For the Minister - Pour le Ministre		

The following is in response to inquiries received in relation to this solicitation. This amendment will form part of the contract documents.

Question 1

Q1: Please consider revising the page limit of 45 pages.

A1: The page limit has been increased by 4 pages, **for a total of 49 pages.**

Question 2

Q2: Please provide some guidance around the years of experience and license requirements for each of the required personnel.

A2: Please refer to Appendix B for minimum years of experience for each personnel category. Please refer to General Instructions (GI 14) and Submission Requirements and Evaluation (SRE 3) for licensing.

Question 3

Q3: Rated Requirements Section 3.2.8 and 3.2.9 request that the personnel resumes should include the role of the personnel as per the RS. Is this request only for the 3.2.8 and 3.2.9 resumes or should this be included in all of the personnel resumes?

A3: The request is for 3.2.8 and 3.2.9. However, for the highest possible score, your proposal should relate to the requirements of the standing offer for all sections.

Question 4

Q4: Please confirm there is NO need to identify **Environmental** Field Technicians/Junior Personnel and no need to provide their CVs in the Technical Proposal.

A4: Only the CV's that are explicitly requested in the SRE section should be provided.

Question 5

Q5:

- a) Can the same project site be used to show experience in more than 1 discipline requested in section 3.2.3, 2a)?
- b) If yes, will points be lost for doing so?

A5:

- a) Yes, the same project site can be used.
- b) No.

Question 6

Q6: Can PSPC provide an indication or examples of “typical” sites and projects anticipated under the geotechnical discipline? For example, is the majority of geotechnical work expected to address design related to construction, specific and complex geotechnical problems or support for environmental projects such as excavations?

A6: The majority of geotechnical work expected will be to address design related to construction, specific and complex geotechnical issues. It is expected that some projects will have as a unique discipline the geotechnical.

Question 7

Q7: Can PSPC indicate the anticipated percentage split of project revenue between environmental and geotechnical projects?

A7: The distribution is unknown at this time but it is anticipated being approximately 60% for environmental discipline and 40% for geotechnical discipline. However, many projects will involve both disciplines at the same time.
