The purpose of this amendment is to:

1. Modify Annex A.
2. Modify Appendix A3.
3. Modify Appendix A6.
4. Provide answers to bidders' questions.

The following shall form part of the RFP:

1. Reference Paragraph 7.1.8 in Annex A – Statement of Work:

Delete:

The proposed system must allow appropriately configured subscriber equipment to seamlessly roam without user intervention between radio sites.

Insert:

For Trunking operation, the proposed system must allow appropriately configured subscriber equipment to seamlessly roam without user intervention between radio sites.

2. In Appendix A3

Delete:

CLIN 5: Logger Client Workstation – Qty 5.

Insert:

CLIN 5: Console Workstation – Qty 5.

3. In Appendix A6

Delete: Item Number 16 and 17 as shown below;

Item Number	Description	Responsibility of RCMP	Responsibility of Contractor
16	Provide battery backup systems at Radio System Repeater Sites		Yes
17	Install battery backup systems at Radio System Repeater Sites	Implementation Period 2 and 3	Implementation Period 1 only

Insert the following;

Item Number	Description	Responsibility of RCMP	Responsibility of Contractor
16	Provide battery backup systems at Radio System Repeater Sites	Yes	
17	Install battery backup systems at Radio System Repeater Sites	Yes	

All other terms and conditions of the RFP remain unchanged.

Bidders' Questions Received as of 12 July 2019

- Q1. In Appendix A3, the table does not include a CLIN for the Eventide NexLog logging recorder interface. Would the RCMP like a separate CLIN for the Logging Interface?
- A1. Appendix A3 - No a separate CLIN is not required. All costs and work effort required to meet the logging recorder interface requirements should be captured within CLIN 1: Radio System Core.
- Q2. Item 7.2.4 in Annex A states "All proposed equipment destined for the radio sites must operate from a 24 VDC or 12 VDC power source. All radio network equipment can be powered by a 120 VAC 300 watt inverter." Can the RCMP please confirm if this is true for the Trunking radio sites or does it only apply to the Conventional sites? Is the 120 VAC 300 watt inverter provided by the RCMP?
- A2. RCMP confirm item 7.2.4 in Annex A applied to both Trunking and Conventional radio sites. The 120 VAC 300 watt inverter will be provided by the RCMP. If greater capacity is required, the RCMP will be responsible to increase the number or size of the inverters.
