SOLICITATION AMENDMENT 002

This solicitation amendment 002 is raised to update the question and answer set.

Q1.

Regarding the Supply Arrangement, E60MC-190001, it was stated that all builds must comply with the Canadian Coast Guard Welding Specification: CT-043-EQ-EG-001-E from August 2017. However, so far the solicitations that have come out have said this specification does not apply to the build. In fact, some of them seemed to not be aware of this portion of the supply arrangement that made the CCG welding specification a requirement. Is it possible to have some sort of amendment issued noting which builds will actually require this? As we currently have to ask every solicitation about this specification to confirm whether it will be used or not as the requirement adds several thousand dollars to a project and it needs to be clear so that all bidders are on an even field and bidding on the same items.

A1.

PSPC in collaboration with partner departments is in the process of developing a Technical Statement of Requirement (TSOR) template to standardize TSORs for this supply arrangement across government and across Canada. The required welding specifications will be incorporated as a statement in this new template.

Q2.

Section 4.1.1.2- Quality Management System

Are the requirements listed in paragraphs 1 to 3 applicable to our foreign subcontractors?

A2.

The supplier requesting the SA is to submit evidence of a Quality Management System. The SA holder is responsible for ensuring all products are within accordance to the QMS.

Q3.

Paragraphs 5.2.1- 5.2.10- Additional Certifications & Information

Are the requirements listed in these paragraphs applicable to our foreign subcontractors?

A3.

Yes. SA holders are responsible for ensuring continuous compliance of these standards.

Q4.

Paragraph 5.2.8.a. Welding Certification

If part of the welding work is done in Europe, especially in France, is the aluminum welding standard in force in this country acceptable?

A4.

No. Welding must be certified and in accordance with the CSA welding standards identified in section 5.2.8.

Q5.

Paragraph: 5.2.8.b. Welding Certification

To comply with the Coast Guard's welding specifications CT-043-EQ-EG-001-E, are non-destructive testing reports made in a European country (France) acceptable?

A5.

When this welding specification is requested for a requirement, it must be in compliance with the Coast Guard welding spec listed.
