Mobile Security Screening Solution (MSSS)

Bid Solicitation Amendment No. 007

Part 1 – Questions and Answers

Question No. 20

Further to the recently published Answer No. 15 and after checking with the RCMP, it seems that the current version of the ICD is 1.7.8 revision 1.3 and not revision 1.6. The specifications of revision 1.6 were released on November 30, 2018, to accommodate a future RCMP system, which is not currently in operation. The version currently used by the RCMP is therefore 1.7.8 revision 1.3. It seems unfair that Canada requested the current version of the ICD (which, according to the RCMP, is version 1.7.8 revision 1.3) in its August 16, 2019, call for tenders, then specified a few days before the closing of the call for tenders that the version required by Canada is the future version 1.7.8 revision 1.6. Can Canada confirm that version 1.7.8 revision 1.6, which is not currently in operation or used by the RCMP, is the version required under mandatory criterion M-2.1, as stated in Answer No. 15, released on September 17, 2019?

Answer No. 20

Canada will accept certification of either revision 1.3 or revision 1.6 for M-2.1 provided it can support Government of Canada Standard on Security Screening. Please see Bid Solicitation Change #16 and #17 below.

Part 2 – Bid Solicitation Changes

#16 At Attachment 4.1 to Part 4 – Technical Evaluation Criteria, M-2.1:

Delete: M-2.1 in its entirety.

And Replace With:

M-2.1 The Bidder must provide proof from the RCMP that their proposed Livescan system including their proposed Fingerprint Acquisition Profile (FAP) mobile device is vendor certified to RCMP NPS-NIST-ICD version 1.7.8. revision 1.3 or revision 1.6 provided it can support Government of Canada Standard on Security Screening. This proof must be provided and be in effect by October 25, 2019 or the bid will be declared non responsive.

#17 At Attachment 4.3 to Part 4 – Demonstration, Section 2. End to End Reliability Status Use Case/Scenario, sub-heading Fingerprinting Component:

Delete: the first paragraph in its entirety.

And Replace With:

Solicitation No. – N° de l'invitation
45045-180072/B
Client Ref. No. – N° de réf. De client
45045-180072

Amd. No – N° de la modif.
007
File No. – N° du dossier
003xs.45045-180072

Buyer ID – Id de l'acheteur
003xs
CCC No./ N° CCC – FMS No/ N° VME

After the TBS Web form has been submitted, the data from the web form must be available to the Bidder's RCMP-certified Livescan system. This Livescan system must be able to import this demographic data into the Livescan solution and then perform the fingerprinting. The fingerprint scanner must be a mobile FAP 50 or FAP 60 and be the one proposed by the Bidder and certified by the RCMP to NPS-NIST-ICD 1.7.8 revision 1.3 or revision 1.6 provided it can support Government of Canada Standard on Security Screening. The data populated in the Livescan system must be the same as the data keyed into the TBS Web application form.
