Amendment #001 is raised to answer bidder's questions:

Question #1:

After reviewing the sizes on the drawings it looks like these are rough sizes and will be machined to finish sizes at a later date.

Answer #1:

Technical data and dimensions provided ensure that parts are able to be utilized in a close tolerance system that often requires machining to finished size depending on the situation.

Question #2:

Please clarify which type of casting the end-user would need for the C96400 Copper Nickel. These tubes will be casted therefore would like to ensure the correct type of casting.

Specifications for C964 Copper-Nickel

	ASTM	Military
Centrifugal Cast	ASTM B369	MIL-C-20159
Sand Cast	ASTM B369	

Answer #2:

As per the TDP provided, all casting are to be centrifugally cast, C96400 Copper Nickel. ASTM B-369 standard is an approved alternative to the ASTM B-271 standard quoted in the TDP documents.

Question #3:

The drawings provided calls for Centrifugal Casting, is Static Casting acceptable?

Answer #3:

As per the Technical Data Package specifications, centrifugal casting is required.

Question #4:

Does the end-user require the bearing sleeve done by Centrifugal/Sand casting and then machine it to the sizes in the drawing **OR** need it Centrifugal/Sand cast to the sizes in the drawing?

Answer #4:

It is the foundry's discretion to decide how much casting allowance to add to the part, as long as the final casting meets the dimension and other requirements specified in the solicitation documents, technical data package and drawings.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME
