**Les documents français seront disponibles sur demande.**

Amendment 001 has been raised to answer questions from potential bidders.

Q1. In regards to Building Envelope Services SOA Solicitation No.: EZ899-192691/A under section 3.1.2 Licensing, Certification or Authorization it states *"proponent shall be authorized to provide Architectural and Engineering services and must include **an architect licensed, or eligible to be licensed**, certified or otherwise authorized to provide the necessary professional services to the full extent that may be required by provincial or territorial law in the province of British Columbia, and the Yukon Territory. The proponent must provide the AIBC number of the Senior Personnel. Failure by the proponent to provide the required evidence or in the event that the evidence cannot be verified shall result in the Proponent being disqualified and no further consideration being given to the Proponent. "*

Would it be possible to include a member of the team who has a Bachelor of Architectural Science is a member of Engineers and Geoscientists of BC, Association of Professional Engineers and Geoscientists of Alberta, Association of Professional Engineers & Geoscientists of Saskatchewan, BC Building Envelope Council, Registered Roof Observer with the Roofing Consultants Institute, as well as additional training in Passive House and a Certified Infrared Thermographer? Would this be an acceptable alternative to have a licensed Architect?

A1. Building Envelope Firms are typically required to provide architectural services, architectural review, remediation and construction drawings for tender and construction in British Columbia or Yukon. Firms are required to be registered to practice Architecture as per NBC and BCBC, ie: eligible to provide architectural service specialized in building envelope and meet local association rules.

\*All other terms and conditions remain unchanged\*
