This Solicitation Amendment is issued for the following:

1. To address Questions from the industry that were submitted following the site visit.

Please refer to the attached Addendum No. 01.

Addendum No. 01

Date	February 7, 2019	Pages	1 (incl. this page)
Project:	Justice Building – Electrical Work 2018 - PSPC Project No.:R.009486193		

Addendum clarifications, revisions, deletions and inclusions shall be read with, and form part of, the original bid documents. All parties tendering the subject project shall take note of and include for the following revisions and/or information provided which supplement the Drawings and Specifications. Receipt of this addendum shall be acknowledged by inserting the addendum number in the space provided in the Tender Forms.

1.1 Clarification – Replies to Bidder Questions

- Q1 Other than the work required during the shutdown(s), can the contractors work during regular daytime hours?
A1 The contractors may work during regular daytime hours depending upon the type and location of the work. No disturbance of the HoC's daily operations will be permitted. Any noise or other disturbances will need to be minimal.
- Q2 What work will need to be performed after hours?
A2 All work that may generate noise or dust or work requiring an electrical shutdown must be performed after regular working hours.
- Q3 May the contractors use the loading dock to deliver their materials? If yes, what are the hours of operation for the loading dock?
A3 Yes, the loading dock may be used for offloading tools and materials during both regular and after hours provided it does not incapacitate HoC's daily operations. Regular working hours are from 7h30 until 16h. Access beyond these hours is possible with PPS security assistance. This will require asking the security officers at the main entrance that access to the loading dock is required.
- Q4 For deliveries, will the materials need to be scanned before entering the building?
A4 At present it does not appear to be required. This is yet to be Confirmed.
- Q5 Is there any space available for the storage of the contractor's tools and materials (for the duration of the project)?
A5 This will depend upon the type of storage space required and for how long. PSPC has very little space to spare for storage. Any storage space provided could be locked but PPS security would still have access to the space.
- Q6 What is the name of the company that currently providing servicing to the fire alarm system?
A6 Tyco Simplex Grinnell.
