Amendment 002

This amendment is raised to extend to answer questions, as follow:

Question and Answers:

- Q.5:** Do the plant is going to crush different type of material such as granite, limestone or etc., or the plant will be used for only one type of material? Also please clarify about the "gradation" of the feed material.
- A.5:** The plant will be crushing a combination of shale, quartz and granite. Please refer to Amendment 1 previously published for details on the feed gradation.
- Q.6:** Would you please clarify about the abrasiveness of the blasted rock you wish to crush? This will give us an indication of the "crushability" of the rock.
- A.6:** Please refer to the answer at question 5 for the type of material.
- Q.7:** Could you please explain exactly how many different products in grain size are you looking to make, since the requirement is a bit confusing about the outlet of the plant?
- A.7:** This information is available in the Purchase Description.
- Q.8:** Does Canada have an approximate estimate of percentage of each product? Are there any "quality specifications" that need to be met for each product other than the grain size?
- A.8:** The demand varies and the products required will be used to maintain gravel airfield and gravel roads.
- Q.9:** We have an inquiry from a vendor who is asking if a wheel type mobile crusher is acceptable or does it need to be a track type one?
- A.9:** In accordance with Para 3.10 of the Purchase Description "The crushers must be propelled by a track system consisting of a single track on each side"

All other terms and conditions remain the same
