

## AutoCAD A1

- 1- DISMANTLE THE BATHROOM SINK WITH ALL ACCESSORIES FOR RELOCATING. CONCRETE FLOOR OPENING TO BE PROVIDED TO SEAL THE WASTE PIPE TO THE MAIN WASTE PIPE. STUFF THE FLOOR OPENING AS EXISTING (SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB). CAP THE COLD AND HOT WATER PIPES NEAR THE MAIN PIPE IN THE CEILING. REMOVE THE PLUMBING VENT UP TO THE MAIN PIPE AND SEAL AT THE MAIN PIPE.
- 2- DISMANTLE THE SINK WITH ALL ACCESSORIES FOR RELOCATING. CONCRETE FLOOR OPENING CONCRETE FLOOR OPENING TO BE PROVIDED TO SEAL THE WASTE PIPE TO THE MAIN WASTE PIPE. STUFF THE FLOOR OPENING AS EXISTING (SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB). CAP THE COLD AND HOT WATER PIPES NEAR THE MAIN PIPE IN THE CEILING. REMOVE THE PLUMBING VENT UP TO THE MAIN PIPE AND SEAL AT THE MAIN PIPE.
- 3- DISMANTLE THE TOILET BOWL WITH ALL ACCESSORIES FOR RELOCATING. CONCRETE FLOOR OPENING TO BE PROVIDED TO REMOVE THE EXISTING WASTE PIPE UP TO THE MAIN WASTE PIPE AND SEAL AT THE MAIN PIPE. STUFF THE FLOOR OPENING AS EXISTING (SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB). INSTALL A CAP ON COLD WATER PIPING NEAR THE MAIN PIPE.
- 4- TRAP PRIMER SYSTEM TO DISMANTLE COMPLETELY WITH HIS PIPING IN THE CONCRETE FLOOR UP TO THE FLOOR DRAIN. DAR2C AND THE SOLENOID VALVE MUST BE RELOCATED IN THE FUTUR NURSERY. CONCRETE FLOOR OPENING TO BE PROVIDED. REMOVE COLD WATER SUPPLY UP TO THE MAIN PIPE AND CAP NEAR THE MAIN PIPE. STUFF THE FLOOR OPENING AS EXISTING (SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB).
- 5- FLOOR DRAIN TO DISCONNECT WITH THE PIPING UNTIL THE MAIN PIPE. CONCRETE FLOOR OPENING TO BE PROVIDED. REMOVE THE FLOOR DRAIN PRIMER SYSTEM. STUFF THE FLOOR OPENING AS EXISTING (SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB).
- 6- MAIN VALVES FOR HOT AND COLD WATER IN ABOVE THE CEILING SPACE. REMOVE HOT AND COLD WATER SERVICES UP TO THIS POINT. THE PLUMBING CONTRACTOR MUST BE ENSURED TO MAINTAIN THE CONTINUITY OF SERVICES THAT COULD ATTACH ON THIS PIPES.
- 7- CONCRETE FLOOR OPENING (SLAB ON-GRADE) TO BE PROVIDED FOR THE FUTURE PIPING. THE USE OF JACK-HAMMER IS PROHIBITED. SEE THE NEW ARRANGEMENT PLANS TO SEE THE EXACT PIPING LOCATION, THE EXACT DEPTH AND WIDTH OF THE EXCAVATION MUST BE COORDINATE WITH THE HEIGHT OF THE EXISTING PIPING. THE PLUMBING CONTRACTOR RESPONSIBLE FOR ALL OPENINGS AND ALL REPAIRS OF THE CONCRETE SLAB. SEE TYPICAL CROSS SECTION OF ON FLOOR SLAB.
- 8- THE HEIGHT OF EXISTING PIPING IS LOCATED ABOVE 406mm UNDER THE CONCRETE SLAB, PROVIDE EXCAVATION AT THIS POINT.
