4.1.1 Technical Evaluation

Each bid will be reviewed to determine whether it meets the mandatory requirements of the bid solicitation. Any element of the bid solicitation identified with the words "must" or "mandatory" is a mandatory requirement.

Bids that do not comply with each and every mandatory requirement will be declared non-responsive and be disqualified.

4.1.1.1 Mandatory Technical Criteria

The bidder must include with its proposal:

1. The Table of technical compliance below duty filled-in:

The supplied equipment must meet or better all of the requirements defined below. The supplied equipment is to be new, not used or refurbished. Equipment not meeting all the following Mandatory Requirements will be considered non-responsive.

Bidder must provide with their proposal technical literature/brochures, operating manuals, written documentation (such as a description of equipment components and capabilities) etc., to demonstrate compliance with each area of the criteria stated below at time of bid closing. Proposal evaluation will be based upon the information supplied with the bid only. Failure to demonstrate compliance with any area of the criteria will render your proposal non-responsive and no further consideration will be given. References are to be specific to supporting documentation (ex. document title, page and paragraph number).

Please note that compliance must be demonstrated (by submission of supporting documentation such as technical literature/brochures, operating manuals, written statement describing how requirement is met etc.) and that if an offeror only states "comply" without any further detail, this is not considered as a demonstration compliance. A full description of the performance and capabilities of the equipment must be provided.

Although bidders must propose products meeting all mandatory specifications and components outlined in **Annexes "A"**, at the bid closing date, bids will be evaluated on following preselected mandatory specifications and components:
