

Build in Canada Innovation Program – Challenge EN578-DB1801/A
Amendment 001

This amendment is raised to answer a bidder's question.

Question: The challenge funding is described in two phases in the project description but no information is present on how these phases will be separated. What is expected to be delivered for Phase I versus Phase II?

Answer: It is suggested that bidders focus on the initial test of the functionality of the innovation at Phase I and possible configuration of the solution to facilitate further testing at Phase II. It is requested that bidders describe their proposed Phase I and Phase II deliverables in the test plan and the financial proposal sections of the proposal submission form.
