This amendment is raised to:

1. Change the solicitation closing date and time from January 29, 2019, 14:00 CST to February 6, 2019, 14:00 CST.
2. From Part 2 – Bidder Instructions, delete 2.2.1 Best Delivery Date – Bid in its entirety.
3. From Part 6 – Resulting Contract Clauses, delete 6.4.1 Delivery Date in its entirety and replace with:

All the deliverables must be received on or before **March 31, 2019**.

4. Answer the following questions:
 - A. Question:
Regarding the ten (10) light commercial laundry washer and dryer sets (10 washers and dryers), are these top loading or front loading?
Answer:
They can be either top loading or front loading.
 - B. Question:
Regarding Annex “D” Compliance Matrix, Commercial Laundry Washer and Dryer Sets, Item #2: “Washer and dryer must both have a door window.” Commercial build top load washers and dryers don’t have glass loading doors. Will you accept a quote without the glass doors, i.e. can this specification be removed?
Answer:
Yes, this specification can be removed.
 - C. Question:
Regarding Annex “D” Compliance Matrix, Commercial Laundry Washer and Dryer Sets, Item #9: “Washer and dryer must have the control panel located at the front of the machine.” Commercial top load washers don’t have front control panels because moisture can get into the control area when unloading the wet laundry. Will you accept a quote with rear controls on the washer and dryers?
Answer:
Yes, we are willing to accept rear controls on the washers and driers. The specification has been adjusted to clarify this.
 - D. Question:
Regarding Annex “D” Compliance Matrix, Commercial Laundry Washer and Dryer Sets, Item #14: “The washer tub must have outer shock absorbers.” Commercial top load washers don’t have shock absorbers. They have a well-built suspension not to vibrate in spin. This specification seems for a domestic machine design with a lower quality suspension where the shocks are needed to make it work. Will you accept a quote for top load washers without the shocks, i.e. can this specification be removed?
Answer:
Yes, this specification can be removed. The machine must prevent the washer tub from vibrating in the spin cycle. This can be achieved from a high quality suspension or with the assistance of shock absorbers. The specification has been adjusted to clarify this.

Delete Annex "D" Compliance Matrix in its entirety and replace with:

ANNEX "D"

COMPLIANCE MATRIX

Instructions

1. Bidders **must** indicate "yes" or "no" in Column 3 "Mandatory Specification Met" for each mandatory specification to demonstrate if the product offered complies with or doesn't comply with the mandatory specification. **Failure to indicate either "yes" or "no" in Column 3 "Mandatory Specification Met" for each mandatory specification will result in the bid being deemed non-responsive and the bid will not be given further consideration.**

If the product offered does not meet each mandatory specification, the bid will be deemed non-responsive and the bid will not be given further consideration.

2. Supporting technical documentation, which may include but is not limited to specification sheets, technical brochures, photographs or illustrations, must be provided for each mandatory specification to demonstrate how the mandatory specification is met (excepting any cells that are greyed out in Column 4) and should be cross-referenced on the Compliance Matrix in Column 4. (If there aren't any cells greyed out in Column 4, supporting technical documentation is required for all mandatory specifications). It is the Bidder's responsibility to ensure that the submitted supporting technical documentation provides detail to prove that the proposed product meets/products meet the requirements of the mandatory specification.

Where published supporting technical documentation is not available for a mandatory specification, the Bidder must prepare a written narrative complete with a detailed explanation of how its bid demonstrates technical compliance.

The above referenced supporting documentation should be provided prior to bid closing. If the supporting documentation referenced above has not been provided by bid closing, the Contracting Authority will notify the Bidder that they must provide supporting documentation within two (2) business days following notification. Failure to comply with the request of the Contracting Authority within that time period will deem the bid non-responsive and the bid will not be given further consideration.

3. Bidders must address any concerns with the mandatory specifications to the Contracting Authority before bid closing. It is preferred that concerns be submitted in writing (e.g. by e-mail).

COMMERCIAL LAUNDRY WASHER AND DRYER SETS

Manufacturer Offered:	Model Number Offered:

Column 1	Column 2	Column 3	Column 4
Item #	Mandatory Specifications	Mandatory	Indicate cross reference location

		Specification Met? Indicate either "Yes" or "No"	in supporting documents, which demonstrates how the mandatory specification is met
1	Laundry washer and dryer combinations must be white in color		X
2	Washer must be electric; washer electrical requirement is 120 volts, 60Hz, single phase		
3	Dryer must be electric; dryer electrical requirement is 240 volts, 60Hz, single phase		
4	Washer and dryer must be Energy Star rated		
5	Washer must be compatible with High Efficiency (HE) detergent		
6	Washer and dryer must be CSA approved		
7	Washer and dryer must have a control panel		X
8	The washer tub capacity must be 3.19 cubic feet (90 litres) at minimum		
9	The washer tub must be stainless steel		X
10	Water hoses must be supplied; the hose must have 3/4 inch (19.01mm) female garden hose type fittings, no clamp-on or quick disconnect fittings are permitted		X
11	The machine must prevent the washer tub from vibrating in the spin cycle. This can be achieved from a high quality suspension or with the assistance of shock absorbers.		
12	The washer drain hose must not exceed a maximum diameter of 1-1/2 inches		X
13	The dryer tub capacity must be 7.0 cubic feet at minimum		
14	The dryer vent size must be 4 inches in diameter		X
15	Each unit (washer and dryer) must fit through a 34 inch doorway		X
