Questions and Answers

Q1 : To read.... "Up" to 3000mm/sec or 3.0m/sec is more realistic

A1 : The criterion is good and we shall stay with this as written in French and English.

Q2 : Mandatory Technical Criteria # J stipulates..."Motion control: Digital motion control with a "minimum" engraving speed of 3000mm/second

Could you kindly verify that this requirement is not a typographical error?

A2 This is not a typographical error.

Q3 : Furthermore, the CO2 laser with the stipulated power can only "cut" up to 0.5mm of certain metals

A3 : Our needs require the to engrave and cutting is simply an added feature that would be considered an advantage and one that could be used from time to time.
