Annex B: Draft Equipment Quantities

The tasking consists of identifying and documenting the conceptual design for the provision to the CAF of adequate, reliable, and sustainable electrical power generation and distribution. The development of each option(s) must take into consideration the resources and equipment required including the generators, power distribution units, power management units, trailers and any other components needed for the support of power generation.

Draft Quantity Table: Power System Units Required

The following three fielding levels represent potential quantities of power systems and components that may be procured. The purpose of the various fielding levels is to determine the effect of quantity purchased on the unit prices of power system and components. It is possible that the potential quantities procured will be a mix of all three fielding levels, depending on the combination of the power generating capacity offered by potential bidders.

Generator/Power System Platform	Fielding Level A	Fielding Level B	Fielding Level C
2 KW 120/240 V AC, 1 Phase, 60 Hz.	700	1225	1750
2 KW 24 VDC	180	315	450
Family of > 2 KW ≤ 5 KW, 120/208 V AC, 3 Phase, 60 Hz.	880	1540	2200
Family of > 5 KW ≤ 10 KW, 120/208 V AC, 3 Phase, 60 Hz.	380	700	970
Family of > 10 KW ≤ 30 KW, 120/208 V AC, 3 Phase, 60 Hz.	220	400	555
Family of > 30 KW ≤ 60 KW, 120/208 V AC, 3 Phase, 60 Hz.	220	400	570
