes ou de toute loi provinciale sur la taxe de vente imposant une taxe de vente au détail sur l'achat de biens personnels corporels incorporés dans les biens immobiliers :
- 22.2.1 survenant après la date à laquelle l'Entrepreneur a présenté une soumission pour le Contrat,
- 22.2.2 s'appliquant aux matériaux; et
- 22.2.3 influant sur le coût de ces matériaux pour l'Entrepreneur.
- 22.3 En cas de changement fiscal suivant le paragraphe CG22.2, tout montant pertinent indiqué dans les Articles de convention sera augmenté ou diminué d'un montant égal qui, sur examen des registres mentionnés à l'article CG51, représente l'augmentation ou la diminution, selon le cas, des coûts directement attribuables à ce changement.
- 22.4 Aux fins du paragraphe CG22.2, lorsqu'une taxe fait l'objet d'un changement après la date à laquelle l'Entrepreneur a présenté une soumission mais alors que le ministre des Finances en avait donné avis public avant la date de présentation de la soumission, le changement fiscal est censé être survenu avant la date à laquelle la soumission a été présentée.

CG23 Main-d'œuvre et matériaux canadiens

- 23.1 L'Entrepreneur emploie pour l'exécution des travaux, de la main-d'œuvre et des matériaux canadiens dans toute la mesure où ils sont disponibles, compte tenu des exigences économiques et de la nécessité de poursuivre une exécution diligente des travaux.
- 23.2 Sous réserve du paragraphe CG23.1, l'Entrepreneur emploie, dans la mesure où elle est disponible, la main-d'œuvre de la localité où les travaux sont exécutés, et il recourt aux bureaux des Centres d'emploi du Canada pour recruter les ouvriers, là où la chose est réalisable.
- 23.3 Sous réserve des paragraphes CG23.1 et CG23.2, l'Entrepreneur emploie une proportion raisonnable d'ouvriers qui ont été en service actif dans les Forces armées canadiennes et qui en

ont reçu une libération honorable.

CG24 Protection des travaux et des documents

- 24.1 L'Entrepreneur garde et protège les travaux, l'emplacement des travaux, le Contrat, les devis, les plans, les dessins, les renseignements, les matériaux, l'outillage et les biens immobiliers, fournis ou non par Sa Majesté à l'Entrepreneur, contre toute perte ou dommage de quelque nature et ne peut les utiliser, donner, démolir ou en disposer sans le consentement écrit du Ministre, sauf si cela est indispensable à l'exécution des travaux.
- 24.2 Si une cote de sécurité est attribuée aux documents ou renseignements donnés ou dévoilés à l'Entrepreneur, l'Entreteneur prend toutes les mesures que lui enjoint le représentant ministériel pour assurer le degré de sécurité conforme à cette cote.
- 24.3 L'Entrepreneur fournit tous dispositifs de sécurité et aide toute personne à laquelle le Ministre a donné l'autorisation d'inspecter ou de prendre les mesures de sécurité qui s'imposent à l'égard des travaux et de l'emplacement des travaux.
- 24.4 Le représentant ministériel peut ordonner à l'Entrepreneur de faire telles choses et d'effectuer tels travaux additionnels qui, de l'avis du représentant ministériel, sont raisonnables et nécessaires pour assurer l'observation des paragraphes CG24.1 à CG24.3, ou pour rectifier une violation de ces paragraphes.

CG25 Cérémonies publiques et enseignes

- 25.1 L'Entrepreneur ne permet pas de cérémonie publique relativement aux travaux, sans la permission du Ministre.
- 25.2 L'Entrepreneur n'érige pas ou ne permet pas l'érection d'enseignes ou de panneaux publicitaires sur les travaux ou l'emplacement des travaux sans l'approbation du représentant ministériel.

CG26 Précautions contre les dommages, la transgression des droits, les incendies, et les autres dangers

- 26.1 L'Entrepreneur doit, à ses propres frais, faire le nécessaire pour s'assurer
- 26.1.1 que nulle personne n'est blessée, nul bien endommagé et nul droit, servitude ou privilège enfreint en raison de l'activité de l'Entrepreneur en vertu du Contrat;
 - 26.1.2 que la circulation à pied ou autrement sur les chemins ou cours d'eau publics ou privés n'est pas indûment entravée, interrompue ou rendue dangereuse par les travaux ou l'outillage;
 - 26.1.3 que les dangers d'incendie sur le chantier ou l'emplacement des travaux sont éliminés et que, sous réserve de tout ordre qui peut être donné par le représentant ministériel, tout incendie est promptement maîtrisé;

- 26.1.4 que la santé et sécurité des personnes occupées aux travaux ne sont pas menacées par les méthodes ou les moyens mis en œuvre;
- 26.1.5 que des services médicaux suffisants sont offerts en tout temps pendant les heures de travail, à toutes personnes occupées aux travaux;
- 26.1.6 que des mesures sanitaires suffisantes sont prises à l'égard des travaux et l'emplacement des travaux; et
- 26.1.7 que tous les jalons, bouées et repères placés sur les travaux ou l'emplacement des travaux par le représentant ministériel ou sur son ordre sont protégés et ne sont pas enlevés, abimés, changés ou détruits.

- 26.2 Le représentant ministériel peut ordonner à l'Entrepreneur de faire toute chose et de construire tout ouvrage additionnel qui, de l'avis du représentant ministériel, est raisonnable ou nécessaire pour assurer l'observation du paragraphe CG26.1 ou pour rectifier une infraction audit paragraphe.
- 26.3 L'Entrepreneur se conforme, à ses propres frais, à tout ordre que le représentant ministériel émet conformément au paragraphe CG26.2.

CG27 Assurances

- 27.1 L'Entrepreneur souscrit et maintient, à ses propres frais, des polices d'assurance relativement aux travaux et en fournit la preuve au représentant ministériel conformément aux exigences des Conditions d'assurance « E ».
- 27.2 Les polices d'assurance mentionnées au paragraphe CG27.1 doivent être :
 - 27.2.1 en la forme et nature, au montant, pour la durée et suivant les termes et conditions prévus aux Conditions d'assurance « E »; et
 - 27.2.2 prévoir le remboursement des demandes de règlement, conformément à l'article CG28.

CG28 Indemnité d'assurance

- 28.1 Dans le cas d'une demande de règlement en vertu d'une police d'assurance tous risques chantier (y compris les installations) que maintient l'Entrepreneur conformément à l'article CG27, les sommes dues à l'égard d'un sinistre seront remboursées directement à Sa Majesté, et :
 - 28.1.1 les sommes ainsi versées seront retenues par Sa Majesté aux fins du contrat; ou
 - 28.1.2 si Sa Majesté en décide ainsi, seront conservées par Sa Majesté, et le cas échéant, deviendront sa propriété de façon absolue.
- 28.2 Dans le cas d'une demande de règlement en vertu d'une police responsabilité civile générale que maintient l'Entrepreneur conformément à l'article CG27, l'assureur remboursera directement au

demandeur les sommes dues à l'égard d'un sinistre.

- 28.3 Si le Ministre choisit conformément au paragraphe CG28.1 de conserver l'indemnité d'assurance, il peut faire effectuer une vérification de la comptabilité de l'Entrepreneur et de Sa Majesté relativement à la partie des travaux perdue, endommagée ou détruite, afin d'établir la différence, s'il en est, entre
- 28.3.1 l'ensemble du montant des pertes ou dommages subis par Sa Majesté, incluant tous frais encourus pour le déblaiement et le nettoyage des travaux et l'emplacement des travaux et de toute autre somme payable par l'Entrepreneur à Sa Majesté en vertu du Contrat, moins toute somme retenue conformément à l'alinéa CG28.1.2; et
- 28.3.2 l'ensemble des sommes payables par Sa Majesté à l'Entrepreneur en vertu du Contrat à la date où la perte ou les dommages ont été subis.
- 28.4 Toute différence établie conformément au paragraphe CG28.3 doit être payée sans délai par la partie débitrice à la partie créancière.
- 28.5 Suite au paiement prévu au paragraphe CG28.4, Sa Majesté et l'Entrepreneur sont réputés libérés de tous droits et obligations en vertu du Contrat, à l'égard seulement de la partie des travaux qui a fait l'objet d'une vérification mentionnée au paragraphe CG28.3.
- 28.6 S'il n'est pas exercé de choix en vertu du paragraphe CG28.1.2, l'Entrepreneur, sous réserve du paragraphe CG28.7, déblaie et nettoie les travaux et l'emplacement des travaux et il restaure et remplace à ses frais la partie des travaux qui a été perdue ou endommagée, comme si ces travaux n'avaient pas encore été exécutés.
- 28.7 Lorsque l'Entrepreneur exécute les obligations prévues au paragraphe CG28.6, Sa Majesté lui rembourse, jusqu'à concurrence des sommes mentionnées au paragraphe CG28.1, les frais de déblaiement, nettoyage, restauration et remplacement en question.
- 28.8 Sous réserve du paragraphe CG28.7, tout paiement par Sa Majesté en exécution des obligations prévues au paragraphe CG28.7 est effectué conformément aux dispositions du Contrat, mais chaque paiement doit représenter 100% du montant réclamé, nonobstant les alinéas MP4.4.1 et MP4.4.2.

CG29 Garantie du contrat

- 29.1 L'Entrepreneur obtient et dépose auprès du représentant ministériel une ou des garanties conformément aux conditions de garantie du contrat.
- 29.2 S'il est déposé une garantie auprès du représentant ministériel en vertu du paragraphe CG29.1 constituant en tout ou en partie en un dépôt de garantie, ce dépôt sera traité conformément aux articles CG43 et CG45 des Conditions générales.
- 29.3 Si la garantie en vertu du paragraphe CG29.1 consiste, en partie, en un cautionnement (bond) pour le paiement de la main-d'œuvre et des matériaux, l'Entrepreneur affiche une copie de ce cautionnement sur l'emplacement des travaux.

CG30 Modifications aux travaux

- 30.1 Sous réserve de l'article CG5, le représentant ministériel peut, à tout moment avant de délivrer son Certificat définitif d'achèvement :
- 30.1.1 exiger des travaux ou des matériaux en sus de ceux qui ont été prévus dans les Plans et devis; et
 - 30.1.2 supprimer ou modifier les dimensions, le caractère, la quantité, la qualité, la description, la situation ou la position de la totalité ou d'une partie des travaux ou matériaux prévus dans les Plans et devis ou exigés en conformité de l'alinéa CG30.1.1.
- à condition que ces travaux ou matériaux supplémentaires, ou que ces suppressions ou modifications soient, selon lui compatibles avec l'intention du Contrat.
- 30.2 L'Entrepreneur exécute les travaux conformément aux ordres, suppressions et modifications émis de temps à autre par le représentant ministériel en vertu du paragraphe CG30.1, comme s'ils faisaient partie des Plans et devis.
- 30.3 Le représentant ministériel décide si ce que l'Entrepreneur a fait ou omis de faire conformément à un ordre, une suppression ou une modification en vertu du paragraphe CG30.1 a augmenté ou diminué le coût des travaux pour l'Entrepreneur.
- 30.4 Si le représentant ministériel décide, conformément au paragraphe CG30.3, qu'il y a eu augmentation du coût pour l'Entrepreneur, Sa Majesté paie à l'Entrepreneur le coût accru que l'Entrepreneur a nécessairement encouru pour les travaux supplémentaires, calculé conformément aux articles CG49 ou GB50.
- 30.5 Si le représentant ministériel décide, conformément au paragraphe CG30.3, qu'il y a eu réduction du coût pour l'Entrepreneur, Sa Majesté réduit le montant payable à l'Entrepreneur en vertu du Contrat d'un montant égal à la réduction du coût occasionné par toute suppression ou modification ordonnée conformément au paragraphe CG30.1.2, calculé conformément à l'article CG49.
- 30.6 Les paragraphes CG30.3 à CG30.5 s'appliquent seulement à un contrat ou partie d'un contrat comportant, suivant le Contrat, une Entente à prix fixe.
- 30.7 Tout ordre, suppression ou modification mentionné au paragraphe CG30.1 doit être par écrit, porter la signature du représentant ministériel et être communiqué à l'Entrepreneur conformément au paragraphe CG11.

CG31 Interprétation du Contrat par le représentant ministériel

- 31.1 Avant la délivrance par le représentant ministériel du Certificat définitif d'achèvement mentionné au paragraphe CG44.1, le représentant ministériel tranche toute question concernant l'exécution des travaux ou les obligations de l'Entreteneur en vertu du Contrat et en particulier, mais sans limiter la portée générale de ce qui précède, concernant :

- 31.1.1 la signification de quoi que ce soit dans les Plans et devis;
 - 31.1.2 l'interprétation des Plans et devis au cas d'erreur, omission, obscurité ou divergence dans leur texte ou intention;
 - 31.1.3 le respect des exigences du Contrat quant à la quantité ou la qualité des matériaux ou du travail que l'Entrepreneur fournit ou se propose de fournir;
 - 31.1.4 la suffisance de la main-d'œuvre, de l'outillage ou des matériaux que l'Entrepreneur fournit pour la réalisation des travaux et du Contrat, pour assurer l'exécution des travaux suivant le Contrat et l'exécution du Contrat conformément à ses dispositions;
 - 31.1.5 la qualité de tout genre de travail effectué par l'Entrepreneur; ou
 - 31.1.6 l'échéancier et la programmation des diverses phases de l'exécution des travaux;
- et la décision du représentant ministériel est sans appel, pour ce qui est des travaux.
- 31.2 L'Entrepreneur exécute les travaux conformément aux décisions et directives du représentant ministériel en vertu du paragraphe CG31.1 et conformément à toute décision et directive du représentant ministériel que en découlent.

CG32 Garantie et rectification des défauts des travaux

- 32.1 Sans restreindre les garanties implicites ou explicites de la loi ou du Contrat, l'Entrepreneur doit, à ses propres frais
- 32.1.1 rectifier toute défectuosité et corriger tout vice qui se manifeste dans les travaux ou qui est signalé au Ministre quant aux parties du travail acceptées relativement au Certificat provisoire d'achèvement mentionné au paragraphe CG44.2 dans les 12 mois qui suivront la date d'émission du Certificat provisoire d'achèvement.
 - 32.1.2 rectifier toute défectuosité et corriger tout vice qui se manifeste dans les travaux ou qui est signalé au Ministre relativement aux parties des travaux décrites dans le Certificat provisoire d'achèvement mentionné au paragraphe CG44.2 dans les 12 mois qui suivent la date d'émission du Certificat définitif d'achèvement mentionné au paragraphe CG44.1.
- 32.2 Le représentant ministériel peut ordonner à l'Entrepreneur de rectifier ou corriger toute défectuosité ou tout vice mentionné au paragraphe CG32.1 ou couvert par toute autre garantie implicite ou explicite.
- 32.3 L'ordre mentionné au paragraphe CG32.2.1 doit être par écrit; il peut préciser le délai dans lequel l'Entrepreneur doit rectifier ou corriger la défectuosité ou le vice et il doit être donné à l'Entrepreneur conformément à l'article CG11.
- 32.4 L'Entrepreneur doit rectifier la défectuosité ou corriger le vice mentionné dans l'ordre donné en conformité du paragraphe CG32.2 dans le délai qui y est stipulé.

CG33 Défaut de l'Entrepreneur

- 33.1 Si l'Entrepreneur omet de se conformer à une décision ou directive rendue ou émise par le représentant ministériel en vertu des articles CG18, CG24, CG26, CG31 ou CG32, le représentant ministériel peut recourir aux méthodes qui lui semblent opportunes pour exécuter ce que l'Entrepreneur a omis d'exécuter.
- 33.2 L'Entrepreneur paie à Sa Majesté, sur demande, la totalité de tous les frais, dépenses et dommages encourus par Sa Majesté en raison du défaut de l'Entrepreneur de se conformer à toute décision ou directive stipulée au paragraphe CG31.1 et en raison de toute méthode utilisée en l'occurrence par le représentant ministériel conformément au paragraphe CG33.1.

CG34 Protestations des décisions du représentant ministériel

- 34.1 L'Entrepreneur peut contester, dans les dix jours de sa réception, une décision ou directive mentionnée aux paragraphes CG30.3 ou CG33.1.
- 34.2 Toute contestation mentionnée au paragraphe CG34.1 doit être par écrit, indiquer tous les motifs de la contestation, être signée par l'Entrepreneur et communiquée à Sa Majesté par l'entremise du représentant ministériel.
- 34.3 Si l'Entrepreneur proteste conformément au paragraphe CG34.2, le fait pour lui de se conformer à la décision ou à la directive qu'il conteste ne sera pas interprété comme une reconnaissance du bienfondé de cette décision ou de cette directive et ne pourra constituer une fin de non-recevoir quant à toute poursuite qu'il estimera appropriée dans les circonstances.
- 34.4 Tout protêt de l'Entrepreneur en vertu du paragraphe CG34.2 ne le dispense de se conformer à la décision ou directive en question.
- 34.5 Sous réserve du paragraphe CG34.6, l'Entrepreneur doit, sous peine de déchéance, intenter toute poursuite judiciaire mentionnée au paragraphe CG34.3 dans les trois mois suivant la date d'émission du Certificat définitif d'achèvement mentionné au paragraphe CG44.1.
- 34.6 L'Entrepreneur doit, sous peine de déchéance, intenter dans les trois mois suivant la fin d'une période de garantie, toute poursuite judiciaire mentionnée au paragraphe CG34.3 et découlant d'un ordre donné en vertu de l'article CG32.
- 34.7 Sous réserve du paragraphe CG34.8, si Sa Majesté tient la contestation de l'Entrepreneur comme bien fondée, elle doit lui rembourser le coût des travaux, de l'outillage et des matériaux additionnels nécessaires à l'exécution de l'ordre ou de la directive ayant fait l'objet du protêt.
- 34.8 Les couts mentionnés au paragraphe CG34.7 doivent être calculés conformément aux dispositions des articles CG48 à CG50.

CG35 Changement des conditions du sol – Négligence ou retard de la part de Sa Majesté

- 35.1 Sous réserve du paragraphe CG35.2, nul paiement autre qu'un paiement expressément stipulé au Contrat n'est fait par Sa Majesté à l'Entrepreneur en raison de quelque dépense supplémentaire

encourue ou pour quelque perte ou dommage subi par l'Entrepreneur.

35.2 Si l'Entrepreneur encourt des frais supplémentaires ou subit des pertes ou dommages directement attribuables :

35.2.1 à un écart substantiel entre les renseignements sur les conditions du sol à l'emplacement des travaux, dans les Plans et devis ou d'autres documents fournis à l'Entrepreneur pour l'établissement de sa soumission, ou à un écart substantiel entre une présomption raisonnable de l'Entrepreneur fondée sur lesdits renseignements et les conditions réelles rencontrées par l'Entrepreneur à l'emplacement des travaux lors de leur exécution; ou

35.2.2 à la négligence ou à un retard de la part de Sa Majesté après la date du Contrat, à fournir tout renseignement ou à tout acte auquel Sa Majesté est expressément obligée par le Contrat ou que les usages de l'industrie dicteraient ordinairement à tout propriétaire;

il doit dans les dix jours qui suivent la date de la constatation des conditions du sol décrites à l'alinéa CG35.2.1 ou la date de la négligence ou du retard décrit au paragraphe CG35.2.2, en donner avis par écrit au représentant ministériel et lui signifier son intention d'exiger le remboursement des frais supplémentaires encourus ou le coût de toutes pertes ou dommages subis.

35.3 Lorsque l'Entrepreneur a donné au représentant ministériel l'avis mentionné au paragraphe CG35.3, il doit sous peine de déchéance dans les 30 jours suivant la date de l'émission du Certificat définitif mentionné au paragraphe CG44.1, remettre au représentant ministériel une demande écrite de remboursement des frais supplémentaires ou du coût de toutes pertes ou dommages subis.

35.4 La demande de remboursement mentionnée au paragraphe CG35.3 devra contenir une description suffisante des faits et circonstances qui motivent la demande afin que le représentant ministériel puisse déterminer si cette demande est justifiée ou non, et l'Entrepreneur doit, à cette fin, fournir tout autre renseignement que le représentant ministériel peut exiger.

35.5 Si, de l'avis du représentant ministériel, la demande de remboursement mentionnée au paragraphe CG35.3 est bien fondée, Sa Majesté doit verser à l'Entrepreneur un supplément calculé en conformité des articles CG47 à CG49.

35.6 Si, de l'avis du représentant ministériel, le cas décrit à l'alinéa CG35.2.1 se traduit pour l'Entrepreneur par une économie dans l'exécution du Contrat, le montant établi dans les Articles de convention est, sous réserve du paragraphe CG35.7, réduit d'un montant égal à l'économie réalisée.

35.7 Le montant à être déduit en vertu du paragraphe CG35.6 doit être déterminé selon les dispositions des articles CG47 à CG49.

35.8 Si l'Entrepreneur néglige de donner l'avis mentionné au paragraphe CG35.2 et de présenter la demande de remboursement mentionnée au paragraphe CG35.3 dans le délai prescrit, aucun supplément ne doit lui être versé en l'occurrence.

CG36 Prolongation de délai

- 36.1 Sous réserve du paragraphe CG36.2, le représentant ministériel peut, s'il estime que l'achèvement en retard des travaux est attribuable à des causes indépendantes de la volonté de l'Entrepreneur et sur demande présentée par l'Entrepreneur avant le jour fixe par les Articles de convention pour l'achèvement des travaux ou avant toute autre date fixée auparavant conformément au présent article, prolonger le délai d'achèvement des travaux.
- 36.2 Toute demande mentionnée au paragraphe CG36.1 doit être accompagnée du consentement écrit de la compagnie dont le cautionnement constitue une partie de la garantie du contrat.

CG37 Dédommagement pour retard d'exécution

- 37.1 Aux fins du présent article :
- 37.1.1 les travaux sont censés être achetés le jour ou le représentant ministériel délivre le Certificat provisoire d'achèvement mentionné au paragraphe CG44.2; et
- 37.1.2 « période de retard » signifie la période commençant le jour fixé par les Articles de convention pour l'achèvement des travaux et se terminant le jour précédant immédiatement le jour de l'achèvement, à l'exclusion cependant de tout jour faisant partie d'une période de prolongation accordée en vertu du paragraphe CG36.1 et de tout autre jour où, de l'avis du représentant ministériel, l'achèvement des travaux a été retardé par des causes indépendantes de la volonté de l'Entrepreneur.
- 37.2 Si l'Entrepreneur n'achève pas les travaux au jour fixé par les Articles de convention mais achève ces travaux par la suite, l'Entrepreneur paie à Sa Majesté un montant égal à l'ensemble :
- 37.2.1 de tous les salaires, gages et frais de déplacement versés par Sa Majesté aux personnes surveillant les travaux pendant la période de retard;
- 37.2.2 des coûts encourus par Sa Majesté en conséquence de l'impossibilité pour Sa Majesté de faire usage des travaux achevés pendant la période de retard; et
- 37.2.3 de tous les autres frais et dommages encourus ou subis par Sa Majesté pendant la période de retard par suite de l'inachèvement des travaux à la date prévue.
- 37.3 S'il estime que l'intérêt public le commande, le Ministre peut renoncer au droit de Sa Majesté à la totalité ou partie d'un paiement exigible en conformité du paragraphe CG37.2.

CG38 Travaux retirés à l'Entrepreneur

- 38.1 Le Ministre peut dans les cas suivants et à son entière discrétion, en donnant un avis par écrite à l'Entrepreneur conformément à l'article CG11, retirer à l'Entrepreneur la totalité ou une partie des travaux et recourir aux moyens qui lui semblent appropriés pour achever les travaux si l'Entrepreneur :
- 38.1.1 fait défaut ou retarde à commencer les travaux ou à exécuter les travaux avec diligence et à la satisfaction du représentant ministériel, dans les six jours suivant la réception par

l'Entrepreneur d'un avis par écrite du Ministre ou du représentant ministériel, conformément à l'article CG11 :

- 38.1.2 a négligé d'achever quelque partie des travaux dans le délai imparti par le Contrat;
 - 38.1.3 est devenu insolvable :
 - 31.1.4 a commis un acte de faillite;
 - 31.1.5 a abandonné les travaux;
 - 31.1.6 a fait cession du Contrat sans le consentement requis au paragraphe CG3.1; ou
 - 31.1.7 a de quelque autre façon fait défaut d'observer ou d'accomplir l'une quelconque des dispositions du Contrat.
- 38.2 Si la totalité ou une partie quelconque des travaux a été retirée à l'Entrepreneur en vertu de paragraphe CG38.1.
- 38.2.1 l'Entrepreneur n'a droit, sauf dispositions du paragraphe CG38.4, à aucun autre paiement dû et exigible.
 - 38.2.2 l'Entrepreneur est tenu de payer à Sa Majesté, sur demande, un montant égal à la totalité des pertes et dommages que Sa Majesté aura subis en raison de défaut de l'Entrepreneur d'achever les travaux.
- 38.3 Si la totalité ou partie des travaux retirés à l'Entrepreneur en vertu du paragraphe CG38.1 est achevée par Sa Majesté, le représentant ministériel établit le montant, s'il y en a, de toute retenue ou demande d'acompte de l'Entrepreneur existant au moment où les travaux lui ont été retirés et dont, selon le représentant ministériel, on n'a pas besoin pour assurer exécution des travaux ou pour rembourser à Sa Majesté les pertes ou dommages subis en raison du défaut de l'Entrepreneur.
- 38.4 Sa Majesté peut verser à l'Entrepreneur le montant qu'on jugera non requis suivant le paragraphe CG38.3.

CG39 Effet du retrait des travaux à l'Entrepreneur

- 39.1 La retrait de la totalité ou d'une partie des travaux à l'Entrepreneur en conformité de l'article CG38, n'a pas pour effet de libérer l'Entrepreneur d'une obligation quelconque découlant pour lui du Contrat ou de la loi, sauf quant à l'obligation pour lui de continuer l'exécution de la partie des travaux qui lui fut ainsi retirée.
- 39.2 Si la totalité ou partie des travaux est retirée à l'Entrepreneur en conformité de l'article CG38, tous les matériaux et outillage, ainsi que l'intérêt de l'Entrepreneur dans tous les biens immobiliers, permis, pouvoirs et privilèges acquis, utilisés ou fournis par l'Entrepreneur pour les travaux, continuent d'être la propriété de Sa Majesté sans indemnisation de l'Entrepreneur.
- 39.3 Si le représentant ministériel certifie que tout matériau, outillage ou un intérêt quelconque

mentionné au paragraphe CG39.2 n'est plus requis pour les travaux et qu'il n'est plus dans l'intérêt de Sa Majesté de retenir lesdits matériaux, outillage ou intérêt, ils sont remis à l'Entrepreneur.

CG40 Suspension des travaux par le Ministre

- 40.1 Le Ministre peut, lorsqu'il estime que l'intérêt public le commande, sommer l'Entrepreneur de suspendre l'exécution des travaux pour une durée déterminée ou indéterminée, en lui communiquant par écrit un avis à cet effet, conformément à l'article CG11.
- 40.2 Sur réception suivant l'article CG11 de la sommation mentionnée au paragraphe CG40.1, l'Entrepreneur suspend toutes les opérations sauf celles qui, de l'avis du représentant ministériel, sont nécessaires à la garde et à la préservation des travaux, de l'outillage et des matériaux.
- 40.3 Pendant la période de suspension, l'Entrepreneur ne peut enlever de l'emplacement, sans le consentement du représentant ministériel, quelque partie des travaux, de l'outillage et des matériaux.
- 40.4 Si la période de suspension est de 30 jours ou moins, l'Entrepreneur reprend l'exécution des travaux dès l'expiration de la période de suspension et il a droit au paiement des frais, calculés en conformité des articles CG48 à CG50, du travail, de l'outillage et des matériaux nécessairement encourus en conséquence de la suspension des travaux.
- 40.5 Si, à l'expiration d'une période de suspension de plus de 30 jours, le Ministre et l'Entrepreneur conviennent que l'exécution des travaux sera continuée par l'Entrepreneur, ce dernier reprend les opérations sous réserve des termes et conditions convenus entre lui et le Ministre.
- 40.6 Si, à l'expiration d'une période de suspension de plus de 30 jours, le Ministre et l'Entrepreneur ne conviennent pas que les travaux seront continués par l'Entrepreneur ou ne s'entendent pas sur les termes et conditions suivant lesquels l'Entrepreneur poursuivra l'exécution des travaux, l'avis de suspension est censé être un avis de résiliation et conformément de l'article CG41.

CG41 Résiliation du Contrat

- 41.1 Le Ministre peut, à n'importe quel moment, résilier le Contrat en donnant avis par écrit à cet effet à l'Entrepreneur conformément à l'article CG11.
- 41.2 Sur réception suivant l'article CG11 de l'avis mentionné au paragraphe CG41.1, l'Entrepreneur cesse toutes opérations dans l'exécution du Contrat, sous réserve de toutes conditions énoncées dans l'avis.
- 41.3 Si le Contrat est résilié conformément au paragraphe CG41.1, Sa Majesté paie à l'Entrepreneur, sous réserve du paragraphe CG41.4, un montant égal :
 - 41.3.1 au coût de tout le travail, l'outillage et les matériaux qu'aura fournis l'Entrepreneur en vertu du Contrat à la date de résiliation, en exécution d'un contrat ou d'une partie de contrat relativement auquel une Entente à prix unitaire est précisée dans le Contrat; ou

41.3.2 au moins :

41.3.2.1 du montant, calculé conformément aux Modalités de paiement, qui aurait été payable à l'Entrepreneur s'il avait achevé les travaux; et

41.3.2.2 du montant que l'on reconnaît devoir à l'Entreteneur en vertu de l'article CG49, concernant un contrat ou une partie de contrat pour lequel le Contrat prévoit une Entente à prix fixe;

moins l'ensemble de tous les montants qui furent payés à l'Entrepreneur par Sa Majesté et de tous les montants dont l'Entrepreneur est redevable envers Sa Majesté en vertu du Contrat.

41.4 Si Sa Majesté et l'Entrepreneur ne peuvent convenir du montant mentionné au paragraphe CG41.3, ce montant sera déterminé suivant la méthode indiquée à l'article CG50.

CG42 Réclamations contre et obligations de la part de l'Entrepreneur ou d'un sous-entrepreneur

42.1 Afin d'acquitter toutes obligations légales de l'Entrepreneur ou d'un sous-entrepreneur ou de satisfaire à toutes réclamations légales contre eux résultant de l'exécution du Contrat, Sa Majesté peut payer tout montant qui est dû et payable à l'Entrepreneur en vertu du Contrat, directement aux créanciers de l'Entrepreneur ou du sous-entrepreneur, ou aux réclamants en l'occurrence. Toutefois, ce montant que paie Sa Majesté, le cas échéant, ne doit pas excéder le montant que l'Entrepreneur aurait été tenu de verser au réclamant si les dispositions des lois relatives aux privilèges dans les provinces et territoires ou, dans le cas de la province de Québec, de la loi à cet effet dans le Code civil, avaient été applicables aux travaux. Le réclamant n'a pas à respecter les dispositions des lois relatives aux privilèges qui établissent les démarches à suivre au moyen d'avis, d'enregistrements ou d'autre façon, comme il aurait pu être nécessaire de le faire pour conserver ou valider toute réclamation à l'égard de liens émanant du réclamant.

42.2 Sa Majesté n'effectue pas de paiement tel qu'il est décrit au paragraphe CG42.1 à moins que le réclamant lui remette :

42.2.1 un jugement ou une ordonnance exécutoire d'un tribunal compétent établissant le montant qu'aurait eu à verser l'Entrepreneur au réclamant en vertu des dispositions de la loi provinciale ou territoriale relative aux privilèges pertinente ou, dans le cas de la province de Québec, de la loi à cet effet dans le Code civil, si ces lois s'appliquaient aux travaux, ou

42.2.2 une sentence arbitrale définitive et exécutoire établissant le montant qu'aurait eu à verser l'Entrepreneur au réclamant en vertu des dispositions de la loi provinciale ou territoriale relative aux privilèges pertinente ou, dans le cas de la province de Québec, de la loi à cet effet dans le Code civil, si ces lois s'appliquaient aux travaux; ou

42.2.3 le consentement de l'Entrepreneur autorisant le paiement.

Pour déterminer les droits du réclamant en vertu des alinéas CG42.2.1 et CG42.2.2, l'avis exigé au paragraphe CG42.8 sera réputé remplacer l'enregistrement ou la prestation d'un avis après l'achèvement des travaux exigé par les lois applicables, et aucune réclamation ne sera réputée être

expirée, annulée ou non exécutoire parce que le réclamant n'a pas intenté de poursuites dans les délais prescrits par la loi applicable.

- 42.3 Lorsqu'il accepte d'exécuter un Contrat, l'Entrepreneur est réputée avoir consenti de soumettre à l'arbitrage obligatoire, à la demande d'un réclamant, toutes les questions auxquelles il faut répondre pour déterminer si le réclamant a droit au paiement conformément aux dispositions du paragraphe CG42.1. Les parties à l'arbitrage seront, entre autres, le sous-traitant à qui le réclamant a fourni des matériaux ou de l'équipement ou pour qui il a effectué du travail, si le sous-traitant le désire. L'État ne constitue pas une partie à l'arbitrage et, à moins d'une entente contraire entre l'Entrepreneur et le réclamant, l'arbitrage se déroulera conformément à la loi provinciale ou territoriale régissant l'arbitrage applicable dans la province ou le territoire où les travaux sont exécutés.
- 42.4 Une paiement effectuée en conformité du paragraphe CG42.1 comporte quittance de l'obligation de Sa Majesté envers l'Entrepreneur sous le contrat, jusqu'à concurrence du montant payé et peut être déduit d'un montant dû à l'Entrepreneur en vertu du Contrat.
- 42.5 Dans la mesure où les circonstances entourant l'exécution des travaux pour le compte de Sa Majesté le permettent, l'Entrepreneur se conforme à toutes les lois en vigueur dans la province ou le territoire où les travaux sont exécutés quant aux périodes de paiement, aux retenus obligatoires, à la création et à la mise en vigueur de lois concernant les privilèges des fournisseurs ou des constructeurs ou de lois semblables ou, s'il s'agit de la province de Québec, aux dispositions de la loi qui concerne les privilèges.
- 42.6 L'Entrepreneur acquitte toutes ses obligations légales et fait droit à toutes les réclamations légales qui lui sont adressées en conséquence de l'exécution des travaux, au moins aussi souvent que le Contrat oblige Sa Majesté à acquitter ses obligations envers l'Entrepreneur.
- 42.7 Sur demande du représentant ministériel, l'Entrepreneur fait une déclaration attestant de l'existence et de l'état de toutes les obligations et réclamations mentionnées au paragraphe CG42.6.
- 42.8 Le paragraphe CG42.1 ne s'applique qu'aux réclamations et aux obligations :
- 42.8.1 pour lesquelles le représentant ministériel a reçu un avis par écrit avant qu'un paiement n'ait été effectué à l'Entrepreneur conformément au paragraphe MP4.10 et dans les 120 jours suivant la date à laquelle le réclamant :
- 42.8.1.1 aurait dû être payé en totalité conformément au contrat qui le lie à l'Entrepreneur ou à un sous-traitant, s'il s'agit d'une réclamation pour des devoirs dont il est légalement requis qu'ils soient retenus du réclamant; ou
- 42.8.1.2 s'est acquitté des derniers services ou travaux ou à fourni les derniers matériaux exigés par le contrat qui le lie à l'Entrepreneur ou à un sous-traitant, s'il ne s'agit pas d'une réclamation mentionnée au sous-alinéa CG42.8.1.1; et
- 42.8.2 pour lesquelles les procédures visant à établir les droits à un paiement, conformément au paragraphe CG42.2, ont commencé dans l'année suivant la date à laquelle l'avis mentionné à l'alinéa CG42.8.1 a été reçu par le représentant ministériel; et

l'avis exige à l'alinéa CG42.8.1 doit faire état du montant réclamé et du principal responsable selon le Contrat.

- 42.9 Sur réception d'un avis de réclamation en vertu de l'alinéa CG42.8.1, Sa Majesté peut retenir de tout montant dû et payable à l'Entrepreneur en vertu du Contrat un partie ou la totalité du montant de la réclamation.
- 42.10 Le représentant ministériel doit aviser l'Entrepreneur par écrit de la réception de toute réclamation mentionné à l'alinéa CG42.8.1 et de l'intention de Sa Majesté de retenir des fonds conformément au paragraphe CG42.9, et l'Entrepreneur peut, à tout moment par la suite et jusqu'à ce que le paiement soit effectué au réclamant, déposer, auprès de Sa Majesté, une garantie acceptable par Sa Majesté dont le montant est équivalent à la valeur de la réclamation. L'avis d'un tel dépôt doit être reçu par le représentant ministériel et, sur réception d'une telle garantie, Sa Majesté doit dégager à l'intention de l'Entrepreneur tous les fonds qui auraient été payables autrement à l'Entrepreneur et qui ont été retenus conformément aux dispositions du paragraphe CG42.9 à l'égard de la réclamation d'un réclamant pour laquelle la garantie a été déposée.

CG43 Dépôt de garantie – Confiscation ou remise

- 43.1 Si :
- 43.1.1 les travaux sont retirés à l'Entrepreneur conformément à l'article CG38;
 - 43.1.2 le Contrat est résilié en vertu de l'article CG41; ou
 - 43.1.3 l'Entrepreneur a violé ou n'a pas rempli ses engagements en vertu du Contrat;
- Sa Majesté peut s'approprier le dépôt de garantie, s'il en est.
- 43.2 Si Sa Majesté s'approprie le dépôt de garantie conformément au paragraphe CG43.1, le montant obtenu en l'occurrence est censé être une dette payable à l'Entrepreneur par Sa Majesté en vertu du Contrat.
- 43.3 Tout solde du montant mentionné au paragraphe CG43.2, s'il en est, après paiement de toutes pertes dommages ou réclamations de Sa Majesté ou quelqu'un autre, sera payé par Sa Majesté à l'Entrepreneur si, dans l'opinion du représentant ministériel, il n'est pas requis pour les fins du Contrat.

CG44 Certificats du représentant ministériel

- 44.1 Le jour :
- 44.1.1 où les travaux sont achevés; et
 - 44.1.2 où l'Entrepreneur s'est conformé au Contrat et à tous les ordres et directives donnés conformément au Contrat;

à la satisfaction du représentant ministériel, le représentant ministériel délivre à l'Entrepreneur un Certificat définitif d'achèvement.

- 44.2 Si le représentant ministériel est convaincu que les travaux sont suffisamment achevés, il peut, à tout moment avant la délivrance d'un Certificat définitif d'achèvement mentionné au paragraphe CG44.1 délivrer à l'Entrepreneur un Certificat provisoire d'achèvement, et :
- 44.2.1 aux fins du paragraphe CG44.2, les travaux seront jugés suffisamment achevés
- 44.2.1.1 lorsqu'une partie considérable ou la totalité des travaux visés par le Contrat sont, de l'avis du représentant ministériel, prêts à être utilisés par Sa Majesté ou sont utilisés aux fins prévues; et
- 44.2.1.2 lorsque les travaux qui restent à effectuer en vertu du Contrat peuvent, de l'avis du représentant ministériel, être achevés ou rectifiés à un coût n'excédant pas
- 44.2.1.2.1 -3 p. 100 des premiers 500 000 \$; et
- 44.2.1.2.2 -2 p 100 des prochains 500 000 \$; et
- 44.2.1.2.3 -1 p. 100 du reste
- de la valeur du Contrat au moment du calcul de ce coût.
- 44.3 Aux fins uniquement du sous-alinéa 44.2.1.2, lorsque les travaux ou une partie considérable des travaux sont prêts à être utilisés ou sont utilisés aux fins prévues et que le reste ou une partie des travaux ne peut être achevé pour des raisons indépendantes de la volonté de l'Entrepreneur ou, lorsque le représentant ministériel et l'Entrepreneur conviennent de ne pas achever les travaux dans les délais prescrits, le coût de la partie des travaux que l'Entrepreneur n'a pu terminer pour des raisons indépendantes de sa volonté ou que le représentant ministériel et l'Entrepreneur ont convenu de ne pas terminer dans les délais précisés sera déduit de la valeur du contrat mentionnée au sous-alinéa CG44.2.1.2 et ledit coût ne fera pas partie du coût des travaux qui restent à effectuer aux fins de la détermination de l'achèvement réel.
- 44.4 Le Certificat provisoire d'achèvement mentionné au paragraphe CG44.2 doit décrire les parties des travaux qui n'ont pas été achevées à la satisfaction du représentant ministériel et préciser tout ce que l'Entrepreneur doit faire :
- 44.4.1 avant que le Certificat définitif d'achèvement mentionné au paragraphe CG44.1 puisse être délivré; et
- 44.4.2 avant le début de la période de 12 mois mentionnée au paragraphe CG32.1.2 pour lesdites parties et toutes autres choses.
- 44.5 Le représentant ministériel peut, en plus des points indiqués dans le Certificat provisoire d'achèvement mentionné au paragraphe CG44.2, obliger l'Entrepreneur à rectifier toutes autres parties des travaux qui n'ont pas été achevées à sa satisfaction et faire effectuer toutes autres choses nécessaires pour l'achèvement satisfaisant des travaux.

- 44.6 Si le Contrat ou l'une de ses parties a fait l'objet d'une Entente à prix unitaire, le représentant ministériel mesure et consigne dans un registre les quantités de travail exécuté d'outillage fourni par l'Entrepreneur et de matériaux utilisés pour l'exécution des travaux, et informe, sur demande, l'Entrepreneur au sujet de ces mesurages.
- 44.7 L'Entrepreneur aide le représentant ministériel et coopère avec lui dans l'exécution des tâches précisées au paragraphe CG44.6 et a le droit de prendre connaissance de tout registre tenu par le représentant ministériel suivant le paragraphe CG44.6.
- 44.8 Une fois que le représentant ministériel a délivré le Certificat définitif d'achèvement mentionné au paragraphe CG44.1, il doit, si le paragraphe CG44.6 s'applique, délivrer un Certificat définitif de mesurage.
- 44.9 Le Certificat définitif de mesurage mentionné au paragraphe CG44.8 :
- 44.9.1 indique le total des mesurages des quantités mentionnées au paragraphe CG44.6, et
- 44.9.2 lie de façon péremptoire Sa Majesté et l'Entrepreneur quant aux mesurages des quantités qui y sont consignées.

CG45 Remise du dépôt de garantie

- 45.1 Après la délivrance du Certificat provisoire d'achèvement mentionné au paragraphe CG44.2 et à condition que l'Entrepreneur n'ait pas violé ses engagements en vertu du Contrat ou omis de les remplir, Sa Majesté retourne à l'Entrepreneur la totalité ou partie du dépôt de garantie, s'il en est, qui de l'avis du représentant ministériel, n'est pas requise aux fins du Contrat.
- 45.2 Au moment de la délivrance du Certificat définitif d'achèvement mentionné au paragraphe CG44.1, Sa Majesté retourne à l'Entrepreneur tout le solde du dépôt de sécurité, sauf stipulation contraire du Contrat.
- 45.3 Si le dépôt de garantie a été versé au Trésor, Sa Majesté doit payer à l'Entrepreneur l'intérêt sur ledit dépôt à un taux établi de temps à autre en vertu du paragraphe 21(2) de la Loi sur la gestion des finances publiques.

CG46 Précision du sens des expressions figurant aux articles CG47 à CG50

- 46.1 Dans les articles CG47 à CG50 :
- 46.1.1 l'expression « Tableau des prix unitaires » signifie le tableau figurant dans les Articles de convention, et
- 46.1.2 l'expression « outillage » ne comprend pas les outils habituellement fournis par les hommes de métier dans l'exercice de leurs fonctions.

CG47 Additions ou modifications au Tableau des prix unitaires

- 47.1 Le représentant ministériel et l'Entrepreneur peuvent convenir par écrit, lorsqu'une Entente à prix unitaire s'applique au Contrat ou à l'une de ses parties :
- 47.1.1 d'ajouter au Tableau des prix unitaires des catégories de travail, d'outillage ou de matériaux, des unités de mesurage, de prix par unité et des estimations de quantités lorsque certains travaux, outillage et matériaux devant apparaître dans le Certificat définitif de mesurage mentionné au paragraphe CG44.8 ne figurent dans aucune des catégories de travail, d'outillage ou de matériaux établies au Tableau des prix unitaires; ou
 - 47.1.2 sous réserve des paragraphes CG47.2 et CG47.3, de modifier le prix par unité établi au Tableau des prix unitaires à l'égard d'une quelconque catégorie de travail, d'outillage ou de matériaux y figurant, lorsqu'une quantité a été estimée à l'égard de cette catégorie de travail, d'outillage ou de matériaux, et que le Certificat définitif de mesurage mentionné au paragraphe CG44.8 indique ou est susceptible d'indiquer que la quantité totale de cette catégorie de travail exécuté, d'outillage fourni ou de matériaux utilisés par l'Entrepreneur, pour l'exécution des travaux, est :
 - 47.1.2.1 inférieur à 85% de la quantité estimée; ou
 - 47.1.2.2 supérieure à 115% de la quantité estimée.
- 47.2 Le coût total d'un article figurant au Tableau des prix unitaires qui a été modifié conformément au sous-alinéa 47.1.2.1 ne doit, en aucun cas, excéder le montant qui aurait été payable à l'Entrepreneur si la quantité totale estimative de travail avait été exécutée, la quantité totale estimative d'outillage avait été fournie ou la quantité totale estimative de matériaux, utilisée.
- 47.3 Toute modification rendue nécessaire par le sous-alinéa CG47.1.2.2 ne s'appliquera qu'aux quantités supérieures à 115%.
- 47.4 Si le représentant ministériel et l'Entrepreneur ne s'entendent pas suivant le paragraphe CG47.1, le représentant ministériel détermine la catégorie et l'unité de mesurage du travail, de l'outillage et des matériaux et, sous réserve des paragraphes CG47.2 et CG47.3, le prix par unité est déterminé conformément à l'article CG50.

CG48 Établissement du coût – Tableau des prix unitaires

- 48.1 Chaque fois qu'il est nécessaire, aux fins du Contrat, d'établir le coût du travail, de l'outillage et des matériaux, on multiplie la quantité de ce travail de cet outillage ou de ces matériaux, exprimée par l'unité énoncée à la colonne 3 du Tableau des prix unitaires, par le prix énoncé en regard de cette unité à la colonne 5 du Tableau des prix unitaires.

CG49 Établissement du coût – Négociation

- 49.1 Si le mode d'établissement du coût prévu à l'article CG48 ne peut être utilisé parce que le genre ou la catégorie de travail, d'outillage et de matériaux en cause ne figurent pas au Tableau des prix unitaires, le coût du travail, de l'outillage ou des matériaux, aux fins du Contrat est le montant

convenu de temps à autre entre l'Entrepreneur et le représentant ministériel.

- 49.2 Aux fins du paragraphe CG49.1, l'Entrepreneur remet au représentant ministériel lorsque ce dernier le requiert, tout renseignement nécessaire sur ce qu'il lui en coûte en travail, outillage et matériaux mentionnés au paragraphe CG49.1.

CG50 Établissement du coût en cas d'échec des négociations

- 50.1 Si l'on ne parvient pas à établir le coût du travail, de l'outillage et des matériaux conformément aux méthodes prévues aux articles CG47, CG48 ou CG49, pour les fins mentionnées dans ceux-ci, le coût sera égal à l'ensemble de :
- 50.1.1 tous les montants justes et raisonnables effectivement dépensés ou légalement payables par l'Entrepreneur pour le travail, l'outillage et les matériaux couverts par une des catégories de dépenses prévues au paragraphe CG50.2, qui sont directement attribuables à l'exécution du Contrat;
 - 50.1.2 une somme égale à 10% du total des dépenses de l'Entrepreneur mentionnées à l'alinéa CG50.1.1, représentant une indemnité pour profit et pour tous les autres coûts et dépenses, incluant les frais de financement et les intérêts, les frais généraux, dépenses du siège social, et tous autres frais ou dépenses, mais non les coûts et dépenses mentionnés à l'alinéa CG50.1.1 ou CG50.1.3 ou pour une catégorie mentionnée au paragraphe CG50.2;
 - 50.1.3 l'intérêt sur les coûts déterminés en vertu des alinéas CG50.1.1 et CG50.1.2, intérêt qui sera calculé conformément à l'article MP9,
- pourvu que le coût total d'un article figurant au Tableau des prix unitaires, auquel s'appliquent les dispositions de l'alinéa CG47.1.2.1, n'est pas supérieur au montant qui aurait été payable à l'Entrepreneur si la quantité totale dudit article aurait été effectivement produite, utilisée ou fournie.
- 50.2 Aux fins de l'alinéa CG50.1.1, les catégories de dépenses admissibles dans l'établissement du coût du travail, de l'outillage et des matériaux, sont :
- 50.2.1 les paiements faits aux sous-entrepreneurs;
 - 50.2.2 les traitements, salaires et frais de voyage versés aux employés de l'Entrepreneur affectés, proprement dit, à l'exécution des travaux, à l'exception des traitements, salaires, gratifications, frais de subsistance et de voyage des employés de l'Entrepreneur travaillant généralement au siège social ou à un bureau général de l'Entrepreneur, à moins que lesdits employés ne soient affectés à l'emplacement des travaux avec la approbation du représentant ministériel;
 - 50.2.3 les cotisations exigibles en vertu d'un texte statutaire relativement aux indemnités des accidents du travail, à l'assurance-chômage, au régime de retraite et aux congés rémunérés;
 - 50.2.4 les frais de location d'outillage ou un montant équivalent aux frais de location si l'outillage appartient à l'Entrepreneur qui était nécessaire et qui a été utilisé pour

l'exécution des travaux, à condition que lesdits frais ou la somme équivalente soient raisonnables et que l'utilisation dudit outillage ait été approuvée par le représentant ministériel;

- 50.2.5 les frais d'entretien et de fonctionnement de l'outillage nécessaire à l'exécution des travaux et des frais de réparation à tel outillage qui, de l'avis du représentant ministériel, sont nécessaires à la bonne exécution du Contrat, à l'exclusion de toutes réparations provenant de défauts existant avant l'affectation de l'outillage aux travaux;
- 50.2.6 les paiements relatifs aux matériaux nécessaires et incorporés aux travaux, ou nécessaires à l'exécution du Contrat et utilisés à cette fin; et
- 50.2.7 les paiements relatifs à la présentation, à la livraison, à l'utilisation, à l'érection, à l'installation, à l'inspection, à la protection et à l'enlèvement de l'outillage et des matériaux nécessaires à l'exécution du Contrat et utilisés à cette fin; et
- 50.2.8 tout autre paiement fait par l'Entrepreneur avec l'approbation du représentant ministériel et nécessaire à l'exécution du Contrat.

CG51 Registres à tenir par l'Entrepreneur

- 51.1 L'Entrepreneur :
 - 51.1.1 tient des registres complets du coût estimatif et réel des travaux, des appels d'offres, des prix cotés, des contrats, de la correspondance, des factures, des reçus et des pièces justificative s'y rapportant;
 - 51.1.2 met à la disposition du Ministre et du sous-receveur général du Canada ou des personnes qu'ils délèguent pour vérification et inspection tous les documents mentionnés à l'alinéa CG51.1.1;
 - 51.1.3 permet à toutes personnes mentionnées à l'alinéa 51.1.2 de faire des copies ou extraits de tous registres et documents mentionnés à l'alinéa CG51.1.1; et
 - 51.1.4 fournit aux personnes mentionnées à l'alinéa CG51.1.2 tous les renseignements qu'elles peuvent exiger de temps à autre au sujet de ces registres et documents.
- 51.2 Les registres tenus par l'Entrepreneur conformément à l'alinéa CG51.1.1, sont conservés intact pendant deux ans à compter de la date de la délivrance du Certificat définitif d'achèvement mentionné au paragraphe CG44.1, ou jusqu'à l'expiration de toute autre période que le Ministre peut fixer.
- 51.3 L'Entrepreneur oblige tous sous-entrepreneurs, et toutes autres personnes qu'il contrôle directement ou indirectement ou qui lui sont affiliés, de même que toutes personnes qui contrôlent l'Entrepreneur directement ou indirectement, à se conformer aux paragraphes CG51.1 et CG51.2 comme s'ils étaient l'Entrepreneur.

CG52 Conflits d'intérêts

- 52.1 Le présent Contrat stipule qu'aucun ancien titulaire de charge publique qui ne se conforme pas au Code régissant la conduite des titulaires de charge publique en ce qui concerne les conflits d'intérêts et l'après-mandat ne peut retirer des avantages directs du présent Contrat.

CG53 Situation de l'Entrepreneur

- 53.1 L'Entrepreneur sera retenu en vertu du Contrat à titre d'entrepreneur indépendant.
- 53.2 L'Entrepreneur et tout employé dudit entrepreneur n'est pas retenu en vertu du Contrat à titre d'employé, d'agent ou de mandataire de Sa Majesté.
- 53.3 Aux fins des paragraphes CG53.1 et CG53.2, l'Entrepreneur sera à lui seul responsable de tous les paiements et de toutes les retenues exigées par la loi, y compris ceux exigés par le Régime de pensions du Canada, le Régime des rentes du Québec, l'assurance-chômage, les accidents du travail ou l'impôt sur le revenu.

ATTESTATION D'ASSURANCE DE L'ASSUREUR

CONDITIONS GÉNÉRALES

CA 1 Preuve du contrat d'assurance (02/12/03)

Dans un délai de trente (30) jours après l'acceptation de la soumission de l'entrepreneur, ce dernier, à moins d'avis contraire par écrit de l'agent d'approvisionnement, doit remettre à l'agent d'approvisionnement, l'Attestation d'assurance d'un assureur dans la forme apparaissant dans le présent document et, si demandé par l'agent d'approvisionnement, remettre à ce dernier les originaux ou les copies certifiées conformes de tous les contrats d'assurance auxquels l'entrepreneur a souscrit conformément aux Exigences des garanties d'assurance décrites ci-après.

CA 2 Gestion des risques (01/10/94)

Les dispositions des Exigences des garanties d'assurance des présentes n'ont pas pour but de couvrir toutes les obligations de l'entrepreneur en vertu de l'article CG8 des Conditions générales « C » du marché. L'entrepreneur est libre, à condition d'en assumer le coût, de prendre des mesures additionnelles de gestion des risques ou des garanties d'assurance complémentaires qu'il juge nécessaire pour remplir ses obligations conformément à l'article CG8.

CA 3 Paiement de franchise (01/10/94)

L'entrepreneur doit assumer le paiement de toutes sommes d'argent en règlement d'un sinistre, jusqu'à concurrence de la franchise.

CA 4 Assurance d'assurance (02/12/03)

L'entrepreneur a déclaré qu'il détient une assurance de responsabilité civile appropriée et habituelle qui est en vigueur conformément aux présentes Conditions d'assurance et il a garanti qu'il obtiendra, en temps opportune et avant le commencement des travaux, l'assurance de biens appropriée et habituelle conformément aux présentes Conditions d'assurance et qu'en outre il maintiendra en vigueur toutes les polices d'assurance requises conformément aux présentes Conditions d'assurance.

EXIGENCES DE GARANTIES D'ASSURANCE

PARTIE I

EXIGENCES GÉNÉRALES D'ASSURANCE (EGA)

EGA 1 Assuré (02/12/03)

Chaque contrat d'assurance doit assurer l'entrepreneur et doit inclure à titre d'Assuré dénommé additionnel, Sa Majesté la Reine du chef du Canada, représentée par le Conseil national de recherches Canada.

**EGA 2 Période d'assurance
(02/12/03)**

Moins d'avis contraire par écrit de l'agent d'approvisionnement ou d'indication contraire ailleurs dans les présentes Conditions d'assurance, les contrats d'assurance exigés dans les présentes doivent prendre effet le jour de l'attribution du marché et demeurer en vigueur jusqu'au jour de la délivrance du Certificat définitif d'achèvement du représentant ministériel.

**EGA 3 Preuve du contrat d'assurance
(01/10/94)**

Dans un délai de vingt-cinq (25) jours après l'acceptation de la soumission de l'entrepreneur, l'assureur, à moins d'avis contraire écrit de l'entrepreneur, doit remettre à l'entrepreneur l'Attestation d'assurance d'un assureur dans la forme apparaissant dans le présent document et, si demandé, les originaux ou les copies certifiées conformes de tous les contrats d'assurance auxquels l'entrepreneur a souscrit conformément aux présentes Exigences de présentes garanties d'assurance.

**EGA 4 Avis
(01/10/94)**

Chaque contrat d'assurance doit renfermer une disposition selon laquelle trente (30) jours avant de procéder à toute modification importante visant la garantie d'assurance, ou à l'annulation de ladite garantie d'assurance, un avis par écrit doit être envoyé par l'assureur à Sa Majesté. Tout avis de cette nature que reçoit l'entrepreneur doit être transmis sans délai à Sa Majesté.

**PARTIE II
ASSURANCE DE LA RESPONSABILITÉ CIVILE DES ENTREPRISES**

**ARC 1 Portée de l'assurance
(01/10/94)**

Le contrat d'assurance doit être établi sur un formulaire similaire à celui connu et désigné dans l'industrie de l'assurance sous l'appellation Assurance de la responsabilité civile des entreprises (base d'événement) – BAC 2100, et doit accorder un montant de garantie d'au moins 2 000 000 \$ (tous dommages confondus) pour des dommages corporels et matériels imputables au même événement ou à une série d'événements ayant la même origine. Les frais de justice ou autres déboursés de défense par suite de sinistre ou de réclamation ne viendront pas en déduction du montant de garantie.

**ARC 2 Garanties/Dispositions
(01/10/94)**

Le contrat d'assurance doit inclure les garanties/dispositions suivantes sans toutefois nécessairement s'y limiter :

- 2.1 La responsabilité découlant de la propriété, de l'existence de l'entretien ou de l'utilisation de lieux par l'entrepreneur et les activités nécessaires ou connexes à l'exécution du présent contrat.
- 2.2 L'extension de la garantie « Dommages matériels et/ou privation de jouissance ».

- 2.3 L'enlèvement ou l'affaiblissement d'un support soutenant des bâtiments ou terrains, que ce support soit naturel ou non.
- 2.4 La responsabilité découlant des appareils de levage et des monte-charge (y compris les escaliers roulants).
- 2.5 La responsabilité civile indirecte des entrepreneurs.
- 2.6 Les responsabilités contractuelles et assumées en vertu du présent contrat.
- 2.7 La responsabilité civile découlant des risques après travaux. En regard de la présente garantie, ainsi que toutes les autres garanties de cette Partie II des présentes Conditions d'assurance, l'assurance doit demeurer en vigueur pendant au moins un (1) an à partir de la date de délivrance du Certificat d'achèvement du représentant ministériel.
- 2.8 Responsabilité réciproque – La clause doit être rédigée comme suit :

Responsabilité réciproque – L'assurance telle que garantie par le présent contrat s'applique à toute demande d'indemnité faite à ou à toute action intentée contre n'importe quel assuré par n'importe quel autre assuré. La garantie d'assurance s'applique de la même façon et dans la même mesure que si un contrat distinct avait été établi à chacun d'eux. L'inclusion de plus d'un assuré n'augmente pas le montant de garantie de l'assureur.

- 2.9 Individualité des intérêts – La clause doit être rédigée comme suit :

Individualité des intérêts – La présente assurance, sous réserve des montants de garantie, s'applique séparément à chaque assuré de la même façon et dans la même mesure que si un contrat distinct avait été établi à chacun d'eux. L'inclusion de plus d'un assuré n'augmente pas le montant de garantie de l'assureur.

ARC 3 Risques additionnels (02/12/03)

Le contrat d'assurance doit couvrir ou être amendé pour couvrir les risques suivants, si l'entreprise y est soumise :

- 3.1 Dynamitage;
- 3.2 Battage de pieux et travail par caisson;
- 3.3 Reprise en sous-œuvre;
- 3.4 Risques associés aux activités de l'entrepreneur dans un aéroport en service;
- 3.5 Contamination par radioactivité par suite de l'utilisation d'isotopes commerciaux;
- 3.6 Endommagement à la partie d'un bâtiment existant hors de la portée directe d'un marché de rénovation, d'addition ou d'installation;
- 3.7 Risques maritimes reliés à la construction de jetés, quais et docks.

**ARC 4 Indemnités d'assurance
(01/10/94)**

Toute indemnité en vertu de la présente assurance est habituellement versée à un tiers réclamant.

**ARC 5 Franchise
(02/12/03)**

Le contrat d'assurance doit être établie avec une franchise d'au plus 10 000 \$ événement quant aux sinistres causés par dommages matériels.

**PART III
ASSURANCE DES CHANTIERS – RISQUES D'INSTALLATION – TOUS RISQUES**

**AC 1 Portée de l'assurance
(01/10/94)**

Le contrat d'assurance doit être établi pour assurer l'entreprise sur un base « Tous risques » donnant un couverture d'assurance identique à celle qui est fournie par les formulaires connues et désignées dans l'industrie des assurances sous les noms de l' « Assurances des Chantiers – Formule globale » ou « Risques d'installation – Tous Risques ».

**AC 2 Biens assurés
(01/10/94)**

Les biens assurés doivent comprendre :

- 2.1 les travaux, ainsi que tous les biens, équipement et matériaux devant être incorporés à l'entreprise achevée à l'endroit du projet, avant, durant et après leur installation, érection ou construction, y compris les essais;
- 2.2 les frais de déblaiement du chantier occasionnés par un sinistre couvert y ayant laissé des débris provenant de biens couverts par la présente assurance, y compris la démolition des biens endommagés, l'enlèvement de la glace et l'assèchement.

**AC 3 Indemnité d'assurance
(01/10/94)**

- 3.1 Toutes indemnités en vertu du contrat d'assurance doit être payées conformément à l'article CG28 des Conditions générales « C » du contrat.
- 3.2 Le contrat d'assurance doit stipuler que toute indemnité en vertu d'icelle doit être payé à Sa Majesté ou selon les directives du Ministre.
- 3.3 L'entrepreneur doit faire toutes choses et exécuter tous documents requis pour le paiement de l'indemnité d'assurance.

AC 4 Montant d'assurance

(01/10/94)

Le montant de l'assurance doit égalier au moins la somme de la valeur du contrat plus la valeur déclarée (s'il y a lieu) dans les documents du marché de tout le matériel et équipement fourni par Sa Majesté sur le chantier pour être incorporé à l'entreprise achevée et en faire partie.

AC 5 Franchise
(02/12/94)

La police doit être établie avec une franchise d'au plus 10 000 \$.

AC 6 Subrogation
(01/10/94)

La clause suivante doit être incluse dans le contrat d'assurance :

« Tous droits de subrogation ou transfert de droits sont par les présentes abandonnées contre toutes les personnes physiques ou morales ayant droit au bénéfice de la présente assurance. »

AC 7 Exclusion
(01/10/94)

Le contrat d'assurance peut comporter les exclusions normales sous réserve des exceptions suivantes :

- 7.1 Peuvent être exclus les frais inhérents à la bonne exécution des travaux, et rendus nécessaires par des défauts dans les matériaux, la main d'œuvre ou la conception, l'assurance produisant néanmoins ses effets en ce qui concerne les sinistres entraînés par voie de conséquence.
- 7.2 La perte ou les dommages causés par la contamination de matériaux radioactifs, sauf la perte ou les dommages résultant de l'utilisation d'isotopes commerciaux pour la mesure, l'inspection, le contrôle de la qualité, la radiographie ou la photographie industriels.
- 7.3 La mise en service et l'occupation de l'entreprise, en totalité ou en partie, doivent être permis pour les fins auxquels l'entreprise est destiné à son achèvement.

CGC1 Obligation de fournir une garantie de contrat

- 1.1 L'Entrepreneur doit, à ses propres frais, fournir une ou plusieurs des garanties de contrat mentionnées à l'article CGC2.
- 1.2 L'Entrepreneur doit fournir au représentant ministériel la garantie de contrat mentionnée au paragraphe CGC1.1 dans les 14 jours suivant la date à laquelle l'Entrepreneur reçoit un avis lui signifiant l'acceptation de sa soumission par Sa Majesté.

CGC2 Types et montants acceptables de garanties de contrat

- 2.1 L'Entrepreneur fournit au représentant ministériel conformément à l'article CGC1 :
 - 2.1.1 un cautionnement d'exécution et un cautionnement pour le paiement de la main-d'œuvre et des matériaux, représentant chacun au moins 50% du montant payable indiqué dans les Articles de convention; ou
 - 2.1.2 un cautionnement pour le paiement de la main-d'œuvre et des matériaux, représentant au moins 50% du montant payable indiqué dans les Articles de convention, et un dépôt de garantie représentant :
 - 2.1.2.1 au moins 10% du montant indiqué dans les Articles de convention, si ce montant n'excède pas 250 000 \$; ou
 - 2.1.2.2 25 000 \$, plus 5% de la partie du montant du Contrat indiqué dans les Articles de convention qui excède 250 000 \$; ou
 - 2.1.3 un dépôt de garantie représentant le montant prescrit à l'alinéa CGC2.1.2, majoré d'un supplément représentant 10% du montant du Contrat indiqué dans les Articles de convention.
- 2.2 Le cautionnement d'exécution et le cautionnement pour le paiement de la main-d'œuvre et des matériaux mentionnés au paragraphe CGC2.1 doivent être dans une forme approuvée et provenir d'une compagnie dont les cautionnements sont acceptés par Sa Majesté.
- 2.3 Le montant maximum du dépôt de garantie requis en vertu de l'alinéa CGC2.1.2 ne doit pas excéder 250 000 \$, quel que soit le montant du Contrat indiqué dans les Articles de convention.
- 2.4 Le dépôt de garantie mentionné aux alinéas CGC2.1.2 et CGC2.1.3 consiste en :
 - 2.4.1 une lettre de change payable à l'ordre du receveur général du Canada et certifiée par une institution financière approuvée ou tirée par une institution financière approuvée sur son propre compte; ou
 - 2.4.2 des obligations du gouvernement du Canada ou des obligations garanties inconditionnellement quant au capital et aux intérêts par le gouvernement du Canada.
- 2.5 Aux fins du paragraphe CGC2.4 :

- 2.5.1 une lettre de change est un ordre inconditionnel donné par écrit par l'Entrepreneur à une institution financière agréée et obligeant ladite institution à verser, sur demande et à une certaine date, une certaine somme au receveur général du Canada ou à l'ordre de ce dernier; et
- 2.5.2 si une lettre de change est certifiée par une institution financière autre qu'une banque à charte, elle doit être accompagnée d'une lettre ou d'une attestation estampillée confirmant que l'institution financière appartient à au moins l'une des catégories mentionnées à l'alinéa CGC2.5.3 ;
- 2.5.3 une institution financière agréée est :
 - 2.5.3.1 une société ou institution qui est membre de l'Association canadienne des paiements,
 - 2.5.3.2 une société qui accepte des dépôts qui sont garantis par la Société d'assurance-dépôts du Canada ou la Régie de l'assurance-dépôts du Québec jusqu'au maximum permis par la loi,
 - 2.5.3.3 une caisse de crédit au sens de l'alinéa 137(6)(b) de la *Loi de l'impôt sur le revenu*,
 - 2.5.3.4 une société qui accepte du public des dépôts dont le remboursement est garanti par Sa Majesté du chef d'une province, ou
 - 2.5.3.5 la Société canadienne des postes.
- 2.5.4 les obligations mentionnées à l'alinéa CGC2.4.2 doivent être :
 - 2.5.4.1 payables au porteur ;
 - 2.5.4.2 accompagnées d'un document de transfert dûment exécuté à l'ordre du receveur général du Canada, dûment exécuté et dans la forme prescrite par le Règlement concernant les obligations intérieures du Canada; ou
 - 2.5.4.3 enregistrées quant au capital ou quant au capital et aux intérêts au nom du receveur général du Canada, conformément au Règlement concernant les obligations intérieures du Canada; et
 - 2.5.4.4 fournies à leur valeur courante sur le marché à la date du Contrat.
