This amendment 001 is raised to answer questions to the solicitation as follows:

1 - QUESTIONS / ANSWERS:

Q.01: Will we require extra power harnesses to lower the power from the existing desk height location to the desired location? We typically require extra harnesses as the existing harnesses may not be long enough to drop down to the bottom of the panel. Do you have a CAD plan showing existing furniture systems configuration? If so, can you please provide us with a copy and we can try to determine if new power parts/pieces are required?

A.01: No, we will not require additional power harnesses. Should the harness be unable to reach, the other surface will be retrofitted instead. Not all workstations will require the element to be changed.

Q.02: Will we require a new element for the bottom of the panel or are we expected to cut a new hole in the base element of the panel? If so, this is where the outer cover/bezel may be required if it cannot be relocated from the existing desk height location.

A.02: The existing element will be turned 180 degrees. The existing hole will continue to be used at the bottom of the frame. No new parts are required.

Q.03: We wanted to bring the following to your attention; there will be a noticeable hole on your existing panel(s) when we relocate the existing table height power source.

A.03: N/A

Q.04: Could you please let me know, a frame (frame means electric height adjustable legs) with height range 21" to 47.9" would be acceptable?

A.04: The minimum requirements must be met.

All terms and conditions remain unchanged.
