Questions and Answers

Q1) What will be placed in the bins i.e. Is it wheat bushels? Or liquid?

A1) Grain

Q2) Are you looking for Smoothwall bins or Corrugated bins?

A2) Smoothwall

Q3) Do you require interior paint. When storing grain this is usually not painted.

A3) No it does not need to be painted in the inside. The bins will be for untreated grain only.

Q4) Under 2.12 Must come equipped with Moisture/Temp Cable compatible with Easy Check Deluxe hand unit. Please provide details on this system

A4) Agriculture Canada owns a Westeel Easy Check Deluxe hand unit monitor. The Moisture/ Temperature cable supplied must be compatible with the monitor.

The Moisture/ Temperature cable must be long enough to get a reading from the bottom of the bin. Contractor must also supply the mounting device to attach the cable to the bin and a communication line to go from the Moisture cable down the ladder and be accessible to staff at ground level.

The monitor will work with either Westeel or OPIsystems Inc moisture/ tempertaure cables.

Q5) We need more details of the site where the hopper bins will be installed. Is it possible to send some pictures of the site ?

A5) See attached pictures. We have taken delivery of 5000+ bushel bins in this yard. We will also have the existing bins moved.

Q6) What Product is stored inside this bins?

A6) Grain

Q7) Depending on what product it will be used for, we will not be comfortable putting my regular slide gate under this bin, if it is a coarse grain and it is being moved out with a permanently fixed auger of some sort then what we build in house is going to work just fine, on the other hand if they are storing a fine powder and moving the auger in and out then I would recommend that we use a slide gate that can be fine-tuned better than the ones I build can be. I would appreciate if you clarify this.

A7) We are storing grains, oilseeds, pulses and corn. Nothing is being built under the bins. We have self-propelled loading augers we use to unload the hopper bins.
