Solicitation Amendment 003 is being issued to provide further questions and answers.

Questions and Answers:

- 16) Following the answer to question 1 of amendment 002 about the mandatory degrees in B.Eng software or electrical (criteria M4 and M7). We do not understand such constraint on the academic requirement for this contract while past such projects over 9 years didn't impose them. These constraints will potentially prevent DRDC from being able to benefit from 9 years of accumulated experience on similar and successful contracts with them. We would like to know the justification for this new constraint.
  - a) The academic program leading to a computer science degree is different from a physics degree. A computer scientist specializes in understanding the nuances of a specific language and the application of different languages to different problems. It is different from physics.
- 17) Regarding criteria M10, which require B.Sc. degree in computer science, are B.Eng software or electrical acceptable for the role of Computer Programmer?
  - a) No. The computer science degree offers exposure to languages and the orientation of a language to a particular problem.
