

Question and answer #1 of 1

Q1: Section 7.2 Part A Construction Projects describes required experience “such as embassies”. We are assuming that renovations related to a secure government-controlled access establishment (that also has finely detailed interiors) would be acceptable. Can you confirm?

A1: Yes, we are looking for something with similar qualities. This is not necessarily limited to government buildings. Controlled access could include private sector secure facilities. The bidder should indicate how the proposed facility has similarities to an Embassy.

Q2: Also in Section 7.2, the phrase “experience in the construction and renovation...” is used. Can this be changed to the same wording of a similar procurement currently underway (Project B-DHAKA-302) – specifically: “experience in the construction, and/or renovation of building?”

A2: Yes
