This solicitation amendment 005 is raised to respond to questions from the Industry.

Questions and Responses

Q1 According to our regulator there is no “regulatory” need for a service provider to take these sources on service provider's license, and that suppliers can transport from the DRDC license to the CNL license, and address all transportation requirements with the respective regulators on behalf of the DRDC. As such, can DND address why they have this requirement? The CNSC has asked what is the driving concern for DRDC to require that the irradiators be transferred out of their license to a service provider's license.

R1 The SOW has been revised to delete sections 5.4 and 6.3, see attached. From a regulatory perspective there will no longer be a requirement for the supplier to take these sources on their licence as part of the removal and disposal work.

Q2 The service provider is currently reviewing the T&C's. Please advise if T&C's are negotiable?

R2 Terms and Conditions set out in the RFP are not negotiable.

Q3 By providing a quote the service provider cannot accept the MT1 mandatory technical criteria (see section 4.1 on page 13 or 20 of the solicitation) that asks for a license to accept these sources at the time of bidding. The service provider could not accept the sources until the service provider has CNSC special arrangement and approval to ship from CNL.

R3 the purpose of MT1 was to ensure the service provider has a valid CNSC licence and is able to do this type of work and not to necessarily have the sources transferred to their licence in order to do the work.

Q4 Can the proposal be submitted directly to you via email instead of using epost?

R4 Bids cannot be emailed directly to the Contracting Authority. Please refer to section 2.2 of the RFP for more details.
