Amendment No. 001 to Solicitation 5P423-190204/A is raised to address the following:

Questions and Responses

Q1:

Do you want the water that is entering the tank via a fire hydrant or any other potable source to be potable after loading it into the truck tank?

A1:

The water that is entering the tank via a hydrant or any other potable source needs to enter the tank as potable and must remain potable when in the tank. Any type of venting of the tank needs to automatically close and seal to atmosphere when the tank is not being filled or drained to prevent dirt and debris from entering the tank.

Q2:

Will the vehicle, when parked outside in cold temperatures, be plugged into an electrical outlet?

A2:

When the vehicle is parked outside in cold temperatures, the expectation is that it will start at temperatures as cold as minus 40 C when its oil and block heaters are plugged in to an electrical outlet. There is no requirement for type of onboard standalone heating.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
