Amendment 001 is raised to answer the following bidder questions:

1. **Question: Annex A, Section 1, Line 4:** Can you please provide the mounting interface dimensions of the appliance that the winch will be fixtured to?

Answer: The winch will be mounted to various vessels and in different configurations. The end user will use chains or custom adapters to mount the winch to the vessels.

2. **Question: Annex A, Section 2, Criterion 21:** It is stated that "Spooling to be electronically controlled and fully adjustable to accommodate a variety of cables." What is meant by fully adjustable in this context?

Answer: The electronic control should have a simple method to electronically adjust the spool setting to address diametrical variances of cable runs. Additionally, the electronic spooling control will allow for other nominal cable diameters to be used.

3. **Question:** Also, what other cable specifications should be considered (other than the 7mm diameter/ 500m long cable specified in Criterion 6)?

Answer: It is reasonable to consider that cables just larger and smaller than 7mm diameter may be used. The drum diameter and capacity will not change from the specification indicated. Approximately 4mm diameter cable may be the smallest cable we may use and approximately 10 mm diameter cable may be the largest. It should be noted that the 7mm cable size noted in the specification would be the predominant size used.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED
