Description of work:

Innovation, Science and Economic Development Canada (ISED) requires the services of a Programmer Analyst / BI Developer to support the various projects and initiatives in the development of BI applications. Duties and deliverables may include but not be limited to the following:

- Work closely with business analysts and stakeholders to understand, analyze and document BI requirements;
- Develop functional and technical design documents;
- Analyse, design and develop Framework Manager models to support the reporting requirements;
- Design, develop, test and maintain ETL routines to move data from source systems in to the data warehouse and from the data warehouse;
- Prepare, maintain and publish ETL documentation, including design, source-to-target mappings and business-driven transformation rules;
- Analyse, design and develop cubes to support the reporting requirements;
- Develop and test BI applications (reports, dashboards, metadata) using enterprise BI platform (Cognos, IBM DataStage, etc.);
- Design and develop SQL routines;
- Conduct analysis and provide detailed feedback on the data accuracy and cleanliness;
- Produce data models (logical, physical);
- Provide assistance to the BIA team with the design and development of test plans and scripts for testing;
- Support and maintain deployed BI solutions;
- Conduct knowledge transfer sessions with internal resources;
- Develop and update project related technical documentation;
- Provide weekly progress/status reports; and
- Attend status and other meetings as required.

- Bidders must submit a bid for all resource categories
- The work is currently being performed by Emerion under a contract (value $2,289,875.98)
