Question and Answers

Question #2: “Tasks” section:

Point 3. Stipulates that “Purchase new items only. Items must have been manufactured within the last year”.

Does the specific item purchased have to be made within the last year? Or does this mean the product must have still been in production within the last year? I doubt even the store selling an item would be able to come up with a date most items they sell were manufactured, how would this be proven?

Answer #2: Regarding task 3, as a primary requirement, the contractor should only use newly purchased products.

In the case where it is verifiable, the date of manufacture of the item should fall within the last year. Understandably, dates of manufacture may be limited to certain item types or those with dated packaging or serial numbers.
