This amendment is being raised to address the following questions and amendments with regards to solicitation No W7702-206210/A

1. The following questions are in regards to the Mandatory Criteria:

Q1. Regarding item M10, is it acceptable to use a 70 A load center (instead of 60A) in these bunkers?

R1 Yes

Q2 Regarding item M15 and M16, has your client considered using a Mini Split system that will give heat and air conditioning in one unit and is much more efficient than the ones you requested?

R2 Yes a split unit is acceptable.

Q3 On the compliance matrix on page 19 of the spec it calls for 2000W wall mounted fan forced heater with thermostat, quantity 2. On the drawing provided it only shows one heater. Can you confirm the quantity.

R3 Quantity of 2 unless the Mini Split system that will give heat and air conditioning in one unit is used.

2. The following are general questions regarding the requirement:

Q1 We would be a minimum of 90 Days after drawing approval. Is that acceptable?

R1 Please refer to Part 2.2.1 Best Delivery Date – Bid.

Q2 Do you have means of offloading the container when it gets to the site?

R1 Yes this can be arranged with transport

3. The following are changes to the solicitation document:

DELETE: ANNEX "D" - COMPLIANCE MATRIX – MINIMUM MANDATORY
PERFORMANCE SPECIFICATIONS

**INSERT: ANNEX "D" - COMPLIANCE MATRIX – MINIMUM MANDATORY PERFORMANCE
SPECIFICATIONS**

A complete list of the minimum mandatory performance specifications are detailed below in the "Compliance Matrix". Bidders are to clearly demonstrate compliance with each mandatory specification.

1. Bidders **must** show compliance by addressing each performance specification in the Compliance Matrix, whether the product offered "meets" or "doesn't meet".
2. Bidders are requested to indicate how they meet each performance specification by recording this information under the Performance Specification Offered column in the Compliance Matrix.
3. It is requested that supporting technical documentation, including but not limited to, specification sheets, technical brochures, photographs or illustrations be provided with the bid at solicitation close and be cross-referenced on the Compliance Matrix for each performance specification to outline where in the supporting technical documentation it demonstrates compliance. It is the Bidders responsibility to ensure that the submitted supporting technical documentation provides detail to prove that the proposed product(s) meet the requirements of the Performance Specification. If published supporting technical document is not available, the Bidder should prepare a written narrative complete with a detailed explanation of how its bid demonstrates technical compliance.
4. If the supporting documentation referenced above has not been provided at bid closing, the Contracting Authority will notify the Bidder that they must provide supporting documentation within two (2) business days following notification. Failure to comply with the request of the Contracting Authority within that time period, will deem the bid non-responsive and the bid will be given no further consideration.
5. Bidders must address any concerns with the performance specifications in written detail to the Contracting Authority before bid closing as outlined in the Request for Proposal (RFP) document.
6. Failure to meet each mandatory performance specification will result in the bid being deemed non-responsive, and be given no further consideration.
