Amendment 001

This amendment is raised to extend the bid closing date and to answer questions, as follow:

1- Closing date:

At Page 1 of solicitation, closing date:

DELETE: 2019-08-28

INSERT: 2019-09-11

2- Question and Answers:

Q.1: Would you be able to provide a feed gradation for the material being crushed for this tender?

A.1: The product feeding the Jaw Crusher will be blasted quarry rock. The size will be approximately 500 mm in diameter down to fines. The percentages of sizes within this range are not currently available. It is believed that this is sufficient information for suppliers to offer a bid.

Q.2: We are looking for clarification on the loading of the unit in the diagram once dismantled into an aircraft:
Can the ramp angle of 15 degrees be decreased for entry into the aircraft?

A.2: No. The ramp when open and supported on the ground has an angle of 15 degrees.

Q.3: With regards to ANNEX B, PURCHASE DESCRIPTION, MOBILE ROCK CRUSHER PLANT, Canada has required the mobile rock crusher plant contains two Units on track, first a track mounted Jaw crusher and second a combination of a Cone crusher with screening unit mounted on track. Would Canada also accept offers containing 3 separate units as follows?

- Track mounted Jaw Crusher
- Track mounted Cone Crusher
- Track mounted Screening Unit

A.3: No. In accordance with Purchase Description Clause 1.1 Scope "This specification covers the requirements for a mobile rock crusher plant, consisting of a Jaw Crusher and a Cone Crusher with integrated screening unit." CANADA believes that these configurations are readily available in the market.

Q.4: Regarding ANNEX B, PURCHASE DESCRIPTION, MOBILE ROCK CRUSHER PLANT, Canada has requested the Mobile rock crusher plant unit to be able to produce various aggregates but not mentioned the characteristic of the input material such as the type of rocks and mechanical and chemical properties of the input rock. Since the hardness and type of the input material influence the type of jaw plates and other parts in crushers also the conveyor belts, we would like to kindly ask Canada to clarify about the type, mechanical and chemical characteristic of the input material.

-
- A.4:** In accordance with Purchase Description Clause 3.4 (a) "Input material will consist of blasted rock found in the northeastern part of Ellesmere Island." CANADA believes this is sufficient information for suppliers to make a bid.

All other terms and conditions remain the same
