This Amendment to the Solicitation is raised to address the following bidder inquiries:

QUESTION 1:

Item #5.8 in "ANNEX A, REQUIREMENT" asks about input tension. This is normally done at the pay-out machine, however there is no requirement for a pay-out machine in the document. So, we would like to kindly ask you if you have a pay-out machine or do you require one? Otherwise, please clarify the customer requirement regarding Item # 5.8 in the Statement of Work in Annex "A" and Mandatory Technical Criteria # M13.

ANSWER 1:

The input drum must have an operator selectable/adjustable tension mechanism, sometimes called a drum brake, that will prevent free spooling of the drum unless selected/adjusted by the operator. A payout machine is one option that could provide such functionality.

QUESTION 2:

What type of machine does the Client prefer?

1. One reel to coil machine
2. One take-up and one pay-out machine
3. One take up machine with drum brake

ANSWER 2:

The Client has no preference on the type of solution offered as long as the technical requirements are satisfied.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
