Amendment No. 001 is raised for the following:

Questions:

1. Please confirm that the Whitaker 120 model mentioned is on the RMCP Security Equipment Guide.
2. The Annex A provided refers to "Office" shredders as well as multiple machines and voltages. Disintegrators are normally classified as "High Volume Commercial" shredders. As such we believe the required particle size is 10mm x 15mm for Secret (9.5mm screen) and 1 x 5mm for Top Secret (3mm screen). The smallest screen available for a Whitaker 120 is 1/4" which is 6mm. This does not meet TS requirements of 3mm. Please confirm security level/levels required for this application.
3. Disintegrator output volume varies substantially with security level/screen size. Please provide information on the required throughput based on RCMP testing results. E.g. "Required output at Top Secret (3mm screen) is a minimum of 100 Reams per hour based on RCMP test data. Please provide the RCMP approval that supports this output level."
4. Disintegrators can be built in a number of voltages, 220V, 480V, 575V. Is there a preferred voltage?

Answers:

DELETE Annex A in its entirety.

Terms of voltage: 380 volts / 60Hz / Tri-phase

The highest level of security is Protected C, 6mm would work very well.

All other terms and conditions remain unchanged.
