**This amendment has been raised to answer the following questions:**

Q1: Under 1.19.1 i. Does the customer have an existing system for the rack? If so, can they provide pictures so we can quote accordingly?

A1: No, we currently do not have an existing system. The rack needs to be durable enough to securely carry the load of the hose

Q2: Under Section 1.16 i. Would I be able to get the paint code that the customer specifically wants?

A2: PCA does not have a particular paint code. A standard bright yellow paint used on road maintenance vehicles such as snow plows, is acceptable

Q3: Under section 1.19.1 iv. Power rewind – does the customer prefer hydraulic rewind or electric rewind?

A3: Hydraulic rewind would be preference

Q4: Under Section 1.20.5. Does the mounted gauge require a meter for print-out or would a digital display be sufficient?

A4: A print out is not necessary. Digital Display is sufficient.

Q5: 1.22 i. Does the customer prefer a tank material? Mild steel will be the cheapest. However, Stainless steel is the best approach for tank life. Or is this tender Price driven? Secondly, if we do quote the tank in stainless, we don't normally "polish" the entire tank, we leave the shell and tank components the standard Stainless finish while polishing just the bands as the attached picture. Is this acceptable?"

A5: This tender is price driven. Either material is acceptable. If Mild steel is used it must be treated with a corrosion resistant coating while acceptable for use with potable water. If stainless steel is used, the natural stainless finish is acceptable.

**All other terms and conditions remain the same.**
