2.4. Enquiries - Request for Standing Offers

All enquiries must be submitted in writing to the Standing Offer Authority no later than ten (10) calendar days before the Request for Standing Offers (RFSO) closing date. Enquiries received after that time may not be answered.

Offerors should reference as accurately as possible the numbered item of the RFSO to which the enquiry relates. Care should be taken by Offerors to explain each question in sufficient detail in order to enable Canada to provide an accurate answer. Technical enquiries that are of a proprietary nature must be clearly marked "proprietary" at each relevant item. Items identified as "proprietary" will be treated as such except where Canada determines that the enquiry is not of a proprietary nature. Canada may edit the questions or may request that Offerors do so, so that the proprietary nature of the question is eliminated, and the enquiry can be answered with copies to all Offerors. Enquiries not submitted in a form that can be distributed to all Offerors may not be answered by Canada.

2.5. Applicable Laws

The Standing Offer and any contract resulting from the Standing Offer must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

Offerors may, at their discretion, substitute the applicable laws of a Canadian province or territory of their choice without affecting the validity of their offer, by deleting the name of the Canadian province or territory specified and inserting the name of the Canadian province or territory of their choice. If no change is made, it acknowledges that the applicable laws specified are acceptable to the Offerors.

PART 3 - OFFER PREPARATION INSTRUCTIONS

3.1. Offer Preparation Instructions

If the Offeror chooses to submit its offer electronically, Canada requests that the Offeror submits its offer in accordance with section 8 of the 2006 standard instructions and as amended in Part 2 - Offeror Instructions, Article 2.1 Standard Instructions, Clauses and Conditions. Offerors are required to provide their offer in a single transmission. The epost Connect system has a limit of 1GB per single message posted and a limit of 20GB per conversation. The offer must be gathered per section and separated as follows:

Section I: Technical Offer
Section II: Financial Offer
Section III: Certifications

If the Offeror chooses to submit its offer in hard copies, Canada requests that Offerors provide their offer in separately bound sections as follows:

Section I: Technical Offer (two (2) hard copies)
Section II: Financial Offer (one (1) hard copy)
Section III: Certifications (one (1) hard copy)

Prices must appear in the financial offer only. No prices must be indicated in any other section of the offer.

If the Offeror is simultaneously providing copies of its offer using multiple acceptable delivery methods, and if there is a discrepancy between the wording of any of these copies and the electronic copy provided through epost Connect service, the wording of the electronic copy provided through epost Connect service will have priority over the wording of the other copies.

Canada requests that Offerors follow the format instructions described below in the preparation of their offer.

- (a) use 8.5 x 11 inch (216 mm x 279 mm) paper;
- (b) use a numbering system that corresponds to that of the Request for Standing Offers.

In April 2006, Canada issued a policy directing federal departments and agencies to take the necessary steps to incorporate environmental considerations into the procurement process Policy on Green Procurement (<http://www.tpsgc-pwgsc.gc.ca/ecologisation-greening/achats-procurement/politique-policy-eng.html>).

To assist Canada in reaching its objectives, Offerors should:

- 1) use 8.5 x 11 inch (216 mm x 279 mm) paper containing fibre certified as originating from a sustainably-managed forest and containing minimum 30% recycled content; and
- 2) use an environmentally-preferable format including black and white printing instead of colour printing, printing double sided/duplex, using staples or clips instead of cerlox, duotangs or binders.

Section I: TECHNICAL OFFER

In their technical offer, Offerors should explain and demonstrate how they propose to meet the requirements and how they will carry out the Work. The Offeror must consider the following elements in its technical offer.

Solicitation No. - N° de l'invitation
W8486-184917/D

The following technical information must be submitted with the offer, or promptly after a request from the Standing Offer Authority. Failure to provide the technical information within the requested time frame will render the offer non-responsive.

1. Product Information

Brand name, and where applicable, the qualification product reference number (QPRN) of the product offered are to be stated in Annex A of the offer. The Offeror must include all required reference numbers, letters, Certificates of Analysis (CoA), and Safety Data Sheets (SDS) pertaining to each product offered as specified in Annex A.

1.1 Where a Qualified Products List (QPL) is specified for an item at Annex A:

- a. Qualification product reference number (QPRN) must be stated if the product offered is listed on the published QPL, otherwise a letter from the appropriate qualifying authority for the applicable specification is required; and,
- b. Products offered must be qualified by the appropriate qualifying authority for the applicable specification at the time of solicitation closing date, or,

1.2 Where tests are specified for an item at Annex A:

- a. A Certificate of Analysis from a recognized laboratory is required; and,
- b. The Certificate of Analysis results must demonstrate qualification to all requirements of the applicable specifications; and,
- c. The Certificate of Analysis must indicate the requirement/property, test method used, and results obtained with units; and,
- d. The Certificate of Analysis must be signed, dated, and must indicate the date of manufacture and batch number of the product tested; and,
- e. The product tested must be of the same batch as the product offered initially; and,
- f. The Certificate of Analysis must not be expired. A Certificate of Analysis is considered to have expired when the product (batch) reaches the date of first re-test (according to the minimum re-test frequency set out for each item and referred to as "Re-test (months)" at Annex "A") after the date of manufacture.

1.3 Where a Technically Acceptable Products List (TAPL) is specified for an item at Annex A:

- a. Offerors are required to provide a TAPL letter showing that the product is approved to the current issue of the applicable Department of National Defence Specification. Only products with this approval will be considered; and,
- b. Products offered must be qualified by the appropriate qualifying authority for the applicable specification at the time of solicitation closing date.

2. Safety Data Sheet (SDS)

The most current SDS of the product is required for assessment purposes; it must disclose the chemical ingredient information, in accordance with the Hazardous Products Regulations (HPR), along with its Chemical Abstract Service (CAS) number and percent composition. If either the CAS number or chemical name of a controlled product has not been disclosed on the SDS due to trade secret information, the Offeror must provide this confidential information in a separate document.

If no CAS number or name of the chemical is disclosed, the Offeror must provide a statement that the product is not WHMIS controlled and does not contain hazardous ingredients. Products that are covered by the Hazardous Products Act are evaluated against specific criteria as required by the HPR. If the product meets any of the criteria for a hazard class, it is known as a hazardous product or WHMIS controlled product.

Note: Proprietary information will be treated with confidentiality.

3. Optional products and Different Container size Offers

3.1 Optional products

Offerors may offer multiple optional products for the same item number with one price applicable for all products offered under that item. All optional products offered will be evaluated against the same criteria. If all optional products are technically compliant, the Offeror will be allowed to supply any of the qualified optional products under that item number. The optional products qualified under a same item number must be of the same Environmental, Health and Safety assessment class in order for a supplier to be allowed to supply them under the same item number.

If an optional product is not compliant, it will be removed from the Offeror's list and only the remaining technically compliant products will be considered for further evaluation.

3.2. Different Container size Offer

In the event that the Offeror wishes to offer the same product in a different container size (i.e. different NSN but the same product specifications, grade, type and class), the Offeror must provide the size, unit of issue, and a detailed justification. In this case, the Offeror is not required to provide technical data, literature, specifications, and drawings, since the product is the same and only the container size changes.

The Standing Offer will identify, if accepted, the new NSN corresponding to the container size offered. Only the NSN listed in the Standing Offer will be allowed to be supplied.

3.3 Recycled and Re-refined Oils

Offerors may offer products manufactured with recycled or re-refined oil bases, so long as the product is qualified by the agency responsible for qualifying the applicable specification identified for the product.

4. Repackaging

Requirements for repackaged lubricants:

The Offeror is required to declare for each item whether he is the original manufacturer. Where an Offeror is not the original manufacturer of the lubricant, the Offeror must state whether the lubricant will be repackaged by any party other than the original manufacturer. In order for repackaged items by other than the original manufacturer to be acceptable, it is mandatory for the Offerors to:

- a) Demonstrate accreditation of the repackaging organization (RPO) to a recognized quality scheme such as ISO 9000 or its derivatives, or comply with the requirements of AQAP 2120;

b) Submit a copy of their quality management plan for the repackaging of each item to be repackaged.

The quality management plan must include as a minimum:

- location where the repackaging is to take place;
- how the process is to be achieved;
- details of how contamination from previous products will be avoided;
- how the RPO will maintain batch control, given that mixing of different batches is not permitted;
- and,
- how the RPO will demonstrate that no degradation of product quality has occurred.

Section II: Financial Offer

Offerors must submit their financial offer in accordance with Annex "A" Requirement and Annex "B" Basis of Payment. The total amount of Applicable Taxes must be shown separately.

1. Unit Price

The firm unit price must be in Canadian dollars DDP destination Incoterms 2000 and must not exceed 2 decimals. Offerors must submit a price per unit for the items in Annex "A" for each region of delivery.

1.1 Basic Unit price

Offerors must submit a Basic unit price per unit of issue for the items in Annex A within a region they wish to compete for. The regions are defined in Part 1.
