Solicitation No./No de l'invitation: M5000-20-1453/A1

This amendment is raised to address the following:

Question 1) Section 1 Appendix A: Paragraph 1.2.1 Disturbed grab samples to be taken every 1.0 metre.

Typically disturbed samples from auger at 1.5m intervals, plus undisturbed samples from split spoons from standard penetration test are being collected. Should we switch collection of these samples (a sample at 0.75m intervals) or keep up with your request (no undisturbed samples)?

Response 1) Keep with the request as indicated in the RFP

Question 2) Section 1 Appendix A: Paragraph 1.2.2.... Test for the following:

- Soil grain size distribution is posted under point 1.2.2.2 and under 1.2.2.9.

Is it the same type of Soil grain size distribution?

Response 2) Yes

Question 3) Section 1 Appendix A: Paragraph 1.2.2.8 Moisture Content and moisture density relationship (Standard Proctor Test).

The same test is required under 1.2.2.10. Please clarify.

Response 3) This is a duplication.

Question 4) How important is to follow exactly the scope of work outlined in RFP or we could use our typical scope of work which covers all your requests only a little bit different order like :

- Intro,
- SOW
 - Review of Available data (geotechnical data design drawings etc.),
 - Site Reconnaissance prior to drilling,
 - Field program (drilling, logging, sampling SPT tests and pocket pen tests),
 - Laboratory Testing,
 - Analysis, and
 - Report

Response 4) Follow the scope of work as indicated
