2.4 Enquiries - Bid Solicitation

All enquiries must be submitted in writing to the Contracting Authority no later than **five (5) calendar days before the bid closing date**. Enquiries received after that time may not be answered.

Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that the Bidder do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all bidders. Enquiries not submitted in a form that can be distributed to all bidders may not be answered by Canada.

2.5 Applicable Laws

Bidders may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their bid, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. 3.1.5 Determination of Cost - Addition or deletion of work

The Department may from time to time, require changes to the areas to be maintained due to operational requirements, on-site projects, or construction of new areas to be maintained or deletion of areas to be maintained; the Firm Price will be adjusted accordingly based on 80% of the Firm Price shown in Pricing Schedule 1 and/or 2 (adjust accordingly), as follows:

Firm Price break down for the calculation of additional or deletion of m² :

- 20% of the original firm price remains unchanged. **Operating Cost**
- 80% of the original firm price for the calculation of addition or deletion:

The increase or decrease in the monthly firm price for the areas added or deleted is based on 80% of the firm price and will be calculated by dividing the firm price for snow removal by the number of square meters listed in Annex D Snow Removal Site Plan and then multiplied by the square meter area to be added or deleted.

Example:

A Contract in Year 1 (firm price of \$65,000.00) with a total area of **2,805m²**, from which a reduction of **358m²** must be applied effective January 1st:

PERIOD OF CONTRACT November 1 st to April 30 th	ANNUAL FIRM PRICE
Year 1	\$ 65,000.00
Option Year 1	\$ 74,000.00
Option Year 2	\$ 78,000.00

Price breakdown for the calculation of deletion :

	Year 1	Option Year 1	Option Year 2
20% of Firm Price	\$13,000.00	\$14,800.00	\$15,600.00

A payment is considered overdue on the 31st day following that date and interest will be paid automatically in accordance with the section 17.

All Year Grounds (Snow Removal and Landscape Maintenance)

days of receipt. The 30-day payment period begins upon receipt of the revised invoice or the replacement or corrected Work. Failure by Canada to notify the Contractor within 15 days will only result in the date specified in subsection 1 to apply for the sole purpose of calculating interest on overdue accounts.

- (a) **Landscaping** shall be paid in accordance with **Pricing Schedule 1**, upon submission of invoice at the end of each calendar month as per SACC Clause 2035-16 (standard payment period is 30 days) from May through October for each Landscaping season.
- (b) **Snowfall up to 254 cm** shall be paid in accordance with **Pricing Schedule 2** in the percentages shown below upon submission of invoice at the end of each calendar month as per SACC Clause 2035-16 (standard payment period is 30 days) from November through April for the snow season as follow:

February = 25% of the Firm Lot Price
March = 20% of the Firm Lot Price
April = 5% of the Firm Lot Price

(c) **``As and When Requested`` Work**

Any costs incurred for **"Snowfall in Excess of 254 cm"**, **"Special Operations"** and for **"Extra Work"** shall be paid, on an "as and when requested" basis, in accordance with **Pricing Schedule 3, 4 and 5**, after completion, inspection and acceptance of the work performed at the end of the calendar month in which the work has been performed and accepted.

Canada's total liability under the "as and when requested" portion of the Contract shall not exceed \$_____ (to be determined). (Applicable Taxes extra)

All Year Grounds (Snow Removal and Landscape Maintenance)

7.7.3 Limitation of Expenditure

The Contractor will supply the goods and services under the Contract to an estimated total expenditure that must not exceed **\$ (to be determined)** (Applicable Taxes Extra) of which **\$ (to be determined)** (Applicable Taxes extra) is for goods and/or services enumerated or described in Pricing Schedule 1 and 2, and **\$ (to be determined)** (Applicable Taxes extra) is for additional goods and/or services that may be requested on an "As and When Requested" basis at the prices and/or rates set out in Pricing Schedule 3, 4 and 5.

7.7.4 Determination of Cost - Addition or deletion of work

The Department may from time to time, require changes to the areas to be maintained due to operational requirements, on-site projects, or construction of new areas to be maintained or deletion of areas to be maintained; the Firm Price will be adjusted accordingly based on 80% of the Firm Price shown in Pricing Schedule 1 and/or 2 (adjust accordingly), as follows:

Firm Price break down for the calculation of additional or deletion of m² :

- 20% of the original firm price remains unchanged. **Operating Cost**
- 80% of the original firm price for the calculation of addition or deletion:

The increase or decrease in the monthly firm price for the areas added or deleted is based on 80% of the firm price and will be calculated by dividing the firm price for snow removal by the number of square meters listed in Annex D Snow Removal Site Plan and then multiplied by the square meter area to be added or deleted.

Example:

A Contract in Year 1 (firm price of \$65,000.00) with a total area of **2,805 m2**, from which a reduction of **358 m2** must be applied effective January 1st:

PERIOD OF CONTRACT November 1 st to April 30 th	ANNUAL FIRM PRICE
Year 1	\$ 65,000.00
Option Year 1	\$ 74,000.00
Option Year 2	\$ 78,000.00

Price breakdown for the calculation of deletion :

	Year 1	Option Year 1	Option Year 2
20% of Firm Price	\$13,000.00	\$14,800.00	\$15,600.00
80% of Firm Price	\$52,000.00	\$59,200.00	\$62,400.00

Formula: **\$52,000.00** (80% of the \$65,000.00) / 2,805m2 = \$18.54 x 358m2 = \$6,637.32 (total reduction based on the total firm price.)

Price breakdown reduction (Snow Only) effective January 1st:

- January = \$6,637.32 @ 25% = \$1,659.33
- February = \$6,637.32 @ 25% = \$1,659.33
- March = \$6,637.32 @ 20% = \$1,327.46
- April = \$6,637.32 @ 5% = \$331.87

Total Reduction = \$4,977.99

Verification of the price breakdown: \$6,637.32 x 75% (remaining period to apply the reduction, beginning January 1st) = \$4,977.99

Non-target animals such as skunks, raccoons or porcupines found trapped must be immediately released on-site.

4.7 Winter Preparation

Advise the Technical Authority when the work is scheduled so an inspection can be conducted to verify the tasks have been completed.

1. Garden beds

Garden beds must be prepared for winter by trimming perennials to ground level, weeding and raking the soil. Materials will be removed from site.

2. Remove fallen leaves

Leaves must be mulched or raked and removed from site whenever fallen leaf accumulation exceeds 40% of a square metre of any surface. All mulched leaves must be spread evenly to avoid damages to the turf. If the Technical Authority determines that the quantity of mulched leaves is excessive the Contractor will be directed to rake and dispose of all mulched leaves off-site.

4.8 Green Roofs, 455 Boulevard de la Carrière

An escort is required when accessing the 12th floor green roof at 455 Boulevard de la Carrière. A maintenance schedule will be agreed upon by the Technical Authority, Property Facility Manager, and the Contractor upon commencement of the contract in order to schedule an escort and keys.

Keys will be provided to the Contractor for the parking garage green roofs; an escort is not required for these roofs.

1. Green roof maintenance

Maintain healthy plant material throughout the growing season by providing twice monthly, or as required to meet maintenance standards, green roof maintenance services. Each visit to also include a complete visual inspection of the entire green roof area to assess overall health and appearance of plant material and to verify that all visible assembly components remain correctly installed and are performing optimally. Spring clean-up and winter preparation of planted areas shall include the removal of dead plant material, weeds, litter and clean-up of roof drains within the planting area. Immediately report any damages to the Technical Authority.

If infilling of bare spots (with cuttings, plugs and seeds) or replacing eroded substrate is required as a result of factors beyond the control of the Contractor, the Technical Authority will issue a Call-Up for this work under the Statement of Work, Section 5 Extra Work.

2. Growing medium testing and fertilization

Before the start of each season, administer a growing medium test from an accredited testing facility, to assess pH and fertility levels. Based on test results, in early spring apply a high quality slow release granular fertilizer as required. The pH level should be maintained in the range of 6.5 – 7.5.

3. Weeding

Remove weeds or any unintended species by physical means before they flower and set seed. Never allow a woody plant to establish in the green roof. All vegetation must be removed from areas not designated for vegetation such as gravel areas, pavers, and drains. Do not use herbicides.

4. Litter removal

The green roof, gravel and paving stone areas shall be kept free of litter. Litter includes weeds, garbage, as well as organic and inorganic debris.

5. Watering

All vegetation shall be watered as required during prolonged dry weather to ensure plants receive enough moisture to sustain optimum aesthetic value and maintain vigour throughout the growing season. Prolonged hot dry weather is generally defined as periods of 75⁰ F / 24⁰ C with less than 1 inch / 2.5 cm of rainfall that persists for four weeks or longer. This estimated time period may vary depending on local weather and site conditions; therefore, the plants should be monitored closely to determine if watering is required. Any recently planted material shall be irrigated as necessary to ensure optimum conditions for the establishment period. Do not overwater.

Hose bibs on rooftop of main building only. No hose bibs on parking garage rooftop or bicycle storage rooftop.

6. Clear roof drains

Roof drains shall be cleared of all litter, leaves, growing medium, vegetation, or anything which interferes with the free flow of runoff water.

7. Displaced growing medium

Any displaced growing medium should be replaced to the original condition.

8. Foot traffic

Limit foot traffic to a random path. Avoid repetitive foot traffic, standing in one place or trampling plants, especially when plants are wet or frozen.

9. Clean up

Clean up thoroughly after any maintenance operation. Remove all debris from site. Ensure no dirt or debris is tracked or left inside the building when accessing the green roofs. Footwear must be clean when walking inside the buildings.

10. Green roof inspections

In addition to the regularly scheduled inspections during the growing season, the Contractor is to inspect the roof after major wind events to ensure that the green roof system including hardscape elements are still intact and to report any damage to the Technical Authority on the Green Roof Maintenance Report.

11. Green roof site maintenance form

The Green Roof Site Maintenance Form Annex "H" will be completed after each visit to document the Contractor's inspections and work completed. The Contractor's supervisor shall verify and sign that all relevant activities have been completed and documented. This form is to be submitted electronically to the Technical Authority within one business day of maintenance activities. The reports must be kept up to date in order for invoices to be processed.

12. Hazardous conditions

Report any conditions detrimental to plant health or personnel safety.

13. Insects and Disease

Monitor all vegetation for the presence of pest and disease. Notify the Technical Authority of any infestations. Use Integrated Pest Management practices such as traps, water blast, physical removal or pruning. Do not apply any registered chemical control unless approved in writing by the Technical Authority. Keep records of plant condition, positive pest identification and corrective actions taken to combat pest and disease.
