This amendment is being raised to answer the following questions:

Question and Answer:

With respect to tooling it's mentioned "North American" spec is needed which is not an issue.

Question: do you require or typically use 1-V or 2-V dies tools?

Answer: 1-V

The required tonnage is shown as 10 MT.

Question: Should this read 100 MT?

Answer: yes 100MT

The requirements call for a pneumatic foot pedal with emergency stop.

Question: Can this also be an electrical foot pedal with emergency stop?

(Virtually no modern servo CNC press brake will have a pneumatic foot pedal, and if it did I doubt it would comply with CSA Z142-10)

Answer: Yes, an electric foot pedal with emergency stop will be fine.

Question: Can the back protection be a gate/door with safety rated interlock?

Answer: Yes, the gate/door with a safety interlock will be fine.

In order to meet the required delivery date, we would may have to quote a 230 volt press.

Question: Would it be acceptable for a 575/230 volt transformer to be supplied with/on the press?

Answer: yes, a 575/230 volt transformer supplied or on the press will be fine.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
