THIS AMENDMENT IS RAISED TO ANSWER QUESTIONS FROM POTENTIAL BIDDERS:

- Q1. Would DND once again, based on the response from CCTT rewrite or remove this requirement?
- A1. DND will not change or remove this requirement for at least one (1) licensed technician. DND will accept having a technician that is registered with a provincial association.
- Q2. DND is already asking for a Professional Engineer. Based on the response, ref the modifications (no intend but "may" have modifications), then why wouldn't one Professional Engineer be sufficient for the purpose of the work requirement should a Task be raised to initiate modifications?
- A2. DND's requirement is for at least one Professional Engineer.
- Q3. We have requested twice now a response to our Q3 – Have all previous modifications performed by the previous incumbent in the past five (5) years been CSA approved? This has not yet been answered. Please provide a response to this.
- A3. We will not answer questions concerning the previous contract.
- Q4. In regards to response (Amendment 006) Q4. In order to get CSA certified modifications, a complete drawing package of all the heaters in the RFP would need to be provided. If that is the case, then DND would need to provide all drawings for all the heaters listed in this RFP. Would DND please provide all the drawings for the heaters identified in the SOW?
- A4. DND can only provide drawings that they are authorized to release. The remaining drawings will have to be procured from the OEM.
- Q5. How much work was actually sub-contracted under the previous contract based on the overall contract value?
- A5. We will not answer questions concerning the previous contract.
- Q6. Further to Q4 raised in Amendment 006, would Canada be prepared to accept ESA certification?
- A6. DND will accept a technician that is ESA certified as equivalent to a licensed technician in the electrical field registered with CCTT.

All other terms and conditions remain the same.
