Amendment 003

This amendment is raised to revise the solicitation and to publish questions and answers.

Revision 5

At part 2.6 Optional Site Visit:

Delete: Thursday, February 14th, 2019

Insert: Tuesday, February 19th, 2019

Question 1: At what pressure is the min flow capacity of 316 l/s?

Response 1: At operating pressure. The intent is that a minimum flow of 316 l/s is provided at operating pressure of 125 psi max

Question 2: Standard pressures for this size compressor is 150 psi. Since it is used for sandblasting, operating pressure should be at 125 psi. Can we supply a compressor for 150 psi max?

Response 2: Yes, requirement 4.2.2.2.7 in the TSOR states working pressure between 58 psig and 181 psig.

Question 3: We strongly recommend an air tank size for this compressor at 2000 gallon, not 500 gallon as per spec.

Response 3: As stated in section 4.2.3.2.2 of the TSOR, 500 gallons is a minimum. This is what is currently being used in the system. Increasing the size of the air tank will require a structural analysis of the mezzanine supporting the air system.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
