

1 General

1.1 STANDARD

- .1 Comply with National Building Code, Part 8, Construction Safety Measures at Construction and Demolition sites, and Provincial requirements.

1.2 PROTECTION

- .1 Prevent movement, settlement, and other damage to utilities, and parts of building to remain in place. Provide bracing and shoring required.
 - .1 Have shop drawings for bracing and shoring, stamped by a professional engineer registered or licenced to practice in the Province of New Brunswick, on site at all times. Make available to Departmental Representative upon request.
- .2 Protect building systems, services and equipment.
- .3 Provide temporary dust screens, covers, railings, supports and other protection as required. Relocate as necessary to accommodate progression of work.
- .4 Tanks in use:
 - .1 Tanks will contain fish stock which have to be protected.
 - .2 Provide protection and containment mechanisms to capture materials to prevent solid and liquid contamination, and objects from falling into water.
 - .3 Type of protection and containment mechanisms to be approved by Departmental Representative.
- .5 Empty tanks:
 - .1 Provide protection to prevent liquid contamination from entering tanks.

2 Products

2.1 MATERIALS

- .1 Refer to drawings for materials used to do patching, repair and blocking-in. Where no material is shown on drawings, use new material to match existing. Refer to applicable trade sections for quality of materials.

3 Execution

3.1 GENERAL

- .1 All materials resulting from demolition work, except items to be reused or items identified to be retained by Departmental Representative, shall become the property of the Contractor.
- .2 Repair and refinish surfaces, at no increase in Contract Price, where existing surfaces are damaged because of negligence or inadequate protection.

3.2 EXAMINATION

- .1 Examine site and building and be fully informed as to requirements of the Contract Documents and applicable codes.

3.3 DEMOLITION WORK

- .1 Remove components, as indicated and required, to permit new construction.
- .2 Prevent movement, settlement, and other damage to parts to remain in place. Provide bracing and shoring required.
- .3 Materials resulting from demolition work, except items to be reused or items identified to be retained by Departmental Representative, shall become the property of Contractor. Dispose of material off site, no burning or selling at site will be permitted. Carefully remove materials identified to be retained.
- .4 At end of each day's work, leave project site in safe condition.
- .5 Demolish to minimize dusting. Keep materials wetted as required.

3.4 REUSED/SALVAGE ITEMS

- .1 Carefully remove items to be reused and store in secure area. Protect from damage at all times. Where specification section exists for similar products, install in accordance with applicable section.
 - .1 Refer to drawings for items to be reused.
- .2 Carefully remove items designated to be turned over to the Departmental Representative. Deliver to storage area on site.
 - .1 Refer to drawings for items to be salvaged/turned over to Departmental Representative.

3.5 DISPOSAL OF MATERIALS

- .1 Dispose of material off site, no burning or selling at site will be permitted. Retain tipping slips and make available for viewing upon request of Departmental Representative.
- .2 Dispose of materials in locations acceptable to local authorities having jurisdiction. Include for costs of disposal.
