COMMUNICATION

The Enhanced Recovery Capability (ERC) project team attended Canadian Association of Defence and Security Industries, (CADSI) Defence & Security Trade Show (CANSEC) held in May 2019 in Ottawa. The project team had an opportunity to meet with the industry that featured displays at CANSEC and shared with CANSEC participants some updates on the procurement process. As some companies were not represented at CANSEC, the project team was not able to relay this information in person. Therefore, this notice is raised to share the updates with the rest of the industry.

The ERC Project has received approval to enter the Definition Phase and its intent is to implement a phased and progressive release of draft procurement documentation by August 2019. Following the release of the documentation, opportunities will be provided for input to refine the ERC requirements. The project's objective is to develop a draft request for proposal (RFP) by February 2020 and complete the final RFP by summer 2020.

The procurement strategy for ERC will result in two separate contracts awarded to a single winning supplier: an acquisition contract, which will include the delivery of ERC vehicles (variants A and B), and an in-service contract to support for the ERC fleet during its in-service life.

Canada is still in consideration in regards to introducing an Invitation to Quality (ITQ) phase to the competitive procurement process.

Additional information on the ERC Project can be found on the Buy and Sell website at <https://buyandsell.gc.ca/procurement-data/tender-notice/PW-BL-316-27219>.

Should you wish to discuss anything in this communication or in your Request for Information Submission, please do not hesitate to contact the Contracting Authority by phone or email listed on page one of this notice.
