Subject: Questions from Vendors #3

BID SOLICITATION #W7707-176015 Sonobuoy (2)

Date: 2019-07-27

Question and Answer

Question 1:

We read the solicitation document for this tender and are unclear whether there is an equivalency, alternative or substitute accepted for the above-mentioned item. On page 20 under the definitions section there is a reference about this term which is also mentioned in the specifications table shown in Specifications D (pp. 23-24), however we are unsure about this eventual equivalency. A clarification will be greatly appreciated.

Answer 1:

We assume that the question is referring to the entry “Analog equivalency” in the Definitions section on p. 20 of the solicitation. This definition refers only to the mathematical scaling that allows the digital output of the SDSR to be regarded as having units of volts. In specification D11, for example, the SDSR output levels are stated in dBV (decibels re 1 VRMS) by means of this scaling. However, the word “equivalency” used in this narrow sense of a mathematical scaling does not imply that there is an acceptable replacement or substitute for the entire SDSR. The Government requires an SDSR that meets all the requirements in the SOR.

Subject: Questions from Vendors #4

BID SOLICITATION #W7707-176015 Sonobuoy (2)

Date: 2019-07-30

Question and Answer

Question 1:

If the circuit card inside the SDSR units meet the requirements listed under Specification C: Mil Standard Compliance (C10, C11, C12, C13, C14) but the 19" rack chassis does not, would the bid still be considered compliant?

Answer 1:

Yes. But please note that all instances of MIL Standard Compliance have been removed from the statement of requirements. Please refer to amendment 001.

Question 2:

Would it be possible to provide the ATP (6.1.3.3) and Operation manuals (6.1.3.4) upon delivery? There is a possibility that these documents, even without the specific test data listed, are considered export controlled.

Answer 2:

Yes this would be acceptable.

Question 3:

Could you clarify what you are looking for in regards to the required SDSR Hardware Document (6.1.3.2)?

Answer 3:

We are looking for a document that describes the following:

- a) Type and number of all external hardware connections to the SDSR.
- b) Interconnections diagrams including external pre-amplifier and output transmitter, if present.
- c) Physical dimensions and weight
- d) Description of mounting brackets/hardware

This document would be used to order the appropriate cables to allow the SDSR to interface with other research equipment.
