### Question 1 - Annex "A"

You state "The Bidder must provide equipment literature to prove that the equipment complies with each and every one of the Mandatory Technical Specifications specified in Annex A, Requirement. Simply stating "yes" or "compliant" will not be sufficient for the purpose of this evaluation.

Our literature does not necessarily cover each requirement specifically. Is it sufficient to provide calculations and or verbal description / drawings to demonstrating compliance?

YES

### Question 2 - Table 1

Shredder Dimension - 1473mm x 1016mm x 2286mm (LWH)

Is it correct to assume this is a guideline dimension and a shredder that meets all other requirements but is not this specific size is acceptable?

YES

### Question 3 - Table 1

Shred Size - Material exiting shredder will have a approx. width of 7/8"

Our experience suggests this is a very narrow width for textiles and will result in higher than desired jam situations, slowing production. Is 1 1/2" width acceptable?

YES

### Question 4 - Table 1

Shred Size - Material exiting shredder will have a approx. length of 1-12"

Please clarify that this is 1 1/2". Secondly, most shredders will cut to a certain width but the length is based on the material being shredded. Can the shred size specification be modified to "7/8" by various lengths or 1 1/2" by various lengths"?

YES

### Question 5 - Cutting Chamber (Bid Improvement Suggestion)

Minimum of two hexagonal counter rotating shafts

Hexagonal shafts are specific to one brand of shredder and have a number of design and service/maintenance flaws. Is a shredder with round shafts (industry standard) acceptable?

YES

### Question 6 - Knives

Qty 35-40

Are more or fewer knives acceptable if the shred size specification and minimum chamber size are met?

Standing Offer No

File No. - N° du dossier

Buyer ID - Id de l'acheteur  
HAL203  
CCC No./N° CCC - FMS No./N° VME

YES

### Question 7 - Knives

Knife diameter 6" - 7"

Are larger knife diameters acceptable if shred size, chamber size and overall dimensions are met?

YES

### Question 8 - Drive System

Minimum Qty 1 x 30 HP motor 575/3Ph/60Hz REQUIRED

Is 220V / 3 Phase 60 Hz acceptable?

Can you eliminate the horsepower requirement? Depending on the gear drive and reduction system horsepower is not relevant.

NO

### Question 9 - Drive System (Bid Improvement Suggestion)

Fast/Slow Shaft speed: 38/32 RPM

Please consider eliminating this requirement. Each shredder operates at a specific RPM depending on design. This RPM level is specific to a particular brand.

YES ELIMINATE

### Question 10 - Drive System (Bid Improvement Suggestion)

Max tooth Force 38,000-40,000lbs

I believe you are looking for a minimum tooth force. Please consider eliminating this requirement as this figure can be calculated a number of ways and is open to interpretation

YES ELIMINATE

### Question 11 - Electrical

In Drive System the spec is 575V/3 Phase/60Hz.

Here the spec calls for 208 V to 600 V and 50 / 60 Hz

Please clarify the electrical requirement.

ALREADY ANSWERED THIS ABOVE IN Q8 575V/3 PHASE/60HZ IS REQUIRED

### Question 12 - Control Panel

Run time hour meter.

Again, this is specific to a brand of shredder. Please consider removal.

Standing Offer No

File No. - N° du dossier

Buyer ID - Id de l'acheteur  
HAL203  
CCC No./N° CCC - FMS No./N° VME

**REQUIRED FOR MAINTENANCE PURPOSES**

### **Question 13 - Control Panel**

Direct across the line starting for shredder.

We believe this refers to the wiring configuration and is specific to a shredder brand. Please consider removing this requirement as it does not impact shredder function.

**YES REMOVE THIS REQUIREMENT**

### **Question 14 - Control Panel**

Fused lockable disconnect.

This is normally part of the electrical connection from the Plant (DND/Canada) and is not part of the shredder. Please consider removing this requirement or supplying the exact specification.

**REQUIRED FOR SAFETY PURPOSES IF SYSTEM MAINTENANCE IS REQUIRED**
