## **Amendment 001**

This amendment is raised to provide responses to bidder questions.

- Q1.** The documents identify only spoil is in need of being disposed, but the scope of work summary also references brush. Can you clarify this tender is specifically for the spoil disposal and no brush, trees or stump disposal is part of this tender?
- A1.** The intended spoils will be soil that is a mix of material and cannot be reused. This could include fill, topsoil or woody debris however PCA will attempt to limit stumps in the mix. Brush included in the spoils is expected to be limited in size ranging from 50 mm – 100 m diameter.
- Q2.** Can you identify the type of spoil being disposed? Is it topsoil and overburden? Is it granular? Is it clay? If it is a mix, can you identify the volumes of each expected
- A2.** Material will be substantially mineral soil comprised of 30% clay, 40% silt and 30% sand sizes.
- Q3.** Have you had any geotechnical investigation completed on the material? If so, can you provide the documentation?
- A3.** Material has been identified in several boreholes, and the descriptions provided above are an average for the source site which is located over a 25 to 30 km distance that is geographically similar.
- Q4.** The tender documents claim that no contaminated material is being disposed of, how will the owner indemnify and hold harmless the land owner of the disposal site for any contaminated material entering the site?
- A4.** The material is being removed from primarily forested lands and archaeological sites have been identified for monitoring. There is also a full time environmental monitor on site that will alert PCA if any contamination is found.
- Q5.** Is there any archaeological material expected to be disposed of? Does the owner have a procedure in place to monitor this?
- A5.** Archaeological materials will not be removed from site. There is an archaeological monitor for the project.
- Q6.** What are the expected daily volumes of material to be disposed?
- A6.** The volumes will be variable and dependent on the Construction Contractor's schedule and area they are working in. Efforts will be made to inform the Spoils Contractor of the two (2) week and daily schedules to estimate anticipated volumes.
- Q7.** How much notice will the trail contractor provide that trucks are en route to the disposal site? How many loads per day are expected?
- A7.** See answer A6. above. Loads per day could range from 0 to 35.
- Q8.** What hours of the day will the disposal site be expected to be available?
- A8.** The Construction Contractor is working Dusk to Dawn 7 days a week, including long weekends.
- Q9.** Is there any guarantee as to the minimum total or daily volumes expected to be hauled?
- A9.** No.
- Q10.** Who is the owners rep that will accept and sign off on truck tickets and volume of material? Will they be on site, or will the volumes and load counts be required to be sent in to an office each day?
- A10.** Loads will be monitored and tracked by PCA as they leave the construction site. The PCA representative will be identified at Contract award and will not sign off on truck tickets. Load counts from the Spoils Contractor are required to be sent to the PCA representative weekly.
- Q11.** What are the holdback requirements for this contract? Will holdbacks be applicable?
- A11.** Holdbacks are not applicable under this Contract.

**ALL OTHER TERMS & CONDITIONS REMAIN UNCHANGED**
