SOLICITATION AMENDMENT No. 002

Question 1:

Regarding the base building design, will that be something like outline specifications and block building diagrams and system diagrams? Will that be a detailed equipment selection with capacities/schedules etc, details for wall/roof construction, M&E system drawings, specification?

Answer 1:

Refer to Section 2.3.4.1 of the TOR. Specifically the overall requirement to “prepare a set of design and performance criteria for a standardized pesticide storage facility. The document must include sufficient information that any consultant team could use this Design Guideline document to create a consistent Pesticide Storage Facility nationally.”

The intent is to comprehensively lay out the most important information to allow for consistent, repeatable standards of quality and operation for this building type. Fully resolved details are not required (although standard details may be helpful to illustrate key information). Specifics on system types and performance criteria will need to be beyond standard outline specifications and have to be clearly presented with consideration for flexibility and noted variables.

All other terms and conditions of the Invitation to Tender remain unchanged.
